**Mumbai:** Analysts remain upbeat on the near-to-medium term prospects of IndusInd Bank after India's fifth-largest private sector bank reported fourth-quarter earnings that met expectations with standalone net profit rising 50% from the corresponding period last year.

Shares of the Hinduja Group-promoted lender advanced as much as 2.3% in Tuesday's trading before closing at ₹1,119.95 per share on the NSE, up 1.63% from the previous close. More than 5.5 million IndusInd Bank shares exchanged hands on the BSE and NSE against a combined average daily volume of about 3.3 million shares over the last month.

Of the 33 analysts who reviewed the bank's quarterly earnings, 28 maintained their 'buy' or 'overweight' ratings and five remained neutral, Bloomberg data showed. Nine raised price targets and eight slashed them. The remaining 16 analysts maintained their price targets on the stock.

Goldman Sachs raised its price

target while Jefferies maintained the status quo. Both brokerage houses foresee 36-38% upside potential, respectively, from the current levels.

Jefferies valued the bank at 1.7 times its FY25-adjusted price-to-book (P/B). It estimates annual profits to grow 21% between FY23 and FY26 supported by top-line expansion and a decline in credit costs, further improving the RoA and RoE. "Valuations are attractive at 1.4 times FY24 adjusted P/B and IndusInd Bank is among the top picks in the sector," said Jefferies in a client note.

Kotak Institutional Equities valued the stock at 1.5 times P/B and 11 times FY25E EPS to achieve 15% RoE. It is one of its preferred picks given its attractive risk-reward at the current price. "IndusInd Bank may not have a strong liability profile that we associate with the large private banks but it does compensate for this difference through higher asset yields. We believe that asset quality should not be a key concern area for the entire sector, including IndusInd Bank," Kotak said in a client note.
