| This being the first public issue of our Company, there has been no formal market for the Equity Shares. The face value of the Equity Shares is ₹ 2 each. The Floor Price, the Cap Price and the Offer Price, as determined by our Company, in consultation with the book running lead managers (“Book Running Lead Managers” or “BRLMs”), in accordance with the SEBI ICDR Regulations and on the basis of the assessment of market demand for the Equity Shares by way of the Book Building Process, and as stated in “Basis for Offer Price”, beginning on page 148, should not be taken to be indicative of the market price of the Equity Shares after such Equity Shares are listed. No assurance can be given regarding an active and/ or sustained trading in the Equity Shares nor regarding the price at which the Equity Shares will be traded after listing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                         |                                                                                        |                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Investments in equity and equity-related securities involve a degree of risk and investors should not invest any funds in the Offer unless they can afford to take the risk of losing their entire investment. Investors are advised to read the risk factors carefully before taking an investment decision in the Offer. For taking an investment decision, investors must rely on their own examination of our Company and the Offer, including the risks involved. The Equity Shares in the Offer have not been recommended or approved by the Securities and Exchange Board of India (“SEBI”), nor does SEBI guarantee the accuracy or adequacy of the contents of this Red Herring Prospectus. Specific attention of the investors is invited to “Risk Factors” beginning on page 34.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                         |                                                                                        |                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## ACME SOLAR HOLDINGS LIMITED

Our Company was originally incorporated as “ACME Solar Holdings Private Limited” at Haryana, India, as a private limited company under the Companies Act, 2013, pursuant to a certificate of incorporation dated June 3, 2015, issued by the Registrar of Companies, Delhi and Haryana at New Delhi. Upon the conversion of our Company into a public limited company, pursuant to a board resolution dated May 1, 2017 and a shareholders’ resolution dated May 2, 2017, the name of our Company was changed to “ACME Solar Holdings Limited”, and a fresh certificate of incorporation dated May 12, 2017 was issued by the RoC. Pursuant to a board resolution dated January 21, 2020 and a shareholders’ resolution dated January 24, 2020, our Company was converted into a private limited company and consequently, the name of our Company was changed to “ACME Solar Holdings Private Limited”, and a fresh certificate of incorporation dated July 1, 2020, was issued by the Registrar of Companies, New Delhi. Subsequently, pursuant to a board resolution dated May 27, 2024, and a shareholders’ resolution dated June 7, 2024, our Company was converted into a public limited company and consequently, the name of our Company was changed to “ACME Solar Holdings Limited” and a fresh certificate of incorporation dated June 22, 2024 was issued by the Registrar of Companies, Delhi and Haryana at New Delhi. For details in relation to the changes in the registered office of our Company, see “**History and Certain Corporate Matters - Changes in the registered office of our Company**” on page 300.

                                                                      |
| In case of any revision in the Price Band, the Bid/ Offer Period shall be extended for at least three additional Working Days after such revision of the Price Band, subject to the total Bid/ Offer Period not exceeding 10 Working Days. In cases of force majeure, banking strike or similar unforeseen circumstances, our Company may, for reasons to be recorded in writing, extend the Bid/ Offer Period for a minimum of one Working Day, subject to the Bid/ Offer Period not exceeding 10 Working Days. Any revision in the Price Band, and the revised Bid/ Offer Period, if applicable, shall be widely disseminated by notification to the Stock Exchanges, by issuing a public notice and also by indicating the change on the websites of the BRLMs and at the terminals of the Members of the Syndicate and by intimation to Designated Intermediaries and Sponsor Bank(s), as applicable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| The Offer is being made in terms of Rule 19(2)(b) of the Securities Contracts (Regulation) Rules, 1957, as amended (the “SCRR”), read with Regulation 31 of the SEBI ICDR Regulations. The Offer is being made through the Book Building Process in accordance with Regulation 6(2) of the SEBI ICDR Regulations wherein not less than 75% of the Net Offer shall be available for allocation on a proportionate basis to QIBs (the “ <b>QIB Portion</b> ”), provided that our Company in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors and the basis of such allocation will be on a discretionary basis by our Company in consultation with the BRLMs, in accordance with the SEBI ICDR Regulations (the “ <b>Anchor Investor Portion</b> ”), of which one-third shall be reserved for domestic Mutual Funds, subject to valid Bids being received from the domestic Mutual Funds at or above the price at which allocation is made to Anchor Investors (“ <b>Anchor Investor Allocation Price</b> ”). In the event of under-subscription or non-allocation in the Anchor Investor Portion, the balance Equity Shares shall be added to the remaining QIB Portion (“ <b>Net QIB Portion</b> ”). Further, 5% of the Net QIB Portion shall be available for allocation on a proportionate basis only to Mutual Funds, subject to valid Bids being received at or above the Offer Price, and the remainder of the Net QIB Portion shall be available for allocation on a proportionate basis to all QIBs (other than Anchor Investors), including Mutual Funds, subject to valid Bids being received at or above the Offer Price. Further, not more than 15% of the Net Offer shall be available for allocation to Non-Institutional Investors (“ <b>Non-Institutional Category</b> ”) of which one-third shall be available for allocation to Bidders with an application size of more than ₹ 200,000 and up to ₹ 1,000,000 and two-thirds shall be available for allocation to Bidders with an application size of more than ₹ 1,000,000 and under-subscription in either of these two subcategories of Non-Institutional Category may be allocated to Bidders in the other sub-category of Non-Institutional Category in accordance with the SEBI ICDR Regulations, subject to valid Bids being received at or above the Offer Price. Further, not more than 10% of the Net Offer shall be available for allocation to Retail Individual Investors (“ <b>Retail Category</b> ”), in accordance with the SEBI ICDR Regulations, subject to valid Bids being received from them at or above the Offer Price. Further, Equity Shares will be allocated on a proportionate basis to Eligible Employees applying under the Employee Reservation Portion, subject to valid Bids received from them at or above the Offer Price. All Bidders (except Anchor Investors) shall mandatorily participate in this Offer only through the Application Supported by Blocked Amount (“ <b>ASBA</b> ”) process and shall provide details of their respective bank account (including UPI ID (defined hereinafter) in case of UPI Bidders (defined hereinafter)) in which the Bid Amount will be blocked by the Self Certified Syndicate Banks (“ <b>SCSBs</b> ”) or the Sponsor Bank(s), as the case may be. Anchor Investors are not permitted to participate in the Offer through the ASBA process. For details, see “ <b>Offer Procedure</b> ” beginning on page 648. |                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## SECTION I – GENERAL

### DEFINITIONS AND ABBREVIATIONS

*This Red Herring Prospectus uses certain definitions and abbreviations which, unless the context otherwise indicates or implies, shall have the meaning as provided below. References to any legislation, act, regulation, rule, guideline, policy, circular, notification or clarification shall be to such legislation, act, regulation, rule, guideline, policy, circular, notification or clarification as amended and any reference to a statutory provision shall include any subordinate legislation made from time to time under that provision.*

*The words and expressions used in this Red Herring Prospectus but not defined herein, shall have, to the extent applicable, the meanings ascribed to such terms under the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended (“SEBI ICDR Regulations”), the Securities Contracts (Regulation) Act, 1956, as amended (“SCRA”), the Depositories Act, 1966, as amended or the rules and regulations made thereunder. Unless the context otherwise requires, all references to ‘we’, ‘us’ and ‘our’ are to our Company and our Subsidiaries, on a consolidated basis.*

*Notwithstanding the foregoing, terms in “Statement of Possible Special Tax Benefits”, “Industry Overview”, “Key Regulations and Policies in India”, “Financial Information”, “Unaudited Proforma Financial Information”, “Outstanding Litigation and Material Developments” and “Main Provisions of the Articles of Association”, beginning on pages 160, 185, 289, 411, 522, 583, and 671, respectively, will have the meaning ascribed to such terms in those respective sections.*

| CAN or Confirmation of Allocation Note   | Notice or intimation of allocation of the Equity Shares sent to Anchor Investors, who have been allocated the Equity Shares, after the Anchor Investor Bidding Date.                                                                                                                                                                                                                                                                                                                                                          |
| Cap Price                                | The higher end of the Price Band, above which the Offer Price and Anchor Investor Offer Price will not be finalised and above which no Bids will be accepted. The Cap Price shall not be more than 120% of the Floor Price, provided that the Cap Price shall be at least 105% of the Floor Price                                                                                                                                                                                                                             |
| Cash Escrow and Sponsor Bank Agreement   | The agreement dated October 29, 2024, entered into amongst our Company, the Promoter Selling Shareholder, the Registrar to the Offer, the BRLMs, the Escrow Collection Bank(s), the Public Offer Account Bank(s), the Sponsor Bank, and the Refund Bank(s) for, among other things, collection of the Bid Amounts from the Anchor Investors and where applicable, refunds of the amounts collected from Anchor Investors, on the terms and conditions thereof                                                                 |
| CDP or Collecting Depository Participant | A depository participant as defined under the Depositories Act, 1996, registered with SEBI and who is eligible to procure Bids at the Designated CDP Locations in terms of circular no. CIR/CFD/POLICYCELL/11/2015 dated November 10, 2015 issued by SEBI as per the lists available on the websites of the BSE and the NSE                                                                                                                                                                                                   |
| Client ID                                | Client identification number maintained with one of the Depositories in relation to the demat account                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Cut-Off Price                            | Offer Price, which shall be any price within the Price Band, finalised by our Company in consultation with the BRLMs                                                                                                                                                                                                                                                                                                                                                                                                          |
|                                          | Only Retail Individual Bidders and Eligible Employees Bidding under the Employee Reservation Portion are entitled to Bid at the Cut-off Price. QIBs (including Anchor Investor) and Non-Institutional Bidders are not entitled to Bid at the Cut-off Price                                                                                                                                                                                                                                                                    |
| Demographic Details                      | The details of the Bidders including the Bidder's address, name of the Bidder's father/husband, investor status, occupation, bank account details and UPI ID, as applicable                                                                                                                                                                                                                                                                                                                                                   |
| Designated CDP Locations                 | Such locations of the CDPs where Bidders can submit the ASBA Forms. The details of such Designated CDP Locations, along with names and contact details of the Collecting Depository Participants eligible to accept ASBA Forms are available on the respective websites of the Stock Exchanges ( <a href="http://www.bseindia.com">www.bseindia.com</a> and <a href="http://www.nseindia.com">www.nseindia.com</a> , respectively) as updated from time to time                                                               |
| Designated Date                          | The date on which the Escrow Collection Bank(s) transfers funds from the Escrow Account, and funds blocked by the SCSBs and Sponsor Bank are transferred from the ASBA Accounts, as the case may be, to the Public Offer Account or the Refund Account, as appropriate, after finalisation of the Basis of Allotment, in terms of this Red Herring Prospectus following which the Equity Shares will be Allotted in the Offer                                                                                                 |
| Designated Intermediary(ies)             | SCSBs, Syndicate, sub-Syndicate, Registered Brokers, CDPs and RTAs who are authorised to collect ASBA Forms from the ASBA Bidders, in relation to the Offer                                                                                                                                                                                                                                                                                                                                                                   |
|                                          | In relation to ASBA Forms submitted by RIIs, Non-Institutional Bidders Bidding with an application size of up to ₹ 500,000 (not using the UPI Mechanism) and the Eligible Employees Bidding in the Employee Reservation Portion by authorising an SCSB to block the Bid Amount in the ASBA Account, Designated Intermediaries shall mean SCSBs                                                                                                                                                                                |
|                                          | In relation to ASBA Forms submitted by UPI Bidders where the Bid Amount will be blocked upon acceptance of UPI Mandate Request by such UPI Bidders, Designated Intermediaries shall mean Syndicate, sub-syndicate/agents, Registered Brokers, CDPs, SCSBs and RTAs. In relation to ASBA Forms submitted by QIBs (excluding Anchor Investors) and Non-Institutional Bidders (not using the UPI mechanism), Designated Intermediaries shall mean Syndicate, sub-Syndicate/ agents, SCSBs, Registered Brokers, the CDPs and RTAs |
| Designated RTA Locations                 | Such locations of the RTAs where Bidders can submit the ASBA Forms to RTAs                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|                                          | The details of such Designated RTA Locations, along with names and contact details of the RTAs eligible to accept ASBA Forms are available on the respective websites of the Stock Exchanges ( <a href="http://www.bseindia.com">www.bseindia.com</a> and <a href="http://www.nseindia.com">www.nseindia.com</a> , respectively) as updated from time to time                                                                                                                                                                 |
| Designated SCSB Branches                 | Such branches of the SCSBs which shall collect the ASBA Forms used by the Bidders, a list of which is available on the website of SEBI at                                                                                                                                                                                                                                                                                                                                                                                     |

| Term                                 | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| MNRE                  | Ministry of New and Renewable Energy                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| MW                    | Mega Watt which represents the total alternating current capacity of the power projects                                                                                                                                                                                                                                                                                                                                                                                            |
| MWp                   | Mega Watt Peak which represents the total direct current capacity of the power project                                                                                                                                                                                                                                                                                                                                                                                             |
| Net Debt              | It is calculated by subtracting a company's total cash and cash equivalents, bank balances from its total borrowing                                                                                                                                                                                                                                                                                                                                                                |
| Net worth             | Net worth means the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and instruments entirely in the nature of equity after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the audited balance sheet, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation. |
| NSO                   | National Statistical Office                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| O&M                   | Operational and Maintenance                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| O&M Cost              | Expense incurred towards operation and maintenance of the project                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Off-taker             | An off taker is the counterparty with which the PPA is contracted for purchase of power generated from specific power projects as per PPA terms                                                                                                                                                                                                                                                                                                                                    |
| Operational Projects  | Projects which have achieved their commercial operation date and obtained a commissioning certificate                                                                                                                                                                                                                                                                                                                                                                              |
| Other Income          | Income generated by our Company from sources other than the usual course of business.                                                                                                                                                                                                                                                                                                                                                                                              |

| Term                                   | Description                                                                                                                                                                                                 |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P50                                    | Is it essentially a statistical level of confidence suggesting that the predicted resource/energy yield may be exceeded with 50% probability                                                                |
| P75                                    | Is it essentially a statistical level of confidence suggesting that the predicted resource/energy yield may be exceeded with 75% probability                                                                |
| PAT                                    | Profit or loss after tax for the given period                                                                                                                                                               |
| PAT Margin                             | It is calculated as PAT divided by Total Revenue                                                                                                                                                            |
| Plant Availability                     | Plant availability refers to the percentage of time that the power plant is capable of producing electricity as designed. It is a measure of the operational readiness of the plant's equipment and systems |
| PLF                                    | Plant Load Factor                                                                                                                                                                                           |
| PLI                                    | Production Linked Incentives                                                                                                                                                                                |
| Portfolio                              | Operational Projects, Under Construction Awarded Projects and Under Construction Contracted Projects                                                                                                        |
| PPA                                    | Power Project Agreement                                                                                                                                                                                     |
| PPA Tenor                              | The tenor for which the Power Purchase Agreement shall remain in force as per the terms of the PPA.                                                                                                         |
| Project Cost                           | The total capitalised cost incurred for setting up the project.                                                                                                                                             |
| Project SPV                            | Special Purpose Vehicle incorporate to undertake a relevant renewable power project                                                                                                                         |

## CERTAIN CONVENTIONS, USE OF FINANCIAL INFORMATION AND MARKET DATA AND CURRENCY OF PRESENTATION

### Certain Conventions

All references in this Red Herring Prospectus to ‘India’ are to the Republic of India and its territories and possessions and all references herein to the ‘Government’, ‘Indian Government’, ‘GoI’, ‘Central Government’ or the ‘State Government’ are to the Government of India, central or state, as applicable. Unless otherwise specified, any time mentioned in this Red Herring Prospectus is in Indian Standard Time. Unless otherwise stated, all references to page numbers in this Red Herring Prospectus are to page numbers of this Red Herring Prospectus.

### Currency and Units of Presentation

All references to “*Rupee(s)*”, “*Rs.*” or “*₹*” or “*INR*” are to Indian Rupees, the official currency of the Republic of India. All references to “*U.S. Dollar(s)*” or “*USD*” or “*US Dollar*” are to United States Dollars, the official currency of the United States of America.

### Exchange Rates

This Red Herring Prospectus contains conversion of U.S. Dollar into Rupees that have been presented solely to comply with the requirements of the SEBI ICDR Regulations. These conversions should not be considered as a representation that such U.S. Dollar amounts have been, could have been or can be converted into Rupees at any particular rate, the rates stated below or at all. Unless otherwise stated, the exchange rates referred to for the purpose of conversion of U.S. Dollar amounts into Rupee amounts, are as follows:

| Currency | Exchange rate as on |               |                |                |                |
|----------|---------------------|---------------|----------------|----------------|----------------|
|          | June 30, 2024       | June 30, 2023 | March 31, 2024 | March 31, 2023 | March 31, 2022 |
| USD      | 83.45**             | 82.04         | 83.37*         | 82.22          | 75.81          |

\* Since March 31, 2024 was a Sunday, March 30, 2024 was a Saturday and March 29, 2024 was a public holiday on account of Good Friday, the exchange rate was considered as on March 28, 2024.

\*\* Since June 30, 2024 was a Saturday, the exchange rate was considered as on June 29, 2024.

### Financial and Other Data

Unless stated or the context requires otherwise, the financial information in this Red Herring Prospectus is derived from our Restated Consolidated Financial Information. The Restated Consolidated Financial Information comprises the restated consolidated financial information of our Company as at the three months ended June 30, 2024 and June 30, 2023 and for the years ended March 31, 2024, March 31, 2023 and March 31, 2022, comprising the restated consolidated statement of assets and liabilities as at June 30, 2024 and June 30, 2023, and as at ended March 31, 2024, March 31, 2023 and March 31, 2022, the restated consolidated statement of profit and loss (including other comprehensive income), the restated consolidated statement of changes in equity, the restated consolidated cash flow statement for the three months ended June 30, 2024, and June 30, 2023 and for the years ended March 31, 2024, March 31, 2023 and March 31, 2022, and, the summary statement of material accounting policies and other explanatory information prepared in accordance with Section 26 of Part I of Chapter III of the Companies Act, 2013, as amended, the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended, and the Guidance Note on Reports in Company Prospectuses (Revised 2019) issued by the ICAI, as amended from time to time. The Restated Consolidated Financial Information has been prepared to comply in all material respects with the Indian Accounting Standards as prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time), presentation requirements of division II of Schedule III to the Companies Act, 2013, as applicable to the consolidated financial statements and other relevant provisions of the Companies Act, 2013.

For further information of our Company’s financial information, please see “**Financial Information**” beginning on page 411. We have also included in this Red Herring Prospectus, the Unaudited Proforma Financial Information which includes the pro forma consolidated statement of profit and loss for the year ended March 31, 2024 and related notes.

For further details, see “**Unaudited Proforma Financial Information**” on page 522, “**History and Certain**

**Corporate Matters – Details regarding material acquisitions or divestments of business/undertakings, mergers, amalgamations, any revaluation of assets, etc. in the last 10 years”** on page 303, and **“Risk Factors – 34. The Unaudited Pro Forma Consolidated Financial Information is presented for illustrative purposes only and may not be indicative of our future performance.”** on page 71.

There are significant differences between Indian GAAP, Ind AS, U.S. GAAP and IFRS. Our Company does not provide reconciliation of its financial information to IFRS or U.S. GAAP. For details, see **“Risk Factors – 62. Significant differences exist between Indian Accounting Standards (“Ind AS”) used to prepare our Restated Consolidated Financial Information, such as the United States Generally Accepted Accounting Principles (U.S. GAAP) and the International Financial Reporting Standards (“IFRS”), which may affect investors’ assessment of our Company’s financial condition.”** on page 86. Our Company has not attempted to explain those differences or quantify their impact on the financial data included in this Red Herring Prospectus and it is urged that you consult your own advisors regarding such differences and their impact on our financial data. Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting policies and practices, the Companies Act, Ind AS, and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting policies and practices on the financial disclosures presented in this Red Herring Prospectus should, accordingly, be limited.

Our Company’s fiscal year commences on April 1 of each year and ends on March 31 of the next year. Accordingly, all references to a particular fiscal year (referred to herein as **“Fiscal”, “Fiscal Year”**) are to the 12 months ended March 31 of that particular year, unless otherwise specified. Further, unless indicated otherwise or unless the context requires otherwise, all references to a year in this Red Herring Prospectus are to a calendar year.

All the figures in this Red Herring Prospectus have been presented in million or in whole numbers where the numbers have been too small to present in million unless stated otherwise. One million represents 1,000,000 and one billion represents 1,000,000,000. Certain figures contained in this Red Herring Prospectus, including financial information, have been subject to rounding adjustments. Any discrepancies in any table between the totals and the sum of the amounts listed are due to rounding off. All figures in decimals have been rounded off to the two decimal points. In certain instances, (i) the sum or percentage change of such numbers may not conform exactly to the total figure given, and (ii) the sum of the figures in a column or row in certain tables may not conform exactly to the total figure given for that column or row. However, figures sourced from third-party industry sources may be expressed in denominations other than million or may be rounded off to other than two decimal points in the respective sources, and such figures have been expressed in this Red Herring Prospectus in such denominations or rounded-off to such number of decimal points as provided in such respective sources.

Unless the context otherwise indicates, any percentage amounts, as set forth in **“Risk Factors”, “Our Business”** and **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** beginning on pages 34, 242 and 536, respectively, and elsewhere in this Red Herring Prospectus have been calculated on the basis of amounts derived from the Restated Consolidated Financial Information.

#### *Non-Generally Accepted Accounting Principles Financial Measures*

This Red Herring Prospectus contains certain non-GAAP financial measures and certain other statistical information relating to our operations and financial performance like net worth, earnings before interest, taxes, depreciation and amortization expenses (**“EBITDA”**), EBITDA Margin, PAT Margin, net debt to equity ratio, and cash return on equity (together, **“Non-GAAP Measures”**) that are not required by, or presented in accordance with, Ind AS, Indian GAAP, or IFRS. Further, these non-GAAP measures are not a measurement of our financial performance or liquidity under Ind AS, Indian GAAP, IFRS or U.S. GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the years/ period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS or U.S. GAAP. We compute and disclose such non-Indian GAAP financial measures and such other statistical information relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance. These non-Indian GAAP financial measures and other statistical and other information relating to our operations and financial performance may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to financial measures and statistical information of similar nomenclature that may be computed and presented by other companies and are not measures of operating performance or liquidity defined by Ind AS and may not be comparable to similarly titled measures presented by other companies. For the risks relating to our Non-GAAP Measures, see **“Risk Factors – 61. We have in this Red Herring Prospectus included certain non-GAAP**

*financial measures and Key Performance Indicators (“KPIs”) that may vary from any standard methodology that is applicable across our industry. We rely on certain assumptions and estimates to calculate such measures, therefore such measures may not be comparable with financial, operational or industry-related statistical information of similar nomenclature computed and presented by other similar companies.”* on page 85.

## **Industry and Market Data**

Industry publications generally state that the information contained in such publications has been obtained from publicly available documents from various sources. The data used in these sources may have been re-classified by us for the purposes of presentation. Data from these sources may also not be comparable. Accordingly, no investment decision should be made solely on the basis of such information. Further, industry sources and publications are also prepared based on information as of a specific date and may no longer be current or reflect current trends.

The extent to which industry and market data set forth in this Red Herring Prospectus is meaningful depends on the reader’s familiarity with and understanding of the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which we conduct our business, and methodologies and assumptions may vary widely among different industry sources. Accordingly, no investment decision should be made solely on the basis of such information. Such data involves risks, uncertainties and numerous assumptions and is subject to change based on various factors, including those disclosed in **“Risk Factors – 55. Industry information included in this Red Herring Prospectus has been derived from an industry report exclusively commissioned and paid for by us for such purpose. Further, this Red Herring Prospectus contains information from technical reports by TÜV SÜD South Asia Private Limited appointed by our Company.”** on page 83.

Unless stated otherwise, industry and market data used in this Red Herring Prospectus is derived from the report titled, “Strategic assessment of power and renewable energy sector in India” dated October, 2024 prepared by CRISIL Market Intelligence & Analytics, a division of CRISIL Limited (**“CRISIL MI&A/CRISIL”**) appointed by our Company pursuant to an engagement letter dated February 27, 2024, and such CRISIL Report has been commissioned by and paid for by our Company, exclusively in connection with the Offer. Further, CRISIL pursuant to their consent letter dated October 8, 2024, has accorded its no objection and consent to use the CRISIL Report in connection with the Offer and has also confirmed that it is an independent agency, and that it is not related to our Company, our Directors, our Promoters, our Key Managerial Personnel or our Senior Management or the BRLMs.

The CRISIL Report is available on the website of our Company at <https://acmesolar.in/investor-corner/investor-resources/industry-reports> and has also been included in **“Material Contracts and Documents for Inspection – Material Documents”** on page 705.

In accordance with the SEBI ICDR Regulations, the section **“Basis for Offer Price”** beginning on page 148, includes information relating to our peer group companies and industry averages. Such information has been derived from publicly available sources. Such industry sources and publications are also prepared based on information as at specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base this information on estimates and assumptions that may prove to be incorrect.

## **Notice to prospective investors in the United States**

The Equity Shares have not been recommended by any U.S. federal or state securities commission or regulatory authority. Further, the foregoing authorities have not confirmed the accuracy or determined the adequacy of this Red Herring Prospectus or approved or disapproved the Equity Shares. Any representation to the contrary is a criminal offence in the United States. In making an investment decision, investors must rely on their own examination of our Company and the terms of this Offer, including the merits and risks involved. The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold (a) in the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act) pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act and (b) outside the United States in reliance on Regulation S and the applicable laws of the jurisdiction where those offers and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction

outside India and may not be offered or sold, and Bids may not be made, by persons in any such jurisdiction except in compliance with the applicable laws of such jurisdiction.

## FORWARD-LOOKING STATEMENTS

This Red Herring Prospectus contains certain “forward-looking statements”. All statements regarding our expected financial condition and results of operations, business, plans and prospects are forward looking statements, which may include statements with respect to our business strategy, our revenue and profitability, our goals and other such matters discussed in this Red Herring Prospectus regarding matters that are not historical facts. These forward-looking statements generally can be identified by words or phrases such as “*aim*”, “*anticipate*”, “*believe*”, “*goal*”, “*expect*”, “*estimate*”, “*intend*”, “*likely to*”, “*objective*”, “*plan*”, “*projected*”, “*should*”, “*will*”, “*will continue*”, “*seek to*”, “*will pursue*” or other words or phrases of similar import. Similarly, statements that describe our expected financial conditions, results of operations, strategies, objectives, prospects, plans or goals are also forward-looking statements. However, these are not the exclusive means of identifying forward-looking statements. All forward-looking statements whether made by us or any third parties in this Red Herring Prospectus are based on our current plans, estimates, presumptions and expectations and are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with the expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company has businesses and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, incidence of any natural calamities and/or acts of violence, changes in laws, regulations and taxes and changes in competition in our industry.

Certain important factors that could cause actual results to differ materially from our expectations include, but are not limited to, the following:

- inability to grow our portfolio of renewable energy power projects;
- dependence on the power purchase agreements for the revenue of operations and sale of power;
- dependence on the top 10 off-takers, which contributed 95.42%, 89.42%, 89.97%, 87.48% and 81.11% of our revenue from operations during the three months ended June 30, 2024 and June 30, 2023 and for Fiscals 2024, 2023 and 2022, respectively;
- dependence on our top supplier, ACME Cleantech, from which we procured 84.48%, 77.15%, 79.37%, 69.84% and 69.95% of our total purchases during the three months ended June 30, 2024 and June 30, 2023 and in Fiscal 2024, 2023 and 2022, respectively, and absence of definitive supply agreements with our vendors for the supply of components;
- dependence on the continued relationship with one of our Promoters, ACME Cleantech;
- receipt of certain office orders from the Directorate of Enforcement to our Company, ACME Cleantech and ACME Solar Energy in connection with ongoing investigations;
- lack of experience of commissioning wind, hybrid and FDRE power projects;
- restrictions on renewable energy equipment imports;
- inclusion of certain emphasis of matters by our Joint Statutory Auditors in the examination report on the Restated Consolidated Financial Information; and
- loss incurred by us in a previous period.

For a further discussion on factors that could cause our actual results to differ from our expectations, see “**Risk Factors**”, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on pages 34, 242 and 536, respectively. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

Forward-looking statements reflect our views as of the date of this Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on the currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. None of our Company, Directors, the Promoter Selling Shareholder, and the BRLMs or their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence

of underlying events, even if the underlying assumptions do not come to fruition. There can be no assurance to Bidders that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, Bidders are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements to be a guarantee of our future performance.

In accordance with regulatory requirements of SEBI and as prescribed under applicable law, our Company will ensure that investors in India are informed of material developments from the date of filing of this Red Herring Prospectus until the date of Allotment. In accordance with the requirements of SEBI, the Promoter Selling Shareholder will ensure that investors are informed of material developments in relation to the statements and undertakings specifically undertaken or confirmed by it in this Red Herring Prospectus until the date of Allotment. Only statements and undertakings which are specifically confirmed or undertaken by the Promoter Selling Shareholder to the extent of information pertaining to it and/or the Offered Shares, as the case may be, in this Red Herring Prospectus shall be deemed to be statements and undertakings made by such Promoter Selling Shareholder.

## SUMMARY OF THE OFFER DOCUMENT

This section is a general summary of certain disclosures included in this Red Herring Prospectus and is neither exhaustive, nor does it purport to contain a summary of all the disclosures in this Red Herring Prospectus or all details relevant to prospective investors. This summary should be read in conjunction with, and is qualified in its entirety by, the more detailed information appearing elsewhere in this Red Herring Prospectus, including the sections titled “**Risk Factors**”, “**The Offer**”, “**Capital Structure**”, “**Objects of the Offer**”, “**Industry Overview**”, “**Our Business**”, “**Financial Information**”, “**Outstanding Litigation and Material Developments**”, “**Offer Procedure**” and “**Main Provisions of the Articles of Association**” beginning on pages 34, 95, 111, 125, 185, 242, 411, 583, 648 and 671, respectively, of this Red Herring Prospectus.

Unless the context otherwise requires, in this section, references to “we”, “us” and “our” are to ACME Solar Holdings Limited on a consolidated basis while references to “our Company” or “the Company”, are to ACME Solar Holdings Limited on a standalone basis. Further, references to the “ACME Group” include MKU Holdings Private Limited, ACME Cleantech and its subsidiaries.

### Summary of Business

We are a renewable energy company in India with a portfolio of solar, wind, hybrid and firm and dispatchable renewable energy (“**FDRE**”) projects. We develop, build, own, operate and maintain utility scale renewable energy projects (through our in-house engineering, procurement and construction (“**EPC**”) division and operation and maintenance team), and generate revenue through the sale of electricity to various off-takers including central and state government-backed entities. As of the date of this Red Herring Prospectus, we have an aggregate operational capacity of 1,340 MW (1,826 MWp); under construction contracted capacity of 3,250 MW and under construction awarded capacity of 1,730 MW.

For further information, see “**Our Business**” on page 242.

### Summary of Industry

Renewable sources are a clean source of energy, preventing the release of pollutants into the air. While there are multiple renewable sources that can be utilised, solar, wind, small hydro, biomass, and bagasse remain key sources. (Source: CRISIL Report)

Renewable energy installations have increased to approximately 200 GW as of August 2024. As of March-2024, installed grid connected renewable energy generation capacity (including large hydro) in India constituted approximately 44% of the total installed generation base in India. (Source: CRISIL Report)

<sup>(1)</sup> Average CUF, average grid availability and average plant availability includes calculations for installed capacity at the end year & excludes assets which were monetized during the year.

<sup>(2)</sup> EBITDA: EBITDA is calculated as earnings before interest, taxes, depreciation and amortisation and exceptional items

<sup>(3)</sup> EBITDA Margin: EBITDA / Revenue from operations

<sup>(4)</sup> PAT: Profit after tax

<sup>(5)</sup> PAT Margin: PAT / total revenue

<sup>(6)</sup> Net debt/Equity(x): (Long term borrowing + Short term borrowing – Cash and cash equivalents – Other Bank balances)/ total equity attributable to shareholders of the Company

<sup>(7)</sup> Cash RoE (% of Equity): (Profit after tax + Depreciation) / Equity. Cash ROE is not a financial metric related to a renewable energy sector specifically. The terminology is used as a measure of capital efficiency with focus on cash profit. Cash ROE is calculated as a cash profit (profit after tax plus depreciation) for the year divided by closing net worth. Given that our Company operates in a capital intensive business with high depreciation and interest cost, profit may not represent our Company's performance accurately, accordingly Cash ROE has been used to describe our Company's performance. The operational life of solar power plants is around 30 years and depreciation is not a cash flow.

<sup>(8)</sup> Revenue from Operations comprises of (i) sale of goods and services; and (ii) other operating revenue

<sup>(9)</sup> Total Revenue comprises of (i) revenue from operations; and (ii) other income

<sup>(10)</sup> DSO: Closing trade receivables divided by Revenue from Operations multiplied by 365 for yearly or 91 for June quarter calculations.

<sup>^</sup>Increase in Net Debt/ Equity as of June 30, 2024 in comparison to March 31, 2024, is mainly on account of repayment of compulsory convertible debentures of ₹ 6,500.00 million to ACME Cleantech resulting in reduction in total equity attributable to shareholders of the Company.

<sup>\$</sup>Reduction in PAT for the three month ended June 30, 2024 in comparison to June 30, 2023 is mainly on account of a) decrease in revenue from operations mainly due to sale of assets of 369 MW in January 2024 which was partially offset by revenue from full commissioning of ACME Aklera (250 MW) in January 2024; and b) increase in tax mainly on account of increase in the taxable profits from EPC business (after adjusting unabsorbed losses) of our Company.

<sup>#</sup>Not annualized.

\* Our Company has signed a share purchase agreement dated September 27, 2023 with Blupine Energy Private Limited, for inter alia the sale of 20 MW in ACME Sidlaghatta Solar Energy Private Limited ("ACME Sidlaghatta"). The long stop date for the sale and purchase of ACME Sidlaghatta was the date falling after expiry of one year from the execution date of the share purchase agreement, i.e., September 27, 2023. However, since the conditions precedent required to be fulfilled prior to closing of the ACME Sidlaghatta transaction could not be completed before the long stop date, being September 28, 2024, the share purchase agreement dated September 27, 2023, stands automatically terminated with respect to transaction concerning ACME Sidlaghatta.

NA: Not available since the proforma financial information for Fiscal 2023 and Fiscal 2022 is not available.

For further information, see “**Basis for Offer Price – Key Performance Indicators**” on page 151.

## Promoters

The Promoters of our Company are Mamta Upadhyay, Manoj Kumar Upadhyay, ACME Cleantech Solutions Private Limited, MKU Holdings Private Limited and Upadhyay Family Trust.

For further details, see “**Our Promoters and Promoter Group**” on page 403.

## Offer Size

The following table summarizes the details of the Offer. For further details, see “**The Offer**” and “**Offer Structure**” on pages 95 and 643, respectively.

|                                             |                                                                                                                          |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Offer <sup>(1)</sup>                        | [●] Equity Shares of face value ₹ 2 each, aggregating up to ₹ 29,000.00 million                                          |
| of which                                    |                                                                                                                          |
| Fresh Issue <sup>(1)</sup>                  | [●] Equity Shares of face value ₹ 2 each, aggregating up to ₹ 23,950.00 million                                          |
| Offer for Sale <sup>(2)</sup>               | Up to [●] Equity Shares of face value ₹ 2 each, aggregating up to ₹ 5,050.00 million by the Promoter Selling Shareholder |
| which includes                              |                                                                                                                          |
| Employee Reservation Portion <sup>(3)</sup> | Up to [●] Equity Shares aggregating up to ₹ 100.00 million                                                               |
| Net Offer                                   | Up to [●] Equity Shares aggregating up to ₹ [●] million                                                                  |

- (1) Our Board has authorised the Offer pursuant to their resolutions dated June 22, 2024 and October 20, 2024. Our Shareholders have authorised the Fresh Issue pursuant to their special resolutions dated June 24, 2024 and October 21, 2024.
- (2) Our Board has taken on record the consent for the Offer for Sale of the Promoter Selling Shareholder pursuant to its resolution dated October 20, 2024. The Promoter Selling Shareholder has confirmed that the Offered Shares have been held by them for a period of at least one year prior to the filing of this Red Herring Prospectus and are accordingly eligible for being offered for sale in the Offer in compliance with the SEBI ICDR Regulations. The Promoter Selling Shareholder has authorized the inclusion of the Offered Shares in the Offer for Sale. For details of authorizations received for the Offer for Sale, see “Other Regulatory and Statutory Disclosures-Authority of the Offer” beginning on page 647.
- (3) In the event of under-subscription in the Employee Reservation Portion (if any), the unsubscribed portion will be available for allocation and Allotment, proportionately to all Eligible Employees who have Bid in excess of ₹ 200,000 (net of Employee Discount, if any), subject to the maximum value of Allotment made to such Eligible Employee not exceeding ₹ 500,000 (net of Employee Discount, if any). The unsubscribed portion, if any, in the Employee Reservation Portion after allocation of up to ₹ 500,000 (net of Employee Discount, if any), shall be added to the Net Offer. Our Company, in consultation with the BRLMs, may offer a discount of up to [●]% on the Offer Price (equivalent of ₹ 27.00 per Equity Share) to Eligible Employees bidding in the Employee Reservation Portion which shall be announced two Working Days prior to the Bid/Offer Opening Date. For further details, see “Offer Procedure” and “Offer Structure” on pages 648 and 643, respectively.

The Offer and Net Offer shall constitute [●]% and [●]%, respectively, of the post-Offer paid up Equity Share capital of our Company. See “The Offer” and “Offer Structure” beginning on pages 95 and 643, respectively.

### Objects of the Offer

The Net Proceeds are proposed to be used in accordance with the details provided in the following table:

| Sr. No | Particulars                                                                                                                                 | Amount<br>(in ₹ million) |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| 1.     | Investment in our Subsidiaries for repayment/prepayment, in full or in part, of certain outstanding borrowings availed by our Subsidiaries. | 17,950.00                |
| 2.     | General corporate purposes <sup>(1)</sup>                                                                                                   | [●]                      |
|        | <b>Total Net Proceeds</b>                                                                                                                   | <b>[●]</b>               |

(1) To be finalized upon determination of the Offer Price and updated in the Prospectus prior to filing with the RoC. The amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds.

For further details, see “Objects of the Offer” on page 125.

### Aggregate pre-Offer and post-Offer Shareholding of our Promoters (including the Promoter Selling Shareholder) and members of our Promoter Group

The aggregate pre-Offer and post-Offer equity shareholding and percentage of the pre-Offer and post-Offer paid-up Equity Share capital, of each of our Promoters (including the Promoter Selling Shareholder) and members of our Promoter Group as on the date of this Red Herring Prospectus is set forth below:

| S. No.    | Name of the Shareholder       | Pre-Offer                  |                                    | Post-Offer              |                                    |
|-----------|-------------------------------|----------------------------|------------------------------------|-------------------------|------------------------------------|
|           |                               | Number of Equity Shares    | Percentage of Equity Share capital | Number of Equity Shares | Percentage of Equity Share capital |
| Promoters |                               |                            |                                    |                         |                                    |
| 1.        | ACME Cleantech <sup>(1)</sup> | 522,207,910 <sup>(2)</sup> | 100.00                             | [●]                     | [●]                                |
|           | Total                         | 522,207,910 <sup>(2)</sup> | 100.00                             | [●]                     | [●]                                |

(1) Also the Selling Shareholder.

(2) Manoj Kumar Upadhyay, Mamta Upadhyay, MKU Holdings, VRS Infotech, Nikhil Dhingra and Chandan Mukherjee have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters, ACME Cleantech.

Except as disclosed above, none of our other Promoters and members of the Promoter Group hold any Equity Shares of our Company.

For further details, see “Capital Structure” beginning on 111.

### Summary of Selected Financial Information derived from our Restated Consolidated Financial Information

The summary of selected financial information of the Company derived from the Restated Consolidated Financial Information is set forth below:

(₹ in million, unless otherwise specified)

| Particulars                                         | As at three months ended June 30, 2024 | As at three months ended June 30, 2023 | As at and for the year ended March 31, 2024 | As at and for the year ended March 31, 2023 | As at and for the year ended March 31, 2022 |

| Total borrowings <sup>(4)</sup>                     | 93,199.14                              | 84,723.29                              | 82,175.93                                   | 86,573.49                                   | 75,636.02                                   |
| Equity Share capital                                | 1,044.42                               | 1,044.42                               | 1,044.42                                    | 1,044.42                                    | 1,044.42                                    |
| Net Worth <sup>(5)</sup>                            | 19,421.21                              | 19,807.67                              | 25,908.69                                   | 19,005.63                                   | 19,087.63                                   |

\*Adjusted for the split of equity shares from face value of ₹ 10 each to ₹ 2 each, as approved by our Board and the Shareholders pursuant to their resolutions dated May 27, 2024, and June 7, 2024, respectively.

\*\*Our Company generated a profit for the year of ₹ 6,977.81 million in Fiscal 2024 compared to loss for the year of ₹ (31.74) million in Fiscal 2023, primarily on account of an increase in exceptional items. As disclosed in the section “**Management’s Discussion and Analysis of Financial Condition and Results of Operations – Fiscal 2024 Compared to Fiscal 2023**” on page 550, exceptional items increased to ₹ 7,486.91 million in Fiscal 2024 from ₹ 394.36 million in Fiscal 2023. This increase is primarily attributable to an increase in net gain on sale of assets to ₹ 7,212.30 million in Fiscal 2024 from ₹ 225.67 million in Fiscal 2023 since our Company divested 369 MW of projects to an investor during Fiscal 2024; and an increase in contingent consideration related to investment disposed in earlier years to ₹ 274.61 million in Fiscal 2024 from ₹ 168.69 million in Fiscal 2023. Our Company did not divest any of its assets in Fiscal 2023. Accordingly, on account of our Company generating a profit for the year of ₹ 6,977.81 million in Fiscal 2024 compared to loss for the year of ₹ (31.74) million in Fiscal 2023, there was an increase in other equity which increased to ₹ 18,364.27 million in Fiscal 2024 compared to ₹ 11,461.21 million in Fiscal 2023 which primarily contributed to a corresponding increase in the net worth of our Company.

^Not annualized for June 30, 2024 and June 30, 2023.

**Notes:**

- (1) Basic EPS (₹) = Restated net profit/loss attributable to equity shareholders / weighted average number of shares outstanding during the period/year.
- (2) Diluted EPS (₹) = Restated net profit/loss attributable to equity shareholders / weighted average number of dilutive equity shares.
- (3) Net asset value per Equity Share (₹) = Net worth / Number of equity shares and potential equity shares on account of compulsory convertible debentures outstanding as at the end of the end of the year/ period. For the purposes of the above, “net worth” means the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and instruments entirely in the nature of equity after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the audited balance sheet, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation.
- (4) Total borrowings represent sum of short-term borrowings and long term borrowings.
- (5) Net worth means the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and instruments entirely in the nature of equity after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the audited balance sheet, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation.

For further details, see “**Restated Consolidated Financial Information**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on pages 411 and 536, respectively.

**Qualifications of the Auditors which have not been given effect to in the Restated Consolidated Financial Information**

The Joint Statutory Auditors have not made any qualifications in their examination report, which have not been given effect to in the Restated Consolidated Financial Information.

**Summary of Outstanding Litigation and Material Developments**

\* To the extent quantifiable.

<sup>s</sup>The Office of the Labour Officer, Rajgarh had filed a complaint dated September 20, 2020, under violation of section 12(1) and section 22 of the Minimum Wages Act, 1948, against one of our Corporate Promoters, ACME Cleantech, and one of our Individual Promoters, Manoj Kumar Upadhyay and ACME Solar Energy (M.P.). Therefore, whilst both ACME Cleantech and Manoj Kumar Upadhyay are named in the complaint, this matter has been accounted for only once. Further, for the purpose of calculating the aggregate amount involved, the monetary liability, to the extent quantifiable, has been taken into account only once. For further details, see “**Outstanding Litigation and Material Developments**” beginning on page 583.

@Includes nine writ petitions filed by the Company, one writ petition filed by one of our Corporate Promoters and five writ petitions filed by our Subsidiaries challenging various provisions of direct and indirect tax laws, and one appeal filed by one of our Corporate Promoters before the Customs Excise & Service Tax Appellate Tribunal towards claim of service tax refund. For further details, see “**Outstanding Litigation and Material Developments**” beginning on page 583.

<sup>#</sup> Includes a tax matter involving ACME Cleantech, for which summons have been issued by the Assistant Director of Income Tax Investigations. For details, please see “**Outstanding Litigation and Material Developments – IV. Litigation involving or Promoters – A. Litigation filed against our Promoters – Outstanding actions by regulatory and statutory authorities**” beginning on page 599.

As on the date of this Red Herring Prospectus, there is no outstanding litigation involving our Group Companies which may have a material impact on our Company.

For further details of the outstanding litigation proceedings, see “**Outstanding Litigation and Material Developments**” beginning on page 583.

## Risk Factors

Investors are advised to read the risk factors carefully before taking an investment decision in the Offer. Please see “**Risk Factors**” beginning on page 34.

## Summary of Contingent Liabilities

The following is a summary table of our contingent liabilities as per Ind AS 37 as at June 30, 2024, as indicated in our Restated Consolidated Financial Information.

| (in ₹ million) |                                                   |                     |
|----------------|---------------------------------------------------|---------------------|
| Sr. No.        | Particulars                                       | As on June 30, 2024 |
| 1.             | Disputed demand for income tax                    | 340.46              |
| 2.             | Disputed demand for sales tax                     | 100.58              |
| 3.             | Guarantees issued including financial guarantees* | 5,678.80            |
| <b>Total</b>   |                                                   | <b>6,119.84</b>     |

\*Our Company has issued a guarantee of ₹ 5,678.80 million in favour of ACME Cleantech against certain borrowings sanctioned to ACME Cleantech amounting to ₹ 6,754.00 million. These borrowings pertain primarily to the guarantees being issued by ACME Cleantech for various Subsidiaries of our Company.

For further details, please see “**Restated Consolidated Financial Information – Note 48 – Contingent Liabilities**”, “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” and “**Outstanding Litigation and Material Developments**” beginning on pages 492, 536 and 583, respectively.

## Details of Pre-IPO Placement

Our Company is not contemplating a pre-IPO placement

## Issue of Equity Shares for consideration other than cash or bonus issue in the last one year

Our Company has not issued any Equity Shares for consideration other than cash or bonus issue in the one year preceding the date of this Red Herring Prospectus.

## Split / Consolidation of Equity Shares in the last one year

Except as disclosed below, our Company has not undertaken a split or consolidation of the Equity Shares in the one year preceding the date of this Red Herring Prospectus.

Pursuant to resolutions passed by our Board and the Shareholders in their meetings dated May 27, 2024, and June 7, 2024, respectively, the authorized share capital of our Company was sub-divided from 1,000,000,000 equity shares of face value of ₹ 10 each to 5,000,000,000 Equity Shares of face value of ₹ 2 each.

## Exemption from complying with any provisions of securities laws, if any, granted by SEBI

Our Company has not sought for any exemptions from complying with any provisions of securities laws, as on the date of this Red Herring Prospectus.

## SECTION II – RISK FACTORS

An investment in Equity Shares involves a high degree of risk. Potential investors should carefully consider all the information in this Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares, the industry in which we operate. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition. If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with **“Our Business”**, **“Industry Overview”**, **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** and **“Restated Consolidated Financial Information”** on pages 242, 185, 536 and 411, respectively, as well as the other financial and statistical information contained in this Red Herring Prospectus. In making an investment decision, prospective investors must rely on their own examination of us and our business and the terms of the Offer including the merits and risks involved.

Prospective investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Offer. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment, which may differ in certain respects from that of other countries.

This Red Herring Prospectus also contains certain forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. For further information, see **“Forward-Looking Statements”** on page 22.

Unless otherwise indicated or unless context requires otherwise, the financial information included herein is based on our Restated Consolidated Financial Information included in this Red Herring Prospectus. For further information, see **“Restated Consolidated Financial Information”** on page 411. We have also included Unaudited Pro Forma Consolidated Financial Information to show the impact of the sale of the Divested Projects SPVs made during Fiscal 2024 on our statement of profit and loss for Fiscal 2024. For further details, see **“Unaudited Proforma Financial Statements”** on page 522.

Unless the context otherwise requires, in this section, references to “we”, “us” and “our” are to ACME Solar Holdings Limited on a consolidated basis while references to “our Company” or “the Company”, are to ACME Solar Holdings Limited on a standalone basis. Further, references to the “ACME Group” include MKU Holdings Private Limited, ACME Cleantech and its subsidiaries.

Unless otherwise indicated, industry and market data used in this section has been derived from industry publications, in particular, the report titled “Strategic assessment of power and renewable energy sector in India” dated October 2024 (the **“CRISIL Report”**) prepared and issued by CRISIL Market Intelligence & Analytics, appointed by us on February 27, 2024 and exclusively commissioned and paid for by us in connection with this Offer. A copy of the CRISIL Report is available on the website of our Company at <https://acmesolar.in/investor-corner/investor-resources/industry-reports>. The data included herein includes excerpts from the CRISIL Report and may have been re-ordered by us for the purposes of presentation. There are no parts, data or information (which may be relevant for this Offer), that has been left out or changed in any manner. Unless otherwise indicated, financial, operational, industry and other related information derived from the CRISIL Report and included herein with respect to any particular year refers to such information for the relevant calendar year. Also see, **“Certain Conventions, Presentation of Financial, Industry and Market Data and Currency of Presentation – Industry and Market Data”** on page 20.

### Internal Risk Factors

1. We may not be able to grow our portfolio of renewable energy power projects as we rely on highly competitive renewable energy power project auctions. Further, our future growth is significantly dependent on successfully executing our Under Construction Awarded Projects and Under Construction

**Contracted Projects. In the event, we are not successful in executing our future projects, our business and results of operations may be adversely impacted.**

As of the date of this Red Herring Prospectus, we have an aggregate Operational Project capacity of 1,340 MW (1,826 MWp); Under Construction Contracted Project capacity of 3,250 MW and Under Construction Awarded Project capacity of 1,730 MW. Our strategy to grow our business includes expanding and diversifying our renewable energy portfolio to include hybrid, FDRE and pump storage projects for which we have to participate in bids and bid against other renewable energy players. We compete for project awards based on, among other things, pricing, technical and engineering expertise, financing capabilities, past experience and track record. The bidding and selection process is also affected by a number of factors, including those beyond our control, such as market conditions or government incentive programs. We only submit bids for those renewable energy auctions where we are comfortable with the policies, incentives, credit history of the off-taker, and evacuation infrastructure availability, transmission systems, water, roads and communications networks and other ancillary infrastructure, competitive intensity, capacity on offer and restrictions on maximum/minimum bid quantity. However, it is difficult to predict whether and when we will be awarded a new renewable power project. Further, post June, 2025, an annual increase of 25% in the inter-state transmission system charges (“ISTS”) will be applicable for solar, wind, hydro PSP, and Battery Energy Storage System sources, resulting in the applicability of 100% of ISTS charges from July 2028. (Source: CRISIL Report)

In addition, the rules of the auction process may change. For example, in our experience, most national auctions currently use the reverse auction structure, in which several bidders simultaneously bid for the same project. Currently, wind capacity is auctioned based on single stage, two envelope closed bidding process. (Source: CRISIL Report) There can be no assurance that the central and state governments will continue to allow us to utilize such bidding structures and any shift away from the current structures could increase competition and benefit other bidders more than us, which can adversely affect our business, results of operations and cash flows.

The table below sets forth the percentage of bids the ACME Group, ACME Cleantech, our Company and our Subsidiaries won against the total bids that it participated in and those that came up for auction in the Indian solar power sector in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

| Particulars                                                                                     | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024          | Fiscal 2023 | Fiscal 2022 |

Notes:

- (1) Source: CRISIL Report
- (2) This includes 320 MW of the FDRE project being undertaken by ACME Sun Power Private Limited with SJVN allocated as part of a green shoe option.
- (3) The capacity was secured during the three months ended June 30, 2024 as the bid was submitted in the first quarter and the e-reverse auction was conducted on July 16, 2024. Additionally, our Company been awarded capacity of 300 MW each from SJVN and SECI subsequent to June 30, 2024.
- (4) None of our Step-Down Subsidiaries participated in any bids in the financial periods mentioned above.

In addition, the government conducted tender processes may be subject to change in qualification criteria, unexpected delays and uncertainties. There can be no assurance that the projects for which we bid will be tendered within a reasonable time, or at all. In the event that new projects which have been announced and which we plan to bid for are not put up for tender within the announced timeframe, or qualification criteria are modified such that we are unable to qualify, our business, prospects, financial condition, cash flows and results of operations could be materially and adversely affected.

**2. We are dependent on our Power Purchase Agreements (“PPA”) to sell power and generate our revenue from operations. Further, the terms of our PPAs may expose us to certain risks that may affect our future results of operations and cash flows.**

As on the date of this Red Herring Prospectus, all of our Operational Projects were with central and state government entities and government-backed corporations at pre-determined tariffs. Further, all of our Under Construction Contracted Projects and Under Construction Awarded Projects are with central and state government entities and government-backed corporations, except our solar Under Construction Contracted Project which is being developed by one of our Subsidiaries, ACME Sikar Solar Private Limited with a contracted capacity of 300 MW located at Bikaner, Rajasthan for which no power purchase agreement has been signed and it is categorized as a merchant power plant. For further information in relation to the details of our off-takers, please see “**Selected Operating Information**” on page 280. We typically enter into long term PPAs for a period of 25 years and sell power generated from our power projects to central and state government entities and government-backed corporations at pre-determined tariffs. Under our PPAs, we are required to furnish and maintain a performance bank guarantee from the date of signing the PPA to the date as specified in the PPA. In the event there are any delays in commissioning of our projects, it may result in liquidation of performance bank guarantees and on complete liquidation, the non-commissioned capacity is likely to be terminated by the offtaker. While there have been no such instances where our performance bank guarantees have been invoked in the last three Fiscals, we cannot assure you that such instances will not happen in future. Further, in the event we seek an extension of the term of a PPA, we are not likely to be able to renegotiate the terms of the PPA to include a higher tariff rate.

Further, in the event there is excess generation of electricity above the stipulated capacity, the offtaker is only obliged to accept the partial additional generation at reduced tariffs, which may result in loss of additional revenue from operation for sale of power. While there have been no instances wherein excess electricity was sold at a reduced tariff in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022, we cannot assure you that such events will not occur in the future.

Typically once we have won a bid, we are awarded a letter of award, subsequent to which we sign the PPAs. In the event there are delays in the execution of PPAs, we may not be able to develop the projects on time which may impact our operational capacity as well as result in loss of revenue from operations from sale of power. For example, despite the letter of award being issued to our Company on April 20, 2023 in relation to the hybrid project with SECI with a capacity of 380 MW, we have signed PPA for 190 MW and the signing of PPAs for the remaining 190 MW is yet to be completed. Such factors may limit our business flexibility, expose us to an increased risk of unforeseen business and industry changes and could have an adverse effect on our business, results of operations and cash flows. Further, our profitability is largely a function of our ability to manage our costs during the terms of our PPAs and operate our power projects at optimal levels. If we are unable to manage

our costs effectively or operate our power projects at optimal levels, our business and results of operations may be adversely affected.

As counterparties in our PPAs are central or state government entities or government-backed corporations, our ability to negotiate the terms of the PPAs, which are generally standard form contracts, is limited. As a result, the PPAs may contain terms that may be onerous to us, such as penalties, fines and charges imposed by the offtaker under any statute or regulation in relation to delay in commissioning of project shall be payable by us. In the event we default in fulfilling our obligations under the PPAs, such as not supplying the minimum amount of power specified in the PPAs or failing to obtain regulatory approvals, licenses and clearances by ourselves, we may be liable for penalties and, in certain specified events, face the risk of the PPAs being terminated.

The table below provides penalties paid by our SPVs for delay in commissioning of solar power projects:

| Particulars                | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024 | Fiscal 2023          | Fiscal 2022 |
|----------------------------|----------------------------------|----------------------------------|-------------|----------------------|-------------|
| Penalties paid (₹ million) | Nil                              | Nil                              | Nil         | 43.96 <sup>(1)</sup> | Nil         |

<sup>(1)</sup> Charged to ACME Heergarh, one of our Subsidiaries, due to delay in commissioning caused due to delay in supply of components on account of global supply chain issues.

The PPAs may be terminated prematurely by counterparties for a variety of reasons which inter-alia, includes failure to commission the project by scheduled commercial operation date, failure to supply power in terms of the relevant PPA, our specific Project SPVs voluntarily or involuntarily becoming insolvent or breach of any other material terms of the PPAs.

We have in the past terminated a PPA in December 2023 with one of the state electricity distribution company on account of force majeure events continuing for more than 180 days. While we did not incur any liability on account of termination of such PPA, we cannot assure you that we will not incur any liability for the termination of a PPA in the future.

The termination of any of our PPAs could adversely affect our reputation, business, results of operations and cash flows as well as our ability to enter into new PPAs in the future. Any failure to supply power from the scheduled commercial operation date may also result in the encashment of performance bank guarantees provided by us under the terms of our PPAs. Except as disclosed below, our Company and our Subsidiaries have not provided any performance bank guarantees in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

|                                       |  |                                                       |                                  |             |             | (in ₹ million) |
|---------------------------------------|--|-------------------------------------------------------|----------------------------------|-------------|-------------|----------------|
| Name of the Subsidiary                |  | Performance bank guarantee (in terms of total amount) |                                  |             |             |                |
|                                       |  | Three months ended June 30, 2024                      | Three months ended June 30, 2023 | Fiscal 2024 | Fiscal 2023 | Fiscal 2022    |
| ACME Pokhran Solar Private Limited    |  | -                                                     | -                                | -           | 100.00      | -              |
| ACME ECO Clean Energy Private Limited |  | -                                                     | -                                | 200.00      | -           | -              |
| ACME Urja One Private Limited         |  | -                                                     | -                                | 698.82      | -           | -              |
| ACME Surya Power Private Limited      |  | -                                                     | -                                | 766.25      | -           | -              |
| ACME Sun Power Private Limited        |  | -                                                     | -                                | 980.80      | -           | -              |
| ACME Renewtech Private Limited        |  | -                                                     | -                                | 870.00      | -           | -              |

Note: In addition to the above, in Fiscal 2025 and as on the date of this Red Herring Prospectus, two of our Subsidiaries, namely ACME Alpha Renewables Private Limited and ACME Platinum Urja Private Limited, have provided performance bank guarantees of ₹ 435.00 million and ₹ 481.13 million, respectively.

3. Our business is dependent on our top 10 off-takers, which contributed 95.42%, 89.42%, 89.97%, 87.48% and 81.11% of our revenue from operations during the three months ended June 30, 2024 and June 30, 2023 and for Fiscal 2024, 2023 and 2022, respectively. The loss of any of these off-takers could have an adverse effect on our business, financial condition, results of operations and cash flows.

We generate a significant portion of our revenues from, and are therefore dependent on, certain key off-takers for a substantial portion of our business. The table below sets forth our revenue from our top ten off-takers including as a percentage of our revenue from operations for the Fiscals indicated:

| Fiscal 2024                                                 |                        |                    | Fiscal 2023                                                 |                        |                    | Fiscal 2022 <sup>(1)</sup>                                  |                        |                    |
|-------------------------------------------------------------|------------------------|--------------------|-------------------------------------------------------------|------------------------|--------------------|-------------------------------------------------------------|------------------------|--------------------|
| Customers/Off-takers                                        | Revenue (₹ in million) | % of Total Revenue | Customers/Off-takers                                        | Revenue (₹ in million) | % of Total Revenue | Customers/Off-takers                                        | Revenue (₹ in million) | % of Total Revenue |
| Solar Energy Corporation of India                           | 2,949.62               | 22.36              | Solar Energy Corporation of India                           | 2,574.55               | 19.88              | Solar Energy Corporation of India                           | 2,587.27               | 17.39              |

Note: These include revenue from entities which have been divested off in the respective years.

(1) Our Company has not received consent from this Off-taker.

If the financial condition of these off-takers deteriorate or they are compelled to change the source of their renewable energy supplies, it may impact the demand for electricity produced by our renewable power projects, which in turn could have an adverse impact on our business, results of operations and cash flows.

Further, since we are dependent on some of our key off-takers for a substantial portion of our business, the loss of any such off-taker or a substantial reduction in demand from such key off-takers could have an adverse effect on our business, results of operations and cash flows. Further, we expect that we will continue to be reliant on certain off-takers in relation to renewable energy projects for the foreseeable future. Accordingly, any failure to maintain our relationships with these off-takers could have an adverse effect on our business, results of operations and cash flows.

**4. We procured 84.48%, 77.15%, 79.37%, 69.84% and 69.95% of our total purchases during the three months ended June 30, 2024 and June 30, 2023 and in Fiscal 2024, 2023 and 2022, respectively from ACME Cleantech, our top supplier. Further, we do not have definitive supply agreements with our vendors for the supply of components and any interruptions in supply could adversely affect our business, financial condition, results of operations and cash flows.**

We do not enter into long-term agreements with our suppliers and typically source the components that we require through purchase orders. Our suppliers may not perform their obligations in a timely manner or at all, resulting in delays in commencement of our projects. While there has been no instance during the last three Fiscals and three months ended June 30, 2024 where the non-performance of obligations by our suppliers had an adverse impact on our results of operations, we cannot assure that such instances will not arise in the future.

Historically, solar panels were primarily imported from China by our Promoter, ACME Cleantech. In addition, we have tied up with a domestic supplier, Envision (Envision Wind Power Technologies India Private Limited) for the supply of wind turbine generation system, which will be sourced by ACME Cleantech, for our first wind power project, which is currently under-construction.

The tables below provides the details of total purchases from ACME Cleantech, our top supplier, purchases from whom constituted more than 50% of our total purchases along with the details of top 10 suppliers in the last three Fiscals:

| Name of Supplier <sup>(2)</sup>           | Fiscal 2024<br>Amount<br>(₹ million) | Percentage<br>of Total<br>Purchase <sup>(1)</sup><br>(%) | Name of Supplier <sup>(2)</sup> | Fiscal 2023<br>Amount<br>(₹ million) | Percentage<br>of Total<br>Purchase <sup>(1)</sup><br>(%) | Name of Supplier <sup>(2)</sup> | Fiscal 2022<br>Amount<br>(₹ million) | Percentage<br>of Total<br>Purchase <sup>(1)</sup><br>(%) |
|-------------------------------------------|--------------------------------------|----------------------------------------------------------|---------------------------------|--------------------------------------|----------------------------------------------------------|---------------------------------|--------------------------------------|----------------------------------------------------------|
| ACME Cleantech (Supplier 1)               | 15,043.61                            | 79.37                                                    | ACME Cleantech (Supplier 1)     | 8,256.57                             | 69.84                                                    | ACME Cleantech (Supplier 1)     | 9,585.87                             | 69.95                                                    |
| Supplier 2                                | 870.08                               | 4.59                                                     | Supplier 2                      | 1,637.37                             | 13.85                                                    | Supplier 2                      | 1,436.36                             | 10.48                                                    |
| Supplier 3                                | 698.82                               | 3.69                                                     | Supplier 3                      | 667.50                               | 5.65                                                     | Supplier 3                      | 835.69                               | 6.10                                                     |

The tables below provides the details of revenue from operations contributed by our Company (on a consolidated level) to the standalone revenue from operations of ACME Cleantech in the last three Fiscals:

| Particulars                                                                                                                          | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 |
|--------------------------------------------------------------------------------------------------------------------------------------|-------------|-------------|-------------|
| Revenue contributed by ACME Solar on a consolidated basis (₹ million) (A)                                                            | 14,744.56   | 8,177.82    | 9,486.71    |
| Revenue from operations of ACME Cleantech on a standalone basis (₹ million) (B)                                                      | 14,767.66   | 8,972.13    | 11,015.20   |
| Percentage of revenue contributed by ACME Solar on a consolidated basis to the revenue from operations of ACME Cleantech (%) (C=A/B) | 99.84       | 91.15       | 86.12       |

Also see “- 33. We have in the past entered into a number of related party transactions and may continue to enter into related party transactions in the future on an arm’s length basis, and there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties” on page 69.

If our suppliers are unable to provide us the quantity of components that we require, we may have to source components from other suppliers and may have to incur additional expenses and experience delays in our timelines. We may also be required to replace a supplier if its products or services do not meet our safety, quality or performance standards. While there have been no instances where we were not able to receive adequate components from our suppliers or had to change any supplier on account of quality of safety standards in the last three Fiscals and three months ended June 30, 2024, we cannot assure you that such instances will not happen going forward.

**5. We are dependent on our relationship with one of our Promoters, ACME Cleantech and any adverse developments in such relationship may adversely affect our business and reputation.**

One of our Promoters, ACME Cleantech has been our largest supplier of components in the last three Fiscals, which primarily includes solar PV modules. The tables below provides the details of total purchases from ACME Cleantech, our top supplier, purchases from whom constituted more than 50% of our total purchases in the last three Fiscals:

| Name of Supplier | Fiscal 2024        |                                                 | Fiscal 2023        |                                                 | Fiscal 2022        |                                                 |
|------------------|--------------------|-------------------------------------------------|--------------------|-------------------------------------------------|--------------------|-------------------------------------------------|
|                  | Amount (₹ million) | Percentage of Total Purchase <sup>(1)</sup> (%) | Amount (₹ million) | Percentage of Total Purchase <sup>(1)</sup> (%) | Amount (₹ million) | Percentage of Total Purchase <sup>(1)</sup> (%) |
| ACME Cleantech   | 15,043.61          | 79.37                                           | 8,256.57           | 69.84                                           | 9,585.87           | 69.95                                           |

- (1) Total purchases is defined as amount spent by us for procurement of components for our projects and spare parts for O&M services. Historically, ACME Cleantech has been our top supplier as it has been the EPC contractor for majority of our projects especially procuring modules and provided O&M services for majority of our Operational Projects. Our Company pursuant to internal restructuring has taken over the EPC and O&M operations. For further information, see “**Our Business – Project Development Mechanism - Internal Restructuring**” on page 269.

The tables below provides the details of total purchases from ACME Cleantech, our top supplier, purchases from whom constituted more than 50% of our total purchases during three months ended June 30, 2024 and June 30, 2023:

| Name of Supplier | Three months ended June 30, 2024 |                                                 | Three months ended June 30, 2023 |                                                 |
|------------------|----------------------------------|-------------------------------------------------|----------------------------------|-------------------------------------------------|
|                  | Amount (₹ million)               | Percentage of Total Purchase <sup>(1)</sup> (%) | Amount (₹ million)               | Percentage of Total Purchase <sup>(1)</sup> (%) |
| ACME Cleantech   | 5,286.68                         | 84.48%                                          | 2,186.27                         | 77.15%                                          |

- (1) Total purchases is defined as amount spent by us for procurement of components for our projects and spare parts for O&M services. Historically, ACME Cleantech has been our top supplier as it has been the EPC contractor for majority of our projects

especially procuring modules and provided O&M services for majority of our Operational Projects. Our Company pursuant to internal restructuring has taken over the EPC and O&M operations. For further information, see “Our Business – Project Development Mechanism - Internal Restructuring” on page 269.

The trademark “ACME” registered under class 35, “ACME Logo” registered under classes 9 and 38 and “ACME Label” registered under classes 37, 40, 29, 31 and 32, in India (“ACME Trademarks”), have been assigned to us and to ACME Solar Energy for an indefinite period by ACME Cleantech pursuant to an assignment deed dated February 14, 2017, by and among ACME Cleantech, our Company and ACME Solar Energy for a one time consideration of ₹ 1,000.00 each by our Company and ACME Solar Energy. Pursuant to such assignment deed, our Company has the right to use the trademark and logo for our business. We believe our use of the name and logo is vital to our competitiveness and our brand success. Further, we have executed a trademark license agreement dated September 12, 2024, pursuant to which certain trademark has been licensed to MKU Holdings by our Company and our Subsidiary, ACME Solar Energy on non-exclusive, irrevocable, and perpetual basis, and to sublicense the right to use, trademarks, worldwide in relation to the business of manufacturing of solar modules, manufacturing of any kind of electric apparatus for transmission of electricity and power and any business or other activity that is ancillary to, necessary for, incidental to, useful to, arising out of, supportive of related to, connected to or a reasonable extension, development or expansion of any of the foregoing.

In addition, ACME Cleantech has significantly invested in our business, through a combination of equity and debt financing into our Company and our Project SPVs. The table below provides details of the equity investment made by ACME Cleantech in our Company and our Subsidiaries in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

| Particulars                                                        | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 |
|--------------------------------------------------------------------|----------------------------------|----------------------------------|-------------|-------------|-------------|
| Equity investment by ACME Cleantech (including securities premium) | 14,784.68                        | 21,284.58                        | 21,285.58   | 21,284.48   | 21,284.48   |

Note: The decrease in equity investment from Fiscal 2024 to the three months ended June 30, 2024 is due to the conversion of 6,500,000 compulsorily convertible debentures issued by our Company to ACME Cleantech to 6,500,000 non-convertible debentures, which were subsequently redeemed by our Company. For details, see “Capital Structure” beginning on page 111.

The table below provides details of loans received from ACME Cleantech in the last three Fiscals as a percentage total borrowings (consisting of long-term borrowings and short term borrowings):

| Particulars                         | Fiscal 2024        |                                    | Fiscal 2023        |                                    | Fiscal 2022        |                                    | Rate of interest (%) |
|-------------------------------------|--------------------|------------------------------------|--------------------|------------------------------------|--------------------|------------------------------------|----------------------|
|                                     | Amount (₹ million) | Percentage of total borrowings (%) | Amount (₹ million) | Percentage of total borrowings (%) | Amount (₹ million) | Percentage of total borrowings (%) |                      |
| Loans received from ACME Cleantech* | 461.27             | 0.56                               | 15.44              | 0.02                               | 1,731.17           | 2.29                               | Interest free loan** |

\* Transactions entered into in accordance with applicable laws, including after taking necessary consents from the board of directors and/or from the shareholders of ACME Solar Holdings Limited and/or its relevant subsidiaries, and at an arm's length basis.

\*\* The loans are reflected as short term borrowings in our Restated Consolidated Financial Information.

The table below provides details of loans received from ACME Cleantech during the three months ended June 30, 2024 and June 30, 2023 as a percentage total borrowings (consisting of long-term borrowings and short term borrowings):

| Particulars                         | Three months ended June 30, 2024 |                                    | Three months ended June 30, 2023 |                                    | Rate of interest (%) |
|-------------------------------------|----------------------------------|------------------------------------|----------------------------------|------------------------------------|----------------------|
|                                     | Amount (₹ million)               | Percentage of total borrowings (%) | Amount (₹ million)               | Percentage of total borrowings (%) |                      |
| Loans received from ACME Cleantech* | 540.59                           | 0.58                               | 68.73                            | 0.08                               | Interest free loan** |

\* Transactions entered into in accordance with applicable laws, including after taking necessary consents from the board of directors and/or from the shareholders of ACME Solar Holdings Limited and/or its relevant subsidiaries, and at an arm's length basis.

*\*\* The loans are reflected as short term borrowings in our Restated Consolidated Financial Information.*

ACME Cleantech has also supported us, from time to time, with bank guarantees for the security we are required to submit at the time of submitting bids, and has also provided us with support for the performance guarantees and corporate guarantees for our Project SPVs which are required to be in place for the development phase of a project. If we are unable to obtain such support from ACME Cleantech in future, our business and results of operations may be adversely affected.

Also see “ - 33. *We have in the past entered into a number of related party transactions and may continue to enter into related party transactions in the future on an arm’s length basis, and there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.*” on page 69.

Our Company has entered into a non-compete agreement dated June 25, 2024 (“**Effective Date**”) read with the amendment agreement dated October 7, 2024, under which (a) (i) MKU Holdings and ACME Cleantech; and (ii) all the subsidiaries of MKU Holdings and ACME Cleantech, other than our Company and our Subsidiaries, directly and indirectly, will not carry on, or engage in any business that competes with the renewable energy business of our Company and our Subsidiaries, and (b) all the subsidiaries of MKU Holdings and ACME Cleantech, other than our Company and our Subsidiaries shall not undertake EPC and O&M related business other than undertaking supply of modules and wind turbines for the existing renewable energy projects as on the Effective Date which are being implemented by our Company by itself or through our Subsidiaries. Further, under the terms of the non-compete agreement, three wind power projects managed by two companies which are under corporate insolvency resolution process, may be owned, and operated by ACME Cleantech or its affiliates, subject to receipt of necessary approval in this regard in accordance with applicable law and approval from lenders of ACME Cleantech or its affiliates, as applicable.

Further, in order to bring all the capabilities of EPC and O&M operations within the purview of our Company, our Company entered into an agreement for the transfer of employees with ACME Cleantech on June 25, 2024, read with the amendment agreement dated October 9, 2024 (“**Transfer Agreement**”). Pursuant to the Transfer Agreement, certain employees of ACME Cleantech who are engaged in EPC and O&M operations of the projects shall be transferred to the rolls of our Company with effect from November 1, 2024, thus giving us the capability to undertake integrated EPC and O&M operations in-house.

Further, ACME Cleantech had entered into O&M agreements with our project SPVs pursuant to which it provided O&M services for such projects. Our Company and ACME Cleantech entered into a deed of novation dated June 25, 2024, read with the amendment agreement dated October 7, 2024 pursuant to which ACME Cleantech agreed to novate all of its rights, obligations, interest and title under the O&M agreements to our Company.

For further information, see “**History and Certain Corporate Matters – Summary of Shareholders’ Agreement and other agreements**” on page 332.

We cannot assure you that our relationship with ACME Cleantech will not deteriorate in the future. Our credit ratings and ability to raise financing are also affected by ACME Cleantech’s creditworthiness, and the loss of its support could adversely affect our business and reputation.

6. ***Our Company, ACME Cleantech and ACME Solar Energy have received certain office orders from the Directorate of Enforcement in connection with investigations under the Foreign Exchange Management Act, 1999, as amended. MKU Holdings has also received a questionnaire from the Directorate of Enforcement and subsequently, notices from the Assistant Commissioner of Police, Economic Offences Wing, Gurugram and the Office of the Assistant Commissioner of Police, Delhi, Economic Offences Wing in connection with an ongoing investigation being undertaken under the provisions of Prevention of Money Laundering Act, 2002 against IREO group of companies.***

Our Company received various office orders from the Directorate of Enforcement, Chandigarh (“Directorate of Enforcement”) in connection with an investigation under FEMA, directing it to furnish certain information including such as details of bank accounts in which foreign inward / outward remittances were received / sent, FDI received along with details of foreign entities from whom, such investment was received, details of certain prior transactions with third parties including details of agreements with them, fund received and details of projects sold to them, details of exports and imports, among others.

Further, ACME Cleantech also received multiple office orders from the Directorate of Enforcement in connection with an investigation under FEMA, directing it to furnish certain information including such as details of all directors of the company, copies of income tax returns of the company from fiscal 2003, details of all bank accounts of the company and its directors operated from 2002, details of movable and immovable properties within and outside India, certain information regarding overseas investments made, details of all cases booked by the police, income tax department, directorate of enforcement or any other investigative agencies against the company and its directors, and information regarding the status of final award dated January 24, 2019 awarded by the Singapore International Arbitration Center in relation to the arbitration proceedings between ACME Cleantech and CEEG (Shanghai) Solar Science Technology Co Ltd (“**CEEG**”) pursuant to which, ACME Cleantech had contended that CEEG had breached the terms of their agreement to supply modules within the stipulated timelines despite advance payment having been made by ACME Cleantech, among others.

Furthermore, ACME Solar Energy also received an office order dated October 6, 2021 from the Directorate of Enforcement in connection with an investigation under FEMA, directing it to furnish certain information including such as details of its business profile, list of its bank accounts along with the respective bank branch addresses, details of advance export payments received against which export was not completed, details of exports made against which proceeds have not been realised, details of inward remittances received as FDI, and copies of income tax returns and audit reports for the financial year 2017 until the date of such office order. For further details of these matters, see “Outstanding Litigation and Material Developments” on page 500.

While each of our Company, ACME Cleantech and ACME Solar Energy have responded to each of such office orders providing the information sought, there can be no assurance that the Directorate of Enforcement will not seek further documents or information in relation to such investigation. In the event we are unable to adequately address the queries sought by either the Directorate of Enforcement or by any other similar authority, we may be subjected to an adverse ruling or a penalty which may have an adverse impact on our reputation, business, results of operations and financial condition.

Separately, our Promoter MKU Holdings received a questionnaire pursuant to an email dated July 20, 2023 (“**Email**”) from the Directorate of Enforcement seeking certain information in respect of an investigation being undertaken under the provisions of Prevention of Money Laundering Act, 2002 against IREO group of companies (“**IREO**”) alleging money laundering by way of misappropriation and diversion / siphoning of funds, resulting in delay / non-delivery of a project to homebuyers. Given that MKU Holdings had also invested towards this project, the Directorate of Enforcement had sought responses to certain queries including whether the nature of booking made was commercial or residential, the built-up / carpet area and purchase price of the booked unit, the delivery date promised, among others. MKU Holdings, pursuant to its response dated August 1, 2023, addressed the queries set out in the Email.

Thereafter, the Assistant Commissioner of Police, Economic Offences Wing, Gurugram and the Office of the Assistant Commissioner of Police, Delhi, Economic Offences Wing also issued notices to MKU Holdings seeking certain information in relation to the investigation against IREO. MKU Holdings, while responding to these notices and providing the information sought, clarified that a deed of settlement dated September 12, 2022 (“**Deed of Settlement**”) had been entered into pursuant to which, IREO had already paid the initial instalment of the agreed refundable amount along with interest and had also agreed to pay the second instalment along with interest. Pursuant to the Deed of Settlement, it was also agreed that Oberoi Realty Limited (“**ORL**”), who IREO had entered into a MOU with, would undertake the development/redevelopment of the project. MKU Holdings in its response dated February 19, 2024, further confirmed that IREO had represented to it about the development and progress of the project and consequently, MKU Holdings did not have any pending grievance against IREO. Further, MKU Holdings was in a receipt of another notice dated July 4, 2024, under section 91 of Code of Criminal Procedure, 1973, from the Office of the Assistant Commissioner of Police, Delhi, seeking similar information as sought earlier in relation to the investigation against IREO. Subsequently, MKU Holdings had responded to the said notice pursuant to a letter dated July 11, 2024, providing the similar information. For further details of these notices, see “**Outstanding Litigation and Material Developments**” on page 500.

7. *While we have experience in commissioning solar power projects, we do not have experience in commissioning wind, hybrid, FDRE power projects and closed loop pump storage projects. Without prior experience in commissioning such projects we could encounter delays, and unexpected costs, undermining project viability and profitability.*

While we have experience in construction, operating and commissioning solar power projects, we have no prior experience in operating wind power projects, hybrid power projects, FDRE projects and closed loop pump storage projects.

The following table provides an overview of our Under Construction Contracted Projects and Under Construction Awarded Projects, as of the date of this Red Herring Prospectus:

| Particulars                                     | Contracted Capacity (AC) MW | Solar (AC) MW <sup>(3)</sup> | Solar (DC) MWp <sup>(3)</sup> | Wind MW <sup>(3)</sup> | Battery MWh <sup>(3)</sup> |
|-------------------------------------------------|-----------------------------|------------------------------|-------------------------------|------------------------|----------------------------|
| Under Construction Contracted <sup>(1)(4)</sup> | 3,250                       | 3,566                        | 5,068                         | 637                    | 2,756                      |
| Under Construction Awarded <sup>(2) (5)</sup>   | 1,730                       | 2,033                        | 2,948                         | 375                    | 2,000                      |

<sup>(1)</sup> Our Under Construction Contracted Projects comprise those projects for which a power purchase agreement has been signed but the project has not achieved its commercial operation date.

<sup>(2)</sup> Our Under Construction Awarded Projects comprise those projects for which we have received a letter of award (“LOA”) from the off-taker but have not signed a PPA and the contracted capacity details for such projects are as per the LOA.

<sup>(3)</sup> The current configuration of solar, wind and battery energy storage system (“BESS”) has been identified based on our initial assessments and may undergo change on account of change in capital expenditure cost of these resources and will be finalized at the stage of financial closure.

<sup>(4)</sup> Includes two FDRE projects of a contracted capacity of 250 MW and 320 MW to be operated by ACME Surya Power Private Limited and ACME Sun Power Private Limited, respectively.

<sup>(5)</sup> Includes two FDRE projects of a contracted capacity of 400 MW and 280 MW awarded to ACME Gamma Urja Private Limited and ACME Hybrid Urja Private Limited, respectively.

For details in relation to type of our Under Construction Contracted Projects and Under Construction Awarded Projects, please see “**Our Business - Overview**” on page 242.

In addition to the projects mentioned above, we have secured connectivity of 647 MW, which has not been allocated to any projects, and have also applied for connectivity of 3,300 MW for future bids. Further, ACME Cleantech has signed a memorandum of understanding with the Government of Uttar Pradesh for the development of a 600 MW closed loop pump storage project in the state by ACME Urja Two Private Limited, the relevant project SPV. On June 17, 2024, our Company acquired the entire equity share capital of ACME Urja Two Private Limited.

For our renewable energy projects, it typically takes 18 to 24 months from the date of signing of the PPA to the project achieving commercial operations. This timeline may vary and any unforeseen delays or circumstances during the construction and engineering of the project may further extend the time taken to generate revenues from the project. The FDRE and hybrid projects require installation of higher capacity and forecasting of such higher installed capacity in these projects may expose us to higher penalties or wastage of more excess power than we have factored in our model at the time of bidding. Without prior experience in setting up such projects, we may encounter difficulties in commissioning them, which may potentially cause project delays, cost overruns, and sub-optimal performance. Further, such projects require specialized knowledge for efficient installation and maintenance. Unlike solar panels, which have relatively standardized installation procedures, FDRE and hybrid projects require precise engineering and mechanical expertise. Inexperienced handling of components and systems could lead to operational inefficiencies, increased downtime, and heightened safety risks. Further, without prior experience in navigating the legal and regulatory landscape for such projects, we may also encounter delays, compliance issues, and unexpected costs which may undermine viability and profitability from these projects undermining project viability and profitability.

**8. Restrictions on renewable energy equipment imports may increase our costs of procurement of such equipment.**

Certain of our components such as solar PV module and inverters, are imported from China by ACME Cleantech, which is our top supplier. Any restrictions, either from the central or state governments or government-backed corporations, or from any other authorised bilateral or multilateral organisations or because of sanctions, on such imports may adversely affect our business, results of operations and prospects. Due to a massive supply glut in China, module prices in China decreased by around 57% in the two year period ended December 2023 to US\$ 0.12/Wp. (Source: CRISIL Report) While module prices are expected to fall 35% to 40% in Fiscal 2025, the prices in the last quarter of Fiscal 2024 of US\$ 0.20/Wp and US\$ 0.21/Wp of international and domestic modules, respectively, are believed to have bottomed out and prompted the industry to limit capacity additions. (Source: CRISIL Report) Further, since the Ministry of New and Renewable Energy has reinstated the applicability of ALMM, only ALMM enlisted manufacturer can supply modules to government and government-assisted projects. Projects under open access and rooftop solar by private parties are also brought into the ambit of ALMM. (Source: CRISIL Report)

The table below provides details our expenses on equipment primarily originating from China as a percentage of total expenses in the following Fiscals:

| Particulars                                                      | Fiscal 2024        |                                  | Fiscal 2023        |                                  | Fiscal 2022        |                                  |
|------------------------------------------------------------------|--------------------|----------------------------------|--------------------|----------------------------------|--------------------|----------------------------------|
|                                                                  | Amount (₹ million) | Percentage of Total Purchase (%) | Amount (₹ million) | Percentage of Total Purchase (%) | Amount (₹ million) | Percentage of Total Purchase (%) |
| Expenses on imported components primarily originating from China | 12,646.02          | 66.72                            | 7,731.22           | 65.40                            | 7,855.34           | 57.32                            |

The table below provides details our expenses on equipment primarily originating from China as a percentage of total expenses during the three months ended June 30, 2024 and June 30, 2023:

| Particulars                                                      | Three months ended June 30, 2024 |                                  | Three months ended June 30, 2023 |                                  |
|------------------------------------------------------------------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|
|                                                                  | Amount (₹ million)               | Percentage of Total Purchase (%) | Amount (₹ million)               | Percentage of Total Purchase (%) |
| Expenses on imported components primarily originating from China | 4,809.10                         | 76.85                            | 2,046.59                         | 72.22                            |

In the event there are any changes in the government policy, we may have to incur additional expenses on purchase of such equipment, which we may not be able to reflect in our tariff rate, thereby impacting our margins.

**9. Our Joint Statutory Auditors have included certain emphasis of matters in their examination report on the Restated Consolidated Financial Information. There can be no assurance that any similar emphasis of matters will not form part of our financial statements for the future fiscal periods, which could subject us to additional liabilities due to which our reputation and financial condition may be adversely affected.**

The Joint Statutory Auditors have included the following Emphasis of Matters in the examination report on the Restated Consolidated Financial Information:

**Three months period ended June 30, 2023**

*“We draw attention to Note 2 to the accompanying Special Purpose Consolidated Interim Financial Statements, which describes the basis of its preparation. The Special Purpose Consolidated Interim Financial Statements have been prepared by the Holding Company’s management to enable preparation of Restated Consolidated Financial Information of the Group for the quarter ended 30 June 2023 and for the purpose of its inclusion as comparative financial information in the Special Purpose Consolidated Interim financial statements of the Group for the quarter ended 30 June 2024, which in turn will be used for the preparation of Restated Consolidated Financial Information of the Group for the quarter ended 30 June 2024, to be included in the Red Herring Prospectus (‘RHP’) and Prospectus which is to be filed by the Holding Company with Securities and Exchange Board of*

India, National Stock Exchange of India Limited, BSE Limited and Registrar of Companies, Delhi and Haryana as per the requirements of Section 26 of Part I of Chapter III of the Act, read with the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended from time to time ('SEBI ICDR Regulations') in connection with the proposed Initial Public Offer ('IPO') of equity shares of the Holding Company. Therefore, these Special Purpose Consolidated Interim Financial Statements may not be suitable for any other purpose. Our report is issued solely for the aforementioned purpose, and accordingly, should not be used, referred to or distributed for any other purpose or to any other party without our prior written consent. Further, we do not accept or assume any liability or any duty of care for any other purpose for which or to any other person to whom this report is shown or into whose hands it may come without our prior consent in writing. Our opinion is not modified with respect to this matter."

There is no impact of the above emphasis of matter on the business and financial condition of our Company.

### **Fiscal 2023**

"We draw attention to note 44(B)(iii) of the accompanying consolidated financial statements which describes that the Board of Directors in its meeting held on 15 June 2023 have approved and subsequently filed the composite scheme of arrangement ("Scheme") with the Hon'ble National Company Law Tribunal for their approval which involves demerger of solar and wind business (demerged undertaking) of the ACME Solar Holdings Private Limited into Acme Cleantech Solutions Private Limited ('the Resulting Company') on a going concern basis and amalgamation of the Company with its remaining business with and into M/s MKU Holding Private Limited (the "Transferee Company") and upon such Scheme becoming effective the ACME Solar Holdings Private Limited shall stand dissolved without further process of winding up. Our opinion is not modified in respect of this matter."

Subsequently, our Board in its meeting held on May 27, 2024, approved the resolution to withdraw the scheme and the National Company Law Tribunal, Chandigarh pursuant to an order dated June 7, 2024 allowed the petition to withdraw the scheme and there is no impact of the withdrawal of the scheme on the business and financial condition of our Company.

"We draw attention to Note 44(B)(i) to the accompanying consolidated financial statements, related to the recoverability of dues aggregating to Rs.1,081.73 million as at 31 March 2023 from Southern Power Distribution Company of Andhra Pradesh Limited, in relation to the alleged excess installed DC capacity matter that is currently under dispute and pending before the Andhra Pradesh Electricity Regulatory Commission for resolution. Based on internal assessment and legal opinion obtained, the management believes that the aforesaid dues are fully recoverable and accordingly, no adjustment is required in the accompanying consolidated financial statements. Our opinion is not modified in respect of this matter."

### **Fiscal 2022**

"We draw attention to Note 43(B)(i) to the accompanying consolidated financial statements, related to the recoverability of dues from Southern Power Distribution Company of Andhra Pradesh Limited by certain subsidiary companies, as further detailed in the said note, which are currently under litigation before the Hon'ble Supreme Court of India. Based on internal assessment and legal opinion obtained, the management is of the view that the aforesaid dues are fully recoverable and accordingly, no adjustment is required in the accompanying consolidated financial statements of the Group. Our opinion is not modified in respect of this matter."

Subsequently, by way of its order dated June 19, 2024, the Andhra Pradesh Electricity Regulatory Commission has directed the Southern Power Distribution Company of Andhra Pradesh Limited to inter alia pay the outstanding amounts due to certain of our Subsidiaries in 12 instalments. Accordingly, there is currently no impact from the ongoing litigations on the business and financial condition of our Company.

The opinion of our Joint Statutory Auditors is not modified in respect of these matters. There are no qualifications or adverse remarks per the requirements of the Companies (Auditor's Report) Order, 2020, in the auditor's report pertaining to the audited consolidated financial statements for the financial years ended March 31, 2024, March 31, 2023, and March 31, 2022. There can be no assurance that any similar emphasis of matters will not form part of our financial statements for the future fiscal periods, which could subject us to additional liabilities due to which our reputation and financial condition may be adversely affected.

**10. We incurred loss for the year of ₹ 31.74 million in Fiscal 2023. We cannot assure you that going forward we will continue to generate profits which may impact our business and results of operations.**

We incurred a loss for the year of ₹ 31.74 million in Fiscal 2023. During Fiscal 2022, while our loss before exceptional items was (₹ 2,271.37) million, however, we generated a profit for the year of ₹ 620.10 million primarily on account of exceptional items, i.e., divestment of 510 MW of projects to investors, and such exceptional items amounted to ₹ 3,295.63 million in Fiscal 2022.

The table below sets forth certain of our financial information for the years/periods indicated:

| (₹ million)                            |                                  |                                  |                 |                |               |

| <b>Profit/(Loss) for the year</b>      | <b>13.89</b>                     | <b>823.31</b>                    | <b>6,977.81</b> | <b>(31.74)</b> | <b>620.10</b> |

*Note: In Fiscal 2024, we reported a profit for the year of ₹ 6,977.81 million due to an increase in exceptional items, which amounted to ₹ 7,486.91 million. This increase is primarily attributable to an increase in net gain on sale of assets/investments to ₹ 7,212.30 million in Fiscal 2024 from ₹ 225.67 million in Fiscal 2023 since we divested 369 MW of projects to an investor during Fiscal 2024; and an increase in contingent consideration related to investment disposed in earlier years to ₹ 274.61 million in Fiscal 2024 from ₹ 168.69 million in Fiscal 2023. For details, see “Financial Information” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 411 and 536, respectively.*

Further, certain of our Subsidiaries have incurred loss for the year in the last three Fiscals and during the three months ended June 30, 2024 and June 30, 2023:

\* Did not incurred losses during the relevant period/Fiscal

<sup>#</sup>Our Company proposes to utilize an aggregate amount of ₹17,950.00 million from the Net Proceeds towards investment in our Subsidiaries for repayment / prepayment, in full or in part, of certain outstanding borrowings availed by these Subsidiaries. For details, see “Objects of the Offer” beginning on page 125.

The table below provides details of our net debt to equity ratio, and trade receivable days outstanding during the three months ended June 30, 2024 and June 30, 2023 and the last three Fiscals:

| Particulars                             | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 |
|-----------------------------------------|----------------------------------|----------------------------------|-------------|-------------|-------------|
| Net debt to equity ratio <sup>(1)</sup> | 3.89                             | 3.68                             | 2.66        | 3.85        | 3.56        |
| Trade receivable days <sup>(2)</sup>    | 112*                             | 140*                             | 116         | 197         | 228         |

<sup>(1)</sup> Net debt to equity is calculated as net debt for the year (calculated as short-term borrowings plus long term borrowings less cash and cash equivalents and other bank balances) divided by total equity attributable to shareholders of the holding company. The increase in net debt to equity ratio as of June 30, 2024 in comparison to Fiscal 2024 is mainly on account of repayment of compulsorily convertible debentures of ₹ 6,500.00 million to ACME Cleantech, which resulted in a reduction in the total equity attributable to Shareholders of our Company.

<sup>(2)</sup> Trade receivable days is calculated as Trade Receivables divided by Revenue from Operations multiplied by 365 (number of days in a year). For the three months ended June 30, 2024 and June 30, 2023, trade receivable days is calculated as Trade Receivables divided by Revenue from Operations multiplied by 91 (number of days in the relevant period).

\* Not annualized

We cannot assure you that going forward, we will not incur any losses, which could adversely affect our business and results of operations.

**11. There are outstanding legal proceedings involving our Company, Subsidiaries, and Promoters. Further, we have in the past made applications for compounding of certain non-compliances under Foreign Exchange Management Act and condonation of delay under Companies Act.**

There are outstanding legal proceedings against our Company, Promoters, and Subsidiaries, which are pending at various levels of adjudication before various courts, tribunals and other authorities.

A summary of such outstanding legal proceedings involving our Company, Subsidiaries, and Promoters as on the date of this Red Herring Prospectus is set out below:

| Category of individuals/entities | Criminal proceedings | Tax proceedings | Statutory or regulatory actions | Disciplinary actions by the SEBI or Stock Exchanges against our Promoters in the last five years, including outstanding action | Material civil litigations as per the Materiality Policy | Aggregate amount involved* (in ₹ million) |

\* To the extent quantifiable.

<sup>\$</sup>The Office of the Labour Officer, Rajgarh had filed a complaint dated September 20, 2020, under violation of section 12(1) and section 22 of the Minimum Wages Act, 1948, against one of our Corporate Promoters, ACME Cleantech, and one of our Individual Promoters, Manoj Kumar Upadhyay and ACME Solar Energy (M.P.). Therefore, whilst both ACME Cleantech and Manoj Kumar Upadhyay are named in the complaint, this matter has been accounted for only once. Further, for the purpose of calculating the aggregate amount involved, the monetary liability, to the extent quantifiable, has been taken into account only once. For further details, see “**Outstanding Litigation and Material Developments**” beginning on page 500.

<sup>@</sup>Includes nine writ petitions filed by the Company, one writ petition filed by one of our Corporate Promoters and five writ petitions filed by our Subsidiaries challenging various provisions of direct and indirect tax laws, and one appeal filed by one of our Corporate Promoters before the Customs Excise & Service Tax Appellate Tribunal towards claim of service tax refund. For further details, see “**Outstanding Litigation and Material Developments**” beginning on page 583.

<sup>#</sup> Includes a tax matter involving ACME Cleantech, for which summons have been issued by the Assistant Director of Income Tax Investigations. For details, please see “**Outstanding Litigation and Material Developments – IV. Litigation involving or Promoters – A. Litigation filed against our Promoters – Outstanding actions by regulatory and statutory authorities**” beginning on page 599.

As on the date of this Red Herring Prospectus, there are no litigation involving the Group Companies which may have a material impact on our business, and results of operations.

Further, as at March 31, 2024 and the three months ended June 30, 2024, we have not considered any provisions for any possible liabilities arising out of these litigation and have accordingly not made any such provisions. In addition, we cannot assure you that no additional liability will arise out of these proceedings. Decisions in such proceedings adverse to our interests may have an adverse effect on our reputation, business, financial condition, results of operations and cash flows.

For further information, see “**Outstanding Litigation and Other Material Developments**” at page 583.

Our Company had also in the past, made an application dated June 27, 2022, for compounding of non-compliance under Section 9(6) of Foreign Exchange Management (Non-debt Instruments) Rules, 2019 for delay in receipt of deferred consideration in connection with divestment of its shareholding in one of its erstwhile subsidiaries. Pursuant to an order dated February 23, 2023, issued by the RBI, the non-compliance was compounded with an aggregate penalty of ₹0.05 million to be paid by us. Additionally, one of our Subsidiaries, ACME Phalodi, had filed an application dated August 18, 2021, seeking condonation of application under Companies Act for delay of

1,143 days in filing the required e-form MGT-14 within 30 days of the board meeting. Further, pursuant to an order dated November 2, 2021, issued by the Deputy Director, Ministry of Corporate Affairs, a non-compliance in relation to a delayed filing of e-form MGT-14 was condoned. Any such repeated non-compliances may be detrimental to the interest of our Company and may have a material adverse effect on our reputation as well as results of operations. We cannot assure that there will not be any fines imposed on us for non-compliances in future.

**12. Any constraints in the availability of the electricity grid, including our inability to obtain access to transmission lines in a timely and cost-efficient manner, could adversely affect our business, results of operations and cash flows.**

We rely on transmission grids and other transmission and distribution facilities that are owned and operated by the respective state governments or public entities who are our customers. If construction of our renewable energy projects outpaces transmission capacity of electricity grids, we may be dependent on the construction and upgrade of grid infrastructure by the relevant state government or public entities. We cannot assure you that the relevant government or public entities will do so in a timely manner, or at all. The curtailment of our power projects' output levels will reduce our electricity output and limit operational efficiencies, which in turn could have an adverse effect on our business, results of operations and cash flows.

Further, we are responsible for establishing last mile access to available transmission networks, for which we may engage contractors to build transmission lines and other related infrastructure. Any delay in this last mile access will delay our commissioning of projects and may result in liquidation of performance bank guarantees submitted on per day basis and on complete liquidation, the non-commissioned capacity is likely to be terminated by offtaker. For example, the transmission lines for certain of our Under Construction Contracted Portfolio (ACME Raisal, ACME Dhampur, ACME Deogarh and ACME Phalodi, each with 300 MW contracted capacity) got delayed due to constraints on overhead lines imposed by the Supreme Court of India pursuant to its order dated April 19, 2021. Further, any delay in obtaining right of way passage may also delay the construction of transmission line.

Further, Ministry of New and Renewable Energy, Government of India has granted 'Must Run' status to renewable power projects, which means evacuation of power from solar and wind power plants should not be curtailed for factors other than on account of grid safety or safety of equipment or personnel. With increased renewable energy adoption, the grid stability may get impacted and we may have to stop producing electricity during the period when electricity cannot be transmitted. Further, we have faced certain instances in the state of Rajasthan, Andhra Pradesh, Telangana and Karnataka where the transmission of power got impacted on account of grid failure or other grid related issues, however, there was no financial impact. Our PPAs generally do not contain "take-or-pay" provisions and as a result any grid breakdown will mean that we cannot supply electricity generated by us which will result in non-payment of tariffs by the off-taker for that period and no recourse on our part against the off-taker. Such events outside of our control could reduce the net power generation of our solar power projects and adversely affect our revenues. To the extent that any of the foregoing affects our ability to sell electricity to the grid, our business, results of operations and cash flows could be adversely affected.

**13. A certain portion of the land on which our renewable power projects are or will be located may require certain approvals and permits in order for us to use such land for developing such projects. In the event we are unable to obtain such approvals and permits, our business, results of operations, cash flows and financial condition could be adversely affected.**

Some of our renewable power projects are located, or will be located, on agricultural land, land owned by the state governments or land owned by private parties. The land title transfer process is dependent on the type of land on which the renewable power projects are, or will be, located, and the policies of the relevant state governments in the places in which such land is located. In the case of land acquired from private parties which is agricultural land, the transfer of such land from agriculturalists to non-agriculturalists such as us and the use of such land for non-agricultural purposes may require an order from the relevant state land or revenue authority allowing such transfer or use. For more details, see "**Government and Other Approvals**" on page 609. In addition, we are yet to enter into lease deeds for majority of our Under Construction Awarded Projects and certain of our Under Construction Contracted Projects. For further information, see "**Our Business – Overview**" on page 242.

We cannot assure you that the relevant approvals will be received, or that lease or sub-lease deeds will be executed in a timely manner, such that the operation of our solar power projects will be unaffected. In certain cases, any delay in the construction or commissioning of a power project may result in termination of the lease. Further, the terms of lease and sub-lease agreements may not be coterminous with the lifetime of the power projects.

Accordingly, we may have to obtain extensions of the terms of such leases and sub-leases for the remainder of the terms of the corresponding PPAs. In the event that the relevant third party does not renew the lease or sub-lease agreements, we may be forced to remove our equipment at the end of the lease and our business, results of operations, cash flows and financial condition could be adversely affected. While there have been no instances in the last three Fiscals and the three months ended June 30, 2024, where we were not able to obtain relevant approvals from regulatory authorities or enter into lease deeds in a timely manner which results into delay in construction or commissioning of power projects, we cannot assure you that, going forward we will be able to obtain relevant approvals or enter into lease deeds in a timely manner which could adversely impact our business, results of operations, cash flows and financial condition.

In general, land required for a renewable energy projects needs to be contiguous. However, certain portion of the land on which our renewable power projects are or will be located may not be contiguous due to various reasons including lands under litigation, sand dunes, water channels/bodies, railway tracks, high transmission lines, forest land, revenue issues and landowner's unwillingness to lease. If we are unable to obtain contiguous parcels of land, we may not be able to set up our projects in a manner we desire and our business and operations may be adversely affected.

**14. *There is a limited pool of potential purchasers of utility scale quantities of electricity and the possibility that counterparties to our PPAs may not fulfill their obligations could expose us and our power projects to risks which could have an adverse effect on our business, results of operations and cash flows.***

Since the transmission and distribution of electricity are controlled by the central and state utility providers in India, there is a concentrated pool of potential buyers for grid connected utility scale electricity generated by our projects, which may restrict our ability to negotiate favorable terms under new PPAs and could affect our ability to find new customers for the electricity generated by our plants. Further, if the financial condition of these central and state utility providers deteriorates or other policies to which they are currently subject and that compels them to source renewable energy change, demand for electricity produced by our plants could be negatively affected.

Additionally, there may be delays associated with collection of receivables from our off-takers. Although the central and state governments in India have taken steps for improving the financial health and operational efficiency of state-owned discoms across the country through schemes such as Ujwal DISCOM Assurance Yojana (Source: CRISIL Report), there can be no assurance that the utility companies that are currently our customers will pay our tariffs on time or at all as stipulated in the PPAs. For example, prior to June 2022, we faced instances where certain off-takers were not making timely payments within the due date as per the provisions of the PPA and consequent late payment surcharges on delayed payments. Further, certain of the off-takers also did not open letter of credit as required under the PPA for payments security mechanism. Subsequently, we along with other renewable power generator companies raised this issue with the Ministry of New and Renewable Energy and Ministry of Power, Government of India, which took the cognizance of this issue and notified the LPS Rules on June 3, 2022, wherein stringent measures and actions were enforced against non-payment of dues by off-takers. Consequent to the LPS Rules being notified, the relevant off-takers paid their outstanding dues and are now making timely payments.

The following table sets forth our trade receivables and trade payables during Fiscal 2024, 2023 and 2022 and three months ended June 30, 2024 and June 30, 2023:

| Particulars                      | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 |
|----------------------------------|----------------------------------|----------------------------------|-------------|-------------|-------------|
| Trade Receivables (in ₹ million) | 3,806.90                         | 5,692.80                         | 4,208.85    | 6,992.97    | 9,314.38    |
| Trade Receivable Days            | 112*                             | 140*                             | 116         | 197         | 228         |

Trade receivables days is calculated Trade Receivables divided by Revenue from Operations multiplied by 365 (number of days in a year). For the three months ended June 30, 2024 and June 30, 2023, trade receivable days is calculated as Trade Receivables divided by Revenue from Operations multiplied by 91 (number of days in the relevant period).

\* not annualized

**15. *Majority of our Operational Projects are located in the states of Andhra Pradesh, Rajasthan and Telangana which contributed 79.81%, and 56.23%, of our revenue from operations in the three months ended June 30, 2024 and June 30, 2023, respectively and 63.22%, 54.73% and 55.54% of our revenue from operations during Fiscal 2024, 2023 and 2022, respectively. Any change in governmental policies or***

**occurrence of natural disasters in any of these states may impact our impact on our business, results of operations and cash flows.**

As on the date of this Red Herring Prospectus, all of our Operational Projects are solar projects. According to the CRISIL Report, states like Gujarat, Rajasthan, Madhya Pradesh, Andhra Pradesh, Karnataka, and Tamil Nadu offer more solar irradiance as compared to other parts of India which makes them desirable for installing solar projects. As of June 30, 2024, 18 out of our 28 Operational Projects are located in the states of Andhra Pradesh, Rajasthan, and Telangana representing 85.07% of our total Operational Projects capacity. The table below sets forth our revenues generated from projects in these states and as a percentage of our revenue from operations for the Fiscals indicated:

| State          | Fiscal 2024                            |                                              | Fiscal 2023                            |                                              | Fiscal 2022                            |                                              |

|                | Revenue from operations<br>(₹ million) | Percentage of revenue from operations<br>(%) | Revenue from operations<br>(₹ million) | Percentage of revenue from operations<br>(%) | Revenue from operations<br>(₹ million) | Percentage of revenue from operations<br>(%) |
| Andhra Pradesh | 1,994.78                               | 15.12                                        | 1,989.05                               | 15.36                                        | 1,901.77                               | 12.78                                        |
| Rajasthan      | 3,719.98                               | 28.20                                        | 2,499.85                               | 19.31                                        | 2,215.27                               | 14.89                                        |
| Telangana      | 2,625.84                               | 19.90                                        | 2,598.06                               | 20.06                                        | 4,146.85                               | 27.87                                        |
| <b>Total</b>   | <b>8,340.60</b>                        | <b>63.22</b>                                 | <b>7,086.96</b>                        | <b>54.73</b>                                 | <b>8,263.89</b>                        | <b>55.54</b>                                 |

The table below sets forth our revenues generated from projects in these states and as a percentage of our revenue from operations for the three months ended June 30, 2024 and June 30, 2023:

| State          | Three months ended June 30, 2024    |                                           | Three months ended June 30, 2023    |                                           |
|----------------|-------------------------------------|-------------------------------------------|-------------------------------------|-------------------------------------------|
|                | Revenue from operations (₹ million) | Percentage of revenue from operations (%) | Revenue from operations (₹ million) | Percentage of revenue from operations (%) |
| Andhra Pradesh | 506.33                              | 16.35%                                    | 568.57                              | 15.40%                                    |
| Rajasthan      | 1,288.66                            | 41.62%                                    | 773.83                              | 20.96%                                    |
| Telangana      | 676.28                              | 21.84%                                    | 733.24                              | 19.86%                                    |
| <b>Total</b>   | <b>2,471.28</b>                     | <b>79.81%</b>                             | <b>2,075.63</b>                     | <b>56.23%</b>                             |

Our operations are susceptible to local and regional factors, such as accidents, political factors, economic and weather conditions, natural disasters, and demographic and population changes, the outbreak of infectious diseases and other unforeseen events and circumstances.

The table below provides details of the instances of natural disasters which impacted our operations in the last three Fiscals and in the three months ended June 30, 2024:

| S. No. | Name of State | Name of Company                                 | Place of incident / Site             | Category   | Fiscal      | Brief Description                                                                      | Estimated loss (₹ million) |
|--------|---------------|-------------------------------------------------|--------------------------------------|------------|-------------|----------------------------------------------------------------------------------------|----------------------------|
| 1      | Rajasthan     | ACME Jodhpur & Rewa Solar Power Private Limited | Bhadla Rajasthan                     | Wind Storm | Fiscal 2022 | 220 KV transmission line- 1 tower collapsed due to wind storms                         | 7.55                       |
| 2      | Rajasthan     | ACME Heergarh Powertech Private Limited         | Village Badisid, Jodhpur, Rajasthan. | Wind Storm | Fiscal 2024 | Modules and structures were damaged due to high speed wind storm – 119 modules damaged | 2.02                       |
| 3      | Rajasthan     | ACME Heergarh Powertech Private Limited         | Village Badisid, Jodhpur, Rajasthan. | Wind Storm | Fiscal 2024 | Modules and structures were damaged due to high speed wind storm – 343 modules damaged | 6.24                       |

| S. No. | Name of State | Name of Company                                 | Place of incident / Site | Category       | Fiscal                           | Brief Description                                                                       | Estimated loss (₹ million) |
|--------|---------------|-------------------------------------------------|--------------------------|----------------|----------------------------------|-----------------------------------------------------------------------------------------|----------------------------|
| 4      | Rajasthan     | ACME Jodhpur Solar Power Private Limited        | Bhadla Rajasthan         | Cyclonic Storm | Fiscal 2024                      | Damaged erected modules and MMS structures due to cyclonic storm- 2,640 module damaged. | 24.07                      |
| 5      | Rajasthan     | ACME Jodhpur & Rewa Solar Power Private Limited | Bhadla Rajasthan         | Wind Storm     | Fiscal 2024                      | 220 KV transmission line-1. Three towers collapsed due to wind storms                   | 7.49                       |
| 6      | Rajasthan     | ACME Jodhpur & Rewa Solar Power Private Limited | Bhadla Rajasthan         | Wind Storm     | Three months ended June 30, 2024 | 220 KV transmission line- 1. Two towers collapsed due to wind storms                    | 5.54                       |

Any disruptions, damage or destruction of such projects may adversely affect our ability to meet our contractual obligations and customers' demand and the loss of any one of our key customers or a significant reduction in demand from such customers could adversely affect our business, results of operations and cash flows.

**16. We incur substantial expenditure and may require additional capital and financing in the future for our projects. Our operations could be adversely affected if we are unable to obtain such capital and financing in a timely manner.**

We have a capital intensive business and incur significant capital expenditure in commissioning new renewable energy projects as well as upgrading and improving our existing projects. The following table sets forth details of the capital expenditure incurred by our Company in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

| Particulars                   | (in ₹ million)                   |                                  |                  |                  |                  |
|-------------------------------|----------------------------------|----------------------------------|------------------|------------------|------------------|
|                               | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024      | Fiscal 2023      | Fiscal 2022      |
| Freehold land addition        | -                                | -                                | 24.91            | 9.51             | 87.56            |
| Plant and equipment addition* | 10,219.60                        | 3,456.18                         | 27,488.32        | 17,967.64        | 14,982.98        |
| Vehicles addition             | -                                | -                                | -                | 0.29             | -                |
| <b>Total</b>                  | <b>10,219.60</b>                 | <b>3,456.18</b>                  | <b>27,513.23</b> | <b>17,977.44</b> | <b>15,070.54</b> |

\*Includes capital work in progress

Further, as of June 30, 2024, our Company has estimated that it will incur a total of ₹ 384,653.81 million as capital expenditure for our Under Construction Contracted Projects and Under Construction Awarded Projects (based on the estimated project cost as per the TUV Reports minus the amounts already incurred in setting up the projects as of June 30, 2024). In order to meet our capital expenditure requirements, we may be required to source additional capital through the incurrence of debt or the issuance of equity and debt securities or a combination of both. This may cause our interest and debt repayment obligations to increase, and could adversely affect our results of operations. Further, we may be subject to additional covenants, which could require us to obtain the respective lenders' consent prior to carrying out certain activities (including certain corporate actions) and entering into certain transactions. An inability to obtain such financing in a timely manner could lead to delays in our upgradation or expansion plans and may have an adverse effect on our growth, business and operations.

**17. We may face significant risks in relation to upgrading and improving our renewable energy projects that could result in reduced power generation and increased expenses in the maintenance of our renewable energy projects.**

Our renewable energy projects require periodic upgrading and improvement including undertaking “repowering” in which we install additional modules to counter module degradation. Changes in technology and module degradation may require us to incur additional capital expenditure to upgrade our projects. The table below provides details of the amount spent by us on maintenance and upgradation of plant and equipment at our projects in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

| (₹ million)                                   |                                  |                                  |               |               |               |
|-----------------------------------------------|----------------------------------|----------------------------------|---------------|---------------|---------------|
| Particulars                                   | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024   | Fiscal 2023   | Fiscal 2022   |
| Repair and maintenance of plant and equipment | 6.44                             | 7.35                             | 51.10         | 31.35         | 41.28         |
| Operation and maintenance expenses            | 120.62                           | 142.52                           | 568.32        | 536.25        | 581.73        |
| <b>Total</b>                                  | <b>127.06</b>                    | <b>149.87</b>                    | <b>619.42</b> | <b>567.60</b> | <b>623.01</b> |

The development and implementation of such technology entails technical and business risks and significant costs. Any unexpected operational or mechanical failure, including failure associated with breakdowns and forced outages, and any decreased operational performance, could reduce our facilities’ generating capacity to below expected levels and reduce our revenues as a result of generating and selling less power. Unanticipated capital expenditure associated with maintaining, upgrading or repairing our facilities may also reduce profitability, especially since we will not be able to pass on any unexpected costs in relation to the projects to our off-takers. While there have been no material equipment malfunction or failure during the last three fiscals and the three months ended June 30, 2024, we cannot assure you that such instances will not arise in the future.

If we fail to properly operate and maintain our solar or other renewable energy projects, such projects may experience decreased performance, reduced useful life or shut downs. We may also experience an increase in the cost of operating a project on account of several factors including costs related to labor, equipment, insurance and taxes. If we cause any damage to third parties while operating or maintaining our projects, we may become liable for the consequences of any resulting damage. While there have been no such instances in the last three Fiscals and the three months ended June 30, 2024, we cannot assure you that such instances will not happen in future. We may also experience equipment malfunction or failure, leading to unexpected maintenance needs, unplanned outages or other operational issues. In addition, inconsistencies in the quality of solar panels, PV modules, balance-of-system equipment or maintenance services for our solar power projects may affect the system efficiency of such projects. While our solar panels, inverters, modules and other system components are generally covered by manufacturers’ warranties, which are typically for five to 25 years any failure to operate as specified may require us to make a claim against the manufacturer under such warranty. However, the warranties may not be sufficient to cover all of our expense and losses. In addition, these manufacturers could cease operations and may no longer honor the warranties, fully, in part or on time, which would require us to incur the costs associated with replacing or repairing the faulty component.

To the extent that any of the foregoing affects our ability to sell electricity to the grid or central or state transmission units, or we incur increased costs in relation to operating and maintaining our renewable energy projects, our business, financial condition and results of operations could be adversely affected.

**18. We are exposed to risks associated with time and cost overruns, delays or under-estimations of our costs of construction, which may affect the economic viability of our renewable energy projects.**

Submitting a competitive bid for a renewable energy project requires extensive research, planning, and due diligence and capacity to operate with low operating margins for sustained period of time. If we miscalculate or misjudge our tariff rates and incorrectly factor the costs of construction, development, land acquisition and price of the components, the economics of successful bids may be affected and the projects may become economically unviable. For instance, we estimate prices for system components and factor these costs into our bids, and if these prices vary from what we had anticipated, the profitability of our successful bids maybe adversely affected. Our suppliers may attempt to renegotiate supply contracts, if there is an increase in component prices, which may also increase our capital expenditure. We may also be required to incur unanticipated capital expenditure for

interconnection rights, regulatory approvals, preliminary engineering permits, and legal and other expenses which could adversely affect the profitability of the projects and, as a result, our profitability.

Construction of our renewable energy projects may be adversely affected by circumstances outside our control, including inclement weather, adverse geological and environmental conditions, failures to receive regulatory approvals on schedule or third party delays in providing supplies and other materials. Changes in project plans or designs, or defective or delayed execution, may increase our costs from our initial estimates. Moreover, local political changes as well as demonstrations or protests by local communities or special interest groups could result in, or contribute to, project development time and cost overruns for us. In Fiscal 2023, one of our Project SPVs, ACME Heergarh had not commissioned the project within the scheduled timelines. The table below sets forth liquidated damages paid by ACME Heergarh for failing to commission its project within the scheduled timelines in Fiscal 2023:

| Name of the SPV | Amount of liquidated damages<br>(₹ million) |
|-----------------|---------------------------------------------|
| ACME Heergarh   | 43.96                                       |

While there have been no other time and cost overruns for our project completion in the three months ended June 30, 2024 and Fiscals 2024, 2023 and 2022, we cannot assure you that such instances will not arise in the future. We may not be able to recover any losses in connection with construction cost overruns or delays. Our PPAs require that we bring renewable energy power projects to commercial operation by certain dates contained in the PPAs. If we are unable to adhere to such stipulated timelines for reasons other than as specifically contemplated in the PPAs, it could result in penalties, including reducing the stipulated tariff, us paying liquidated damages to the off-taker in proportion to the amount of power not supplied, or granting the off-taker the right to draw on performance bank guarantees provided by us.

The occurrence of any of the events discussed above could results in us failing to generate our expected return from our projects and adversely affect our business and results of operations.

**19. Our in-house engineering, procurement and construction (“EPC”) operations expose us to certain risks such as price fluctuation in the cost of equipment and components to develop our renewable energy projects.**

We conduct EPC operations which expose us to certain risks such as price fluctuation in the cost of equipment and components to develop our power projects. Additionally, we are primarily responsible for all equipment and construction defects. While we typically obtain warranties from our equipment suppliers, we are responsible for initiating claims against equipment suppliers during the warranty period and which could cause delays in the completion of our renewable energy projects. We cannot assure you that we will be successful with such claims against our suppliers or that these claims will be resolved in a timely manner, or at all.

The table below sets forth warranty claims received by us for equipment supplies as a percentage of our revenue from operations for the years indicated:

| Name of the<br>Subsidiary                             | Fiscal 2024           |                                                       | Fiscal 2023           |                                                       | Fiscal 2022           |                                                       |
|-------------------------------------------------------|-----------------------|-------------------------------------------------------|-----------------------|-------------------------------------------------------|-----------------------|-------------------------------------------------------|
|                                                       | Amount<br>(₹ million) | Percentage<br>of Revenue<br>from<br>Operations<br>(%) | Amount<br>(₹ million) | Percentage<br>of Revenue<br>from<br>Operations<br>(%) | Amount (₹<br>million) | Percentage<br>of Revenue<br>from<br>Operations<br>(%) |
| Warranty claims received by us in relation to modules |                       |                                                       |                       |                                                       |                       |                                                       |
| Eminent Solar Power<br>Private Limited*               | 2.00**                | 0.02%                                                 | -                     | -                                                     | -                     | -                                                     |
| Grahati Solar Energy<br>Private Limited               | 0.40**                | 0.00%                                                 | -                     | -                                                     | -                     | -                                                     |

\* An erstwhile subsidiary of our Company.

\*\*While the claims of ₹ 2.00 million and ₹ 0.40 million were made in Fiscal 2022 and Fiscal 2023, however, settlement of claim was finalized in Fiscal 2024 and accordingly they have been reflected in Fiscal 2024. In addition, we have also signed a warranty settlement agreement on March 28, 2024 with the supplier for 3.2 MW of additional module.

The table below sets forth warranty claims received by us for equipment supplies as a percentage of our revenue from operations for the periods indicated:

| Particulars                                           | Three months ended June 30, 2024 |                                                 | Three months ended June 30, 2023 |                                                 |
|-------------------------------------------------------|----------------------------------|-------------------------------------------------|----------------------------------|-------------------------------------------------|
|                                                       | Amount<br>(₹ million)            | Percentage of<br>Revenue from<br>Operations (%) | Amount<br>(₹ million)            | Percentage of<br>Revenue from<br>Operations (%) |
| Warranty claims received by us in relation to modules | -                                | -                                               | -                                | -                                               |

- 20. We may not be able to identify or correct defects or irregularities in title to the properties which we own, lease or intend to acquire in connection with the development of our solar power projects as land title in India can be uncertain. Additionally, certain land on which our solar power projects are located or will be located may be subject to third party rights or onerous conditions which may adversely affect its use.**

There is no central title registry for immovable property in India and the documentation of land records in India has not been fully digitized. Property records in India are generally maintained at the state and district level and in local languages, and are updated manually through physical records. Therefore, property records may not be available online for inspection, may be illegible, untraceable, and incomplete, may not have been updated, may be inaccurate in certain respects, or may have been kept in poor condition, which may impede title investigations or our ability to rely on such property records. Title to land in India is often fragmented, and in many cases, land may have multiple owners. Title may also suffer from irregularities, such as non-execution or non-registration of conveyance deeds and inadequate stamping, and may be subjected to encumbrances that we are unaware of and that may not be apparent on the face of the relevant documentation. Any defects in, or irregularities of, title may result in a loss of development or operating rights over the land, which may prejudice the success of our power projects and require us to write off substantial expenditure in respect of our renewable energy projects. From time to time, we have been involved in litigation including in relation to proceedings by third parties relating to mutation and encroachment of the land parcels on which our projects are located. For details in relation to certain outstanding litigation pertaining to land parcels, see “**Outstanding Litigation and Other Material Developments**” on pages 591, 592, 593 and 594, respectively.

Improperly executed, unregistered or insufficiently stamped conveyance instruments in a property’s chain of title, unregistered encumbrances in favor of third parties, rights of adverse possessors, ownership claims of family members of prior owners or third parties, or other defects that a purchaser may not be aware of can affect title to a property. We may also acquire land from power of attorney holders, who are authorized to transfer land on behalf of the owners of such land. We cannot assure you that any such power of attorney that has been granted is valid or entitles the power of attorney holder to exercise the right to transfer rights over such land. As a result, potential disputes or claims over title to the land on which our solar power projects are located or will be constructed may arise. However, an adverse decision from a court or the absence of an agreement with such third parties may result in additional costs and delays in the construction and operating phases of any solar power projects situated on such land. Also, such disputes, whether resolved in our favor or not, may divert management’s attention, harm our reputation or otherwise disrupt our business.

Some properties used for our solar and wind power projects are subject to other third party rights such as right of passage and rights to place cables and other equipment on the properties, which may result in certain interferences with our use of the properties. Our rights to the properties used for our solar and wind power projects may be challenged by property owners and other third parties for various other reasons as well. Any such challenge, if successful, could impair the development or operations of our solar and wind power projects on such properties.

- 21. We operate in a capital intensive industry and our debt to equity ratio was 4.80 and net debt to equity ratio was 3.89 as of June 30, 2024. If we are not able to source funding for our future renewable energy projects in a timely manner, our business, results of operations and financial condition may be adversely impacted.**

We operate in a capital intensive industry. As of June 30, 2024, we had total borrowings (consisting of long-term borrowings and short term borrowings) of ₹ 93,199.14 million. Our debt/ equity ratio was 4.80 while our net debt to equity ratio was 3.89, as of June 30, 2024. We generally invest equity of approximately 25% of the total project cost in each renewable power project. For the remaining approximately 75% of the total project cost, we source funding from number of lenders. Under the letter of award, achieving financial closure is one of the condition precedent generally within 12-18 months from the date of signing of the PPA. While we believe that there have been no instances in the last three Fiscals and the three months ended June 30, 2024 where we were not able to source funds at favourable rates, we cannot assure you that going forward, we will be able to source funds at favourable rates. In such cases, our business, results of operations and financial condition may be adversely impacted.

**22. Our development of renewable power projects may be restrained by our inability to identify or acquire suitable land sites. If we are unable to identify suitable land on commercially acceptable terms, our ability to develop new renewable energy projects on a timely basis or at all might be affected, which could result in the imposition of penalties and/or reductions in tariffs which could adversely affect our business, financial condition and results of operations.**

Our ability to realize our business and growth plans is dependent on our ability to develop and secure rights to sites suitable for the development of our renewable energy projects. We require suitable land upon which we develop our renewable energy projects. Suitable sites are determined on the basis of cost, solar radiation, wind, grid connection infrastructure and other relevant factors. Identifying particular site for our renewable energy projects by way of a lease or outright purchase which cater to all our requirements, is a costly and time consuming affair, the success of which cannot be assured. Even when we have identified a suitable site to set up our renewable energy projects, our ability to obtain control of the land on which our renewable energy projects will be located is subject to our ability to finance the transaction and competition from other renewable power producers that may have better access to local government support or financial or other resources. Further, large, utility-scale solar and wind power projects must be interconnected to the grid in order to deliver electricity, which requires us to find suitable sites with capacity on the grid available.

We are required to bear the cost of the development of the solar and wind power project and factor these costs when we submit our bids. In the event that the cost of land is more than anticipated, the economic viability of the project will be affected, thereby adversely affecting our results of operations and cash flows. If we are unable to find or obtain control for suitable sites on commercially acceptable terms, our ability to develop new renewable energy projects on a timely basis or at all might be affected, which could result in the imposition of penalties and/or reductions in tariffs which could adversely affect our business, financial condition and results of operations. While there have been no instances in the last three Fiscals and the three months ended June 30, 2024 where we initiated development of a project which was not made operational, we cannot assure you that such instances will not happen going forward.

**23. We have pledged a significant portion of our cash and cash equivalents and bank balances with our lenders.**

We have pledged a significant portion of our cash and cash equivalents and bank balances with our lenders in the form of major maintenance reserves, debt service reserve account (“DSRA”), letter of credit (“LC”) or bank guarantee (“BG”) margin and lien for margin for hedge on behalf of related parties that have availed foreign currency loans. The table below provides details of the amounts pledged as of the dates indicated below:

*(in ₹ million unless stated otherwise)*

| Particulars                                                                    | As of June 30,<br>2024 | As of June 30,<br>2023 | As of March<br>31, 2024 | As of March<br>31, 2023 | As of March<br>31, 2022 |
|--------------------------------------------------------------------------------|------------------------|------------------------|-------------------------|-------------------------|-------------------------|
| <b>Cash and cash equivalents and bank balances</b>                             |                        |                        |                         |                         |                         |
| Cash and cash equivalents                                                      | 10,207.24              | 4,341.56               | 3,091.59                | 5,474.49                | 4,784.56                |
| Other bank balances                                                            | 7,531.19               | 7,515.45               | 10,057.16               | 7,910.09                | 2,846.35                |
| Fixed deposits with banks having maturity beyond 12 months                     | 938.49                 | 10.78                  | 0.77                    | 536.85                  | 34.37                   |
| <b>Total</b>                                                                   | <b>18,676.92</b>       | <b>11,867.79</b>       | <b>13,149.52</b>        | <b>13,921.43</b>        | <b>7,665.28</b>         |
| <b>Details of encumbered and unencumbered cash</b>                             |                        |                        |                         |                         |                         |
| Major maintenance reserve                                                      | -                      | -                      | -                       | 72.05                   | 48.06                   |
| Amount pledged with DSRA                                                       | 2,689.51               | 2,106.44               | 1,899.57                | 2,004.81                | 1,036.95                |
| LC / BG margin                                                                 | 8,360.80               | 1,124.54               | 2,481.95                | 765.58                  | 927.56                  |
| Lien for margin for hedge on behalf of a related party's foreign currency loan | -                      | -                      | -                       | -                       | 125.82                  |
| Other restricted cash and bank balances*                                       | 7,339.03               | 8,632.09               | 8,754.80                | 11,078.00               | 5,493.83                |
| <b>Free Cash</b>                                                               | <b>287.58</b>          | <b>4.72</b>            | <b>13.20</b>            | <b>0.99</b>             | <b>33.06</b>            |

\*The amounts referred to herein refer to amounts that have been restricted by our lenders, and are made available as free cash only upon compliance with restricted payment conditions under the relevant financing agreements.

If we are unable to meet our obligations under our financing agreements, our lenders may choose to invoke the amounts pledged to recover the dues payable to them. This may significantly impact our liquidity and can limit our ability to respond to any imminent financial needs or opportunities, thereby affecting our profitability and financial condition. Lower liquidity can also lead to constraints on our operational flexibility, which can affect the efficiency of our operations.

**24. *The reduction, modification or elimination of government and economic incentives may reduce the economic benefits of our existing renewable energy projects and our opportunities to develop or acquire new renewable energy projects.***

The development and profitability of renewable energy projects in the locations in which we operate are dependent on policy and regulatory frameworks that support such developments. For instance, the Government of India has provided various economic incentives to promote the growth of the renewable energy sector, including but not limited to production-linked incentive schemes, rooftop solar programmes, green energy corridors and viability gap funding (Source: CRISIL Report). For details, see “**Industry Overview**” on page 185. Any adverse changes in policies could lead to a significant reduction in or a discontinuation of the support for renewable energy projects in such locations. Without such support, renewable energy projects might not be commercially viable in such locations.

The imposition of extra duties being levied on sources of energy which cause carbon dioxide pollution for the purpose of reducing greenhouse gas emissions has indirectly supported the expansion of power generated from renewable energy and, in turn, renewable energy projects in general. If such direct and indirect government support for renewable energy (in particular, solar and wind power) is terminated or reduced, it would make producing electricity from solar and wind power projects less competitive and reduce demand for new renewable energy projects.

In addition, the projects in which government entities participate may be subject to delays, extensive internal processes, policy changes, changes due to local, national and internal political pressures and changes in governmental or external budgetary allocation and insufficiency of funds. Since government entities are the off-takers for such projects, these projects are directly and significantly dependent on their support. In Fiscal 2017, four of our Subsidiaries, namely ACME Babadham Solar Power Private Limited, ACME Kaithal Solar Power Private Limited, ACME Koppal Solar Power Private Limited and ACME Vijayapura Solar Power Private Limited, had received viability gap funding of ₹ 1,176.00 million from SECI. Our Subsidiaries received ₹ 823.20 million from this funding prior to Fiscal 2022 and received ₹ 117.60 million, ₹ 117.60 million and ₹ 117.60 million in Fiscals 2022, 2023 and 2024, respectively. However, none of our projects have availed any recurring benefits under any government schemes during the three months ended June 30, 2024 and Fiscals 2024, 2023 and 2022. . We cannot assure you that we will not avail similar government benefits in the future. Any withdrawal of support or adverse changes in their policies may lead to the agreements being renegotiated and could also adversely affect the financing, capital expenditure, revenues, development or operations relating to the projects.

**25. *Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Failure to respond to current and future technological changes in an effective and timely manner may adversely affect our business and results of operations.***

As part of our business, we leverage technology to improve efficiency, plant availability and output. However, the technology required for renewable energy power projects are subject to continuous change and development. Some of our existing technologies and processes in the renewable energy business may become obsolete or perform less efficiently compared to newer and better technologies and processes. While there have been no instances in the last three Fiscals and the three months ended June 30, 2024 where we had to make substantial investments on new technologies to replace our existing technology which has become obsolete, we cannot assure you that such instances will not occur going forward, which could adversely affect our business and results of operations.

The cost of upgrading or implementing new technologies, upgrading our existing equipment or expanding capacity could be significant and may adversely affect our results of operations if we are unable to pass on such costs to

our customers or recover such costs from revenue. Failure to respond to current and future technological changes in an effective and timely manner may adversely affect our business and results of operations.

**26. The delay between making significant upfront investments in our power projects and receiving revenue could adversely affect our liquidity, business and results of operations.**

There is generally a period of 18 to 24 months between our initial upfront investment at the time of signing of the PPA and the date on which we commence to receive revenue from the sale of electricity generated by such power projects. Such initial investments include engineering and procurement, land costs and project analysis and feasibility studies, among others. We have historically relied on our own equity contributions and debt to pay for costs and expenses incurred during project development. Renewable power projects typically generate revenue only after becoming commercially operational, once they start to sell electricity to the grid. There may be long delays from winning a bid and entering into a PPA, to obtaining the initial land and interconnection assessments, to the projects becoming commercially operational, due to the timing of auctions, financing and construction cycles, receipt of approvals and grid connectivity processes. There is no assurance that our success in auctions will necessarily lead to execution of corresponding PPAs promptly, or at all. For our renewable projects, the entire life cycle of developing a project, from PPA signing to the project achieving commercial operations within 18 to 24 months. We have executed majority of our current Operational Projects within the stipulated time. Historically, the average time period for commissioning our Operational Projects is 19.55 months which includes the timeline extension accorded to us by the appropriate authorities as a result of the force majeure events, which are beyond the control of the renewable energy developer.

Between our initial investments in the development of the renewable power projects and their connection to the transmission grid, there may be adverse developments, such as unfavorable environmental or geological conditions, labor strikes, panel shortages or monsoon weather. We may not be able to obtain all of the approvals and consents as anticipated and we may not be able to obtain project level debt financing as anticipated. The timing gap between our upfront investments and actual generation of revenue, or any added delay in between due to unforeseen events, could put strains on our liquidity and resources, and adversely affect our profitability, results of operations and cash flows.

Also see, “ – 2. We are dependent on our Power Purchase Agreements (“PPA”) to sell power and generate our revenue from operations. Further, the terms of our PPAs may expose us to certain risks that may affect our future results of operations and cash flows.” on page 36.

**27. Our Company has paid the statutory dues to the Government and provident fund for all full-time employees for the Fiscals 2024, 2023 and 2022, however, there have been delays in payment of statutory dues by our Company and our Subsidiaries in the three months ended June 30, 2024 and June 30, 2023 and during Fiscal 2024, 2023 and 2022. Inability to make timely payment of our statutory dues could result us into paying interest on the delay in payment of statutory dues which could adversely affect our business, our results of operations and financial condition.**

There have been delays in payment of statutory dues, including employee state insurance corporation, provident fund, professional tax and income tax amongst others towards regulatory authorities by our Company and our Subsidiaries as highlighted below:

**Goods and Services Tax (“GST”)**

Note: In order to address the delays in relation to payment towards provident fund by our Company, all arrears were paid through arrear challan in particular months.

# Our Company proposes to utilize a portion of the Net Proceeds towards investment in our Subsidiaries for repayment / prepayment, in full or in part, of certain outstanding borrowings availed by these Subsidiaries. For details, see "Objects of the Offer" beginning on page 125.

Further, during the last three Fiscals there have been no unpaid dues towards provident fund for applicable employees. The table below provide for which the provident fund is applicable, and the relevant paid and unpaid dues is as follows:

| Fiscal                           | No. of Employees | Total amount due (in ₹ million) | Paid (in ₹ million) | Unpaid (in ₹ million) |
|----------------------------------|------------------|---------------------------------|---------------------|-----------------------|
| Fiscal 2024                      | 248              | 24.69                           | 24.69               | Nil                   |
| Fiscal 2023                      | 209              | 20.32                           | 20.32               | Nil                   |
| Fiscal 2022                      | 131              | 18.51                           | 18.51               | Nil                   |
| Three months ended June 30, 2024 | 232              | 8.51                            | 8.51                | Nil                   |
| Three months ended June 30, 2023 | 161              | 5.47                            | 5.47                | Nil                   |

We cannot assure you that going forward we will be able to make timely payment of our statutory dues which could result us into paying interest on the delay in payment of statutory dues which could adversely affect our business and our results of operations and financial condition.

**28. Bids for pumped storage power projects are limited. We cannot assure you that we will be able to win bids to increase our pump storage projects which could impact our business, revenue from operations and cash flows.**

The identified potential of pumped hydro storage projects in India is about 124 GW (comprising 114 PHSP). However, the operational capacity of PHSP is merely 4.7 GW. While several provisions are proposed by the GoI to facilitate the allocation and development of pump hydro storage projects, (Source: CRISIL Report) however, in our experience bids for such projects in India are currently limited.

While our Company has acquired 100% of the equity share capital of ACME Urja Two Private Limited for the development of a 600 MW closed loop pump storage project in the state of Uttar Pradesh, however, cannot assure you that on account of limited bids in India, we will be able to adequately diversify our renewable energy product portfolio.

**29. Our business is subject to environmental conditions, seasonal fluctuations and natural calamities that may have an adverse impact on our business, financial condition and results of operations.**

The revenues generated by our renewable power projects are proportional to the amount of electricity generated, which in turn is dependent upon prevailing environmental conditions. Our power generation is highly dependent on weather conditions and the profitability of our operations depend not only on observed weather conditions at the project site but also on the consistency of those weather conditions. We base our investment decisions with respect to each renewable energy project on the findings of related studies conducted on-site.

However, operating results for renewable energy projects vary depending on natural variations from season to season and from year to year and may also change permanently because of climate change or other factors (including conditions resulting from man-made causes, such as smog from crop burning), which are beyond our control. In addition, the amount of electricity our projects produce is dependent in part on the amount of sunlight or irradiation. For instance, there may be a fall in electricity generation due to certain environmental conditions, such as, cloudy weather, sandstorms, heavy rainfall, solar eclipse and environment pollution. As a result, during the last three Fiscals and in the three months ended June 30, 2024, we have experienced an interannual solar

radiation variations approximately in +/-2% range for our Operational Projects. While we engage in regular operational and maintenance activities of our Operational Projects and cleaning of solar PV modules to minimize the impact of soiling, we cannot assure you that such initiatives will offset the environmental conditions which could materially impact our business operations.

The seasonality of our energy production may also create increased demands on our working capital reserves and borrowing capacity under our outstanding debt during periods where cash generated from operating activities is lower.

**30. *We face competition, including from both traditional and renewable energy companies, and any failure to respond to market changes in the renewable energy industry could adversely affect our business, financial condition and results of operations.***

We face competition in the industry in which we operate. Our primary competitors are local and international developers and operators of renewable energy projects. We also compete with traditional energy companies such as utilities generating power from conventional fossil fuels.

Our competitors may have advantages over us in terms of greater operational, financial or technical management, or other resources and may be able to achieve better economies of scale and lower cost of capital. Our market position depends on our financing, development and operation capabilities, reputation and track record. Any increase in competition during the bidding process or reduction in our competitive capabilities could have an adverse impact on our market share and on the margins we generate from our solar and wind power projects. Some of the key players include ReNew Power (approximately 8.3 GW operational wind and solar power projects), Adani Green Energy Limited (approximately 10.9 GW operational wind, solar and hybrid power projects), NTPC Green Energy Limited (approximately 3.5 GW operational solar and wind power projects), TATA Power Renewable Energy Limited (approximately 4.5 GW operational solar and wind power projects), Greenko (5.4 GW of operational wind and solar power projects) and Avaada Energy Private Limited (operational approximately 4.0 GW of solar power projects) as of March 31, 2024. (Source: CRISIL Report)

Our competitors may also ally or form affiliates with other competitors to our detriment. As our competitors grow in scale, they may establish in-house EPC and O&M capabilities, which could offset any advantage we currently have over many of them. Moreover, suppliers or contractors may merge with our competitors, which may limit our choices of suppliers or contractors and hence affect the flexibility of our overall project execution capabilities.

New competitors that are not currently in the market may emerge as the solar and wind power industry grows and evolves. There can be no assurance that our current or potential competitors will not win bids for solar and wind power projects or offer services comparable or superior to those that we offer at the same or lower prices or adapt to market demand more quickly than we do. Increased competition may result in price reductions, reduced profit margins and loss of market share.

We face competition from developers of other renewable energy facilities, including wind, hybrid, biomass, nuclear and hydropower. If these non-solar renewable sources become more financially viable, our business, financial condition and results of operations could be adversely affected. Competition from such producers may increase if the technology used to generate electricity from these other renewable energy sources becomes more sophisticated, or if the Indian government elects to further strengthen its support of such renewable energy sources.

As we also compete with utilities generating power from conventional fossil fuels, a reduction in the price of coal or diesel could make the development of solar and wind energy less economically attractive and we could be at a competitive disadvantage.

**31. *Undertaking acquisitions or divestments may subject us to additional risks that may adversely affect our business, financial condition, results of operations and prospects.***

A principal component of our growth is to continue to explore acquisition and divestment opportunities. We pursue selective acquisition and divestment of projects. We have divested certain of our Project SPVs in the past and may continue to undertake such divestments in the future. During Fiscals 2024, 2023 and 2022, we divested 369 MW, nil and 510 MW of projects, respectively. On account of such divestments, exceptional items amounted to nil, ₹ 74.47 million, ₹ 7,486.91 million, ₹ 394.36 million and ₹ 3,295.63 million for the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022, respectively, and as a result our profit/(loss) for the year was ₹ 13.89 million, ₹ 823.31 million, ₹ 6,977.81million, ₹ (31.74) million, and ₹ 620.10 million for

the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022, respectively. Such exceptional income going forward may not be recurring in the event we do not undertake divestments of our Projects SPVs which may impact our profitability. For details, see “**History and Certain Corporate Matters - Details regarding material acquisitions or divestments of business/undertakings, mergers, amalgamation, any revaluation of assets, etc. in the last 10 years**” on page 303.

While we evaluate divestment opportunities based on the commercial considerations, there may be ongoing indemnity obligations. Pursuant to our agreements with the acquirer of the divested entities, we may be obligated to indemnify the acquirer to the extent of any losses suffered by the acquirer in terms of our contractual agreement including the losses relating to the ongoing litigation matters at the time of such divestment. On June 3, 2024, one of the acquirers of our subsidiaries issued a notice alleging the breach and non-fulfillment of our obligations as envisaged under the securities purchase agreement entered into with them. While we had responded on June 13, 2024, to their notice, we had received another notice dated October 11, 2024 in furtherance of our response dated June 13, 2024, in relation to the alleged breaches/ un-fulfilled obligations. We cannot assure you that there will not be such instances in future. We will actively address any challenges arising from such instance to mitigate their impact on our overall performance. Further, if there are any adverse outcome of litigation for which we have agreed to indemnify the acquirers under the share purchase agreements, it could have an adverse effect on our business, financial condition, results of operations and prospects. In addition, pursuant to our divestment agreements, there is a certain amount of consideration which is payable by the purchaser as deferred purchase consideration, subject to and in accordance with the conditions set out in our agreements. In the event we are unable to receive such consideration, our business and results of operations may be adversely affected.

**32. We have certain contingent liabilities that have been disclosed in our financial statements, which if they materialize, may adversely affect our results of operations, cash flows and financial condition.**

As at June 30, 2024, our contingent liabilities as per Ind AS 37 that have been disclosed in our Restated Consolidated Financial Information, were as follows:

| Particulars                                       | Amount<br>(₹ million) |
|---------------------------------------------------|-----------------------|
| Disputed demand for income tax                    | 340.46                |
| Disputed demand for sales tax                     | 100.58                |
| Guarantees issued including financial guarantees* | 5,678.80              |
| <b>Total</b>                                      | <b>6,119.84</b>       |

\*Our Company has issued a guarantee of ₹ 5,678.80 million in favour of ACME Cleantech against certain borrowings sanctioned to ACME Cleantech amounting to ₹ 6,754.00 million. These borrowings primarily pertain to guarantees issued by ACME Cleantech to various Subsidiaries of our Company.

If a significant portion of these liabilities materialize, it could have an adverse effect on our business, cash flows, financial condition and results of operations. For further information on contingent liabilities as per Ind AS 37 as at June 30, 2024, see “**Restated Consolidated Financial Information – Note 48 - Contingent liabilities and commitments**” on page 492.

**33. We have in the past entered into a number of related party transactions and may continue to enter into related party transactions in the future on an arm’s length basis, and there can be no assurance that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.**

We have in the ordinary course of business entered into transactions with related parties in the past and from time to time, we may enter into related party transactions in the future. While we believe that all such related party transactions that we have entered into are conducted on an arm’s length basis in accordance with the Companies Act and other applicable regulations pertaining to the evaluation and approval of such transactions and all related party transactions that we may enter into post-listing, will be subject to Audit Committee, Board or Shareholder approval, as necessary under the Companies Act and the Listing Regulations, in the interest of the Company and its minority Shareholders and in compliance with the Listing Regulations, we cannot assure you these arrangements in the future, or any future related party transactions that we may enter into, individually or in the aggregate, will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects. While such related party transactions will be undertaken in accordance with the applicable requirements under the SEBI Listing Regulations, the same related party transactions may potentially involve conflicts of interest and there can be no assurance that we will be able to address such conflict of interest in future.

The table below provides details of our aggregate amount of related party transactions in the last three Fiscals:

| Particulars                                          | Amount in Fiscal 2024<br>(₹ million) | As a Percentage of Total Purchases (%)            | Amount in Fiscal 2023<br>(₹ million) | As a Percentage of Total Purchases (%)            | Amount in Fiscal 2022<br>(₹ million) | As a Percentage of Total Purchases (%)            |
|------------------------------------------------------|--------------------------------------|---------------------------------------------------|--------------------------------------|---------------------------------------------------|--------------------------------------|---------------------------------------------------|
| Related Party - Purchase of Goods & Services         | 15,552.33                            | 82.05                                             | 8,256.57                             | 69.84                                             | 9,585.87                             | 69.95                                             |
| <b>Total Purchases</b>                               | <b>18,953.59</b>                     | <b>-</b>                                          | <b>11,821.71</b>                     | <b>-</b>                                          | <b>13,704.43</b>                     | <b>-</b>                                          |

Further, certain related party transactions undertaken by our Company such as loan given / (received) (net) constituted more than 10% of total transactions of similar nature in the three months ended June 30, 2024 and the last three Fiscals.

For further information on our related party transactions, see “*Summary of the Offer Document – Summary of Related Party Transactions*” on page 30.

**34. The Unaudited Pro Forma Consolidated Financial Information is presented for illustrative purposes only and may not be indicative of our future performance.**

In this Red Herring Prospectus, we have included Unaudited Pro Forma Consolidated Financial Information (read with the notes to the Unaudited Pro Forma Consolidated Financial Information and prepared in accordance with the basis of preparation note and adjustments stated therein) to show the divestment of 15 companies for Fiscal 2024 including 14 erstwhile SPVs with total installed capacity of 369 MW of projects. The Unaudited Pro Forma Consolidated Financial Information has been prepared by combining the audited consolidated financial statements of our group, audited special purpose interim financial statements of these SPVs and audited financial information of these SPVs for the relevant year, as provided under the basis of preparation note in the Unaudited Pro Forma Consolidated Financial Information. For details in relation to the difference between key financial metrics such as revenue from operations, EBITDA and PAT under the Restated Consolidated Financial Information and Unaudited Pro Forma Consolidated Financial Information, see “*Basis for Offer Price – Key Performance Indicators*” on page 151.

As the Unaudited Pro Forma Consolidated Financial Information are prepared for illustrative purposes only, it is, by its nature, subject to change and may not give an accurate picture of the actual financial results of operations that would have occurred had such transactions by us been effected on the dates they are assumed to have been effected, and is not intended to be indicative of our future financial results of operations. In addition, the Unaudited Pro Forma Consolidated Financial Information are unaudited and have not been prepared in accordance with the requirements of the U.S. Securities and Exchange Commission or U.S. GAAP. Further, the rules and regulations related to the preparation of the Unaudited Pro Forma Consolidated Financial Information in other jurisdictions may vary significantly from the basis of preparation as set out in the Unaudited Pro Forma Consolidated Financial

Information included in this Red Herring Prospectus. Therefore, the Unaudited Pro Forma Consolidated Financial Information should not be relied upon as if it has been prepared in accordance with those standards and practices. If the various assumptions underlying the preparation of the Unaudited Pro Forma Consolidated Financial Information do not come to pass, our actual results could be materially different from those indicated in the Unaudited Pro Forma Consolidated Financial Information.

**35. Exchange rate fluctuations may adversely affect our business, results of operations and cash flows.**

We are exposed to foreign exchange risks, since we import certain components such as inverters from countries outside India, in particular China. Although we closely follow our exposure to foreign currencies, and budget for currency depreciation while bidding for new projects, however, it may be inadequate to protect us against incurring potential losses if currencies fluctuate significantly.

The table below sets forth details of certain parameters of our foreign currency exposure for the years indicated:

| Particulars                                                       | 2024  | Fiscal<br>2023 | 2022  |
|-------------------------------------------------------------------|-------|----------------|-------|
| Foreign Currency Purchases (₹ million)                            | 51.81 | Nil            | 92.73 |
| Foreign Currency Purchases as a Percentage of Total Purchases (%) | 0.27  | -              | 0.68  |

The table below sets forth details of certain parameters of our foreign currency exposure for the periods indicated:

| Particulars                                                       | Three months ended June 30,<br>2024 | 2023 |
|-------------------------------------------------------------------|-------------------------------------|------|
| Foreign Currency Purchases (₹ million)                            | -                                   | -    |
| Foreign Currency Purchases as a Percentage of Total Purchases (%) | -                                   | -    |

While we have hedged our external commercial borrowings and our capital expenditure costs denominated in U.S. Dollars against foreign currency fluctuations, however, we do not have a policy for hedging our foreign currency payables, and we cannot assure you that we will not incur potential losses if currencies fluctuate significantly.

There is no guarantee that we may be able to manage our foreign currency risk effectively or mitigate exchange exposures, at all times and our inability may harm our results of operations and cause our results to fluctuate and/or decline.

**36. We are required to comply with certain restrictive covenants under our financing agreements. Any non-compliance may lead to, amongst others, accelerated repayment schedule and suspension of further drawdowns, which may adversely affect our business, results of operations, financial condition and cash flows.**

As on August 31, 2024, our total secured outstanding borrowings (fund and non-fund based on a consolidated basis) of ₹ 111,732.55 million. Some of the financing arrangements entered into by us include conditions that require our Company and our Subsidiaries to obtain respective lenders' consent prior to carrying out certain activities (including certain corporate actions) and entering into certain transactions. Failure to meet these conditions or obtain these consents could have significant consequences on our business and operations. These covenants vary depending on the requirements of the financial institution extending such loan and the conditions negotiated under each financing agreement. Some of the corporate actions that require prior consents or intimations to be made to certain lenders include, amongst others, (a) changes to the capital structure of our Company or its shareholding pattern; (b) amendments to memorandum and/or articles of association of our Company, (c) changing the constitution/composition of the Board; (d) undertaking any merger, de-merger, consolidation, reorganization, dissolution, reconstitution, scheme of arrangement or compromise with creditors or shareholders; (e) change in nature of our Company from a 'private limited company' or to undertake any capital expenditure or invest in any project. While we have received all relevant consents required for the purposes of this Offer and have complied with these covenants, a failure to comply with such covenants in the future may restrict or delay certain actions or initiatives that we may propose to take from time to time.

In addition, while there has been no violation of any restrictive covenants and no event of default has occurred and we have not rescheduled repayment of loans in relation to debt financing availed by our Company and our Subsidiaries in the past three Fiscals, we cannot assure that this will continue to be the case in the future. Further, while there have not been any invocation of personal guarantees of Promoters and / or guarantees issued by our

Company in the past three Fiscals and the three months ended June 30, 2024 and there has been no default in any loan repayment, we cannot assure that this will continue to be the case in the future.

Certain of our secured borrowing facilities may also permit the lenders to recall the loan on demand. Such recalls on borrowed amounts may be contingent upon happening of an event beyond our control and there can be no assurance that we will be able to persuade our lenders to give us extensions or to refrain from exercising such recalls which may adversely affect our operations and cash flows. A failure to observe the covenants under our financing arrangements or to obtain necessary consents/ waivers may lead to acceleration of amounts due under such facilities enforcement of security, appointment of nominee directors and triggering of cross default provisions under other financing arrangements, which may entitle the lender(s) to an absolute right to convert entire outstanding facilities and/or unpaid interest into fully paid-up Equity Shares of our Subsidiaries. If the obligations under any of our financing documents are accelerated, we may have to dedicate a portion of our cash flow from operations to make payments under such financing documents, thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. In addition, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing.

For further details of the terms and conditions of our borrowing arrangements, see “**Financial Indebtedness**” on page 571.

**37. Certain of our Subsidiaries have availed certain unsecured loans from our Promoter, ACME Cleantech, that may be recalled by ACME Cleantech at any time and the relevant Subsidiaries may not have adequate funds to make timely payments or at all.**

Certain of our Subsidiaries have availed unsecured loans from our Promoter ACME Cleantech, which may be recalled at any time.

The table below provides details of unsecured loans as follows:

| Name of the Entity                                                                                 | Amount availed<br>(₹ million) | Amount outstanding as<br>on June 30, 2024<br>(₹ million) | Name of the<br>Promoter | Term of the<br>Loan    | Rate of Interest<br>(%) |
|----------------------------------------------------------------------------------------------------|-------------------------------|----------------------------------------------------------|-------------------------|------------------------|-------------------------|
| ACME Aklera<br>Power Technology<br>Private Limited                                                 | 451.97                        | 451.97                                                   | ACME<br>Cleantech       | Repayment on<br>demand | Nil                     |
| Acme Sun Power<br>Private Limited                                                                  | 1.10                          | 1.10                                                     | ACME<br>Cleantech       | Repayment on<br>demand | Nil                     |
| ACME Urja One<br>Private Limited<br>(formerly known as<br>ACME Barmer<br>Solar Private<br>Limited) | 5.20                          | 5.20                                                     | ACME<br>Cleantech       | Repayment on<br>demand | Nil                     |
| Acme Surya Power<br>Private Limited                                                                | 32.70                         | 32.70                                                    | ACME<br>Cleantech       | Repayment on<br>demand | Nil                     |
| Acme Renewtech<br>Private Limited                                                                  | 49.61                         | 49.61                                                    | ACME<br>Cleantech       | Repayment on<br>demand | Nil                     |

These loans may not be repayable in accordance with any agreed repayment schedule and may be recalled by ACME Cleantech at any time. In the event that ACME Cleantech seeks a repayment of any such unsecured loan, such Subsidiaries would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations.

**38. Our ability to access capital at attractive costs depends on our credit ratings. Non-availability of credit ratings or a poor rating may restrict our access to capital and thereby adversely affect our business, financial conditions, cash flows and results of operations.**

The cost and availability of capital depends on our credit ratings. The following table sets forth our details of credit rating received in the last three Fiscals:

| Rating Agency          | Credit Rating | Fiscal |
|------------------------|---------------|--------|
| CRISIL Ratings Limited | A1            | 2022   |
| CRISIL Ratings Limited | A1            | 2023   |
| CRISIL Ratings Limited | A1            | 2024   |

Credit ratings reflects the opinion of the rating agency on our management, track record, diversified clientele, increase in scale and operations and margins, medium term revenue visibility and operating cycle.

While we have not experienced downgrading in our credit ratings received in the last three Fiscals and the three months ended June 30, 2024, we cannot assure you that such instances will not happen going forward. Any downgrade in our credit ratings or our inability to obtain such credit rating in a timely manner or any non-availability of credit ratings, or poor ratings, could increase borrowing costs, will give the right to our lenders to review the facilities availed by us under our financing arrangements and adversely affect our access to capital and debt markets, which could in turn adversely affect our interest margins, our business, results of operations, financial condition and cash flows.

**39. Our long term financing agreements provide for payment of interest at variable rates and any increases in interest rates may adversely affect our results of operations.**

Our long term borrowings with variable interest rates aggregated to ₹ 67,516.57 million as of June 30, 2024 which constituted 72.87% of our total borrowings from banks and financial institutions. As a result, we are susceptible to fluctuations in interest rates and associated risks. Considering 72.87% of our total borrowings are at variable interest rates, accordingly, any revision of their lending rate interest cost are subject to increases/decrease, which will impact the cash flow and ultimately the profit. Banks and financial institutions sanction loan at a specific rate, which may change at the time of actual lending or during the term of the facility, thereby impacting the cash flow as any impact of change in rate of interest cannot be passed on to the tariff, which is fixed in nature. For further information, see “**Financial Indebtedness**” on page 571 for a description of interest typically payable under our financing agreements.

**40. We may not be able to adequately protect our intellectual property rights which could harm our competitiveness.**

Any improper use or infringement of the “ACME” name and associated logo by any party could adversely affect our business, financial condition and results of operations. We cannot assure you that the measures we have taken will be sufficient to prevent any misappropriation of our intellectual properties. While there have been no intellectual property misappropriation or litigations in the last three Fiscals and the three months ended June 30, 2024, we cannot assure you that such instances will not happen in future.

Enforcement of our intellectual property rights could be time consuming and costly. We may not be able to immediately detect and remediate unauthorized use of our intellectual property. In the event that the measures taken by us or the protection afforded by law do not adequately safeguard our intellectual property rights, we could suffer losses in revenue and profit due to competing offerings of services that exploit our intellectual properties. We cannot assure that any of our intellectual property rights will not be challenged by third parties. Adverse rulings in any litigation or proceedings could result in the loss of our proprietary rights and subject us to substantial liabilities, or even disrupt our business operations.

**41. We are required to obtain certain approvals, licenses, registrations and permissions for operating our business, and the failure to obtain, maintain or renew them could adversely affect our business, results of operations and financial condition.**

We are required to maintain various approvals, licenses, registrations and permissions for operating our business, some of which may have expired and for which we may have either made or are in the process of making an application for obtaining the approval or its renewal. There can be no assurance that we will be able to make the applications on time and that the relevant authorities will issue such permits or approvals in the time frame anticipated by us or at all. Failure by us to renew, maintain or obtain the required permits or approvals at the requisite time may result in the interruption of our operations and may have a material adverse effect on our business, results of operations and financial condition.

In addition, few of the SPVs of our Company are required to maintain licenses obtained under the Manufacture and Other Operations in Warehouse (no. 2) Regulations, 2019 (“**MOOWR Scheme**”), which permits our SPVs, a deferral of customs duty and consequentially, integrated goods and services tax paid on import of capital goods,

machinery, inputs etc. required for carrying out manufacturing or other operation in a private bonded warehouse in terms of Section 58 read with Section 65 of the Customs Act, 1962. We may face imminent threat of revocation of licenses under MOOWR Scheme due to several reasons such as declaring the inapplicability of the MOOWR Scheme by administrative bodies like Central Board of Indirect Taxes and Customs for warehousing of solar power generating units like solar panels, solar cells amongst others.

Six of our SPVs, i.e., ACME Dhaulpur Powertech Private Limited, ACME Deoghar Solar Power Private Limited, ACME Raisar Solar Energy Private Limited, ACME Phalodi Solar Energy Private Limited, ACME Heergarh Powertech Private Limited, and ACME Aklera Power Technology Private Limited, respectively were granted MOOWR License in 2021 as per MOOWR Regulations. Under the MOOWR License, a company is permitted for deferral from payment of import duties till the time the goods are moved out of the bonded warehouse. On July 9, 2022, instructions were issued by the Central Board of Indirect Taxes (“CBIT”) declaring the inapplicability of the MOOWR Scheme for warehousing of solar power generating units such as solar panels, solar cells etc. with resulting goods being ‘electricity’. We had challenged the same before Delhi High Court and the final order has been passed on May 6, 2024, whereby the instruction dated July 9, 2022 along with its’ consequent show cause notices has been quashed and the licenses are held valid by the Delhi High Court. However, the said order dated May 6, 2024 has been challenged before Supreme Court by way of SLP(C) No. 20274-20281/2024 XIV which is pending as on date. In the event if the Supreme Court decides the case in favour of custom department, then our Company may be liable to pay the applicable import duties, along with interest. For further details of litigation in relation to connectivity, see **“Outstanding Litigation and Other Material Developments”** on page 583.

Furthermore, our regulatory permits and approvals are subject to numerous conditions, some of which are onerous and require us to make substantial expenditure. If we fail to comply, or a regulator claims we have not complied with these conditions, our business, financial condition and results of operations would be materially adversely affected. Further, we cannot assure that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations or permits that have been or may be issued to us, may impede our operations. For details of pending approvals relating to our business and operations, see **“Government and Other Approvals”** on page 609. While, such pending material approvals do not have any material financial impact, we cannot assure you that we will receive such approvals on time or at all. While there have been no such instances of any show-cause notices in relation to non-compliance with any licenses and approvals, we cannot assure you that that we will not receive any such notices in future.

If we fail to comply with the applicable regulations or if the regulations governing our business are amended, or if there is any adverse interpretation of applicable regulations by any judicial, regulatory or administrative authority, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business and results of operations. For further details of key regulations applicable to our business and our operations, see **“Key Regulations and Policies in India”** on page 289.

Further, approvals granted to us may also be challenged by other parties, in future. For instance, while our Company had made applications for grant of connectivity at Fatehgarh-II, substation for 850 MW and at Ananthpuram and Kurnool-III substations for 400 MW (Wind) and 400 MW (Solar), respectively, to Central Transmission Utility of India Limited, basis which the connectivity was granted to us for Fatehgarh-II, Ananthpuram and Kurnool-III, however, certain third parties have challenged the connectivity granted to us in Ananthpuram and Kurnool-III while the connectivity granted to us at Fatehgarh-II was pursuant to an order by Appellate Tribunal of Electricity. Amidst the ongoing litigation in relation to approval of connectivity or in case filing of appeals against APTEL orders, an adverse outcome of such litigation could impact the connectivity granted to us. Moreover, one of our Subsidiaries, Nirosha Power has received a notice dated April 25, 2024 from Uttar Pradesh Pollution Control Board regarding alleged non-compliance with the provisions of the Water (Preventions and Control of Pollution) Act, 1974 and the Air (Preventions and Control of Pollution) Act, 1981 in relation to submission of compliance report for the conditions stipulated in the no objection certificate issued to one of our Subsidiaries, Nirosha Power for operating in the industry. Subsequently, our Company has responded to the notice pursuant to letter dated August 1, 2024, that the subject notice is not applicable to Nirosha Power. The letter was acknowledged by the Uttar Pradesh Pollution Control Board on August 2, 2024. For further details of litigation in relation to connectivity, see **“Outstanding Litigation and Other Material Developments”** on page 583.

**42. The performance of our solar power projects is affected by varying radiation levels and it can only be estimated based on historical average Global Horizontal Irradiance (“GHI”) data and soiling losses, which may fluctuate during a period and lead to the unreliability of such predictions.**

To estimate the performance of our solar power projects, we rely on a group of metrics, including the GHI (which represents the total amount of shortwave radiation received from above by a surface which is horizontal to the ground) and soiling losses which may vary during a period due to changes in solar irradiation, temperature, cloud cover, dust levels and the bell curve of the sun’s activity cycle. Variances in these metrics make it difficult to accurately predict the expected annual energy production. As a result, during the last three Fiscals and in the three months ended June 30, 2024, we have experienced an interannual solar radiation variations approximately in +/- 2% range for our Operational Projects. While we engage in regular operational and maintenance activities of our Operational Projects and cleaning of solar PV modules to minimize the impact of soiling, we cannot assure you that such initiatives will offset the environmental conditions which could materially impact our business operations. Inaccurate estimations of the performance and miscalculation of direct normal irradiance of our solar power projects could adversely affect our business, results of operations, financial condition and prospects. We cannot assure you that we will not be affected by such inaccurate estimations and miscalculations.

**43. The use of battery energy storage system (“BESS”) technology is subject to certain risks, which may adversely affect our business and operations.**

As on the date of this Red Herring Prospectus, we are currently installing BESS additions in our Under Construction Contracted Projects and intend to install BESS additions in our Under Construction Awarded Projects. BESS is a form of storage technology that can be used for a wide range of grid support activities, such as energy time shift, distribution deferral and energy arbitrage. Such storage technologies aid in addressing ramping requirements and providing capacity during non-solar hours, as a result of which the Government of India has placed emphasis on developing BESS capacity to improve grid operations. (Source: CRISIL Report)

However, there are several challenges and risks associated with the adoption of BESS technology in our renewable energy projects. According to the CRISIL Report, the installation of BESS requires a high initial investment and the capital expenditure incurred in relation to the same is dependent on commodity prices. Any volatility in such commodity prices can significantly increase our capital expenditure costs. Further, batteries can only store a certain amount of energy per unit of weight and volume and naturally lose their charge over time, even when not in use, which can lead to an inferior performance and shorter lifespan of the installation. The installation and maintenance of BESS can be hazardous and in the absence of adequate safety measures, can lead to overheating, fires or explosions. Further, the production and disposal of the batteries, if done improperly, can lead to various environmental risks and cause greenhouse gas emissions, water pollution and waste generation. In particular, due to the nascent stage of this technology, the sustainable recycling of lithium ion batteries is not yet developed and hence, the disposal of these batteries can be challenging. (Source: CRISIL Report)

If we are unable to address the aforesaid risks while employing BESS technology in our projects, our business and operations may be adversely affected.

**44. We do not own majority of the land on which are projects are located and will be located and our Registered and Corporate Office is located on premises not owned by us and sub-leased to us by one of our Promoter, ACME Cleantech. If these leases or sub-leases are terminated or not renewed on terms acceptable to us, it could adversely affect our business, results of operations, and cash flows.**

Our registered and corporate office is located at Plot Number – 152, Sector 44, Gurugram 122 002, Haryana, India. The property on which our registered and corporate office is located has been leased by our corporate Promoter ACME Cleantech with effect from February 1, 2024 from one of our Promoter Group member, VRS Infotech pursuant to an agreement dated February 1, 2024, and has been sub-leased by ACME Cleantech to us for a period of seven months with a lock-in over the entire term with effect from June 1, 2024 until December 31, 2024 pursuant to a sub-lease dated June 17, 2024. The transaction between ACME Cleantech and our Company has been conducted on arm’s length basis and we shall pay a monthly lease rent and applicable tax for the sub-lease to ACME Cleantech. Further, our renewable power projects are located primarily on land, among others, owned by respective Project SPVs or leased from third parties including members of our Group Companies. For details, see “**Summary of the Offer Document– Summary of Related Party Transactions**” and “**Restated Consolidated Financial Information**” on page 30 and 411, respectively. We may not be able to renew or extend the lease agreement at commercially acceptable terms, or at all.

The following table sets forth the details of our Registered and Corporate Office:

| Particulars       | Address                                                        | Owned / Leased                 | Promoter/Promoter Group/Group Company/Third Party | Annual rent (₹ million) | Period of Lease                             | Area (in sq. ft.) | Escalation Clause |
|-------------------|----------------------------------------------------------------|--------------------------------|---------------------------------------------------|-------------------------|---------------------------------------------|-------------------|-------------------|
| Gurugram, Haryana | Plot Number – 152, Sector 44, Gurugram 122 002, Haryana, India | Sub-Leased from ACME Cleantech | Promoter                                          | 16.34                   | 7 months (June 1, 2024 – December 31, 2024) | 28,147.86         | None              |

The table below sets forth the details of projects where land is leased from our Group Companies:

| Name of the SPV                            | Lessor                               | Area (Acres) | Annual Rent in Fiscal 2024 (₹) | Escalation Clause |
|--------------------------------------------|--------------------------------------|--------------|--------------------------------|-------------------|
| Viswatma Solar Energy Private Limited      | Midastouch Power Private Limited     | 25.34        | 35,369                         | 5% every year     |

| Aarohi Solar Power Private Limited         | Saibliss Power Private Limited       | 51.33        | 74,201                         | 5% every year     |
| ACME Odisha Solar Power Private Limited    | Saibliss Power Private Limited       | 10.95        | 55,150                         | Fixed             |
| ACME Odisha Solar Power Private Limited    | Saibliss Power Private Limited       | 1.90         | 9,525                          | Fixed             |

| Name of the SPV                         | Lessor                         | Area (Acres) | Annual Rent in Fiscal 2024 (₹) | Escalation Clause |
|-----------------------------------------|--------------------------------|--------------|--------------------------------|-------------------|
| ACME Odisha Solar Power Private Limited | Saibliss Power Private Limited | 13.60        | 68,184                         | Fixed             |

We may also be required to vacate the premise at short notice as prescribed in the lease agreement, and we may not be able to identify and obtain possession of an alternate location, in a short period of time. Occurrence of any of the above events may have an adverse effect on our business, results of operations, and cash flows. Further, any adverse impact on the ownership rights of our landlords may impede our effective future operations. We may also face the risk of being evicted in the event that our landlord allege a breach on our part of any terms under these lease/ leave and license agreements and there is no assurance that we will be able to identify suitable locations to re-locate our operations.

**45. We depend on the performance of management and other personnel, and if we are unable to attract, retain, and motivate these and other employees, our business, results of operations and financial condition could be harmed.**

Our success and growth depend upon consistent and continued performance of our employees with direction and leadership from senior management. From time to time, there may be changes in our executive management team or other key employees to enhance the skills of our teams or as a result of attrition. The loss of one or more of our Key Managerial Personnel, Senior Management or other key employees could adversely affect our functions and business operations. Our KMPs include our chief financial officer and company secretary and in the last three years, our previous chief financial officer, Neeraj Gupta resigned in Fiscal 2024.

Except as disclosed below, there are no other changes in our Key Managerial Personnel or Senior Management\* during the three years immediately preceding the date of this Red Herring Prospectus are set forth below:

| Name                  | Date of Change    | Reasons                                                                        |
|-----------------------|-------------------|--------------------------------------------------------------------------------|
| Devendra Singh        | October 10, 2024  | Resignation as the Chief Development Officer – Renewable Business              |
| Ravi Parmeshwar       | August 26, 2024   | Appointed as the Chief Human Resources Officer                                 |
| Purushottam Kejriwal  | June 22, 2024     | Appointed as the Chief Financial Officer                                       |
| Rajesh Sodhi          | June 22, 2024     | Appointed as the Compliance Officer                                            |
| Devendra Singh        | June 10, 2024     | Appointed as the Chief Development Officer – Renewable Business                |
| Ashutosh Singh        | June 1, 2024      | Appointed as the Vice President, Operations and Maintenance (O&M Head)         |
| Atma Godara           | June 1, 2024      | Appointed as the Vice President – Human Resources                              |
| Amit Maheshwari       | June 1, 2024      | Appointed as the Executive Vice President – Legal                              |
| Amit Gupta            | June 1, 2024      | Resignation as the Executive Vice President – Legal and Land                   |
| Rishi Kumar Mishra    | May 30, 2024      | Appointed as the Senior Vice President – Engineering and Strategic Procurement |
| Manish Jha            | April 24, 2024    | Appointed as the Chief Operating Officer, Renewable Business                   |

The tables below provide the employee benefits expenses as a percentage of our total expenses in the three months ended June 30, 2024 and June 30, 2023:

| Particulars                | Three months ended June 30, 2024 |                                     | Three months ended June 30, 2023 |                                     |
|----------------------------|----------------------------------|-------------------------------------|----------------------------------|-------------------------------------|
|                            | Amount<br>(₹ million)            | Percentage of total<br>expenses (%) | Amount<br>(₹ million)            | Percentage of total<br>expenses (%) |
| Employee Benefits Expenses | 150.05                           | 5.18                                | 132.78                           | 4.26                                |

The following table sets forth our overall attrition rate as of the periods indicated:

| Particulars                      | As of June 30,<br>2024 | As of June 30,<br>2023 | As of March<br>31, 2024 | As of March<br>31, 2023 | As of March<br>31, 2022 |
|----------------------------------|------------------------|------------------------|-------------------------|-------------------------|-------------------------|
| Opening balance                  | 214                    | 163                    | 163                     | 135                     | 127                     |
| Closing balance                  | 246                    | 189                    | 214                     | 163                     | 135                     |
| New joining <sup>(1)</sup>       | 60                     | 36                     | 129                     | 113                     | 66                      |
| Resignation                      | 28                     | 10                     | 78                      | 85                      | 58                      |
| Attrition Rate(%) <sup>(2)</sup> | 10.22                  | 5.03                   | 26.71                   | 34.27                   | 30.05                   |

Note:

<sup>(1)</sup> New joining and resignation include inter group companies' employee transfer.

<sup>(2)</sup> Attrition rate has been calculated as the number of employees who have resigned during the period, divided by the number of employees existing as of the beginning of the period and the numbers of employees who have joined during the period.

If we fail to identify and recruit strategic personnel, our business and results of operations could be adversely affected. Any loss of members of our senior management team or key personnel could significantly delay or prevent the achievement of our business objectives and could harm our business and customer relationships. We may need to invest significant amounts of cash and equity to attract and retain new employees, and we may never realize returns on these investments. If we are not able to retain and motivate our current personnel or effectively retain employees, our ability to achieve our strategic objectives, and our business, results of operations and financial condition could be adversely affected.

**46. Any disruption to the steady and regular supply of workforce for our operations, including due to strikes, work stoppages or increased wage demands by our workforce or any other kind of disputes with our workforce or our inability to control the composition and cost of our workforce could adversely affect our business, cash flows and results of operations.**

Our activities are labour intensive, require our management to undertake significant labour interface, and expose us to the risk of industrial action. As on June 30, 2024, we had 246 permanent employees. We may be subject to industrial unrest, slowdowns, and increased wage costs, which may adversely affect our business, financial conditions, cash flows and results of operations. While we consider our relationship with our employees to be good and there has been no such instance in the three Fiscals and the three months ended June 30, 2024 of any disruptions in work due to disputes or other problems with our work force, we could experience disruptions in work due to disputes or other problems with our work force in future, which may adversely affect our ability to perform our business operations.

Our Company also appoints independent contractors who in turn engage on-site contract labour for performance of certain of our ancillary operations. As of June 30, 2024, we have 229 off-roll employees. Although we do not engage these laborers directly, it is possible under Indian law that we may be held responsible for wage payments to laborers engaged by contractors should the contractors default on wage payments. Any requirement to fund such payments may adversely affect our business, financial conditions, cash flows and results of operations. Furthermore, pursuant to the provisions of the Contract Labour (Regulation and Abolition) Act, 1970, we may be directed to absorb some of these contract laborers as our employees. Any such order from a court or any other regulatory authority may adversely affect our business, cash flows and results of operations.

Further, work stoppages due to strikes or other events could result in slowdowns or closures of our operations which could have an adverse effect on our business, cash flows and results of operations. While our labours are not unionized and there has been no instance in the last three Fiscals and the three months ended June 30, 2024 where we experienced work stoppages due to strikes or labour unrest that resulted in closure of our operations, there is no assurance that we may not experience any such events in the future.

**47. An inability to maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.**

Our insurance policies may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. In addition, our insurance coverage expires from time to time. While there has been no instance in the last three Fiscals where any event occurred where we experienced losses exceeding our insurance coverage, we cannot assure you that such instances will not arise in the future. During the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022, insurance claim received amounted to nil, nil, ₹ 58.86 million, ₹ 4.67 million and ₹ 17.49 million, respectively, which amounts are reflected in our other income.

The following tables set forth details of coverage of our insurance policies against the total insurable assets for our Operational Projects which includes plant and machinery in the years indicated:

| Particulars                    | Fiscal 2024                    |                                           | Fiscal 2023                    |                                           | Fiscal 2022                    |                                           |
|--------------------------------|--------------------------------|-------------------------------------------|--------------------------------|-------------------------------------------|--------------------------------|-------------------------------------------|
|                                | Insurance Coverage (₹ million) | Percentage of the Total Insurable Assets* | Insurance Coverage (₹ million) | Percentage of the Total Insurable Assets* | Insurance Coverage (₹ million) | Percentage of the Total Insurable Assets* |
| Coverage of Insurance Policies | 74,666.24                      | 119.31                                    | 77,815.01                      | 114.53                                    | 49,071.88                      | 83.13                                     |

\*Insurable Assets includes plant and machinery (excluding freehold land, vehicles, right of use assets and buildings).

The following tables set forth details of coverage of our insurance policies against the total insurable assets for our Operational Projects which includes plant and machinery in the periods indicated:

| Particulars                    | Three months ended June 30, 2024  |                                                 | Three months ended June 30, 2023  |                                                 |
|--------------------------------|-----------------------------------|-------------------------------------------------|-----------------------------------|-------------------------------------------------|
|                                | Insurance Coverage<br>(₹ million) | Percentage of the<br>Total Insurable<br>Assets* | Insurance Coverage<br>(₹ million) | Percentage of the<br>Total Insurable<br>Assets* |
| Coverage of Insurance Policies | 75,033.66                         | 120.96                                          | 78,792.56                         | 132.67                                          |

\*Insurable Assets includes plant and machinery (excluding freehold land, vehicles, right of use assets and buildings).

To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected. Additionally, if we fail to comply with insurance regulatory requirements in the regions where we operate, or other regulations governing insurance coverage, our brand, reputation, business, and results of operations could be adversely affected.

**48. If we are subject to any fraud, theft, or embezzlement by our employees, it could adversely affect our reputation, results of operations and financial condition.**

Our business is subject to incidents of vendor, contractor, employee fraud, theft or embezzlement. We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. Any lapses in judgment or failures that result from human error can affect the accuracy of our financial reporting, resulting in a loss of investor confidence and a decline in the price of our Equity Shares. While there have been no such instances of lapses of internal controls in the last three Fiscals and the three months ended June 30, 2024, we cannot assure you that this will not occur in the future.

Further, our operations are subject to anti-corruption laws and regulations. If we are not in compliance with applicable anti-corruption laws, we may be subject to criminal and civil penalties, which could have an adverse impact on our business, financial condition, results of operations and liquidity. Likewise, any investigation of any potential violations of anti-corruption laws by the relevant authorities could also have an adverse impact on our business and reputation. While there have been no instances of any violations of anti-corruption laws in the last three Fiscals and the three months ended June 30, 2024, we cannot assure you that there will be no such instances in future.

**49. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and may be subject to change based on various factors, some of which are beyond our control. While our Company will receive proceeds from the Fresh Issue, it will not receive any proceeds from the Offer for Sale.**

We intend to use the Net Proceeds for the purposes described in “**Objects of the Offer - Details of the Objects of the Fresh Issue**” on page 126 of this Red Herring Prospectus. As on the date of this Red Herring Prospectus, our funding requirements are based on management estimates and our current business plans and is subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions or business strategies. While we will use the Net Proceeds towards repayment/prepayment, in full or in part, of certain outstanding borrowings availed by our Company and Subsidiaries, and towards general corporate purposes, the amount of Net Proceeds to be used will be based on our management’s discretion. However, our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals and as a consequence, we may be required to reschedule or reallocate our capital expenditures which may have an adverse impact on our business, results of operations and cash flows. Further, while our Company will receive proceeds from the Fresh Issue, it will not receive any proceeds from the Offer for Sale. The Promoter Selling Shareholder will receive the entire proceeds from the Offer for Sale (after deducting applicable Offer expenses) and our Company will not receive any part of the proceeds of the Offer. For further information, see “**The Offer**” and “**Objects of the Offer**” on pages 95 and 125, respectively.

The deployment of the Net Proceeds will be at the discretion of our Board. However, the deployment of the Net Proceeds will be monitored by a monitoring agency appointed pursuant to the SEBI ICDR Regulations. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, and other financial and operational factors.

Accordingly, prospective investors in the Offer will need to rely upon our management's judgment with respect to the use of proceeds. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business and results of operations.

**50. Any variation in the utilization of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders' approval.**

We propose to utilize the Net Proceeds towards (i) Repayment/prepayment, in full or in part, of certain outstanding borrowings availed by our Company and Subsidiaries; and (ii) general corporate purposes in the manner specified in **"Objects of the Offer"** on page 125. At this stage, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Sections 13(8) and 27 of the Companies Act, 2013, and other applicable laws, we cannot undertake any variation in the utilization of the Net Proceeds without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, or vary any terms of any contract if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

**51. Our ability for bonus issuance from the relevant reserves in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.**

Issuance of bonus is typically undertaken by utilizing the accumulated profits and reserves of the company. Our Company has historically capitalized the reserves for the issuance of bonus shares. The amount of our future bonus issuances, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. The use of reserves for the issuance of bonus could potentially impact our Company's ability to meet future bonus issuances and maintain financial stability. While we have not faced such a situation in the past, there can be no assurance that we will be able to undertake bonus issuance in future.

**52. Our Promoters will continue to hold a significant equity stake in our Company after the Offer and their interests may differ from those of the other shareholders.**

As on the date of this Red Herring Prospectus, our Corporate Promoter, ACME Cleantech, holds 100.00% of the paid-up equity share capital of our Company on a fully diluted basis (*includes five Equity Shares each held as a nominee of ACME Cleantech by our Individual Promoters i.e., Manoj Kumar Upadhyay, Mamta Upadhyay, our Corporate Promoter i.e., MKU Holdings and VRS Infotech, Nikhil Dhingra and Chandan Mukherjee*). For further information on their shareholding pre and post-Offer, see **"Capital Structure"** on page 111. After the completion of the Offer, our Corporate Promoter will continue to collectively hold majority of the shareholding in our Company and will continue to exercise significant influence over our business policies and affairs and all matters requiring Shareholders' approval, including the composition of our Board, the adoption of amendments to our constitutional documents, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditure or any other matter requiring special resolution. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these stockholders. The interests of the Promoters as our controlling shareholders could conflict with our interests or the interests of our other shareholders. We cannot assure you that the Promoters will act to resolve any conflicts of interest in our favour and any such conflict may adversely affect our ability to execute our business strategy or to operate our business. For further information in relation to the interests of our Promoters in our Company, please see **"Our Management"** and **"Our Promoters and Promoter Group"** on pages 385 and 403, respectively.

**53. One of our Promoters, ACME Cleantech, has pledged the equity shares of our Company to a lender for availing external financing facilities on which pledge has been temporarily released for lock-in purposes and such equity shares shall be re-pledged with the lender.**

Our Promoter, ACME Cleantech (**"Borrower"** and **"Pledgor"**), has availed external financing facilities from Indian Renewable Energy Development Agency Limited amounting to ₹ 1,500.00 million, which is subject to

terms and conditions as agreed between the lender and the Borrower. Pursuant to the terms of such facility, the Pledgor has pledged 125,329,895 Equity Shares of our Company aggregating to 24.00% of the paid-up Equity Share Capital of our Company. Any default under the underlying facility documents may entitle Indian Renewable Energy Development Agency Limited to enforce the pledge. Further, any default under the loan agreements following the creation of a pledge on the Equity Shares of our Company may result in, inter alia, reduction on the aggregate shareholding of our Promoter, the lender taking ownership of the pledged shares, selling the pledged shares to any third party purchaser, and attending and exercising voting rights in respect of the pledged shares on any matter at any meeting of the members of our Company. Further, for the purpose of creation of statutory lock-in as required under the SEBI ICDR Regulations (“**Lock-In**”) by the depositories on the Equity Shares of our Company held by ACME Cleantech, Indian Renewable Energy Development Agency Limited pursuant to its letter dated September 25, 2024, has temporarily released the pledge created on 24.00% Equity Shares of our Company. Post successful creation of the Lock-in, the Equity Shares shall be re-pledged with Indian Renewable Energy Development Agency Limited within 30 days from the date of listing.

**54. *The majority of our Directors have limited experience in being directors of any other listed entities.***

Our Directors hold directorships in other private or public companies. For further details, see the section “**Our Management**” on page 385. While the Directors on the Board of our Company are qualified professionals with substantial industry experience, they may not have been subject to or familiar with the compliance requirements and scrutiny of the SEBI, Stock Exchanges or any other regulator relevant to a listed company, whether in India or abroad. However, majority of our Directors are currently, are not on the board of any listed companies.

Accordingly, to such extent and from such perspective, their guidance and oversight may be limited, which may thereby have an impact on our Company’s effectiveness in matters of compliance as a listed company under applicable laws, including from the perspective of internal controls, disclosures and procedures. We cannot assure you that lack of such adequate experience may not have any adverse impact on our operations as a listed company.

**55. *Industry information included in this Red Herring Prospectus has been derived from an industry report exclusively commissioned and paid for by us for such purpose. Further, this Red Herring Prospectus contains information from technical reports by TÜV SÜD South Asia Private Limited appointed by our Company.***

We have used the report titled “*Strategic assessment of power and renewable energy sector in India*” dated October 2024 prepared by CRISIL MI&A appointed pursuant to engagement letter dated February 27, 2024 for purposes of inclusion of such information at an agreed fees to be paid by our Company. This report is subject to various limitations and based upon certain assumptions that are subjective in nature. While certain information have been rearranged, however, there are no parts, data or information (which may be relevant for the proposed Offer), that has been left out or changed in any manner. Furthermore, industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. You should consult your own advisors and undertake an independent assessment of information in this Red Herring Prospectus based on, or derived from, the CRISIL Report before making any investment decision regarding the Offer.

Further, we appointed TÜV SÜD South Asia Private Limited to undertake technical analysis of, and prepare technical reports, on each of our projects. TÜV SÜD South Asia Private is an independent agency and is not related to our Company, our Subsidiaries, our Promoters or our Directors. TÜV SÜD South Asia Private Limited has prepared the TUV Reports based on information it was provided with as of specific dates. The TUV Reports among others provide details of the proposed power generation scheme, annual energy yield, solar irradiation in the site locations, wind availability, evacuation of generated power, features of main plants and equipment including the inverter system, electrical systems, environmental aspects, and schedule for project implementation. Opinions in the TUV Reports are based on estimates, projections, forecasts and assumptions which may prove to be incorrect.

Also see, “**Certain Conventions, Presentation of Financial, Industry and Market Data – Industry and Market Data**” on page 20.

**56. Our Promoters ACME Cleantech and MKU Holdings, certain of their Subsidiaries and Group Companies are engaged, or are authorized by their constitutional documents to engage, in business activities which are similar to those undertaken by our Company and Subsidiaries. Further, our Promoter Manoj Kumar Upadhyay may have interest in business similar to ours, which may result in conflicts of interest with us.**

Our Promoters, ACME Cleantech and MKU Holdings, certain of their Subsidiaries and Group Companies, are currently engaged in and/or authorized under their respective memoranda of association to carry on the business of development, establishment, maintenance and operation of solar power plants which is similar to the business of our Company. For details, see “**History and Certain Corporate Matters – Confirmations – Common pursuits**” and “**Group Companies – Common Pursuits**” on pages 384 and 616, respectively. Further, our Individual Promoters, Manoj Kumar Upadhyay is on the board of directors of ACME Cleantech and MKU Holdings.

Our Company has entered into a non-compete agreement dated June 25, 2024 (“**Effective Date**”) with ACME Cleantech and MKU Holdings, read with the amendment agreement dated October 7, 2024, under which (a) (i) MKU Holdings and ACME Cleantech; and (ii) all the subsidiaries of MKU Holdings and ACME Cleantech, other than our Company and our Subsidiaries, directly and indirectly, will not carry on, or engage in any business that competes with the renewable energy business of our Company and our Subsidiaries, and (b) all the subsidiaries of MKU Holdings and ACME Cleantech, other than our Company and our Subsidiaries shall not undertake EPC and O&M related business other than undertaking supply of modules and wind turbines for the existing renewable energy projects as on the Effective Date which are being implemented by our Company by itself or through our Subsidiaries. Further, under the terms of the non-compete agreement, three wind power projects managed by two companies which are under corporate insolvency resolution process, may be owned, and operated by ACME Cleantech or its affiliates, subject to receipt of necessary approval in this regard in accordance with applicable law and approval from lenders of ACME Cleantech or its affiliates, as applicable.

While we will adopt necessary procedures and practices as permitted by law to address any instances of conflict of interest, if and when they may arise, we cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

**57. Certain of our Directors, Promoters, members of our Senior Management and Key Managerial Personnel have interests in our Company in addition to their remuneration and reimbursement of expenses.**

Manoj Kumar Upadhyay, Mamta Upadhyay, MKU Holdings, VRS Infotech and Nikhil Dhingra have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters, ACME Cleantech. Further, certain of our Directors, Promoters, members of our Senior Management and Key Managerial Personnel are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses to the extent of their shareholding, direct and indirect, and benefits therefrom. For such transactions between our Company on one hand and the Directors and the Senior Management, on the other hand, see “**Summary of the Offer Document– Summary of Related Party Transactions**” on page 30.

**58. The average cost of acquisition of Equity Shares by our Promoter Selling Shareholder, ACME Cleantech is ₹ 28.31 which may be less than the Offer Price.**

The average cost of acquisition of Equity Shares by our Selling Shareholder, ACME Cleantech may be less than the Offer Price. The details of the average cost of acquisition of Equity Shares held by ACME Cleantech is set out below:

| S. No.                              | Name of the Selling Shareholder | Number of Equity Shares | Average cost of acquisition per Equity Share (in ₹)* |
|-------------------------------------|---------------------------------|-------------------------|------------------------------------------------------|
| <b>Promoter Selling Shareholder</b> |                                 |                         |                                                      |
| 1.                                  | ACME Cleantech                  | 522,207,910             | 28.31                                                |

\*As certified by S. Tekirwal & Associates, Chartered Accountants, by way of their certificate dated October 29, 2024.

**59. We have refinanced some of the debts of certain of our Project SPVs through green bonds, wherein the non-convertible debentures were subscribed by India Cleantech Energy, whose green bonds were listed on the Singapore Stock Exchange**

We have refinanced the debt of certain of our Project SPVs through green bonds wherein the Project SPVs issued unlisted NCDs in Fiscal 2022 for a total amount of ₹ 24,855.25 million (US\$ 334.00 million) including a top up

debt of ₹ 5,029.30 million (US\$ 67.58 million) to India Cleantech Energy, whose green bonds are listed on the Singapore Stock Exchange.

While we have not had any issuances of non-compliance with any applicable rules and regulations in the past in connection to such green bonds issued by India Cleantech Energy, if we fail to comply with applicable rules and regulations, we may be subject to certain actions, which may have an adverse effect on our business, results of operations, financial condition and cash flows.

**60. *We have not declared any dividends in the last three Fiscals and in the three months ended June 30, 2024 and we cannot assure you that we will be able to payment of dividends on our Equity Shares in the future.***

The dividend distribution policy of our Company was approved and adopted by our Board pursuant to its resolution dated June 22, 2024. Further, we have not declared dividends on our Equity Shares for the period from April 1, 2024 until the date of this Red Herring Prospectus, and the last three Fiscals and the three months ended June 30, 2024. Our ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements and other factors considered relevant by our directors and shareholders. Our ability to pay dividends may also be restricted under certain financing arrangements that we may enter into. We cannot assure you that we will be able to pay dividends on the Equity Shares at any point in the future. For further details information, see “**Dividend Policy**” on page 410.

**61. *We have in this Red Herring Prospectus included certain non-GAAP financial measures and Key Performance Indicators (“KPIs”) that may vary from any standard methodology that is applicable across our industry. We rely on certain assumptions and estimates to calculate such measures, therefore such measures may not be comparable with financial, operational or industry-related statistical information of similar nomenclature computed and presented by other similar companies.***

We have included certain financial and operational measures in this Red Herring Prospectus, which we believe to be non-GAAP financial measures (“**Non-GAAP Measures**”) and KPIs, in accordance with the SEBI ICDR Regulations. We compute and disclose such KPIs relating to our operations and financial performance as we consider such information to be useful measures of our business and financial performance, and because such measures are frequently used by securities analysts, investors and others to evaluate the operational performance of companies such as us. These KPIs may not be computed on the basis of any standard methodology that is applicable across the industry and therefore may not be comparable to financial and operational measures, and industry-related statistical information of similar nomenclature that may be computed and presented by other companies pursuing similar business. We have included certain industry information in this Red Herring Prospectus from the CRISIL Report, and the CRISIL Report highlights certain industry and market data relating to us and our competitors, which may not be based on any standard methodology and are subject to various assumptions.

Further, while after listing of the Equity Shares, we will continue to disclose the KPIs in accordance with the applicable laws, however, as the industry in which we operate continues to evolve, the measures by which we evaluate our business may change. Our internal systems and tools have a number of limitations, and our methodologies or assumptions that we rely on for tracking these metrics may also change over time, which could result in unexpected changes to our metrics, including the metrics we publicly disclose, or our estimates of our category position. In addition, if the internal tools we use to track these measures under-count or over-count performance or contain algorithmic or other technical errors, the data and/or reports we generate may not be accurate. We calculate measures using internal tools, which are not independently verified by a third party. Any real or perceived inaccuracies in such metrics may harm our reputation and adversely affect our stock price, business, results of operations, and financial condition. Further, Non-GAAP measures presented in this Red Herring Prospectus is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP. Further, these Non-GAAP Measures are not a measurement of our financial performance or liquidity under Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit for the years or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP. In addition, these Non-GAAP Measures are not standardized terms, hence a direct comparison of these Non-GAAP Measures between companies may not be possible. Other companies may calculate these Non-GAAP Measures differently from us, limiting its usefulness as a comparative measure. Although such Non-GAAP Measures are not a measure of

performance calculated in accordance with applicable accounting standards, our Company's management believes that they are useful to an investor in evaluating us as they are widely used measures to evaluate a company's operating performance.

Also, see “– 55. *Industry information included in this Red Herring Prospectus has been derived from an industry report exclusively commissioned and paid for by us for such purpose. Further, this Red Herring Prospectus contains information from technical reports by TÜV SÜD South Asia Private Limited appointed by our Company.*”, “Basis for Office Price” and “Management's Discussion and Analysis of Financial Condition and Results of Operations” on pages 83, 148 and 536, respectively.

**62. *Significant differences exist between Indian Accounting Standards (“Ind AS”) used to prepare our Restated Consolidated Financial Information, such as the United States Generally Accepted Accounting Principles (U.S. GAAP) and the International Financial Reporting Standards (“IFRS”), which may affect investors’ assessment of our Company’s financial condition.***

Our Restated Consolidated Financial Information included in this Red Herring Prospectus are prepared under Ind AS, which differs from accounting principles with which prospective investors may be familiar, such as Indian GAAP, IFRS and U.S. GAAP.

Accordingly, the degree to which the Restated Consolidated Financial Information included in this Red Herring Prospectus, will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices, Ind AS, the Companies Act and the SEBI ICDR Regulations should limit their reliance on the financial disclosures presented in this Red Herring Prospectus.

#### **External Risk Factors**

**63. *Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain economies in Asia. Financial turmoil in foreign countries in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Furthermore, economic developments globally can have a significant impact on India. Concerns related to a trade war between large economies or significant changes in crude prices may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. The sovereign rating downgrades for Brazil and Russia (and the imposition of sanctions on Russia) have also added to the growth risks for these markets. These factors may also result in a slowdown in India's export growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global, financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have an adverse effect on our business, financial condition, cash flows and results of operation.

These developments, or the perception that any of them could occur, have had and may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have an adverse effect on our business, financial condition, cash flows and results of operations and reduce the price of our Equity Shares.

**64. *Natural or man-made disasters could adversely affect our business.***

Natural disasters (such as cyclones, flooding, and/or earthquakes), epidemics, pandemics and man-made disasters, including acts of war, terrorist attacks, and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn adversely affect our business, financial condition, and results of operations.

Our operations may be adversely affected by natural disasters, and/or severe weather, which can result in damage to our property generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic, and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1, and H1N1 strains of influenza in birds and swine and more recently, the SARS-CoV-2 virus and the monkeypox virus. Another outbreak of the COVID-19 pandemic or future outbreaks of SARS-CoV-2 virus or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have an adverse effect on our business and the trading price of the Equity Shares.

**65. A downgrade in sovereign credit rating of India and other jurisdictions we operate in may affect the trading price of the Equity Shares.**

Our borrowing costs and our access to the debt capital markets depend significantly on the sovereign credit ratings of India. India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Set forth below is India's sovereign debt rating from certain rating agencies.

| Name of Agency | Rating    | Outlook  | Date             |
|----------------|-----------|----------|------------------|
| Fitch          | BBB-      | Stable   | January 16, 2024 |
| Moody's        | Baa3      | Stable   | August 18, 2023  |
| DBRS           | BBB (low) | Positive | May 14, 2024     |
| S&P            | BBB-      | Positive | May 29, 2024     |

Any adverse revisions to sovereign credit ratings for India and other jurisdictions we operate in by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. This could have an adverse effect on our ability to fund our growth on favorable terms and consequently adversely affect our business and financial performance and the price of the Equity Shares.

**66. We may be affected by competition laws in India, the adverse application or interpretation of which could adversely affect our business.**

The Competition Act, 2002 ("**Competition Act**") was enacted for the purpose of preventing practices that have or are likely to have an adverse effect on competition in India and has mandated the Competition Commission of India to prevent such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition ("**AAEC**") is void and attracts substantial penalties. Further, any agreement among competitors which, directly or indirectly, involves determination of purchase or sale prices, limits or controls production, or shares the market by way of geographical area or number of subscribers in the relevant market is presumed to have an appreciable adverse effect in the relevant market in India and shall be void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Indian central government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset-and turnover-based thresholds to be mandatorily notified to, and pre-approved by, the CCI. In addition, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition (Amendment) Act, 2023 ("**Competition Amendment Act**") was notified on April 11, 2023, which amends the Competition Act and gives the CCI additional powers to prevent practices that harm competition and the interests of consumers. The Competition Amendment Act, *inter alia*, modifies the scope of certain factors used to determine AAEC, reduces the overall time limit for the assessment of combinations by the CCI from 210 days to 150 days and empowers the CCI to impose penalties based on the global turnover of entities, for anti-competitive agreements and abuse of dominant position.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered by us could be within the purview of the Competition Act. Further, the CCI has extraterritorial powers and can investigate any agreements, abusive conduct, or combination occurring outside India if such agreement, conduct, or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations, cash flows, and prospects.

**67. *Changing laws, rules or regulations and legal uncertainties in India, including adverse application of taxation laws and regulations, may adversely affect our business, results of operations, financial condition and cash flows.***

The regulatory and policy environment in which we operate is evolving and is subject to change. There is generally no tax on the electricity generation, however, states such as Madhya Pradesh have levied taxes on generation and we may face similar risk in states we operate as there could be new levies on account of this.

Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has in a decision clarified the components of basic wages which need to be considered by companies while making provident fund payments, which resulted in an increase in the provident fund payments to be made by companies. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations.

Further, any future amendments may affect our tax benefits such as deductions for income earned by way of dividend from investments in other domestic companies.

Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance. For further discussion on capital gains tax, see “ - **Risks Relating to the Equity Shares and this Offer - 75. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.**” on page 91.

We cannot predict the impact of any changes in or interpretations of existing, or the promulgation of, new laws, rules and regulations applicable to us and our business. Unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and expend resources relating to compliance with such new requirements, which may also require significant management time, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

Further, the Government of India has recently introduced various amendments to the Income Tax Act, *vide* the Finance Act, 2024. We have not fully determined the impact of these recent and proposed laws and regulations on our business, financial condition, future cash flows and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

**68. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of wages and other expenses relevant to our business. Further, a rise in inflation in other countries, such as in the United States of America or United Kingdom, may

lead to an increase in the interest rates in India and depreciation in the value of the Rupee which in turn make the components imported by our Company costlier.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

**69. *Compliance with provisions of Foreign Account Tax Compliance Act may affect payments on the Equity Shares.***

The U.S. “Foreign Account Tax Compliance Act” (or “**FATCA**”) imposes a new reporting regime and potentially, imposes a 30% withholding tax on certain “foreign passthru payments” made by certain non-U.S. financial institutions (including intermediaries). If payments on the Equity Shares are made by such non-U.S. financial institutions (including intermediaries), this withholding may be imposed on such payments if made to any non-U.S. financial institution (including an intermediary) that is not otherwise exempt from FATCA or other holders who do not provide sufficient identifying information to the payer, to the extent such payments are considered “foreign passthru payments”. Under current guidance, the term “foreign passthru payment” is not defined and it is therefore not clear whether and to what extent payments on the Equity Shares would be considered “foreign passthru payments”. The United States has entered into intergovernmental agreements with many jurisdictions (including India) that modify the FATCA withholding regime described above. It is not yet clear how the intergovernmental agreements between the United States and these jurisdictions will address “foreign passthru payments” and whether such agreements will require us or other financial institutions to withhold or report on payments on the Equity Shares to the extent they are treated as “foreign passthru payments”. Prospective investors should consult their tax advisors regarding the consequences of FATCA, or any intergovernmental agreement or non-U.S. legislation implementing FATCA, to their investment in Equity Shares.

**70. *U.S. holders should consider the impact of the passive foreign investment company (“PFIC”) rules in connection with an investment in our Equity Shares.***

A foreign corporation will be treated as a PFIC for U.S. federal income tax purposes for any taxable year in which either: (i) at least 75% of its gross income is “passive income” or (ii) at least 50% of the total value of its assets is attributable to assets, including cash, that produce or are held for the production of passive income. Our Company will be treated as owning its proportionate share of the assets and earning its proportionate share of the income of any other corporation in which it owns, directly or indirectly, 25% or more (by value) of the stock.

Based on the current and expected composition of our Company’s and the Subsidiaries’ income and assets, including the expected cash proceeds from this offering, our Company does not expect to be a PFIC for the current year or any future years. However, there can be no assurance that our Company will or will not be considered a PFIC in the current or future years. The determination of whether or not our Company is a PFIC is a factual determination that is made annually after the end of each taxable year, and there can be no assurance that our Company will not be considered a PFIC in the current taxable year or any future taxable year because, among other reasons, (i) the composition of our Company’s and its Subsidiaries’ income and assets will vary over time, (ii) our Company holds, and is expected to continue to hold over a period of years, a substantial amount of projects that are under development and have not achieved their commercial operation date, (iii) our Company holds, and may continue to hold, a substantial amount of cash following this Offer, and (iv) the manner of the application of relevant rules is uncertain in several respects. Further, our Company’s PFIC status may depend on the market price of its Equity Shares, which may fluctuate considerably.

**71. *Investors may not be able to enforce a judgment of a foreign court against us, our Directors, and executive officers in India respectively, except by way of a law suit in India.***

We are incorporated under the laws of India and most of our Directors, Key Management Personnel and Senior Management Personnel reside in India. All of our assets are also located in India. Where investors wish to enforce

foreign judgments in India, they may face difficulties in enforcing such judgments. India exercises reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions. In order to be enforceable, a judgment obtained in a jurisdiction which India recognises as a reciprocating territory must meet certain requirements of the Civil Procedure Code, 1908 (the “CPC”).

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided for under Section 13, 14 and Section 44A of the CPC on a statutory basis. Section 44A of the CPC provides that where a certified copy of a decree of any superior court, within the meaning of that Section, obtained in any country or territory outside India which the government has by notification declared to be in a reciprocating territory, may be enforced in India by proceedings in execution as if the judgment had been rendered by a district court in India. However, Section 44A of the CPC is applicable only to monetary decrees and does not apply to decrees for amounts payable in respect of taxes, other charges of a like nature or in respect of a fine or other penalties and does not apply to arbitration awards (even if such awards are enforceable as a decree or judgment).

Among other jurisdictions, the United Kingdom, United Arab Emirates, Singapore and Hong Kong have been declared by the government to be reciprocating territories for the purposes of Section 44A of the CPC. The United States has not been declared by the GoI to be a reciprocating territory for the purposes of Section 44A of the CPC. A judgment of a court of a country which is not a reciprocating territory may be enforced in India only by a suit upon the judgment under Section 13 of the CPC, and not by proceedings in execution. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or refusal to recognize the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and/ or (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. The suit must be brought in India within three years from the date of judgment in the same manner as any other suit filed to enforce a civil liability in India.

It cannot be assured that a court in India would award damages on the same basis as a foreign court if an action were brought in India. Furthermore, it is unlikely that an Indian court will enforce foreign judgments if it views the amount of damages awarded as excessive or inconsistent with Indian practice. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the RBI to repatriate any amount recovered pursuant to the execution of such foreign judgment.

### ***Risks Relating to the Equity Shares and this Offer***

#### ***72. The trading volume and market price of the Equity Shares may be volatile following the Offer.***

The market price of the Equity Shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements by third parties or governmental entities of significant claims or proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;

- fluctuations in stock market prices and volume; and
- general economic, market and stock market conditions.

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

***73. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

***74. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.***

SEBI and the Stock Exchanges, in the past, have introduced various pre-emptive surveillance measures with respect to the shares of listed companies in India (the “**Listed Securities**”) in order to enhance market integrity, safeguard the interests of investors and potential market abuses. In addition to various surveillance measures already implemented, and in order to further safeguard the interest of investors, the SEBI and the Stock Exchanges have introduced additional surveillance measures (“**ASM**”) and graded surveillance measures (“**GSM**”).

ASM is conducted by the Stock Exchanges on Listed Securities with surveillance concerns based on certain objective parameters such as share price, price-to-earnings ratio, percentage of delivery, client concentration, variation in volume of shares and volatility of shares, among other things. GSM is conducted by the Stock Exchanges on Listed Securities where their price quoted on the Stock Exchanges is not commensurate with, among other things, the financial performance and financial condition measures such as earnings, book value, fixed assets, net-worth, other measures such as price-to-earnings multiple and market capitalization and overall financial position of the concerned listed company, the Listed Securities of which are subject to GSM.

For further details in relation to the ASM and GSM Surveillance Measures, including criteria for shortlisting and review of Listed Securities, exemptions from shortlisting and frequently asked questions (FAQs), among other details, refer to the websites of the NSE and the BSE.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company. Any such instance may result in a loss of our reputation and diversion of our management’s attention and may also decrease the market price of our Equity Shares which could cause you to lose some or all of your investment.

***75. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company is generally taxable in India. Any capital gain realized on the sale of listed equity shares on

a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India as well as STT.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument (“MLI”), if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends. Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company’s business, financial condition, results of operations and cash flows.

The Government of India has recently announced the Union Budget for Financial Year 2025 (“**Budget**”). Pursuant to the Budget, the Finance (No.2) Act, 2024 was enacted which *inter alia* increased the rate of taxation of short term capital gains and long-term capital gains arising from transfer of an equity share. There is no certainty on the impact of Finance (No. 2) Act, 2024 on tax laws or other regulations, which may adversely affect our Company’s business, financial condition, results of operations or on the industry in which we operate.

**76. Any future issuance of Equity Shares may dilute your shareholding and sale of Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares.**

We may be required to finance our growth, whether organic or inorganic, through future equity offerings. Any future equity issuances by us, including a primary offering or through exercise of employee stock options, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us (including under an employee stock option scheme) or disposal of our Equity Shares by the Promoters or any of our other principal shareholders or any other change in our shareholding structure to comply with minimum public shareholding norms applicable to listed companies in India or any public perception regarding such issuance or sales may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that our existing shareholders including our Promoters will not dispose of further Equity Shares after the completion of the Offer (subject to compliance with the lock-in provisions under the SEBI ICDR Regulations) or pledge or encumber their Equity Shares. Any future issuances could also dilute the value of shareholder’s investment in the Equity Shares and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the Offer Price. We may also issue convertible debt securities to finance our future growth or fund our business activities. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares.

**77. Foreign investors are subject to investment restrictions under Indian law that limit our Company’s ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.**

Pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Instrument Rules, all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated October 15, 2020 and the FEMA Non-debt Instrument Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the

aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see “**Restrictions on Foreign Ownership of Indian Securities**” on page 670.

**78. The determination of the Price Band is based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer. Further, the current market price of some securities listed pursuant to certain previous issues managed by the BRLMs is below their respective issue prices.**

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the BRLMs. Furthermore, the Offer Price of the Equity Shares will be determined by our Company in consultation with the BRLMs through the Book Building Process. These will be based on numerous factors, including factors as described under “**Basis for Offer Price**” on page 148 and the Offer Price determined by the Book Building Process may not be indicative of the market price for the Equity Shares after the Offer.

Based on Fiscal 2024, the enterprise value (“EV”) to EBITDA ratio is [●] and price to equity ratio at Offer Price is [●]. The average P/E and EV/EBITDA of the listed peer set is [●] while our Company’s P/E and EV/EBITDA will be at premium of [●] times at the higher price band and [●] times at the lower price band. For further details, see “**Basis for Offer Price**” on page 48.

In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the BRLMs is below their respective issue price. For further details, see “**Other Regulatory and Statutory Disclosures – Price information of past issues handled by the BRLMs**” on page 625. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

**79. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and Retail Individual Investors are not permitted to withdraw their Bids after closure of the Bid/ Offer Closing Date.**

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise or withdraw their Bids at any time during the Bid/ Offer Period and withdraw their Bids until the Bid/ Offer Closing Date but not thereafter. Therefore, QIBs and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or otherwise at any stage after the submission of their Bids. While we are required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed, including Allotment, within three Working Days from the Bid/ Offer Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors’ decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Investors’ ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

**80. Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.**

Under the Companies Act, a company having share capital and incorporated in India must offer pre-emptive rights to its holders of equity shares to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have

been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced.

***81. A third-party could be prevented from acquiring control of us post Offer, because of anti-takeover provisions under Indian law.***

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that the interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Offer. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

## SECTION III – INTRODUCTION

### THE OFFER

The following table summarises the Offer details:

|                                                                                                                             |                                                                                                                                                                                                  |

| <b>Use of Net Proceeds</b>                                                                                                  | See “ <b>Objects of the Offer</b> ” beginning on page 125 for information about the use of the proceeds from the Fresh Issue. Our Company will not receive any proceeds from the Offer for Sale. |

<sup>(1)</sup> Our Board has authorised the Offer pursuant to their resolutions dated June 22, 2024 and October 20, 2024. Our Shareholders have authorised the Fresh Issue pursuant to their special resolutions dated June 24, 2024 and October 21, 2024.

<sup>(2)</sup> Our Board has taken on record the consent for the Offer for Sale of the Promoter Selling Shareholder pursuant to its resolution dated October 20, 2024. The Promoter Selling Shareholder has confirmed that the Offered Shares have been held by them for a period of at least one year prior to the filing of the Draft Red Herring Prospectus and are accordingly eligible for being offered for sale in the Offer in compliance with the SEBI ICDR Regulations. The Promoter Selling Shareholder has authorized the inclusion of the Offered Shares in the Offer for Sale. For details of authorizations received for the Offer for Sale, see “**Other Regulatory and Statutory Disclosures-Authority of the Offer**” beginning on page 617.

<sup>(3)</sup> Our Company, in consultation with the BRLMs, may allocate up to 60% of the QIB Portion to Anchor Investors and the basis of such allocation will be on a discretionary basis by our Company, in consultation with the BRLMs in accordance with the SEBI ICDR Regulations. One-third of the Anchor Investor Portion shall be reserved for domestic Mutual Funds, subject to valid Bids being received from domestic Mutual Funds at or above the Anchor Investor Allocation Price. In the event of under-subscription in the Anchor Investor Portion, the balance Equity Shares in the Anchor Investor Portion shall be added to the QIB Portion. For further details, see “**Offer Procedure**” beginning on page 648.

<sup>(4)</sup> Not more than 15% of the Net Offer shall be available for allocation to Non-Institutional Investors of which one-third of the Non-Institutional Portion will be available for allocation to Bidders with an application size of more than ₹ 200,000 and up to ₹ 1,000,000 and two-thirds of the Non-Institutional Portion will be available for allocation to Bidders with an application size of more than ₹ 1,000,000 and under-subscription in either of these two sub-categories of Non-Institutional Portion may be allocated to Bidders in the

other sub-category of Non-Institutional Portion.

- <sup>(5)</sup> Under-subscription, if any, in the QIB Portion would not be allowed to be met with spill-over from other categories or a combination of categories. Subject to valid Bids being received at or above the Offer Price, under-subscription, if any, in any category, except in the QIB Portion, would be allowed to be met with spill over from any other category or combination of categories at the discretion of our Company, in consultation with the BRLMs and the Designated Stock Exchange subject to applicable law. In the event of under-subscription in the Offer, Equity Shares shall be allocated in the manner specified in the section “**Terms of the Offer**” beginning on page 636.
- <sup>(6)</sup> The Employee Reservation Portion shall not exceed 5% of our post-Offer paid-up Equity Share capital. In the event of under-subscription in the Employee Reservation Portion (if any), the unsubscribed portion will be available for allocation proportionately to all Eligible Employees who have Bid in excess of ₹ 200,000 (net of Employee Discount, if any), subject to the maximum value of allocation made to such Eligible Employee not exceeding ₹ 500,000 (net of Employee Discount, if any). The unsubscribed portion, if any, in the Employee Reservation Portion (after allocation up to ₹ 500,000 net of Employee Discount, if any), shall be added to the Net Offer. Our Company, in consultation with the BRLMs, may offer a discount of up to [●]% on the Offer Price (equivalent of ₹ 27.00 per Equity Share) to Eligible Employees bidding in the Employee Reservation Portion which shall be announced two Working Days prior to the Bid/Offer Opening Date. For further details, see “**Offer Procedure**” and “**Offer Structure**” on pages 648 and 643, respectively.

Allocation to all categories of Bidders shall be made in accordance with SEBI ICDR Regulations. The allocation to each Retail Individual Investor shall not be less than the minimum Bid Lot, subject to availability of Equity Shares in the Retail Category and the remaining available Equity Shares, if any, shall be allocated on a proportionate basis. The allocation to each Non-Institutional Investor shall not be less than the minimum non-institutional application size, subject to availability of Equity Shares in the Non-Institutional Category and the remaining available Equity Shares, if any, shall be allocated on a proportionate basis in accordance with the conditions specified in this regard in Schedule XIII to the SEBI ICDR Regulations. For further details, see “**Offer Structure**”, “**Terms of the Offer**” and “**Offer Procedure**” beginning on pages 643, 636 and 648, respectively.

## SUMMARY FINANCIAL INFORMATION

The summary financial information presented below should be read in conjunction with “***Restated Consolidated Financial Information***” and “***Management’s Discussion and Analysis of Financial Condition and Results of Operations***” beginning on pages 411 and 536, respectively. The following tables set forth summary financial information derived from our Restated Consolidated Financial Information.

## Self-Certified Syndicate Banks

The list of SCSBs notified by SEBI for the ASBA process is available at [www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes](http://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognised=yes), or at such other website as may be prescribed by SEBI from time to time. A list of the Designated Branches of the SCSBs with which an ASBA Bidder (other than UPI Bidders using the UPI Mechanism), not bidding through Syndicate/ Sub Syndicate or through a Registered Broker, RTA or CDP may submit the Bid cum Application Forms, is available at <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=34> or at such other websites as may be prescribed by SEBI from time to time.

## **Self-Certified Syndicate Banks and mobile applications enabled for Unified Payment Interface Mechanism**

In accordance with SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and SEBI Circular No. SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, UPI Bidders using the UPI Mechanism may only apply through the SCSBs and mobile applications whose names appears on the website of the SEBI, which may be updated from time to time. A list of SCSBs and mobile applications, which are live for applying in public issues using UPI Mechanism is provided as 'Annexure A' for the SEBI circular number SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and is also available on <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=40> for SCSBs and <https://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=43> for mobile applications or at such other websites as may be prescribed by SEBI from time to time.

## **Syndicate Self-Certified Syndicate Banks Branches**

In relation to Bids (other than Bids by Anchor Investors and RIIs) submitted under the ASBA process to a member of the Syndicate, the list of branches of the SCSBs at the Specified Locations named by the respective SCSBs to receive deposits of Bid cum Application Forms from the members of the Syndicate is available on the website of the SEBI ([www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=35](http://www.sebi.gov.in/sebiweb/other/OtherAction.do?doRecognisedFpi=yes&intmId=35)) and updated from time to time or any such other website as may be prescribed by SEBI from time to time.

## **Registered Brokers**

Bidders can submit ASBA Forms in the Offer using the stockbroker network of the Stock Exchanges, i.e., through the Registered Brokers at the Broker Centres. The list of the Registered Brokers eligible to accept ASBA Forms, including details such as postal address, telephone number and e-mail address, is provided on the websites of the Stock Exchanges at [www.bseindia.com](http://www.bseindia.com) and [www.nseindia.com](http://www.nseindia.com), as updated from time to time.

## **Registrar and Share Transfer Agents**

The list of the RTAs eligible to accept ASBA Forms at the Designated RTA Locations, including details such as address, telephone number and e-mail address, is provided on the websites of the Stock Exchanges at [www.bseindia.com/Static/Markets/PublicIssues/RtaDp.aspx](http://www.bseindia.com/Static/Markets/PublicIssues/RtaDp.aspx) and [www.nseindia.com/products/content/equities/ipos/asba\\_procedures.htm](http://www.nseindia.com/products/content/equities/ipos/asba_procedures.htm) respectively, as updated from time to time.

## **Collecting Depository Participants**

The list of the CDPs eligible to accept ASBA Forms at the Designated CDP Locations, including details such as their name and contact details, is provided on the websites of the Stock Exchanges at [www.bseindia.com/Static/Markets/PublicIssues/RtaDp.aspx](http://www.bseindia.com/Static/Markets/PublicIssues/RtaDp.aspx) and [www.nseindia.com/products/content/equities/ipos/asba\\_procedures.htm](http://www.nseindia.com/products/content/equities/ipos/asba_procedures.htm), respectively, as updated from time to time.

## **Grading of the Offer**

No credit agency registered with SEBI has been appointed for grading for the Offer.

## **Monitoring Agency**

Our Company has appointed ICRA Limited as the monitoring agency in accordance with Regulation 41 of SEBI ICDR Regulations, for monitoring of the utilisation of the Gross Proceeds from the Fresh Issue. For details in relation to the proposed utilisation of the proceeds from the Fresh Issue, please see "**Objects of the Offer**" beginning on page 125. The details of the Monitoring Agency are as follows:

**Name:** ICRA Limited

**CIN:** L74999DL1991PLC042749

## **Experts**

Except as stated below, our Company has not obtained any expert opinions:

Our Company has received written consent dated October 29, 2024 from M/s. Walker Chandiok & Co. LLP and M/s S. Tekriwal & Associates, Chartered Accountants, FRN 009612N, Joint Statutory Auditors, holding a valid peer review certificate from ICAI, to include their name as required under Section 26 (5) of the Companies Act, 2013 read with the SEBI ICDR Regulations, in this Red Herring Prospectus, and as an “expert” as defined under Section 2(38) of the Companies Act, 2013 to the extent and in their capacity as our Joint Statutory Auditors, and in respect of their (i) examination report dated October 7, 2024, relating to the Restated Consolidated Financial Information; (ii) report dated October 29, 2024, on our Unaudited Proforma Financial Information; and (ii) the statement of special tax benefits of the Company dated October 21, 2024, included in this Red Herring Prospectus and such consent has not been withdrawn as on the date of this Red Herring Prospectus.

Our Company has received written consents each dated October 29, 2024 from M/s S. Tekriwal & Associates, Chartered Accountants, FRN 009612N, to include their name as required under section 26(5) of the Companies Act, 2013 read with SEBI ICDR Regulations, in this Red Herring Prospectus, and as an “expert” as defined under section 2(38) of the Companies Act, 2013 in respect of their certificates in connection with the Offer and in respect of the statement of special tax benefits of the Material Subsidiaries i.e, ACME Solar Energy and ACME Heergarh dated October 21, 2024. Our Company has received written consent dated October 18, 2024 from Ravinder Kumar Khara, Independent Chartered Engineer, to include their name as required under Section 26(5) of the Companies Act, 2013 read with the SEBI ICDR Regulations, in this Draft Red Herring Prospectus, and as an “expert” as defined under Section 2(38) of the Companies Act, 2013 in respect of the certification issued by them in their capacity as an independent chartered engineer to our Company and such consent has not been withdrawn as on the date of this Red Herring Prospectus.

Such consents have not been withdrawn as on the date of this Red Herring Prospectus. The term “experts” and consent thereof does not represent an expert or consent within the meaning under the U.S. Securities Act.

## **Appraising Entity**

None of the objects for which the Net Proceeds will be utilised have been appraised by any agency.

## **Credit Rating**

As the Offer is of Equity Shares, credit rating is not required.

## **Debenture Trustees**

As the Offer is of Equity Shares, the appointment of debenture trustees is not required.

## **Green Shoe Option**

No green shoe option is contemplated under the Offer.

## **Book Building Process**

Book building, in the context of the Offer, refers to the process of collection of Bids from Bidder on the basis of this Red Herring Prospectus, the Bid cum Application Forms and the Revision Forms within the Price Band which will be decided by our Company, in consultation with the BRLMs and minimum Bid lot which will be decided by our Company, in consultation with the BRLMs and advertised in all editions of Financial Express (a widely circulated English national daily newspaper) and all editions of Jansatta (a widely circulated Hindi national daily newspaper, Hindi also being the regional language in the place where our Registered and Corporate Office is located), at least two Working Days prior to the Bid/Offer Opening Date and shall be made available to the Stock Exchanges for the purposes of uploading on their respective website. The Offer Price shall be determined by our Company, in consultation with the BRLMs after the Bid/Offer Closing Date.

**All Investors (other than Anchor Investors) shall mandatorily participate in the Offer only through the ASBA process by providing details of their respective ASBA Account in which the corresponding Bid**

Amount will be blocked by SCSBs, or in the case of UPI Bidders, by using the UPI Mechanism. Anchor Investors are not permitted to participate in the Offer through the ASBA process.

In terms of the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw their Bid(s) or lower the size of their Bid(s) (in terms of quantity of Equity Shares or the Bid Amount) at any stage. Retail Individual Bidders and Eligible Employees Bidding in the Employee Reservation Portion (subject to the Bid Amount being up to ₹500,000) can revise their Bid(s) during the Bid/Offer Period and withdraw their Bid(s) until Bid/Offer Closing Date. Anchor Investors are not allowed to revise and withdraw their Bids after the Anchor Investor Bid/Offer Period. Except Allocation to Retail Individual Bidders, Non-Institutional Bidders and the Anchor Investors, Allocation in the Offer will be on a proportionate basis. Further, allocation to Anchor Investors will be on a discretionary basis. Each Bidder by submitting a Bid in the Offer, will be deemed to have acknowledged the above restrictions and the terms of the Offer. For further details on the Book Building Process and the method and process of Bidding, see “*Terms of the Offer*”, “*Offer Procedure*” and “*Offer Structure*” beginning on pages 636, 648 and 643, respectively.

The Book Building Process is subject to change. Bidders are advised to make their own judgment about an investment through this process prior to submitting a Bid.

Investors should note the Offer is also subject to filing of the Prospectus and obtaining final listing and trading approvals of the Stock Exchanges, which our Company shall apply for after Allotment within three Working Days of the Bid/Offer Closing Date or such other time period as prescribed under applicable law.

For an illustration of the Book Building Process, price discovery process and allocation, see “*Offer Procedure*” beginning on page 648.

### Underwriting Agreement

After the determination of the Offer Price but prior to filing of the Prospectus with the RoC, our Company, the Promoter Selling Shareholder and the Registrar will enter into the Underwriting Agreement with the Underwriters for the Equity Shares proposed to be offered through the Offer. The extent of underwriting obligations and the Bids to be underwritten by each BRLM shall be as per the Underwriting Agreement. Pursuant to the terms of the Underwriting Agreement, the obligations of the Underwriters will be several and will be subject to certain conditions to closing, as specified therein.

The Underwriters have indicated their intention to underwrite the following number of Equity Shares:

*(This portion has been intentionally left blank and will be completed before filing of the Prospectus with the RoC)*

| Name, address, telephone number and e-mail address of the Underwriters | Indicative number of Equity Shares of face value of ₹2 each to be Underwritten | Amount underwritten (₹ in million) |
|------------------------------------------------------------------------|--------------------------------------------------------------------------------|------------------------------------|
| [●]                                                                    | [●]                                                                            | [●]                                |
| [●]                                                                    | [●]                                                                            | [●]                                |
| <b>Total</b>                                                           | [●]                                                                            | [●]                                |

The abovementioned amounts are provided for indicative purposes only and will be finalised after the pricing and actual allocation and subject to the provisions of Regulation 40(2) of the SEBI ICDR Regulations.

In the opinion of our Board, (based on representations made to our Company by the Underwriters), the resources of the Underwriters are sufficient to enable them to discharge their respective underwriting obligations in full. The Underwriters are registered with the SEBI under Section 12(1) of the SEBI Act or registered as brokers with the Stock Exchange(s). Our Board/ IPO Committee, at its meeting held on [●], has approved the execution of the Underwriting Agreement by our Company.

Allocation amongst the Underwriters may not necessarily be in proportion to their underwriting commitments set forth in the table above. Notwithstanding the above table, the Underwriters shall be severally responsible for ensuring payment with respect to Equity Shares allocated to Investors procured by them in accordance with the Underwriting Agreement.

## CAPITAL STRUCTURE

The share capital of our Company, as on the date of this Red Herring Prospectus, is set forth below.

|        |                                                                                                                         | (in ₹, except share data) |                                 |
|--------|-------------------------------------------------------------------------------------------------------------------------|---------------------------|---------------------------------|
| S. No. | Particulars                                                                                                             | Aggregate nominal value   | Aggregate value at Offer Price* |
| A)     | <b>AUTHORISED SHARE CAPITAL<sup>(1)</sup></b>                                                                           |                           |                                 |
|        | Comprising:                                                                                                             |                           |                                 |
|        | 5,000,000,000 Equity Shares of face value of ₹ 2 each                                                                   | 10,000,000,000            | -                               |
| B)     | <b>ISSUED, SUBSCRIBED AND PAID-UP SHARE CAPITAL BEFORE THE OFFER</b>                                                    |                           |                                 |
|        | Comprising                                                                                                              |                           |                                 |
|        | 522,207,910 Equity Shares of face value of ₹ 2 each                                                                     | 1,044,415,820             | -                               |

\*To be updated upon finalisation of the Offer Price and subject to Basis of Allotment.

<sup>+</sup>Assuming full subscription in the Offer.

<sup>#</sup>At consolidated financial basis.

<sup>(1)</sup> For details in relation to the changes in the authorised share capital of our Company in the last 10 years preceding the date of this Red Herring Prospectus, see “History and Certain Corporate Matters – Amendments to our Memorandum of Association in the last 10 years” on page 301.

<sup>(2)</sup> Our Board has authorised the Offer, pursuant to their resolutions dated June 22, 2024 and October 20, 2024. Our Shareholders have authorised the Fresh Issue pursuant to special resolutions dated June 24, 2024 and October 21, 2024.

<sup>(3)</sup> Our Board taken on record the consent for the Offer for Sale of the Promoter Selling Shareholder pursuant to its resolution dated October 20, 2024. The Promoter Selling Shareholder has confirmed that the Offered Shares have been held by them for a period of at least one year prior to the filing of the Draft Red Herring Prospectus and are accordingly eligible for being offered for sale in the Offer in compliance with the SEBI ICDR Regulations. The Promoter Selling Shareholder has authorized the inclusion of the Offered Shares in the Offer for Sale. For details of authorizations received for the Offer for Sale, see “Other Regulatory and Statutory Disclosures - Authority of the Offer” beginning on page 617.

<sup>(4)</sup> In the event of under-subscription in the Employee Reservation Portion (if any), the unsubscribed portion will be available for allocation proportionately to all Eligible Employees who have Bid in excess of ₹ 200,000 (net of Employee Discount, if any), subject to the maximum value of allocation made to such Eligible Employee not exceeding ₹ 500,000 (net of Employee Discount, if any). The unsubscribed portion, if any, in the Employee Reservation Portion (after allocation up to ₹ 500,000 net of Employee Discount, if any), shall be added to the Net Offer. Our Company, in consultation with the BRLMs, may offer a discount of up to [●]% on the Offer Price (equivalent of ₹ 27.00 per Equity Share) to Eligible Employees bidding in the Employee Reservation Portion which shall be announced two Working Days prior to the Bid/Offer Opening Date. For further details, see “Offer Procedure” and “Offer Structure” on pages 648 and 643, respectively.

### Notes to Capital Structure

#### 1. Equity share capital history of our Company

(a) The following table sets forth the history of the equity share capital of our Company:

| Date of allotment | Nature of allotment                            | Name of allottees/ shareholders and equity shares allotted               | Number of equity shares allotted | Face value per equity share (₹) | Issue price per equity share (₹) | Nature of consideration | Cumulative number of equity shares |
|-------------------|------------------------------------------------|--------------------------------------------------------------------------|----------------------------------|---------------------------------|----------------------------------|-------------------------|------------------------------------|
| June 2015         | 3, Pursuant to initial subscription to the MoA | Allotment of 9,999 equity shares to ACME Cleantech and 1 equity share to | 10,000                           | 10                              | 10.00                            | Cash                    | 10,000                             |

| Date of allotment             | Nature of allotment                                                                                                                                                         | Name of allottees/ shareholders and equity shares allotted                                                                                                             | Number of equity shares allotted | Face value per equity share (₹) | Issue price per equity share (₹) | Nature of consideration | Cumulative number of equity shares |

(1) Pursuant to a resolution passed by our Board and Shareholders dated March 29, 2017, and March 30, 2017, respectively, 20,384,415, 0%, compulsorily convertible debentures (“CCDs”) were allotted to ACME Cleantech. Thereafter, pursuant to a resolution passed by our Board and Shareholders dated September 18, 2017, and September 19, 2017, respectively, 6,500,000 CCDs allotted to ACME Cleantech were converted into 6,500,000 non-convertible debentures (“NCDs”). Further, pursuant to a resolution passed by our Board dated December 27, 2017, the remaining 13,884,415 CCDs to ACME Cleantech were converted into 14,501,102 equity shares. Subsequently, pursuant to board and shareholders resolution dated March 29, 2018, and March 30, 2018, respectively, 6,500,000 NCDs of face value of ₹ 1,000 each were converted into 6,500,000 CCDs and consequently pursuant to board, shareholders and operational committee resolutions dated May 27, 2024, June 7, 2024, and June 12, 2024, respectively, 6,500,000 CCDs were converted into 6,500,000 NCDs. Subsequently, all 6,500,000 NCDs were redeemed to the holders pursuant to consent of debenture holder received by letter dated June 12, 2024. Accordingly, as on the date of the Draft Red Herring Prospectus and the date of this Red Herring Prospectus, there are no outstanding CCDs.

(2) Manoj Kumar Upadhyay, Mamta Upadhyay, MKU Holdings, VRS Infotech, Nikhil Dhingra and Chandan Mukherjee have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters, ACME Cleantech.

Our Company is in compliance with the Companies Act, 2013, to the extent applicable, with respect to issuance of Equity Shares from the date of incorporation of our Company till the date of filing of this Red Herring Prospectus.

## 2. Preference share capital history of our Company

Our Company does not have any outstanding preference shares, as on the date of this Red Herring Prospectus.

## 3. Shares issued for consideration other than cash, by way of bonus or by way of conversion of loan

Except as disclosed below, our Company has not issued any equity shares for consideration other than cash, by way of bonus or by way of conversion of loan since its incorporation.

| Date of allotment | Nature of allotment                                                                                                                                                         | Name of allottees/ shareholders and equity shares allotted                                                                           | Number of equity shares (Pre-bonus/loan) | Number of equity shares allotted | Number of equity shares (Post-bonus/loan) <sup>(1)</sup> | Face value per equity share (₹) | Issue price per equity share (₹) | Nature of consideration | Cumulative number of equity shares |

<sup>(1)</sup> Pursuant to a resolution passed by our Board and Shareholders dated March 29, 2017, and March 30, 2017, respectively, 20,384,415, 0% compulsorily convertible debentures (“CCDs”) were allotted to ACME Cleantech. Thereafter, pursuant to a resolution passed by our Board and Shareholders dated September 18, 2017, and September 19, 2017, respectively, 6,500,000 CCDs allotted to ACME Cleantech were converted into 6,500,000 non-convertible debentures (“NCDs”). Further, pursuant to a resolution passed by our Board dated December 27, 2017, 13,884,415 CCDs allotted to ACME Cleantech were converted into 14,501,102 equity shares. Subsequently, pursuant to board and shareholders resolution dated March 29, 2018, and March 30, 2018, respectively, 6,500,000 NCDs of face value of ₹ 1,000 each were converted into 6,500,000 CCDs and consequently pursuant to board, shareholders and operational committee resolutions dated May 27, 2024, June 7, 2024, and June 12, 2024, respectively, 6,500,000 CCDs were converted into 6,500,000 NCDs. Subsequently, all 6,500,000 NCDs were redeemed to the holders pursuant to consent of debenture holder received by letter dated June 12, 2024. Accordingly, as on the date of the Draft Red Herring Prospectus and this Red Herring Prospectus, there are no outstanding CCDs.

<sup>(2)</sup> Manoj Kumar Upadhyay, Mamta Upadhyay, MKU Holdings, VRS Infotech, Nikhil Dhingra and Chandan Mukherjee have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters. Further, the Upadhyay Family Trust does not hold any Equity Shares in our Company.

All the Equity Shares held by our Corporate Promoter were fully paid-up on the respective date of allotment of such Equity Shares.\*

\* Manoj Kumar Upadhyay, Mamta Upadhyay, MKU Holdings, VRS Infotech, Nikhil Dhingra and Chandan Mukherjee have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters, ACME Cleantech.

Except as stated below, as of the date of this Red Herring Prospectus, none of the Equity Shares held by our Promoters are pledged or are otherwise encumbered:

Our Corporate Promoter, ACME Cleantech, has pledged 125,329,895 Equity Shares aggregating to 24.00% of the paid-up Equity Share Capital of our Company against the facility availed by ACME Cleantech from one of the lenders, amounting to ₹ 1,500.00 million. Further, for the purpose of creation of statutory lock-in as required under the SEBI ICDR Regulations (“**Lock-In**”) by the depository on the Equity Shares of our Company held by ACME Cleantech, Indian Renewable Energy Development Agency Limited pursuant to its letter dated September 25, 2024, has temporarily released the pledge created on 24.00% Equity Shares of our Company. Post successful creation of the Lock-in, the Equity Shares shall be re-pledged with Indian Renewable Energy Development Agency Limited within 30 days from the date of listing.

## Shareholding of our Promoters, directors of our Corporate Promoters and the member of our Promoter Group

<sup>(1)</sup> Also the Selling Shareholder

<sup>(2)</sup> Manoj Kumar Upadhyay, Mamta Upadhyay, MKU Holdings, VRS Infotech, Nikhil Dhingra and Chandan Mukherjee have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters, ACME Cleantech.

Note: To be updated at the Prospectus stage.

<sup>^</sup>Subject to finalization of basis of Allotment.

Except as disclosed above, none of the directors of our Corporate Promoters or members of our Promoter Group hold any Equity Shares as on date of this Red Herring Prospectus.

### b) Details of minimum Promoters' contribution locked in

Pursuant to Regulations 14 and 16 of the SEBI ICDR Regulations, an aggregate of 20% of the fully diluted post- Offer Equity Share capital of our Company held by our Promoters shall be considered as minimum promoters' contribution and locked-in for a period of three years or any other period as may be prescribed under applicable law, from the date of Allotment ("**Promoters' Contribution**"). Our Promoter's shareholding in excess of 20% shall be locked in for a period of one year from the Allotment.

Our Promoters have given consent to include such number of Equity Shares held by them, in aggregate, as may constitute 20% of the fully diluted post- Offer Equity Share capital of our Company as Promoters' Contribution. Our Promoters have agreed not to dispose, sell, transfer, charge, pledge or otherwise encumber in any manner the Promoters' Contribution from the date of this Red Herring Prospectus, until the expiry of the lock-in period specified above, or for such other time as required under SEBI ICDR Regulations, except as may be permitted, in accordance with the SEBI ICDR Regulations.

The details of Equity Shares held by our Promoters, which will be locked-in for minimum Promoters' Contribution for a period of three years, from the date of Allotment as Promoters' Contribution are as provided below:

| Name of the Promoter | Number of Equity Shares held | Number of Equity Shares locked-in** | Date of allotment/ transfer <sup>#</sup> | Face value per Equity Share (₹) | Allotment/ Acquisition price per Equity Share (₹) | Nature of transaction | % of the post- Offer paid-up Capital |
|----------------------|------------------------------|-------------------------------------|------------------------------------------|---------------------------------|---------------------------------------------------|-----------------------|--------------------------------------|
| [•]                  | [•]                          | [•]                                 | [•]                                      | [•]                             | [•]                                               | [•]                   | [•]                                  |
| <b>Total</b>         | <b>[•]</b>                   | <b>[•]</b>                          | <b>[•]</b>                               | <b>[•]</b>                      | <b>[•]</b>                                        | <b>[•]</b>            | <b>[•]</b>                           |

Note: To be updated at the Prospectus stage.

<sup>#</sup> Equity Shares were fully paid-up on the date of allotment/acquisition.

<sup>\*\*</sup> Subject to finalisation of Basis of Allotment.

The Equity Shares that are being locked-in are not and will not be ineligible for computation of Promoters' Contribution under Regulation 15 of the SEBI ICDR Regulations. In this connection, we confirm the following:

- The Equity Shares offered for Promoters' Contribution do not and shall not include Equity Shares acquired during the three years preceding the date of this Red Herring Prospectus (a) for consideration other than cash and revaluation of assets or capitalisation of intangible assets, or (b) as a result of bonus shares issued by utilization of revaluation reserves or unrealised profits or from bonus issue against Equity Shares which are otherwise in-eligible for computation of Promoters' Contribution;
- The Promoters' Contribution does not include any Equity Shares acquired during the one year preceding the date of this Red Herring Prospectus, at a price lower than the price at which the Equity Shares are being offered to the public in the Offer;
- Our Company has not been formed by the conversion of one or more partnership firms or a limited liability partnership firm; and

- (iv) The Equity Shares forming part of the Promoters' Contribution are not subject to any pledge or any other form of encumbrance.

**c) Details of share capital locked-in for six months or any other period as may be prescribed under applicable law**

In terms of Regulation 17 of the SEBI ICDR Regulations, except for:

- (i) the Promoters' Contribution and any Equity Shares held by our Promoters in excess of Promoters' Contribution, which shall be locked in as above;
- (ii) Equity Shares issued by our Company to Eligible Employees (or such persons as permitted under the SEBI SBEB Regulations); and
- (iii) the Offered Shares successfully transferred by the Promoter Selling Shareholder pursuant to the Offer for Sale;

the entire pre-Offer Equity Share capital of our Company, shall, unless otherwise permitted under the SEBI ICDR Regulations, be locked in for a period of six months from the date of Allotment in the Offer. In terms of Regulation 17(c) of the SEBI ICDR Regulations, Equity Shares held by a venture capital fund or alternative investment fund of category I or category II or a foreign venture capital investor shall not be locked-in for a period of six months from the date of Allotment, provided that such Equity Shares shall be locked in for a period of at least six months from the date of purchase by such shareholders. As required under Regulation 20 of the SEBI ICDR Regulations, our Company shall ensure that the details of the Equity Shares locked-in are recorded by the relevant Depository.

In terms of Regulation 22 of the SEBI ICDR Regulations, Equity Shares held by our Promoters which are locked-in pursuant to Regulation 16 of the SEBI ICDR Regulations, may be transferred amongst our Promoters or any member of the Promoter Group or to any new promoter, subject to continuation of lock-in in the hands of the transferees for the remaining period and compliance with provisions of the Takeover Regulations, as applicable and such transferee shall not be eligible to transfer them till the lock-in period stipulated in SEBI ICDR Regulations has expired. The Equity Shares held by persons other than our Promoters and locked-in for a period of six months from the date of Allotment in the Offer, may be transferred to any other person holding Equity Shares which are locked-in, subject to the continuation of the lock-in in the hands of the transferee for the remaining period and compliance with the provisions of the Takeover Regulations.

In terms of Regulation 21 of the SEBI ICDR Regulations, the Equity Shares held by our Promoters which are locked-in as per Regulation 16 of the SEBI ICDR Regulations, may be pledged only with scheduled commercial banks or public financial institutions or systemically important non-banking finance companies or deposit taking housing finance companies as collateral security for loans granted by such entity, provided that such pledge of the Equity Shares is one of the terms of the sanctioned loan. However, such lock-in will continue pursuant to any invocation of the pledge and the transferee of the Equity Shares pursuant to such invocation shall not be eligible to transfer the Equity Shares until the expiry of the lock-in period stipulated above.

**d) Lock-in of Equity Shares Allotted to Anchor Investors**

50% of the Equity Shares allotted to Anchor Investors under the Anchor Investor Portion shall be locked-in for a period 90 days from the date of Allotment and the remaining 50% shall be locked-in for a period of 30 days from the date of Allotment.

**e) Sales or purchases of Equity Shares or other specified securities of our Company by our Promoters, members of our Promoter Group and/or our Directors and their relatives during the six months immediately preceding the date of this Red Herring Prospectus**

None of our Promoters, members of our Promoter Group, our Directors, directors of Promoters or their relatives have sold or purchased any Equity Shares of our Company during the six months preceding the date of this Red Herring Prospectus.\*

\* Manoj Kumar Upadhyay, Mamta Upadhyay, MKU Holdings, VRS Infotech, Nikhil Dhingra and Chandan Mukherjee have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters, ACME Cleantech.

## 9. Our shareholding pattern

The table below represents the shareholding pattern of our Company as on the date of this Red Herring Prospectus:

| Category (I) | Category of shareholder (II)                 | Number of shareholders (III) | Number of fully paid up Equity Shares held (IV) | Number of Partly paid-up Equity Shares held (V) | Number of shares underlying Depository Receipts (VI) | Total number of shares held (VII) = (IV)+(V)+(VI) | Shareholding as a % of total number of shares (VIII) As a % of (A+B+C2) | Number of Voting Rights held in each class of securities (IX) |                                  |             | Number of Equity Shares Underlying Outstanding convertible securities (including Warrants) (X) | Shareholding, as a % assuming full conversion of convertible securities (as a percentage of diluted share capital) (XI) = (VII)+(X) As a % of (A+B+C2) | Number of Locked in Equity Shares (XII) | Number of Equity Shares pledged or otherwise encumbered (XIII)** |                                 | Number of Equity Shares held in dematerialized form (XIV) |                                 |             |
|--------------|----------------------------------------------|------------------------------|-------------------------------------------------|-------------------------------------------------|------------------------------------------------------|---------------------------------------------------|-------------------------------------------------------------------------|---------------------------------------------------------------|----------------------------------|-------------|------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|------------------------------------------------------------------|---------------------------------|-----------------------------------------------------------|---------------------------------|-------------|

\*Six of out the seven shareholders hold Equity Shares as nominees of our Promoter, ACME Cleantech, i.e., Manoj Kumar Upadhyay, Mamta Upadhyay, Nikhil Dhingra, Chandan Mukherjee, MKU Holdings and VRS Infotech.

\*\*One of our Promoters, ACME Cleantech, has pledged 125,329,895 Equity Shares aggregating to 24.00% of the paid-up Equity Share Capital of our Company against the facility availed by ACME Cleantech from one of the lenders, amounting to ₹ 1,500.00 million. Further, for the purpose of creation of statutory lock-in as required under the SEBI ICDR Regulations ("Lock-In") by the depositories on the Equity Shares of our Company held by ACME Cleantech, Indian Renewable Energy Development Agency Limited pursuant to its letter dated September 25, 2024, has temporarily released the pledge created on 24.00% Equity Shares of our Company. Post successful creation of the Lock-in, the Equity Shares shall be re-pledged with Indian Renewable Energy Development Agency Limited within 30 days from the date of listing. Accordingly, the column 'Number of Equity Shares pledged or otherwise encumbered' in the above shareholding does not reflect the Equity Shares on which pledge will be re-created by Indian Renewable Energy Development Agency Limited.

10. As on the date of this Red Herring Prospectus, our Company has seven equity Shareholders.

11. **Shareholding of our Directors, Key Managerial Personnel and Senior Management in our Company**

None of our Directors or Key Managerial Personnel or Senior Management hold any Equity Shares\*.

*\*Manoj Kumar Upadhyay and Nikhil Dhingra have been nominated to hold five Equity Shares each on behalf of one of our Corporate Promoters, ACME Cleantech.*

<sup>(1)</sup> Includes one equity share held as a nominee of ACME Cleantech by VRS Infotech.

(d) Set forth below are details of shareholders holding 1% or more of the paid-up share capital of our Company as of two years prior to the date of this Red Herring Prospectus:

| Sr. No.      | Name of Shareholder                      | Face value (in ₹) | Number of equity shares          | Percentage of pre-Offer equity share capital |
|--------------|------------------------------------------|-------------------|----------------------------------|----------------------------------------------|
| 1.           | ACME Cleantech Solutions Private Limited | 10                | 104,441,582 <sup>(1)</sup>       | 100.00                                       |
| <b>Total</b> |                                          | <b>10</b>         | <b>104,441,582<sup>(1)</sup></b> | <b>100.00</b>                                |

<sup>(1)</sup> Includes one equity share held as a nominee of ACME Cleantech by VRS Infotech.

13. There have been no financing arrangements whereby the members of our Promoter Group, our Directors and their relatives have financed the purchase by any other person of securities of our Company other than in the normal course of the business of the financing entity in six months immediately preceding the date of filing of this Red Herring Prospectus.

14. Our Company, our Directors and the BRLMs have not entered into any buy-back arrangement for purchase of the Equity Shares.

15. The Equity Shares are fully paid-up and there are no partly paid-up Equity Shares as on the date of this Red Herring Prospectus. The Equity Shares to be issued or transferred pursuant to the Offer shall be fully paid-up at the time of Allotment.

16. None of the BRLMs and their respective associates (as defined under the SEBI (Merchant Bankers) Regulations, 1992) hold any Equity Shares in our Company as on the date of this Red Herring Prospectus.
17. There are no outstanding warrants, options or rights to convert debentures, loans or other instruments into, or which would entitle any person any option to receive Equity Shares of our Company, as on the date of this Red Herring Prospectus. However, our Company has an ESOP Scheme which has a pool of 15,666,237 options out of which 4,014,827 options are in the process of being granted to the employees.
18. No person connected with the Offer, including, but not limited to, our Company, the Promoters, the members of the Syndicate, or our Directors, shall offer any incentive, whether direct or indirect, in any manner, whether in cash or kind or services or otherwise to any Bidder for making a Bid.
19. Except for the allotment of Equity Shares pursuant to the Fresh Issue, there will be no further issue of specified securities whether by way of issue of bonus shares, preferential allotment, rights issue or in any other manner during the period commencing from the date of filing of this Red Herring Prospectus with SEBI until the Equity Shares have been listed on the Stock Exchanges or all application monies have been refunded, as the case may be.
20. Except for the Equity Shares to be allotted pursuant to the Fresh Issue, there is no proposal or intention, negotiations or consideration by our Company to alter its capital structure by way of split or consolidation of the Equity Shares or issue of Equity Shares or convertible securities on a preferential basis or issue of bonus or rights or further public offer of such securities, within a period of six months from the Bid/Offer Opening Date.
21. The BRLMs, and any person related to the BRLMs or the Syndicate Members, cannot apply in the Offer under the Anchor Investor Portion, except for Mutual Funds sponsored by entities which are associate of the BRLMs, or insurance companies promoted by entities which are associates of the BRLMs, or AIFs sponsored by entities which are associates of the BRLMs, or a FPI (other than individuals, corporate bodies and family offices) sponsored by entities which are associates of the BRLMs.
22. None of the Book Running Lead Managers and their associates (as defined under the SEBI Merchant Bankers Regulations) hold any Equity Shares of our Company as on the date of this Red Herring Prospectus.
23. The Book Running Lead Managers and their associates may engage in the transactions with and perform services for our Company in the ordinary course of business or may in the future engage in commercial banking and investment banking transactions with our Company for which they may in the future receive customary compensation.
24. Our Company shall ensure that there shall be only one denomination of the Equity Shares, unless otherwise permitted by law.
25. Our Company will comply with such disclosure and accounting norms as may be specified by SEBI from time to time.
26. All transactions in Equity Shares by our Promoters and members of our Promoter Group between the date of filing of this Red Herring Prospectus and the date of closing of the Offer shall be reported to the Stock Exchanges within 24 hours of such transactions.
27. Up to [●] Equity Shares aggregating up to ₹ [●] million (which shall not exceed 5% of the post-Offer equity share capital of our Company) shall be reserved for allocation to Eligible Employees under the Employee Reservation Portion, subject to valid Bids being received at or above the Offer Price (net of Employee Discount, if any) as applicable for the Employee Reservation Portion). Only Eligible Employees would be eligible to apply in the Offer under the Employee Reservation Portion. Bids by Eligible Employees can also be made in the Net Offer and such Bids shall not be treated as multiple Bids. Unless the Employee Reservation Portion is undersubscribed, the value of allocation to an Eligible Employee shall not exceed ₹ 200,000 (net of Employee Discount, if any). In the event of undersubscription in the Employee Reservation Portion, the unsubscribed portion may be allocated, on a proportionate basis, to Eligible Employees for value exceeding ₹ 200,000 (net of Employee Discount, if any) up to ₹ 500,000 (net of Employee Discount, if any).

## 28. Employee Stock Option Scheme

Our Company adopted the ESOP Scheme pursuant to the resolution passed by our Board and Shareholders dated June 26, 2024, and June 27, 2024, respectively as amended pursuant to resolutions passed by our Board dated October 7, 2024 and October 16, 2024, and resolutions passed by the Shareholders dated October 8, 2024 and October 17, 2024. The ESOP Scheme has been instituted to grant stock options exercisable into Equity Shares to eligible employees of our Company, our Subsidiaries and our holding company. The ESOP Scheme is in compliance with the Companies Act and the SEBI SBEB & SE Regulations. No employee stock options have been granted to any person other than the current or former employees (as defined in Regulation 2(1)(i) of the SEBI SBEB SE Regulations) of our Company and its holding company under the ESOP Scheme and all grants of employee stock options under the ESOP Scheme have been undertaken in compliance with the SEBI SBEB & SE Regulations and the Companies Act, 2013, as applicable. The details of the ESOP Scheme, as certified by S. Tekriwal & Associates, Chartered Accountants, FRN 009612N, pursuant to their certificate dated October 29, 2024 are as follows:

| Particulars                                                                                                               | Total     |

*Note: While the Nomination and Remuneration Committee of our Board at its meeting dated October 7, 2024 approved the grant of the options, the grant letters have not been issued as on the date of this Red Herring Prospectus.*

*\*Devendra Singh has resigned from our Company after the date on which Nomination and Remuneration committee of our Company passed resolution for the grant of the options (i.e., October 7, 2024). Accordingly, the Company will be taking appropriate steps to cancel the Unvested Options (if any).*

## OBJECTS OF THE OFFER

The Offer comprises a Fresh Issue of [●] Equity Shares of face value of ₹ 2 each, aggregating up to ₹ 23,950.00 million by our Company and an Offer for Sale of up to [●] Equity Shares of face value of ₹ 2 each aggregating up to ₹ 5,050.00 million by the Promoter Selling Shareholder. For details, see “**Summary of the Offer Document**” and “**The Offer**” on pages 24 and 95, respectively.

### The Offer for Sale

The proceeds of the Offer for Sale shall be received by the Promoter Selling Shareholder, ACME Cleantech Solutions Private Limited. Our Company will not receive any proceeds from the Offer for Sale. The Promoter Selling Shareholder will be entitled to their respective portion of proceeds of the Offer for Sale, net of their respective proportion of the Offer related expenses and the relevant taxes thereon. For further details, see “- **Offer Related Expenses**” on page 144.

### Fresh Issue

Our Company proposes to utilize the Net Proceeds towards funding the following objects (collectively, the “**Objects**”):

1. Investment in our Subsidiaries for repayment/prepayment, in full or in part, of certain outstanding borrowings availed by our Subsidiaries; and
2. General corporate purposes.

In addition, we expect to achieve the benefit of listing of our Equity Shares on the Stock Exchanges including enhancement of our Company’s brand name and creation of a public market for our Equity Shares in India.

The main objects clause of our Memorandum of Association enables us to undertake the activities for which the funds are being raised by us in the Fresh Issue. Further, the activities we have been carrying out until now are in accordance with the main objects clause of our Memorandum of Association.

### Utilisation of Net Proceeds

After deducting the Offer related expenses from the gross proceeds of the Fresh Issue, we estimate the net proceeds of the Fresh Issue to be ₹ [●] million (“**Net Proceeds**”). The details of the Net Proceeds of the Offer are summarized in the table below.

| S. No | Particulars                                          | Amount                    |
|-------|------------------------------------------------------|---------------------------|
| (a)   | Gross proceeds of the Fresh Issue                    | Up to ₹ 23,950.00 million |
| (b)   | Less: Offer Expenses in relation to the Fresh Issue* | [●] <sup>(1)</sup>        |
| (c)   | Net Proceeds                                         | [●] <sup>(1)</sup>        |

\*See “- **Offer Related Expenses**” below on page 144.

<sup>(1)</sup> To be determined after finalisation of the Offer Price and updated in the Prospectus prior to filing of the RoC.

### Proposed schedule of implementation and utilisation of Net Proceeds

We propose to deploy the Net Proceeds for the Objects in accordance with the estimated schedule of implementation and deployment of funds as set forth in the table below.

| (₹ in million) |                                                                                                                                             |                                       |                                                            |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|------------------------------------------------------------|
| S. No          | Particulars                                                                                                                                 | Amount to be funded from Net Proceeds | Amount to be deployed from the Net Proceeds in Fiscal 2025 |
| 1.             | Investment in our Subsidiaries for repayment/prepayment, in full or in part, of certain outstanding borrowings availed by our Subsidiaries. | 17,950.00                             | 17,950.00                                                  |
| 2.             | General corporate purposes*                                                                                                                 | [●]                                   | [●]                                                        |
|                | <b>Total Net Proceeds*</b>                                                                                                                  | <b>[●]</b>                            | <b>[●]</b>                                                 |

\*To be finalised upon determination of the Offer Price and updated in the Prospectus. The amount utilised for general corporate purposes shall not exceed 25% of the gross proceeds from the Fresh Issue.

The above-stated fund requirements, proposed deployment of the funds and the intended use of the Net Proceeds as described in this Red Herring Prospectus are based on the current business plan and internal management estimates based on current market conditions and other commercial and technical factors, which are subject to change from time to time. However, such fund requirements and deployment of funds have not been appraised by any bank, financial institution or any other independent agency. For further details, see **“Risk Factors – 49. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and may be subject to change based on various factors, some of which are beyond our control. While our Company will receive proceeds from the Fresh Issue, it will not receive any proceeds from the Offer for Sale..”** on page 81. We may have to revise our funding requirements and deployment on account of a variety of factors such as our financial and market condition, our business and growth strategies, our ability to identify and implement growth initiatives, competitive landscape, general factors affecting our results of operations, financial condition and access to capital and other external factors such as changes in the business environment or regulatory climate and interest or exchange rate fluctuations, which may not be within the control of our management. This may entail rescheduling the proposed utilisation of the Net Proceeds and changing the allocation of funds from its planned allocation at the discretion of our management, subject to compliance with applicable law. For details, see **“Risk Factors – 50. Any variation in the utilization of the Net Proceeds would be subject to certain compliance requirements, including prior shareholders’ approval.”** on page 82.

Subject to applicable laws, in case of any increase in the actual utilization of funds earmarked for the Objects, such additional funds for a particular activity will be met by way of means available to our Company, including from internal accruals and any additional equity and/or debt arrangements. If the actual utilization towards any of the Objects is lower than the proposed deployment, such balance will be used for future growth opportunities, if required and general corporate purposes, which will not exceed 25.00% of the Gross Proceeds, in accordance with the SEBI ICDR Regulations. In the event that estimated utilization out of the Net Proceeds in a Fiscal is not completely met due to factors such as (i) the timing of completion of the Offer; (ii) market conditions outside the control of our Company; and (iii) any other economic, business and commercial considerations, the same shall be utilized in the subsequent fiscals, as may be decided by our Company, in accordance with applicable laws. Any such change in our plans may require rescheduling of our expenditure programs and increasing or decreasing expenditure for a particular object vis-à-vis the utilization of Net Proceeds.

#### **Details of the Objects of the Fresh Issue**

##### **1. Investment in our Subsidiaries for repayment/prepayment, in full or in part, of certain outstanding borrowings availed by our Subsidiaries.**

Our Subsidiaries have entered into various borrowing arrangements, including borrowings in the form of terms loans and various fund based and non-fund based working capital facilities. As on August 31, 2024, we had outstanding borrowings (fund based) of ₹ 98,916.93 million on a consolidated basis.

Our Company intends to utilize an aggregate amount of ₹ 17,950.00 million from the Net Proceeds towards investment in our Subsidiaries for repayment/ prepayment, in full or in part, of certain outstanding borrowings availed by our Subsidiaries. Pursuant to the terms of the borrowing arrangements, prepayment of certain indebtedness may attract prepayment charges as prescribed by the respective lender. Such prepayment charges, as applicable, will also be funded out of the Net Proceeds, as per the requirements of the Company. If the Net Proceeds are insufficient for making payments for such pre-payment penalties or premiums or interest, such excessive amount shall be met from our internal accruals. Given the nature of the borrowings and the terms of repayment/ prepayment, the aggregate outstanding amounts under the borrowings may vary from time to time and our Subsidiaries may, in accordance with the relevant repayment schedule, repay or refinance some of their existing borrowings prior to Allotment. We believe that such repayment or prepayment will help reduce our outstanding indebtedness on a consolidated basis and debt servicing costs and enable utilization of the internal accruals for further investment towards business growth and expansion.

In addition, we believe that this would improve our ability to raise further resources in the future to fund potential business development opportunities. The selection of borrowings proposed to be prepaid or repaid amongst our borrowing arrangements will be based on various factors, including (i) maturity profile and the remaining tenor of the loan, (ii) cost of the borrowing, including applicable interest rates, (iii) any conditions attached to the borrowings, restricting our ability to prepay/ repay the borrowings and time taken to fulfil, or obtain waivers for fulfilment of such conditions, or relating to the terms of repayment, (iv) levy of any

prepayment penalties and the quantum thereof, (v) provisions of any laws, rules and regulations governing such borrowings, and (vi) other commercial considerations including, among others, the amount of the loan outstanding.

Further, our Company and our Subsidiaries may also avail additional borrowings and/ or draw down further funds under existing borrowing facilities, in the ordinary course of business, from time to time, for meeting its capital expenditure and working capital requirements after the date of this Red Herring Prospectus. Accordingly, in case any of the below loans are pre-paid or further drawn-down prior to the filing of this Red Herring Prospectus, we may utilize the Net Proceeds towards repayment and / or pre-payment of such additional indebtedness and for general corporate purposes. In light of the above, if at the time of filing this Red Herring Prospectus, any of the below mentioned loans are repaid in part or full or refinanced or if any additional credit facilities are availed or drawn down or if the limits under the working capital borrowings are increased, then the table below shall be suitably revised to reflect the revised amounts or loans as the case may be which have been availed by our Company and our Subsidiaries.

The following table provides the details of the outstanding amount of borrowings including interest thereon availed by certain of our wholly owned Subsidiaries, as on August 31, 2024, which we propose to pre-pay/ repay, in full or in part, along with the accrued interest from the Net Proceeds for an aggregate amount of ₹ 17,950.00 million:

To the extent our Company deploys the Net Proceeds in our wholly owned Subsidiaries, for the purpose of prepayment or repayment of all or a portion of the above borrowings, it shall be in the form of debt, including inter-corporate loans, non-convertible debentures or in any other manner as may be decided by our Board.

In accordance with Clause 9(A)(2)(b) of Part A of Schedule VI of the SEBI ICDR Regulations which requires a certificate from the statutory auditor certifying the utilisation of loans for the purposes aforesaid, our Company has obtained the requisite certificate each dated October 29, 2024, from our Joint Statutory Auditors and S. Tekriwal & Associates, Chartered Accountants, FRN 009612N, as applicable.

## **2. General corporate purposes**

The Net Proceeds will first be utilized for the object as set out above. Subject to this, our Company intends to deploy balance left out of the Net Proceeds towards our general corporate purposes, as approved by our management, from time to time, subject to such utilization for general corporate purposes not exceeding 25% of the Gross Proceeds, in compliance with the SEBI ICDR Regulations.

Such general corporate purposes may include, but are not restricted to, the following:

- (i) funding organic growth opportunities;
- (ii) business development initiatives;
- (iii) meeting ongoing general corporate purposes or contingencies; and/or
- (iv) any other purpose as may be approved by the Board or a duly appointed committee from time to time, subject to compliance with the Companies Act.

The allocation or quantum of utilization of funds towards the specific purposes described above will be determined by our Board, based on our business requirements and other relevant considerations, from time to time. Our Company's management, in accordance with the policies of our Board, shall have flexibility in utilising surplus amounts, if any. In the event we are unable to utilise the entire amount that we have currently estimated for use out of Net Proceeds in a Fiscal, we will utilise such unutilised amount(s) in the subsequent Fiscals.

## **Means of Finance**

We confirm that there are no requirements to make firm arrangements of finance under Regulation 7(1)(e) of the SEBI ICDR Regulations through verifiable means towards at least 75% of the stated means of finance, excluding the amount to be raised from the Fresh Issue and existing identifiable accruals, as prescribed under the SEBI ICDR Regulations.

## **Offer Related Expenses**

The total expenses of the Offer are estimated to be approximately ₹ [●] million. The expenses of this Offer include, among others, listing fees, underwriting commission (if any), selling commission and brokerage, fees payable to the BRLMs, fees payable to legal counsel, fees payable to the Registrar to the Offer, Escrow Collection Bank and Sponsor Bank to the Offer, processing fee to the SCSBs for processing application forms, brokerage and selling commission payable to members of the Syndicate, Registered Brokers, RTAs and CDPs, printing and stationery expenses, advertising and marketing expenses and all other incidental and miscellaneous expenses for listing the Equity Shares on the Stock Exchanges.

Except for (i) listing fees, audit fees of statutory auditors (to the extent not attributable to the Offer), and expenses for any corporate advertisements consistent with past practice of the Company (not including expenses relating to marketing and advertisements undertaken in connection with the Offer), and stamp duty payable on issue of Equity Shares pursuant to Fresh Issue which shall be borne solely by the Company; and (ii) fees and expenses in relation to the legal counsel to the Promoter Selling Shareholder which shall be borne solely by the Promoter Selling Shareholder, the Company and the Promoter Selling Shareholder agree to share the costs and expenses (including all applicable taxes, except STT which shall be solely borne by the Promoter Selling Shareholder) directly attributable to the Offer in proportion to the number of Equity Shares issued and Allotted by the Company through the Fresh Issue and the number of Offered Shares sold by the Promoter Selling Shareholder through the Offer for Sale. The Company agrees to advance the cost and expenses of the Offer and the Company will be reimbursed, by the Promoter Selling Shareholder for their respective proportion of such costs and expenses upon successful completion of the Offer. The Promoter Selling Shareholder agree that such payments, expenses and

taxes, will be deducted from the proceeds from the sale of Offered Shares, in accordance with Applicable Law and as disclosed in the Offer Documents, in proportion to its respective Offered Shares. Notwithstanding anything contained herein or in any other documentation relating to the Offer, it is clarified that, in the event that the Offer is withdrawn or not completed for any reason, all the costs and expenses (including all applicable taxes) directly attributed to the Offer shall be exclusively borne by the Company and the Promoter Selling Shareholder in a proportionate manner including but not limited to, the fees and expenses of the BRLMs and the legal counsels in relation to the Offer, except as may be prescribed by SEBI or any other regulatory authority.

The estimated Offer expenses are as follows:

| (₹ in million)                        |                                                                                                                                                                                |                     |                                              |                                |  |

| <b>Total Estimated Offer Expenses</b> |                                                                                                                                                                                | [•]                 | [•]                                          | [•]                            |  |

\*To be incorporated in the Prospectus after finalisation of the Offer Price. Offer expenses are estimates and are subject to change. Offer expenses include goods and services tax, where applicable.

- (1) Selling commission payable to the SCSBs on the portion for Retail Individual Bidders, Non-Institutional Bidders and Eligible Employees Bidders which are directly procured and uploaded by the SCSBs, would be as follows:

|                                        |                                                      |
|----------------------------------------|------------------------------------------------------|
| Portion for Retail Individual Bidders* | 0.35% of the Amount Allotted (plus applicable taxes) |
| Portion for Non-Institutional Bidders* | 0.15% of the Amount Allotted (plus applicable taxes) |
| Portion for Eligible Employees*        | 0.25% of the Amount Allotted (plus applicable taxes) |

\*Amount Allotted is the product of the number of Equity Shares Allotted and the Offer Price.

Selling Commission payable to the SCSBs will be determined on the basis of the bidding terminal id as captured in the Bid book of BSE or NSE.

No processing fees shall be payable by the Company and the Promoter Selling Shareholder to the SCSBs on the applications directly procured by them.

Processing fees payable to the SCSBs for capturing Syndicate Member/Sub-syndicate (Broker)/Sub-broker code on the ASBA Form for Non-Institutional Bidders and Qualified Institutional Bidders with bids above ₹ 0.5 million would be ₹ 10 plus applicable taxes, per valid application subject to a maximum cap of ₹ 2 million

- (2) Brokerage, selling commission and processing/uploading charges on the portion for Retail Individual Bidders (using the UPI mechanism), Eligible Employee Bidders and Non-Institutional Bidders which are procured by members of the Syndicate (including their sub-Syndicate Members), RTAs and CDPs or for using 3-in-1 type accounts- linked online trading, demat & bank account provided by some of the brokers which are members of Syndicate (including their sub-Syndicate Members) would be as follows:

|                                        |                                                      |
|----------------------------------------|------------------------------------------------------|
| Portion for Retail Individual Bidders* | 0.35% of the Amount Allotted (plus applicable taxes) |
| Portion for Non-Institutional Bidders* | 0.15% of the Amount Allotted (plus applicable taxes) |
| Portion for Eligible Employees*        | 0.25% of the Amount Allotted (plus applicable taxes) |

\*Amount Allotted is the product of the number of Equity Shares Allotted and the Offer Price.

The Selling commission payable to the Syndicate / sub-Syndicate Members (Retail Individual Bidders up to ₹ 0.2 million), and Non-Institutional Bidders (from ₹ 0.2 - ₹ 0.5 million) will be determined on the basis of the application form number / series,

provided that the application is also bid by the respective Syndicate / sub-Syndicate Members. For clarification, if a Syndicate ASBA application on the application form number / series of a Syndicate / sub-Syndicate Members, is bid by an SCSB, the Selling Commission will be payable to the SCSB and not the Syndicate / sub-Syndicate Members.

Uploading Charges payable to members of the Syndicate (including their sub-Syndicate Members), RTAs and CDPs on the applications made by Retail Individual Bidders and Eligible Employee Bidders using 3-in-1 accounts/Syndicate ASBA mechanism and Non-Institutional Bidders which are procured by them and submitted to SCSB for blocking or using 3-in-1 accounts/Syndicate ASBA mechanism, would be as follows: ₹ 10 plus applicable taxes, per valid application bid by the Syndicate (including their sub-Syndicate Members), RTAs and CDPs.

Bidding charges payable on the application made using 3-in-1 accounts will be subject to a maximum cap of ₹ 3.5 million (plus applicable taxes), in case if the total processing fees exceeds ₹ 3.5 million (plus applicable taxes) then processing fees will be paid on pro-rata basis for portion of (i) Retail Individual Bidder's (ii) Non-Institutional Bidder's (iii) Eligible Employee, as applicable. The selling commission and bidding charges payable to Registered Brokers, the RTAs and CDPs will be determined on the basis of the bidding terminal id as captured in the Bid Book of BSE or NSE.

Selling commission/ uploading charges payable to the Registered Brokers on the portion for Retail Individual Bidders, Eligible Employee Bidders and Non-Institutional Bidders which are directly procured by the Registered Broker and submitted to SCSB for processing, would be as follows:

|                                        |                                                    |
|----------------------------------------|----------------------------------------------------|
| Portion for Retail Individual Bidders* | ₹ 10 per valid application (plus applicable taxes) |
| Portion for Non-Institutional Bidders* | ₹ 10 per valid application (plus applicable taxes) |
| Portion for Eligible Employees*        | ₹ 10 per valid application (plus applicable taxes) |

Uploading charges/ Processing fees for applications made by RIBs using the UPI Mechanism (up to ₹ 0.2 million) and Non-Institutional Bidders (from ₹ 0.2 - ₹ 0.5 million) would be as under:

|                                                            |                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Members of the Syndicate / RTAs / CDPs /Registered Brokers | ₹ 10 per valid application (plus applicable taxes) subject to a maximum cap of ₹ 10.00 million (plus applicable taxes)                                                                                                                                                                                                                                                                   |
| ICICI Bank Limited                                         | ₹ Nil plus, GST for per applications made by UPI Bidders using the UPI mechanism*. The Sponsor Bank(s) shall be responsible for making payments to the third parties such as remitter bank, NPCI and such other parties as required in connection with the performance of its duties under the SEBI circulars, the Syndicate Agreement and other applicable laws.                        |
| Axis Bank Limited                                          | ₹ Nil plus GST for per applications made by UPI Bidders using the UPI mechanism (plus applicable taxes)*. The Sponsor Bank(s) shall be responsible for making payments to the third parties such as remitter bank, NPCI and such other parties as required in connection with the performance of its duties under the SEBI circulars, the Syndicate Agreement and other applicable laws. |

\* Based on valid applications

The total uploading charges / processing fees payable to Members of the Syndicate, RTAs, CDPs, Registered Brokers will be subject to a maximum cap of ₹10.00 million (plus applicable taxes). In case the total uploading charges/processing fees payable exceeds ₹10.00 million, then the amount payable to Members of the Syndicate, RTAs, CDPs, Registered Brokers would be proportionately distributed based on the number of valid applications such that the total uploading charges / processing fees payable does not exceed ₹10.00 million.

All such commissions and processing fees set out above shall be paid as per the timelines in terms of the Syndicate Agreement and Cash Escrow and Sponsor Bank Agreement. The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI RTA Master Circular, in a format as prescribed by SEBI, from time to time and in accordance with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022.

## Interim Use of Funds

Pending utilization for the purposes described above, we undertake to temporarily deposit the funds from the Net Proceeds only with scheduled commercial banks in accordance with the Companies Act 2013 and other applicable laws. In accordance with Section 27 of the Companies Act 2013, our Company confirms that it shall not use the Net Proceeds for buying, trading or otherwise dealing in shares of any other listed company or for any investment in the equity markets and no lien of any nature shall be created on the underlying funds.

## Bridge Loan

Our Company has not raised any bridge loans which are required to be repaid from the Net Proceeds.

## Monitoring of Utilization of Funds

In terms of Regulation 41 of the SEBI ICDR Regulations, our Company has appointed ICRA Limited as the Monitoring Agency to monitor the utilization of the Gross Proceeds as the proposed Issue exceeds ₹ 1,000.00 million. The Monitoring Agency will monitor the utilisation of the Gross Proceeds and the Monitoring Agency shall submit the report required under Regulation 41(2) of the SEBI ICDR Regulations, on a quarterly basis, until such time as the Gross Proceeds have been utilised in full. Our Company undertakes to place the report(s) of the Monitoring Agency on receipt before the Audit Committee without any delay.

Our Company will disclose and continue to disclose, the utilisation of the Gross Proceeds, including interim use under a separate head in our balance sheet for such Fiscals as required under applicable law, clearly specifying the purposes for which the Gross Proceeds have been utilised, till the time any part of the Net Proceeds remains unutilised. Our Company will also, in its balance sheet for the applicable Fiscals, provide details, if any, in relation to all such Net Proceeds that have not been utilised, if any, of such currently unutilised Net Proceeds. Further, our Company, on a quarterly basis, shall include the deployment of Gross Proceeds under various heads, as applicable, in the notes to our quarterly financial results. Our Company will indicate investments, if any, of unutilised Net Proceeds in the balance sheet of our Company for the relevant Fiscals subsequent to receipt of listing and trading approvals from the Stock Exchanges.

In accordance with Regulation 32(1) of the SEBI Listing Regulations, our Company shall furnish to the Stock Exchanges on a quarterly basis, a statement indicating (i) deviations, if any, in the actual utilisation of the proceeds of the Gross Proceeds from the Objects as stated above; and (ii) details of category wise variations in the actual utilisation of the Gross Proceeds from the Objects as stated above. Pursuant to Regulation 32(3) and Part C of Schedule II, of the SEBI Listing Regulations, our Company shall, on a quarterly basis, disclose to the Audit Committee the uses and applications of the Net Proceeds. The Audit Committee shall make recommendations to our Board for further action, if appropriate. On an annual basis, our Company shall prepare a statement of funds utilised for purposes other than those stated in this Red Herring Prospectus and place it before the Audit Committee and make other disclosures as may be required until such time as the Net Proceeds remain unutilised. Such disclosure shall be made only until such time that all the Net Proceeds have been utilised in full. The statement shall be certified by the Joint Statutory Auditors of our Company in accordance with Regulation 32(5) of SEBI Listing Regulations.

### **Variation in Objects of the Offer**

In accordance with Sections 13(8) and 27 of the Companies Act, our Company shall not vary the objects of the Fresh Issue unless our Company is authorized to do so by way of a special resolution of its Shareholders. In addition, the notice issued to the Shareholders in relation to the passing of such special resolution (“**Notice**”) shall specify the prescribed details and be published in accordance with the Companies Act. The Notice shall simultaneously be published in the newspapers, one in English and one in Hindi, the vernacular language of the jurisdiction where our Registered Office is situated. Our Promoters will be required to provide an exit opportunity to such Shareholders who do not agree to the above stated proposal, at a price and in such manner and subject to such conditions as prescribed by SEBI, in this regard.

### **Appraising Entity**

None of the Objects for which the Net Proceeds will be utilized have been appraised by any bank/financial institution.

### **Other Confirmations**

Except to the extent of any proceeds received pursuant to the sale of Offered Shares proposed to be sold in the Offer by the Promoter Selling Shareholder, no part of the Net Proceeds will be paid to our Promoters, members of the Promoter Group, Group Companies, Directors, our Key Managerial Personnel or Senior Management. Our Company has neither entered into nor has planned to enter into any arrangement/ agreements with our Promoters, members of the Promoter Group, Directors, our Key Managerial Personnel, our Senior Management or our Group Companies in relation to the utilization of the Net Proceeds. Further, there are no material existing or anticipated interest of such individuals and entities in the Objects of the Offer except as set out above.

There has been no instance of delays, defaults, rescheduling/restructuring or evergreening in respect of the outstanding borrowings for which the Net Proceeds will be utilized for repayment or prepayment.

## BASIS FOR OFFER PRICE

The Price Band and Offer Price will be determined by our Company in consultation with the BRLMs, and in accordance with applicable law, on the basis of assessment of market demand for the Equity Shares offered through the Book Building Process and quantitative and qualitative factors as described below. The face value of the Equity Shares is ₹ 2 each and the Offer Price is [●] times the face value at the lower end of the Price Band and [●] times the face value at the higher end of the Price Band. Investors should also refer to the sections “**Risk Factors**”, “**Our Business**”, “**Restated Consolidated Financial Information**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on pages 32, 201, 341 and 455, respectively, to have an informed view before making an investment decision.

### Qualitative Factors

Some of the qualitative factors which form the basis for the Offer Price are:

#### **Large renewable energy player well positioned to capitalize on strong industry tailwinds**

We are one of the largest renewable energy independent power producers (“**IPP**”) in India and among the top 10 renewable energy players in India in terms of operational capacity as of June 30, 2024 in India as disclosed on page 238 in the section “**Industry Overview – Key Competitors**”. As of the date of this Red Herring Prospectus, we have an aggregate operational capacity of 1,340 MW (1,826 MWp); under construction contracted capacity of 3,250 MW and under construction awarded capacity of 1,730 MW.

According to the CRISIL Report, renewable energy installations (including large hydroelectric projects) have increased fivefold to approximately 191 GW as of March 2024, as compared with approximately 63 GW as of March 2012, led by various central and state level incentives. As of March 2024, installed grid connected renewable energy generation capacity (including large hydroelectric projects) in India constituted approximately 43% of the total installed generation base in India. In the renewable energy basket (including large hydroelectric projects) as of March 2024, solar energy accounted for a share of 43%. Growth in the solar power sector over the last five years has been robust. As much as approximately 60 GW capacity was added in the segment over Fiscals 2018 to 2023, representing a CAGR of approximately 24.8%, although on a low base. (Source: CRISIL Report)

#### **End-to-end value chain capabilities and an integrated approach to developing renewable power projects by in-house project development, engineering, procurements, construction, operations and maintenance teams**

We have an integrated in-house approach to executing our renewable projects across the entire life cycle of developing a project, from PPA signing to the project achieving commercial operations within 18 to 24 months and subsequently operating and maintaining the project.

We focus on establishing robust connectivity to seamlessly integrate our projects with substations. We assess substations with available capacity, conduct comprehensive evaluations of various factors before initiating connectivity including solar irradiation, wind speed and availability of land. We secured 2,400 MW of connectivity in Fiscal 2024 and 2,150 MW of connectivity in April 2024 from Government and state entities through various options including providing bank guarantees, acquiring land and receipt of letter of awards. Further, we have applied for 3,300 MW of connectivity for future bids, ensuring the readiness of evacuation systems in alignment with stipulated timelines essential for our future project commissioning schedules. As of the date of this Red Herring Prospectus, we have a land bank of approximately 1,200 acres comprising land purchased and leased.

We only submit bids for those renewable energy auctions where we are comfortable with the policies, incentives, credit history of the off-taker, and where there is access to evacuation infrastructure, transmission systems, water, roads and communications networks and other ancillary infrastructure, competitive intensity, capacity on offer and restrictions on maximum/minimum bid quantity (if applicable).

In Fiscal 2024, the ACME Group was one of the leading bidders for FDRE projects (Source: CRISIL Report) entailing integration of solar, wind and battery storage technologies to deliver continuous power especially during peak demand hours. It won projects with an aggregate capacity of 1,250 MW out of 8,250 MW auctioned (Source: CRISIL Report) representing 15.15% of the total FDRE projects bids in India during Fiscal 2024.

As part of our EPC function, our construction capabilities are also a significant strength in our business. We utilize our own civil and electrical engineers with proven project development and project management capabilities to develop and monitor our projects.

### **Expansive portfolio diversified across different renewable energy technologies**

We have an expansive portfolio of projects diversified across different renewable energy technologies. Our projects are located across 11 Indian states of Rajasthan, Gujarat, Punjab, Madhya Pradesh, Uttar Pradesh, Bihar, Chattisgarh, Andhra Pradesh, Odisha, Karnataka and Telangana. According to the CRISIL Report, states like Gujarat, Rajasthan, Madhya Pradesh, Andhra Pradesh, Karnataka, and Tamil Nadu offer more solar irradiance as compared to other parts of India which makes them desirable for installing solar projects. Further, states such as Gujarat, Maharashtra, Karnataka, Tamil Nadu and Andhra Pradesh have excellent wind as well solar potential and provide great opportunities for supply of hybrid power. (Source: CRISIL Report)

Our Under Construction Contracted Projects include solar projects of 1,500 MW (2,192 MWp) being constructed in Rajasthan, wind projects of 150 MW being constructed in Gujarat, hybrid projects of 1,030 MW being constructed in Andhra Pradesh, Karnataka, Rajasthan and Gujarat and FDRE projects of 570 MW being constructed in Rajasthan and Gujarat; and Under Construction Awarded Project capacity of 1,730 MW comprising 600 MW (870 MWp) of solar power projects, 450 MW hybrid power projects and 680 MW of FDRE power projects, as of the date of this Red Herring Prospectus.

Various initiatives such as stringent LPS Rules, mandatory letter of credit by distribution companies, regulation of power supply in case of non-maintenance of payment security mechanisms, denial of open access in case of non-payment of dues beyond 75 days from due date have tightened the payment security and brought in the much-required discipline in payments to renewable energy generators by distribution companies. (Source: CRISIL Report)

Following such developments, we have recently acquired certain projects with a contracted capacity of 2,080 MW comprising 830 MW of hybrid and 1,250 MW of FDRE projects from ACME Cleantech. Out of acquired capacity, for 450 MW capacity, our Company has entered into share purchase and shareholders agreements with ACME Cleantech and relevant SPVs. Pursuant to such share purchase agreements, our Company has acquired 49.00% of the equity share capital of such SPVs, while remaining 51.00% continues to be held by ACME Cleantech. In terms of such share purchase and shareholder agreements, our Company exercises control over such SPVs; and responsibility of overall development, commissioning, and funding of the relevant project shall reside with our Company. Further, our Company has the right to acquire the remaining 51.00% of the equity share capital held by ACME Cleantech post expiry of the relevant PPA lock-in-period (as set out under bid documents as well as the respective power purchase agreement to be entered into by such SPVs, which is one year post the commercial operation date for the respective projects housed in these SPVs. For the remaining 1,630 MW capacity, our Company has acquired the entire equity share capital of the respective SPVs.

### **Committed Promoters and senior management team**

Our Promoter, ACME Cleantech, has a proven track record of developing renewable power projects and has also significantly invested in our business through a combination of equity and debt financing in our Company and our project SPVs. ACME Cleantech has also supported us with bank guarantees for the security we are required to provide at the time of submitting a bid for a renewable power auction and has also provided us with support for the performance guarantees and corporate guarantees our project SPVs are required to have in place for the development phase of a project.

For further details, see “*Our Business – Our Competitive Strengths*” on page 249.

### **Quantitative Factors**

Certain information presented below relating to our Company is based on the on the Restated Consolidated Financial Information. For details, see “*Restated Consolidated Financial Information*” beginning on page 411. Some of the quantitative factors which may form the basis for calculating the Offer Price are as follows:

#### **Basic and diluted earnings per Equity Share (“EPS”):**

As derived from the Restated Consolidated Financial Information:

| Financial Year ended                   | Basic EPS (₹) | Diluted EPS (₹) | Weight |
|----------------------------------------|---------------|-----------------|--------|
| March 31, 2024                         | 12.55         | 12.55           | 3      |
| March 31, 2023                         | (0.06)        | (0.06)          | 2      |
| March 31, 2022                         | 1.12          | 1.12            | 1      |
| <b>Weighted Average</b>                | <b>6.44</b>   | <b>6.44</b>     | -      |
| As at three months ended June 30, 2024 | 0.03          | 0.03            | -      |
| As at three months ended June 30, 2023 | 1.48          | 1.48            | -      |

Notes:

- Weighted average = Aggregate of year-wise weighted EPS divided by the aggregate of weights i.e. (EPS x Weight) for each year/Total of weights.
- Basic Earnings per Equity Share (₹) = Net profit after tax of the Company, as restated / Weighted average no. of Equity Shares outstanding during the year.
- Diluted Earnings per Equity Share (₹) = Net Profit after tax of the Company, as restated / Weighted average no. of potential Equity Shares outstanding during the year.
- Earnings per Share calculations are in accordance with the notified Indian Accounting Standard 33 'Earnings per share'.
- The figures disclosed above are based on the Restated Consolidated Financial Information.
- Adjusted for the split of equity shares from face value of ₹ 10 each to ₹ 2 each, as approved by our Board and the Shareholders pursuant to their resolutions dated May 27, 2024, and June 7, 2024, respectively.

#### Price/Earning ("P/E") ratio in relation to the Price Band of ₹ [●] to ₹ [●] per Equity Share:

| Particulars                                            | P/E at the Floor Price<br>(no. of times)* | P/E at the Cap Price<br>(no. of times)* |
|--------------------------------------------------------|-------------------------------------------|-----------------------------------------|
| Based on basic EPS for the year ended March 31, 2024   | [●]                                       | [●]                                     |
| Based on diluted EPS for the year ended March 31, 2024 | [●]                                       | [●]                                     |

\*To be updated in the Prospectus.

#### Enterprise Value / Earnings Before Interest, Taxes, Depreciation and Amortisation ("EV/EBITDA") ratio in relation to the Price Band of ₹ [●] to ₹ [●] per Equity Share:

| Particulars | EV/EBITDA at the Floor<br>Price (no. of times)* | EV/EBITDA at the Cap<br>Price<br>(no. of times)* |
|-------------|-------------------------------------------------|--------------------------------------------------|
| [●]         | [●]                                             | [●]                                              |
| [●]         | [●]                                             | [●]                                              |

\*To be updated in the Prospectus.

#### Industry Peer Group P/E ratio and EV/EBITDA

Based on the peer group information (excluding our Company) given below in this section, details of the highest, lowest and industry average P/E ratio are set forth below:

| Particulars | Name of the Company        | P/E ratio | EV/EBITDA |
|-------------|----------------------------|-----------|-----------|
| Highest     | Adani Green Energy Limited | 291.7x    | 45.9x     |
| Lowest      | ReNew Energy Global PLC    | 48.4x     | 13.8x     |
| Average     |                            | 170.3x    | 29.8x     |

Source: BSE, Bloomberg

Note: Price and EV represents value for closing price from BSE and Bloomberg market data, respectively, as of October 3, 2024, for Adani Green Energy Limited. Price and EV represents value for closing price from the NASDAQ stock exchange and Bloomberg, respectively, as of October 3, 2024. Foreign exchange rate of ₹ 83.47 per USD for ReNew Energy market data calculations.

#### Return on Net Worth ("RoNW")

As derived from the Restated Consolidated Financial Information:

| Financial Year ended                    | RoNW (%)     | Weight |
|-----------------------------------------|--------------|--------|
| March 31, 2024                          | 26.93        | 3      |
| March 31, 2023                          | (0.17)       | 2      |
| March 31, 2022                          | 3.25         | 1      |
| <b>Weighted Average</b>                 | <b>13.95</b> | -      |
| As at three months ended June 30, 2024* | 0.07         | -      |
| As at three months ended June 30, 2023* | 4.16         | -      |

\*Not annualised for three months ended June 30, 2024 and June 30, 2023

Notes:

- Return on net worth (%) = Profit/loss for the period attributable to owners / Net worth at the end of the period.

- ii) For the purposes of the above, “net worth” means the aggregate value of the paid-up share capital and all reserves created out of the profits and securities premium account and instruments entirely in the nature of equity after deducting the aggregate value of the accumulated losses, deferred expenditure and miscellaneous expenditure not written off, as per the audited balance sheet, but does not include reserves created out of revaluation of assets, write-back of depreciation and amalgamation.

### Net Asset Value per Equity Share

| NAV per Equity Share                   | Amount (₹) |
|----------------------------------------|------------|
| As at three months ended June 30, 2024 | 37.19      |
| As at three months ended June 30, 2023 | 37.93      |
| As on March 31, 2024                   | 49.61      |
| As on March 31, 2023                   | 36.39      |
| As on March 31, 2022                   | 36.55      |
| <i>After the Issue</i>                 |            |
| - At the Floor Price                   |            |
| - At the Cap Price                     |            |
| <i>At Offer Price</i>                  |            |

Notes:

Net asset value per Equity Share (₹) = net worth / Number of Equity Shares outstanding as at the end of period (on fully dilutive basis)

### Comparison with listed Industry Peers

Following is the comparison with our listed peer group companies:

| Name of the Company          | Face Value (₹ Per Share) | Closing price on October 3, 2024 (₹) | Revenue from operations for Fiscal 2024 (in ₹ million) | EPS (₹ per) |         | NAV (₹ per share) | P/E(x)          | RoNW(%) |
|------------------------------|--------------------------|--------------------------------------|--------------------------------------------------------|-------------|---------|-------------------|-----------------|---------|
|                              |                          |                                      |                                                        | Basic       | Diluted |                   |                 |         |
| Our Company*                 | 2                        | NA                                   | 13,192.50                                              | 12.55       | 12.55   | 49.61             | NA <sup>#</sup> | 26.93   |

| Adani Green Energy Limited** | 10.00                    | 1,808.55                             | 92,200                                                 | 6.21        | 6.20    | 85.86             | 291.7x          | 7.22    |
| ReNew Energy Global PLC**    | 10.00                    | 484.49 <sup>1</sup>                  | 81,948                                                 | 9.94        | 9.92    | 332.16            | 48.8x           | 3.07    |

\*The financial information for our Company is based on the Restated Consolidated Financial Information as at and for the financial year ended March 31, 2024.

\*\*The financial information for listed industry peers mentioned above is on a consolidated basis and is sourced from the financial statements of the respective company for the financial year ended March 31, 2024, submitted to the Stock Exchanges and the Nasdaq Stock Market LLC (“Nasdaq”). The other players listed out on the page number 238 of this Red Herring Prospectus under the section, “**Industry Overview - Key competitor**”, are not listed on any stock exchange therefore the same are not compared.

<sup>#</sup>To be included post finalization of the Offer Price.

Notes:

(1) Basic and Diluted EPS for peers are sourced from the audited financial statements for the relevant year.

(2) P/E Ratio has been computed based on the closing market price of equity shares on BSE Limited on October 3, 2024, divided by the Diluted EPS

(3) For listed peers, RoNW is computed as profit attributable to equity shareholders of the company divided by Total Equity attributable to the owners of the Company as on March 31, 2024.

(4) Net Asset Value (“NAV”) per share is computed as the closing net worth divided by the equity shares outstanding as on March 31, 2024.

(5) The peers provided on the page number 238 of this Red Herring Prospectus under the section “**Industry Overview - Key competitor**”, except of Adani Green Energy Limited (“**Adani Green**”) and ReNew Power Private Limited (“**ReNew**”), the peers do not have any equity shares listed on any of the stock exchanges, hence, for the purpose of like to like comparison, only Adani Green and Renew have been included hereinabove.

### Key Performance Indicators (“KPIs”)

The table below sets forth the details of the KPIs that our Company considers have a bearing for arriving at the basis for Offer Price. These KPIs have been used historically by our Company to understand and analyse the business performance, which in result, help us in analysing the growth of various vertical segments. The Bidders can refer to the below-mentioned KPIs, being a combination of financial and operational key financial and operational metrics, to make an assessment of our Company’s performance in various business verticals and make an informed decision.

The KPIs disclosed below have been approved and confirmed by a resolution of our Audit Committee dated October 29, 2024, and the Audit Committee has verified and confirmed that there are no KPIs pertaining to our

Company, that have been disclosed to investors at any point of time during the three years period prior to the date of this Red Herring Prospectus. Further, the KPIs disclosed in this section have been subject to verification and certification by S. Tekriwal & Associates, Chartered Accountants, FRN 009612N, pursuant to certificate dated October 29, 2024, which has been included as part of the “**Material Contracts and Documents for Inspection**” on page 705.

For details of other business and operating metrics disclosed elsewhere in this Red Herring Prospectus, see “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on pages 242 and 536, respectively.

Details of our KPIs for the three months period ended June 30, 2024 and June 30, 2023, Fiscals 2024, 2023 and 2022 is set out below:

*(figures in ₹ million, unless stated otherwise)*

Notes:

(1) Average CUF, average grid availability and average plant availability includes calculations for installed capacity at the end of the period & excludes assets which were monetized during the period.

(2) EBITDA: EBITDA is calculated as earnings before interest, taxes, depreciation and amortization and exceptional items

(3) EBITDA Margin: EBITDA / Revenue from operations.

(4) PAT: Profit after tax

(5) PAT Margin: PAT / total revenue

(6) Net debt/Equity(x): (Long term borrowing + Short term borrowing – Cash and cash equivalents – Other bank balances)/ total equity attributable to shareholders of our Company

(7) Cash RoE (% of Equity): (Profit after tax + Depreciation) / Equity. “Cash ROE” is not a financial metric related to a renewable energy sector specifically. The terminology is used as a measure of capital efficiency with focus on cash profit. Cash ROE is calculated as a cash profit (profit after tax plus depreciation) for the year divided by closing net worth. Given that our Company operates in a capital intensive business with high depreciation and interest cost, profit may not represent our Company’s performance accurately, accordingly Cash ROE has been used to describe our Company’s performance. The operational life of solar power plants is around 30 years and depreciation is not a cash flow.

(8) Revenue from Operations comprises of (i) sale of goods and services; and (ii) other operating revenue

(9) Total Revenue comprises of (i) revenue from operations; and (ii) other income

(10) DSO: Closing trade receivables divided by Revenue from Operations multiplied by 365 for yearly or 91 for June quarter calculations.

^Increase in Net Debt/ Equity as of 30<sup>th</sup> June 2024 in comparison to 31<sup>st</sup> March 2024 is mainly on account of repayment of compulsory convertible debentures of ₹ 6,500.00 million to ACME Cleantech resulting in reduction in total equity attributable to shareholders of our Company.

\$Reduction in PAT for the three month ended 30<sup>th</sup> June 2024 in comparison to 30<sup>th</sup> June 2023 is mainly on account of a) decrease in revenue from operations mainly due to sale of assets of 369 MW in January 2024 which was partially offset by revenue from full commissioning of ACME Aklera (250 MW) in January 2024; and b) increase in tax mainly on account of increase in the taxable profits from EPC business (after adjusting unabsorbed losses) of our Company.

\*Our Company has signed a share purchase agreement dated September 27, 2023 with Blupine Energy Private Limited, for inter alia the sale of 20 MW in ACME Sidlaghatta Solar Energy Private Limited (“ACME Sidlaghatta”). The long stop date for the sale and purchase of ACME Sidlaghatta was the date falling after expiry of one year from the execution date of the share purchase agreement, i.e., September 27, 2023. However, since the conditions precedent required to be fulfilled prior to closing of the ACME Sidlaghatta transaction could not be completed before the long stop date, being September 28, 2024, the share purchase agreement dated September 27, 2023, stands automatically terminated with respect to ACME Sidlaghatta transaction.

NA: Not available since the proforma financial information for Fiscal 2023 and Fiscal 2022 is not available

#Not annualized.

Our Company shall continue to disclose the KPIs disclosed hereinabove in this section on a periodic basis, at least once in a year (or for any lesser period as determined by the Board of our Company), for a duration of one year after the date of listing of the Equity Shares, or until the utilization of Offer Proceeds, whichever is later, on the Stock Exchanges pursuant to the Offer, or for such other period as may be required under the SEBI ICDR Regulations.

A list of our KPIs along with a brief explanation of the relevance of the KPIs to our business operations are set forth below. All such KPIs have been defined consistently and precisely in “**Definitions and Abbreviations – Conventional and General Terms or Abbreviations**” on page 15.

| S. No. | Key Performance Indicators                                                      | Information / Explanations                                                                                                                                                                                                                                                                                                                    |
|--------|---------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.     | Capacity (total MW)                                                             | The rated capacity to be installed on the AC side as per the terms of PPA.                                                                                                                                                                                                                                                                    |
| 2.     | Installed Capacity (total MW)                                                   | Represents total operational capacity as on a given date.                                                                                                                                                                                                                                                                                     |
| 3.     | Under Construction Contracted                                                   | Projects for which powers purchase agreement has been signed but the project has not achieved its commercial operation date. This helps our company in tracking the future projects from which the revenue will be generation post commissioning.                                                                                             |
| 4.     | Under Construction Awarded                                                      | Projects for which the company has received a letter of award (“LOA”) from the off-taker but have not signed a PPA and the contracted capacity details for such projects are as per the LOA. This helps our company in tracking the future projects for which the PPAs will be signing and the revenue will be generation post commissioning. |
| 5.     | CUF                                                                             | Capacity Utilisation Factor is the quantum of energy the plant is able to generate compared to its maximum rated capacity.                                                                                                                                                                                                                    |
| 6.     | Plant Availability                                                              | Plant availability refers to the percentage of time that the power plant is capable of producing electricity as designed. It is a measure of the operational readiness of the plant’s equipment and systems.                                                                                                                                  |
| 7.     | Grid Availability                                                               | Grid availability refers to the percentage of time that the electrical grid is available to accept and distribute the electricity generated by the power plant.                                                                                                                                                                               |
| 8.     | Average CUF for the assets held as on last date of the period (%)               | Average CUF refers to the weighted average of CUF of Installed Capacity in the portfolio as on given date.                                                                                                                                                                                                                                    |
| 9.     | Average Grid Availability for the assets held as on last date of the period (%) | Average Grid Availability refers to the weighted average of Grid Availability of Installed Capacity in the portfolio as on given date.                                                                                                                                                                                                        |

|     |                                                                                  |                                                                                                                                                                                         |
|-----|----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10. | Average Plant Availability for the assets held as on last date of the period (%) | Average Plant Availability refers to the weighted average of Plant Availability of Installed Capacity in the portfolio as on given date.                                                |
| 11. | Revenue from operations                                                          | Revenue is the income earned in the usual course of business of the entity through sale of electricity.                                                                                 |
| 12. | EBITDA                                                                           | EBITDA is calculated as earnings before interest, taxes, depreciation and amortisation and exceptional items                                                                            |
| 13. | EBITDA Margin                                                                    | It is calculated as EBITDA divided by Revenue from Operations.                                                                                                                          |
| 14. | Profit after tax                                                                 | Profit or loss after tax for the given period.                                                                                                                                          |
| 15. | Profit after tax margins % (as a % of total revenue)                             | It is calculated as PAT divided by Total Revenue.                                                                                                                                       |
| 16. | Net debt / Equity                                                                | It is calculated by subtracting a company's total cash and cash equivalents, bank balances from its total borrowing divided by total equity attributable to shareholders of the Company |
| 17. | Cash RoE                                                                         | Cash Return on Equity is calculated as cash profit (PAT + depreciation) for the period divided by equity.                                                                               |
| 18. | DSO                                                                              | Days of Sales Outstanding is calculated as Closing Trade Receivables divided by Revenue from Operations multiplied by 365 for yearly or 91 for June quarter calculations.               |

**Description on the historic use of the KPIs by our Company to analyze, track or monitor the operational and/or financial performance of our Company**

In evaluating our business, we consider and use certain KPIs, as presented above, as a supplemental measure to review and assess our financial and operating performance. The presentation of these KPIs is not intended to be considered in isolation or as a substitute for the Restated Consolidated Financial Information. We use these KPIs to evaluate our financial and operating performance. Some of these KPIs are not defined under Ind AS and are not presented in accordance with Ind AS. These KPIs have limitations as analytical tools. Although these KPIs are not a measure of performance calculated in accordance with applicable accounting standards, our Company's management believes that it provides an additional tool for investors to use in evaluating our ongoing operating results and trends because it provides consistency and comparability with past financial performance, when taken collectively with financial measures prepared in accordance with Ind AS.

**Comparison of Key Performance Indicators over time shall be explained based on additions or dispositions to our business**

Our Company has not made any additions or dispositions to its business except for certain acquisitions and divestments in the three months period ended June 30, 2024, and in the Fiscals 2024, 2023 and 2022. For further details, see “**History and Certain Corporate Matters – Details regarding material acquisitions or divestments of business/ undertakings, mergers, amalgamations, any revaluation of assets, etc. in the last 10 years**” on page 303.

Further, while we have mentioned the adjustments for KPI disclosed above at “- **Key Performance Indicators (“KPIs”)**” on page 151, no comparison of KPIs over time based on additions and dispositions is available.

For details of other business and operating metrics disclosed elsewhere in this Red Herring Prospectus, see “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on pages 242 and 536, respectively.

## Comparison of KPIs with listed industry peers

Set forth below is a comparison of our KPIs with our listed peer group companies:

Source: CRISIL Report

\*Average CUF, average grid availability and average plant availability includes calculations for installed capacity at the end of the period & excludes assets which were monetized during the period.

Notes:

<sup>(1)</sup> (W): Wind; (S): Solar and (H): Hybrid (A): Audited; (UA): Unaudited

<sup>(2)</sup> Presently, Adani Green and Renew are the only two listed comparable renewable energy players operating in India

<sup>(3)</sup> EBITDA: EBITDA is calculated as earnings before interest, taxes, depreciation and amortization and exceptional items

<sup>(4)</sup> EBITDA Margin: EBITDA / Revenue from operations

<sup>(5)</sup> PAT: Profit after tax

<sup>(6)</sup> PAT Margin: PAT / total revenue

<sup>(7)</sup> Net debt/Equity(x): (Long term borrowing + Short term borrowing – Cash and cash equivalents – Other bank balances)/ Equity

<sup>(8)</sup> Cash RoE (% of Equity): (Profit after tax + Depreciation) / Equity. Cash ROE is not a financial metric related to a renewable energy sector specifically. The terminology is used as a measure of capital efficiency with focus on cash profit. Cash ROE is calculated as a cash profit (profit after tax plus depreciation) for the year divided by equity. Given that our Company operates in a capital intensive business with high depreciation and interest cost, profit may not represent our Company's performance accurately, accordingly Cash ROE has been used to describe our Company's performance. The operational life of solar power plants is around 30 years and depreciation is not a cash flow.

<sup>(9)</sup> DSO: Closing trade receivables divided by Revenue from Operations multiplied by 365 for yearly or 91 for June quarter calculation.

<sup>#</sup>Not annualized.

For the three months ended June 30, 2024 and June 30, 2023, trade receivable days is calculated as Trade Receivables divided by Revenue from Operations multiplied by 91 (number of days in the relevant period).

## Weighted average cost of acquisition (“WACA”), Floor Price and Cap Price

**Price per share of the Company (as adjusted for corporate actions, including split, bonus issuances) based on primary issuances of Equity Shares or convertible securities (excluding Equity Shares issued under Employee Stock Option Plan and issuance of Equity Shares pursuant to a bonus issue) during the 18 months preceding the date of this Red Herring Prospectus, where such issuance is equal to or more than 5% of the fully diluted paid-up share capital of the Company in a single transaction or multiple transactions combined together over a span of rolling 30 days (“Primary Issuances”)**

Our Company has not issued any Equity Shares or Preference Shares, during the 18 months preceding the date of this Red Herring Prospectus, where such issuance is equal to or more than 5% of the fully diluted paid-up share capital of our Company (calculated based on the pre-Offer capital before such transaction(s)), in a single transaction or multiple transactions combined together over a span of rolling 30 days. As on the date of this Red Herring Prospectus, no Equity Shares have been issued under the ESOP Scheme.

**Price per share of the Company (as adjusted for corporate actions, including bonus issuances) based on secondary sale or acquisition of equity shares or convertible securities (excluding gifts) involving the Promoters, members of the Promoter Group, the Selling Shareholder or other Shareholders of the Company with rights to nominate directors during the 18 months preceding the date of filing of this Red Herring Prospectus, where the acquisition or sale is equal to or more than 5% of the fully diluted paid-up share capital of our Company (calculated based on the pre-Offer capital before such transaction/s, and excluding ESOPs granted but not vested) in a single transaction or multiple transactions combined together over a span of rolling 30 days (“Secondary Transactions”)**

There have been no secondary sale/ acquisitions of Equity Shares or Preference Shares, where the Promoter Selling Shareholder having the right to nominate Director(s) on our Board, are a party to the transaction, during the 18 months preceding the date of this Red Herring Prospectus, where either acquisition or sale is equal to or more than 5% of the fully diluted paid up share capital of our Company (calculated based on the pre-Offer capital before such transaction/s), in a single transaction or multiple transactions combined together over a span of rolling 30 days. As on the date of this Red Herring Prospectus, no Equity Shares have been issued under the ESOP Scheme.

**There have been no primary or secondary transactions (where Promoters, members of the Promoter Group, the Selling Shareholder or Shareholder(s) having the right to nominate Director(s) on our Board, are a party to the transaction), in the three years prior to the date of this Red Herring Prospectus\***

**The Offer Price is [●] times of the face value of the Equity Shares**

The Offer Price of ₹ [●] has been determined by our Company in consultation with the BRLMs, on the basis of

the demand from investors for the Equity Shares through the Book Building Process. Our Company, in consultation with the BRLMs, are justified of the Offer Price in view of the above qualitative and quantitative parameters.

**Detailed explanation for Offer Price/ Cap Price being [●] times of WACA of primary issuances /secondary transactions of Equity Shares (as disclosed above) along with our Company's KPIs and financial ratios for three months ended June 30, 2024, and for the Fiscals 2024, 2023 and 2022**

Not applicable.

**Explanation for the Offer Price/Cap Price, being [●] times of WACA of primary issuances/secondary transactions of Equity Shares (as disclosed above) in view of the external factors which may have influenced the pricing of the Issue.**

Not applicable.

Investors should read the above-mentioned information along with “**Risk Factors**”, “**Our Business**”, “**Management Discussion and Analysis of Financial Condition and Revenue from Operations**” and “**Restated Consolidated Financial Information**” beginning on pages 34, 242, 536 and 411, respectively, to have a more informed view.

The trading price of the Equity Shares could decline due to the factors mentioned in the section “**Risk Factors**” beginning on page 34 and any other factors that may arise in the future and you may lose all or part of your investments.

## STATEMENT OF POSSIBLE SPECIAL TAX BENEFITS

The Board of Directors

**ACME Solar Holdings Limited (formerly known as ACME Solar Holdings Private Limited),**

Plot No.152, Sector - 44, Gurugram

Haryana – 122002

**Subject: Statement of possible special tax benefits (“the Statement”) available to ACME Solar Holdings Limited (formerly known as ACME Solar Holdings Private Limited) (“the Company”) and its shareholders prepared in accordance with the requirement under Schedule VI –Part A -Clause (9) (L) of Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 (“the SEBI ICDR Regulations”)**

This report is issued in accordance with the Engagement Letter dated 28 May 2024.

We hereby report that the enclosed **Annexure II and III** prepared by the Company, initialled by us for identification purpose, states in all material respects the possible special tax benefits available to the Company and its shareholders under direct and indirect taxes (together “the Tax Laws”), presently in force in India as on the 21 October 2024, which are defined in **Annexure I**. These possible special tax benefits are dependent on the Company and its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws. Hence, the ability of the Company and its shareholders to derive these possible special tax benefits is dependent upon their fulfilling such conditions, which is based on business imperatives the Company may face in the future and accordingly, the Company and its shareholders may or may not choose to fulfil.

The benefits discussed in the enclosed **Annexure II and III** cover the possible special tax benefits available to the Company and its shareholders and do not cover any general tax benefits available to the Company and its shareholders. Further, the preparation of the enclosed **Annexure II and III** and its contents which is to be included in the Red Herring Prospectus and Prospectus is the responsibility of the Management of the Company and has been approved by the IPO Committee of the Board of Directors of the Company at its meeting held on the 21 October 2024. The Statement is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. Further, the benefits discussed in the **Annexure II and III** are not exhaustive. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the proposed initial public offering of equity shares of the Company (the “Proposed Offer”) particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the possible special tax benefits, which an investor can avail. Neither we are suggesting nor advising the investors to invest money based on the Statement.

We conducted our examination in accordance with the “Guidance Note on Reports or Certificates for Special Purposes (Revised 2016)” (the “Guidance Note”) issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.

We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that perform Audits and Reviews of Historical Financial information, and Other Assurance and Related Services Engagements.

We do not express any opinion or provide any assurance as to whether:

- i) the Company and its shareholders will continue to obtain these possible special tax benefits per the Statement in future; or
- ii) the conditions prescribed for availing the possible special tax benefits where applicable, have been/would be met with.

The contents of the enclosed Annexures are based on the information, explanation and representations obtained from the Company, and on the basis of our understanding of the business activities and operations of the Company.

Our views expressed herein are based on the facts and assumptions indicated to us. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. Our views are based on the existing

provisions of the Tax Laws and its interpretation, which are subject to change from time to time. We do not assume responsibility to update the views consequent to such changes. We shall not be liable to the Company for any claims, liabilities or expenses relating to this assignment except to the extent of fees relating to this assignment, as finally judicially determined to have resulted primarily from bad faith or intentional misconduct. We will not be liable to the Company and any other person in respect of this Statement, except as per applicable law.

This report is addressed to and is provided to enable the Board of Directors of the Company to include this report in the Red Herring Prospectus and Prospectus, prepared in connection with the Offering to be filed by the Company with the Securities and Exchange Board of India and the concerned stock exchanges where the equity shares of the Company are proposed to be listed. It is not to be used, referred to or distributed for any other purpose without our prior written consent.

**STATEMENT OF SPECIAL DIRECT TAX BENEFITS AVAILABLE TO ACME SOLAR HOLDINGS LIMITED (FORMERLY KNOWN AS ACME SOLAR HOLDINGS PRIVATE LIMITED) (THE “COMPANY”) AND ITS SHAREHOLDERS UNDER THE APPLICABLE DIRECT TAX LAWS IN INDIA**

Outlined below are the special tax benefits available to the Company and its shareholders under the Income-tax Act, 1961 (‘the ITA’) and Income-tax Rules, 1962 (‘Income Tax Rules’), circulars, notifications, as amended by the Finance Act (No. 2) 2024 (collectively, hereinafter referred to as the “Income Tax Laws”). These special tax benefits are subject to fulfillment of conditions prescribed under the relevant Income Tax Laws by the Company or its shareholders.

**A. Special tax benefits available to the Company under the ITA and Income Tax Rules**

**1. Lower corporate tax rate on income of domestic companies – Section 115BAA of the ITA**

The Taxation Laws (Amendment) Act, 2019 introduced section 115BAA wherein domestic companies are entitled to avail a concessional tax rate of 22% (plus applicable surcharge and cess) on fulfillment of certain conditions. The option to apply this tax rate is available from Financial Year (‘FY’) 2019-20 relevant to Assessment Year (‘AY’) 2020-21 and the option once exercised through filing of Form 10IC on the Income tax portal shall apply to subsequent assessment years. The concessional tax rate of 22% is subject to the company not availing any of the following deductions under the provisions of the ITA:

- Section 10AA: Tax holiday available to units in a Special Economic Zone.
- Section 32(1)(iia): Additional depreciation;
- Section 32AD: Investment allowance.
- Section 33AB/33ABA: Tea coffee rubber development expenses/site restoration expenses
- Section 35(1)/35(2AA)/ 35(2AB): Expenditure on scientific research.
- Section 35AD: Deduction for capital expenditure incurred on specified businesses.
- Section 35CCC/35CCD: expenditure on agricultural extension /skill development
- Chapter VI-A except for the provisions of section 80JJAA and section 80M.

The total income of a company availing the concessional rate of 25.168% (i.e., 22% along with surcharge of 10% and health and education cess of 4%) is required to be computed without set-off of any carried forward loss and depreciation attributable to any of the aforesaid deductions/incentives. A company can exercise the option to apply for the concessional tax rate by filing Form 10IC on or before the due date of filing return of income under section 139(1) of the ITA. Further, provisions of Minimum Alternate Tax (‘MAT’) under section 115JB of the ITA shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed.

1. The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax.

*Note: The Company has opted the lower rate under section 115BAA of the ITA in the FY 2019-20 relevant to the AY 2020-21 as mentioned in the Section 115BAA of ITA and have filed form 10IC on 28 December 2020 which is a pre-requisite for availing the concessional tax rates under section 115BAA of the ITA.*

**2. Deductions in respect of employment of new employees – Section 80JJAA of the ITA**

As per section 80JJAA of the ITA, where a company is subject to tax audit under section 44AB of the ITA and derives income from business, it shall be allowed to claim a deduction of an amount equal to 30% of additional employee cost incurred in the course of such business in a previous year, for 3 consecutive assessment years including the assessment year relevant to the previous year in which such additional employment cost is incurred.

The eligibility to claim the deduction is subject to fulfilment of prescribed conditions specified in sub-section (2) of section 80JJAA of the ITA. The company is presently not claiming deduction under section 80JJAA of the ITA.

3. Deduction with respect to inter-corporate dividends – Section 80M of the ITA

As per the provisions of section 80M of the ITA, inserted with effect from 01 April 2020 i.e., AY 2021-22, a domestic company shall be allowed to claim a deduction of dividend income earned from any other domestic company or a foreign company or a business trust. The amount of deduction so claimed should not exceed the amount of dividend distributed by it on or before the due date. In this case, due date means one month prior to the due date of furnishing return of income under sub section (1) of section 139 of the ITA.

The company has multiple subsidiaries and thus, the company should be eligible to claim deduction under section 80M of the ITA in respect of dividends received (if any) from its subsidiaries and further distributed to its shareholders subject to fulfillment of other conditions.

4. Deductions in respect of specified expenditure

In accordance with and subject to the fulfillment of conditions as laid out under section 35D of the ITA, the company may be entitled to amortize preliminary expenditure, being specified expenditure incurred in connection with the issue for public subscription or such other expenditure as prescribed under section 35D of the ITA, subject to the limit specified therein (viz maximum 5% of the cost of the project or 5% of the capital employed in the business of the company).

The deduction is allowable for an amount equal to one-fifth of such expenditure for each of five successive previous years beginning with the previous year in which the business commences or as the case may be, the previous year in which the extension of the undertaking is completed, or the new unit commences production or operation.

With effect from AY 2024-25, the company shall be required to furnish a statement in Form 3AF containing the particulars of expenditures specified under section 35D of the ITA to such income tax authority prior to one month before the due date of filing Income tax return as per section 139(1) of the ITA.

5. Set-off of Unabsorbed Depreciation under section 32(2) of the ITA

As per the provisions of section 32(2) of the ITA, where a company does not have sufficient profits to cover the depreciation expense for that year, the unabsorbed depreciation shall be carried forward to subsequent assessment years for an indefinite period until it is fully absorbed and set off against future profits of subsequent assessment years. At the time of filing Income tax return for AY 2023-24, the Company has carried forward unabsorbed depreciation to subsequent assessment years.

6. Set-off & Carry forward of business loss under section 72 of the ITA

As per the provisions of section 72 of the ITA, if the Company has incurred loss under the head "Profits and gains of business or profession", and such loss has not been set-off against income under any other head of income, then such loss as has not been set-off shall be carried forward to set-off against the income in the following eight assessment years. The Company has carried forward business losses to subsequent assessment years.

7. Set-off & Carry forward of Losses under the head capital gains

As per the provisions of section 70 of the ITA, if the Company has incurred loss under the head capital gains in relation to a short-term capital asset, it can be set-off either against Short-Term Capital Gain ('STCG') or Long-Term Capital Gain ('LTCG') for that assessment year. If the loss has been incurred in relation to a long-term capital asset, it can be set-off only against LTCG for that assessment year.

However, if the losses are not wholly set-off, the same shall be carried forward to set-off against the income in the following eight assessment years as per section 74 of the ITA. If the loss carried forward relates to short-term capital asset, it shall be set-off either against LTCG or STCG. However, if the loss carried forward

relates to long-term capital asset, it shall be set-off only against LTCG.

At the time of filing Income tax return for AY 2023-24, the Company has carried forward losses under the head capital gains to subsequent assessment years.

#### 8. Tax on Capital Gains

As per Finance (No. 2) Act, 2024, the tax rate on LTCG arising from the transfer of long-term capital assets under section 112 of the ITA has been regularized to 12.5% (without the benefit of Indexation) instead of the erstwhile rate of 20% / 10% with effect from 23 July 2024.

Further, STCG arising from the transfer of short-term capital assets (other than listed equity shares, unit of an equity-oriented fund or unit of a business trust covered under section 111A of the ITA), shall be taxed at the normal tax rate of the Company.

### **B. Special tax benefits available to the shareholders of the Company under the Income Tax Regulations**

#### 1. Dividend Income

Dividend income earned by the shareholders would be taxable in their hands at the applicable rates. However, in the case of domestic corporate shareholder, benefit of deduction under section 80M of the ITA would be available on fulfilling the conditions. Further, Finance Act 2021 restricted surcharge to 15% in respect of dividend income.

#### 2. Tax on Capital Gains

As per Finance (No. 2) Act, 2024, LTCG under section 112A of the ITA arising from the transfer of equity shares on which Securities Transaction Tax ('STT') is paid at the time of acquisition and sale, shall be taxed at the rate of 12.5% (without indexation) (plus applicable surcharge and cess) of such capital gains with effect from 23 July 2024. The threshold for applicability of tax under section 112A of the ITA has been increased from INR 1,00,000 to INR 1,25,000.

Further, Finance Act 2020 restricted surcharge to 15% in respect of capital gains under section 111A and 112A of the ITA which was extended to capital gains under section 112 of the Act vide Finance Act 2023.

As per section 111A of the ITA, STCG arising from the transfer of equity shares on which STT has been paid at the time of acquisition and sale shall be taxed at the rate of 20% (plus applicable surcharge and cess) instead of the erstwhile rate of 15%.

#### 3. Special Provisions for Non-resident shareholders

As per section 90(2) of the ITA, non-resident shareholders will be entitled to be governed by the beneficial provisions under the respective Double Taxation Avoidance Agreement ('DTAA'), if any, applicable to such non-residents. This is subject to fulfilment of conditions prescribed to avail treaty benefits.

Further, any income by way of capital gains accruing to non-residents, may be subject to withholding tax as per the provisions of the ITA or under the relevant DTAA, whichever is beneficial. However, where such non-resident has obtained a lower withholding tax certificate from the tax authorities, the withholding tax rate would be as per the said certificate. The non-resident shareholders may be able to avail credit for any taxes paid by them in India, subject to local laws of the country in which such shareholder is resident.

#### **Notes:**

1. These special tax benefits are dependent on the Company and its shareholders fulfilling the conditions prescribed under the Income tax regulations. Hence, the ability of the Company or its shareholders to derive the tax benefits is dependent upon fulfilling such conditions, which based on the business imperatives, the Company or its shareholders may or may not choose to fulfil.

2. The special tax benefits discussed in the Statement are not exhaustive and is only intended to provide general information to the investors and hence, is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the issue.
3. The Statement has been prepared on the basis that the Company is in the process of getting shares of the company listed on a recognized stock exchange in India and the Company will be issuing shares.
4. The Statement is prepared on the basis of information available with the management of the Company and there is no assurance that:
  - i. the Company or its shareholders will continue to obtain these benefits in future;
  - ii. the conditions prescribed for availing the benefits have been/ would be met with; and
  - iii. the revenue authorities/courts will concur with the view expressed herein.
5. The above views are based on the existing provisions of law and its interpretation, which are subject to change from time to time.
6. The above Statement of Special Tax Benefits sets out the provisions of law in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.

## STATEMENT OF SPECIAL TAX BENEFITS

The Board of Directors  
**ACME Solar Energy Private Limited,**  
Plot No.152, Sector - 44, Gurugram  
Haryana – 122002

**Subject: Statement of possible special tax benefits (“the Statement”) available to ACME Solar Energy Private Limited (“the Company”) prepared in accordance with the requirement under Schedule VI –Part A -Clause (9) (L) of Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 (“the SEBI ICDR Regulations”)**

This report is issued in accordance with the Engagement Letter dated 28 May 2024.

We hereby report that the enclosed **Annexure II and III** prepared by the Company, initialled by us for identification purpose, states in all material respects the possible special tax benefits available to the Company under direct and indirect taxes (together “**the Tax Laws**”), presently in force in India as on the 21 October 2024, which are defined in **Annexure I**. These possible special tax benefits are dependent on the Company fulfilling the conditions prescribed under the relevant provisions of the Tax Laws. Hence, the ability of the Company to derive these possible special tax benefits is dependent upon their fulfilling such conditions, which is based on business imperatives the Company may face in the future and accordingly, the Company may or may not choose to fulfil.

The benefits discussed in the enclosed **Annexure II and III** cover the possible special tax benefits available to the Company and do not cover any general tax benefits available to the Company. Further, the preparation of the enclosed **Annexure II and III** and its contents which is to be included in the Red Herring Prospectus and Prospectus of the Holding Company is the responsibility of the Management of the Company and has been approved by the IPO Committee of the Board of Directors of the Company at its meeting held on 21 October 2024. The Statement is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. Further, the benefits discussed in the **Annexure II and III** are not exhaustive. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the proposed initial public offering of equity shares of the Company (the “Proposed Offer”) particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the possible special tax benefits, which an investor can avail. Neither we are suggesting nor advising the investors to invest money based on the Statement.

We conducted our examination in accordance with the “Guidance Note on Reports or Certificates for Special Purposes (Revised 2016)” (the “Guidance Note”) issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.

We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that perform Audits and Reviews of Historical Financial information, and Other Assurance and Related Services Engagements.

We do not express any opinion or provide any assurance as to whether:

- i) the Company will continue to obtain these possible special tax benefits per the Statement in future;  
or
- ii) the conditions prescribed for availing the possible special tax benefits where applicable, have been/would be met with.

The contents of the enclosed Annexures are based on the information, explanation and representations obtained from the Company, and on the basis of our understanding of the business activities and operations of the Company.

Our views expressed herein are based on the facts and assumptions indicated to us. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. Our views are based on the existing provisions of the Tax Laws and its interpretation, which are subject to change from time to time. We do not assume

responsibility to update the views consequent to such changes. We shall not be liable to the Company for any claims, liabilities or expenses relating to this assignment except to the extent of fees relating to this assignment, as finally judicially determined to have resulted primarily from bad faith or intentional misconduct. We will not be liable to the Company and any other person in respect of this Statement, except as per applicable law.

This report is addressed to the Company and is provided to enable the Board of Directors of the ACME Solar Holdings Limited (formerly known as ACME Solar Holdings Private Limited) (the ‘Holding Company’) to include this report in the Red Herring Prospectus and Prospectus, prepared in connection with the Offering to be filed by the Holding Company with the Securities and Exchange Board of India and the concerned stock exchanges where the equity shares of the Holding Company are proposed to be listed. It is not to be used, referred to or distributed for any other purpose without our prior written consent.

## **STATEMENT OF POSSIBLE SPECIAL DIRECT TAX BENEFITS AVAILABLE TO ACME SOLAR ENERGY PRIVATE LIMITED (THE “COMPANY”) UNDER THE APPLICABLE DIRECT TAX LAWS IN INDIA**

Outlined below are the special tax benefits available to the Company, its shareholders and material subsidiaries under the Income-tax Act, 1961 (‘the ITA’) read with Income-tax Rules, 1962 (‘Income Tax Rules’), circulars, notifications, as amended by the Finance Act 2023 (collectively, hereinafter referred to as the “**Income Tax Laws**”). These possible special tax benefits are subject to fulfillment of conditions prescribed under the ITA and relevant Income Tax Laws by the Company.

### **A. Special tax benefits available to the Company and its material subsidiaries under the ITA and Income Tax Laws in India**

#### **1. Lower corporate tax rate on income of domestic companies – Section 115BAA of the ITA**

The Taxation Laws (Amendment) Act, 2019 introduced section 115BAA wherein domestic companies are entitled to avail a concessional tax rate of 22% (plus applicable surcharge and cess) on fulfillment of certain conditions. The option to apply this tax rate is available from Financial Year (‘FY’) 2019-20 relevant to Assessment Year (‘AY’) 2020-21 and the option once exercised through filing of Form 10IC on the Income tax portal shall apply to subsequent assessment years. The concessional tax rate of 22% is subject to the company not availing any of the following deductions under the provisions of the ITA:

- Section 10AA: Tax holiday available to units in a Special Economic Zone.
- Section 32(1)(iia): Additional depreciation;
- Section 32AD: Investment allowance.
- Section 33AB/3ABA: Tea coffee rubber development expenses/site restoration expenses
- Section 35(1)/35(2AA)/ 35(2AB): Expenditure on scientific research.
- Section 35AD: Deduction for capital expenditure incurred on specified businesses.
- Section 35CCC/35CCD: expenditure on agricultural extension /skill development
- Chapter VI-A except for the provisions of section 80JJAA and section 80M.

The total income of a company availing the concessional rate of 25.168% (i.e., 22% along with surcharge of 10% and health and education cess of 4%) is required to be computed without set-off of any carried forward loss and depreciation attributable to any of the aforesaid deductions/incentives. A company can exercise the option to apply for the concessional tax rate by filing Form 10IC on or before the due date of filing return of income under section 139(1) of the ITA. Further, provisions of Minimum Alternate Tax (‘MAT’) under section 115JB of the ITA shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed.

The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax.

The Company has not opted for the lower corporate tax rate under section 115BAA of the ITA.

#### **2. Deductions in respect of employment of new employees – Section 80JJAA of the ITA**

As per section 80JJAA of the ITA, where a company is subject to tax audit under section 44AB of the ITA and derives income from business, it shall be allowed to claim a deduction of an amount equal to 30% of additional employee cost incurred in the course of such business in a previous year, for 3 consecutive assessment years including the assessment year relevant to the previous year in which such additional employment cost is incurred.

The eligibility to claim the deduction is subject to fulfilment of prescribed conditions specified in sub-section (2) of section 80JJAA of the ITA. The company are not claiming deduction under section 80JJAA of the ITA

currently.

3. Deduction with respect to inter-corporate dividends – Section 80M of the ITA

As per the provisions of section 80M of the ITA, inserted with effect from 01 April 2020 i.e., AY 2021-22, a domestic company shall be allowed to claim a deduction of dividend income earned from any other domestic company or a foreign company or a business trust. The amount of deduction so claimed should not exceed the amount of dividend distributed by it on or before the due date. In this case, due date means one month prior to the due date of furnishing return of income under sub section (1) of section 139 of the ITA.

The Company holds shares in several other companies and should be eligible to claim this deduction in respect of dividends received from such other companies and further distributed to its holding company subject to fulfillment of other conditions.

4. Deductions in respect of specified expenditure

In accordance with and subject to the fulfillment of conditions as laid out under section 35D of the ITA, the Company and its material subsidiaries may be entitled to amortize preliminary expenditure, being specified expenditure incurred in connection with the issue for public subscription or such other expenditure as prescribed under section 35D of the ITA, subject to the limit specified therein (viz maximum 5% of the cost of the project or 5% of the capital employed in the business of the company).

The deduction is allowable for an amount equal to one-fifth of such expenditure for each of five successive previous years beginning with the previous year in which the business commences or as the case may be, the previous year in which the extension of the undertaking is completed, or the new unit commences production or operation.

With effect from AY 2024-25, the company shall be required to furnish a statement in Form 3AF containing the particulars of expenditures specified under section 35D of the ITA to such income tax authority prior to one month before the due date of filing Income tax return as per section 139(1) of the ITA.

5. Set-off of Unabsorbed Depreciation under section 32(2) of the ITA

As per the provisions of section 32(2) of the ITA, where a company does not have sufficient profits to cover the depreciation expense for that year, the unabsorbed depreciation shall be carried forward to subsequent assessment years for an indefinite period until it is fully absorbed and set off against future profits of subsequent assessment years. At the time of filing Income tax return for AY 2023-24, the Company has carried forward unabsorbed depreciation to subsequent assessment years.

6. Set-off & Carry forward of business loss under section 72 of the ITA

As per the provisions of section 72 of the ITA, if the Company has incurred loss under the head "Profits and gains of business or profession", and such loss has not been set-off against income under any other head of income, then such loss as has not been set-off shall be carried forward to set-off against the income in the following eight assessment years. The Company has carried forward business losses to subsequent assessment years.

7. Set-off & Carry forward of Losses under the head capital gains

As per the provisions of section 70 of the ITA, if the Company has incurred loss under the head capital gains in relation to a short-term capital asset, it can be set-off either against Short-Term Capital Gain ('STCG') or Long-Term Capital Gain ('LTCG') for that assessment year. If the loss has been incurred in relation to a long-term capital asset, it can be set-off only against LTCG for that assessment year.

However, if the losses are not wholly set-off, the same shall be carried forward to set-off against the income in the following eight assessment years as per section 74 of the ITA. If the loss carried forward relates to short-term capital asset, it shall be set-off either against LTCG or STCG. However, if the loss carried forward relates to long-term capital asset, it shall be set-off only against LTCG.

At the time of filing Income tax return for AY 2023-24, the Company do not have any capital losses to carry

forward.

#### 8. Tax on Capital Gains

As per section 112 of the ITA, LTCG arising from the transfer of long-term capital assets (other than listed equity shares, unit of an equity-oriented fund or unit of a business trust covered under section 112A of the ITA), shall be taxed at the rate of 20% of such capital gains (plus applicable surcharge and education cess) with indexation benefits.

However, if LTCG is arising from the transfer of a long-term capital asset, being listed securities (other than a unit) or zero-coupon bond then capital gains shall be taxed at the rate of 10% without indexation benefit.

Further, STCG arising from the transfer of short-term capital assets (other than listed equity shares, unit of an equity-oriented fund or unit of a business trust covered under section 111A of the ITA), shall be taxed at the normal tax rate of the Company.

#### 9. MAT Credit

MAT is calculated at the rate of 15% of the “Book Profits” under Section 115JB of the ITA.

When a company is liable to pay tax under the MAT instead of regular income tax, the company is allowed to claim credit of MAT paid over regular tax i.e., MAT Credit is the amount of difference between the MAT amount paid and the amount payable under normal provision.

Under Section 115JAA, the company can carry forward and adjust the MAT credit in subsequent years. MAT credit is available for set off for fifteen years from the year in which such tax under MAT is paid.

Moreover, MAT credit is allowed to set off when tax is paid on the regular income under the provisions of income tax instead of MAT. Set off is granted for the amount of difference between the tax on the total income and tax which would have been payable as per MAT under Section 115JB of the ITA.

Since MAT Credit pertaining to AY 2018-19 is available in case of the Company it has not exercised option under section 115BAA of the ITA.

#### **Notes:**

1. These special tax benefits are dependent on the Company fulfilling the conditions prescribed under the Income Tax Laws Hence, the ability of the Company to derive the tax benefits is dependent upon fulfilling such conditions, which based on the business imperatives, the Company may or may not choose to fulfil.
2. The special tax benefits discussed in the Statement are not exhaustive and is only intended to provide general information to the investors and hence, is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the issue.
3. The Statement has been prepared on the basis that Acme Solar Holdings Limited (formerly known as Acme Solar Holdings Private Limited) (the “Holding Company”) is in the process of getting shares of the Holding Company listed on a recognized stock exchange in India and the Holding Company will be issuing shares.
4. The Statement is prepared on the basis of information available with the management of the Company and there is no assurance that:
  - i. the Company will continue to obtain these benefits in future;
  - ii. the conditions prescribed for availing the benefits have been/ would be met with; and
  - iii. the revenue authorities/courts will concur with the view expressed herein.
5. The above views are based on the existing provisions of law and its interpretation, which are subject to change

from time to time.

6. The above Statement of Possible Special Direct Tax Benefits sets out the provisions of law in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.

## STATEMENT OF SPECIAL TAX BENEFITS

The Board of Directors  
**ACME Heergarh Powertech Private Limited,**  
Plot No.152, Sector - 44, Gurugram  
Haryana – 122002

**Subject: Statement of possible special tax benefits (“the Statement”) available to ACME Heergarh Powertech Private Limited (“the Company”) prepared in accordance with the requirement under Schedule VI –Part A -Clause (9) (L) of Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2018 (“the SEBI ICDR Regulations”)**

This report is issued in accordance with the Engagement Letter dated 28 May 2024.

We hereby report that the enclosed **Annexure II and III** prepared by the Company, initialled by us for identification purpose, states in all material respects the possible special tax benefits available to the Company under direct and indirect taxes (together “**the Tax Laws**”), presently in force in India as on the 21 October 2024, which are defined in **Annexure I**. These possible special tax benefits are dependent on the Company fulfilling the conditions prescribed under the relevant provisions of the Tax Laws. Hence, the ability of the Company to derive these possible special tax benefits is dependent upon their fulfilling such conditions, which is based on business imperatives the Company may face in the future and accordingly, the Company may or may not choose to fulfil.

The benefits discussed in the enclosed **Annexure II and III** cover the possible special tax benefits available to the Company and do not cover any general tax benefits available to the Company. Further, the preparation of the enclosed **Annexure II and III** and its contents which is to be included in the Red Herring Prospectus and Prospectus of the Holding Company is the responsibility of the Management of the Company and has been approved by the IPO Committee of the Board of Directors of the Company at its meeting held on 21 October 2024. The Statement is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. Further, the benefits discussed in the **Annexure II and III** are not exhaustive. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the proposed initial public offering of equity shares of the Company (the “Proposed Offer”) particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the possible special tax benefits, which an investor can avail. Neither we are suggesting nor advising the investors to invest money based on the Statement.

We conducted our examination in accordance with the “Guidance Note on Reports or Certificates for Special Purposes (Revised 2016)” (the “Guidance Note”) issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.

We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that perform Audits and Reviews of Historical Financial information, and Other Assurance and Related Services Engagements.

We do not express any opinion or provide any assurance as to whether:

- i) the Company will continue to obtain these possible special tax benefits per the Statement in future;  
or
- ii) the conditions prescribed for availing the possible special tax benefits where applicable, have been/would be met with.

The contents of the enclosed Annexures are based on the information, explanation and representations obtained from the Company, and on the basis of our understanding of the business activities and operations of the Company.

Our views expressed herein are based on the facts and assumptions indicated to us. No assurance is given that the revenue authorities/ courts will concur with the views expressed herein. Our views are based on the existing provisions of the Tax Laws and its interpretation, which are subject to change from time to time. We do not assume responsibility to update the views consequent to such changes. We shall not be liable to the Company for any

claims, liabilities or expenses relating to this assignment except to the extent of fees relating to this assignment, as finally judicially determined to have resulted primarily from bad faith or intentional misconduct. We will not be liable to the Company and any other person in respect of this Statement, except as per applicable law.

This report is addressed to the Company and is provided to enable the Board of Directors of the ACME Solar Holdings Limited (formerly known as ACME Solar Holdings Private Limited) (the 'Holding Company') to include this report in the Red Herring Prospectus and Prospectus, prepared in connection with the Offering to be filed by the Holding Company with the Securities and Exchange Board of India and the concerned stock exchanges where the equity shares of the Holding Company are proposed to be listed. It is not to be used, referred to or distributed for any other purpose without our prior written consent.

## **STATEMENT OF POSSIBLE SPECIAL DIRECT TAX BENEFITS AVAILABLE TO ACME HEERGARH POWERTECH PRIVATE LIMITED ('THE COMPANY') UNDER THE APPLICABLE DIRECT TAX LAWS IN INDIA**

Outlined below are the special tax benefits available to the Company under the Income-tax Act, 1961 ('the ITA') read with Income-tax Rules, 1962 ('Income Tax Rules'), circulars, notifications, as amended by the Finance Act 2023 (collectively, hereinafter referred to as the "**Income Tax Laws**"). These possible special tax benefits are subject to fulfillment of conditions prescribed under the ITA and relevant Income Tax Laws by the Company.

### **A. Special tax benefits available to the Company under the ITA and Income Tax Laws in India**

#### **1. Lower corporate tax rate on income of domestic companies – Section 115BAA of the ITA**

The Taxation Laws (Amendment) Act, 2019 introduced section 115BAA wherein domestic companies are entitled to avail a concessional tax rate of 22% (plus applicable surcharge and cess) on fulfillment of certain conditions. The option to apply this tax rate is available from Financial Year ('FY') 2019-20 relevant to Assessment Year ('AY') 2020-21 and the option once exercised through filing of Form 10IC on the Income tax portal shall apply to subsequent assessment years. The concessional tax rate of 22% is subject to the company not availing any of the following deductions under the provisions of the ITA:

- Section 10AA: Tax holiday available to units in a Special Economic Zone.
- Section 32(1)(iia): Additional depreciation;
- Section 32AD: Investment allowance.
- Section 33AB/33ABA: Tea coffee rubber development expenses/site restoration expenses
- Section 35(1)/35(2AA)/ 35(2AB): Expenditure on scientific research.
- Section 35AD: Deduction for capital expenditure incurred on specified businesses.
- Section 35CCC/35CCD: expenditure on agricultural extension /skill development
- Chapter VI-A except for the provisions of section 80JJAA and section 80M.

The total income of a company availing the concessional rate of 25.168% (i.e., 22% along with surcharge of 10% and health and education cess of 4%) is required to be computed without set-off of any carried forward loss and depreciation attributable to any of the aforesaid deductions/incentives. A company can exercise the option to apply for the concessional tax rate by filing Form 10IC on or before the due date of filing return of income under section 139(1) of the ITA. Further, provisions of Minimum Alternate Tax ('MAT') under section 115JB of the ITA shall not be applicable to companies availing this reduced tax rate, thus, any carried forward MAT credit also cannot be claimed.

The provisions do not specify any limitation/condition on account of turnover, nature of business or date of incorporation for opting for the concessional tax rate. Accordingly, all existing as well as new domestic companies are eligible to avail this concessional rate of tax.

The Company have opted for the lower corporate tax rate under section 115BAA of the ITA in AY AY 2021-22 and have filed form 10IC on 10 November 2021 which is a pre-requisite for availing the concessional tax rates under section 115BAA of the ITA.

#### **2. Deductions in respect of employment of new employees – Section 80JJAA of the ITA**

As per section 80JJAA of the ITA, where a company is subject to tax audit under section 44AB of the ITA and derives income from business, it shall be allowed to claim a deduction of an amount equal to 30% of additional employee cost incurred in the course of such business in a previous year, for 3 consecutive assessment years including the assessment year relevant to the previous year in which such additional employment cost is incurred.

The eligibility to claim the deduction is subject to fulfilment of prescribed conditions specified in sub-section (2) of section 80JJAA of the ITA. The company are not claiming deduction under section 80JJAA of the ITA currently.

#### **3. Deduction with respect to inter-corporate dividends – Section 80M of the ITA**

As per the provisions of section 80M of the ITA, inserted with effect from 01 April 2020 i.e., AY 2021-22,

a domestic company shall be allowed to claim a deduction of dividend income earned from any other domestic company or a foreign company or a business trust. The amount of deduction so claimed should not exceed the amount of dividend distributed by it on or before the due date. In this case, due date means one month prior to the due date of furnishing return of income under sub section (1) of section 139 of the ITA.

However, ACME Heergarh Powertech Private Limited currently does not hold investments in any other companies.

4. Deductions in respect of specified expenditure

In accordance with and subject to the fulfillment of conditions as laid out under section 35D of the ITA, the Company and its material subsidiaries may be entitled to amortize preliminary expenditure, being specified expenditure incurred in connection with the issue for public subscription or such other expenditure as prescribed under section 35D of the ITA, subject to the limit specified therein (viz maximum 5% of the cost of the project or 5% of the capital employed in the business of the company).

The deduction is allowable for an amount equal to one-fifth of such expenditure for each of five successive previous years beginning with the previous year in which the business commences or as the case may be, the previous year in which the extension of the undertaking is completed, or the new unit commences production or operation.

With effect from AY 2024-25, the company shall be required to furnish a statement in Form 3AF containing the particulars of expenditures specified under section 35D of the ITA to such income tax authority prior to one month before the due date of filing Income tax return as per section 139(1) of the ITA.

5. Set-off of Unabsorbed Depreciation under section 32(2) of the ITA

As per the provisions of section 32(2) of the ITA, where a company does not have sufficient profits to cover the depreciation expense for that year, the unabsorbed depreciation shall be carried forward to subsequent assessment years for an indefinite period until it is fully absorbed and set off against future profits of subsequent assessment years. At the time of filing Income tax return for AY 2023-24, the Company has carried forward unabsorbed depreciation to subsequent assessment years.

6. Set-off & Carry forward of business loss under section 72 of the ITA

As per the provisions of section 72 of the ITA, if the Company has incurred loss under the head "Profits and gains of business or profession", and such loss has not been set-off against income under any other head of income, then such loss as has not been set-off shall be carried forward to set-off against the income in the following eight assessment years. The Company has carried forward business losses to subsequent assessment years.

7. Set-off & Carry forward of Losses under the head capital gains

As per the provisions of section 70 of the ITA, if the Company has incurred loss under the head capital gains in relation to a short-term capital asset, it can be set-off either against Short-Term Capital Gain ('STCG') or Long-Term Capital Gain ('LTCG') for that assessment year. If the loss has been incurred in relation to a long-term capital asset, it can be set-off only against LTCG for that assessment year.

However, if the losses are not wholly set-off, the same shall be carried forward to set-off against the income in the following eight assessment years as per section 74 of the ITA. If the loss carried forward relates to short-term capital asset, it shall be set-off either against LTCG or STCG. However, if the loss carried forward relates to long-term capital asset, it shall be set-off only against LTCG.

The Company do not have any capital losses to carry forward.

8. Tax on Capital Gains

As per section 112 of the ITA, LTCG arising from the transfer of long-term capital assets (other than listed equity shares, unit of an equity-oriented fund or unit of a business trust covered under section 112A of the ITA), shall be taxed at the rate of 20% of such capital gains (plus applicable surcharge and education cess)

with indexation benefits.

However, if LTCG is arising from the transfer of a long-term capital asset, being listed securities (other than a unit) or zero-coupon bond then capital gains shall be taxed at the rate of 10% without indexation benefit.

Further, STCG arising from the transfer of short-term capital assets (other than listed equity shares, unit of an equity-oriented fund or unit of a business trust covered under section 111A of the ITA), shall be taxed at the normal tax rate of the Company.

#### 9. MAT Credit

MAT is calculated at the rate of 15% of the “Book Profits” under Section 115JB of the ITA.

When a company is liable to pay tax under the MAT instead of regular income tax, the company is allowed to claim credit of MAT paid over regular tax i.e., MAT Credit is the amount of difference between the MAT amount paid and the amount payable under normal provision.

Under Section 115JAA, the company can carry forward and adjust the MAT credit in subsequent years. MAT credit is available for set off for fifteen years from the year in which such tax under MAT is paid.

Moreover, MAT credit is allowed to set off when tax is paid on the regular income under the provisions of income tax instead of MAT. Set off is granted for the amount of difference between the tax on the total income and tax which would have been payable as per MAT under Section 115JB of the ITA.

#### **Notes:**

1. These special tax benefits are dependent on the Company fulfilling the conditions prescribed under the Income Tax Laws. Hence, the ability of the Company to derive the tax benefits is dependent upon fulfilling such conditions, which based on the business imperatives, the Company may or may not choose to fulfil.
2. The special tax benefits discussed in the Statement are not exhaustive and is only intended to provide general information to the investors and hence, is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the issue.
3. The Statement has been prepared on the basis that Acme Solar Holdings Limited (formerly known as Acme Solar Holdings Private Limited) (the “Holding Company”) is in the process of getting shares of the Holding Company listed on a recognized stock exchange in India and the Holding Company will be issuing shares.
4. The Statement is prepared on the basis of information available with the management of the Company and there is no assurance that:
  - i. the Company will continue to obtain these benefits in future;
  - ii. the conditions prescribed for availing the benefits have been/ would be met with; and
  - iii. the revenue authorities/courts will concur with the view expressed herein.
5. The above views are based on the existing provisions of law and its interpretation, which are subject to change from time to time.
6. The above Statement of Possible Special Direct Tax Benefits sets out the provisions of law in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.

## **STATEMENT OF POSSIBLE SPECIAL INDIRECT TAX BENEFITS AVAILABLE TO ACME HEERGARH POWERTECH PRIVATE LIMITED UNDER THE APPLICABLE INDIRECT TAX REGULATIONS IN INDIA**

Outlined below are the special tax benefits available to ACME Heergarh Powertech Private Limited (*the "Company"*) under the Central Goods and Services Tax Act, 2017, the Integrated Goods and Services Tax Act, 2017, applicable State/ Union Territory Goods and Services Tax Act, 2017, the Customs Act, 1962, the Customs Tariff Act, 1975, including the relevant rules, notifications and circulars issued there under, the Foreign Trade (Development and Regulation) Act, 1992 (*read with Foreign Trade Policy 2023*) and Rajasthan Investment Promotion Scheme, 2019 (*collectively referred as "Indirect Tax Regulations"*), presently in force in India.

### **I. Special Indirect tax benefits available to the Company**

#### **a) Rajasthan Investment Promotion Scheme (RIPS), 2019**

RIPS, 2019 policy is a state incentive policy issued by the government of Rajasthan to promote investment in the state, drive economic growth and create employment opportunities. Under this policy special fiscal incentives and benefits are provided to enterprises making investments in establishing new units or expanding existing units and includes categories such as manufacturing, services, startups and renewable energy plants among others.

ACME Cleantech Solutions Private Limited (holding Company of 'ACME Solar Holdings Limited') has been granted approval for customized package for setting up of 4500MW Solar Project and 1200 MW Solar Project wherein ACME Cleantech Solutions Private Limited is eligible for reimbursement of 75% of the SGST amount paid to the state of Rajasthan for purchase of equipment from local manufacturer up to 31<sup>st</sup> March 2026. The subsidiaries (including step down subsidiaries) of ACME Cleantech Solutions Private Limited having power plant projects in Rajasthan would be eligible for benefits available under this policy.

ACME Heergarh Powertech Private Limited, having a running power plant in Rajasthan, may avail and enjoy the fiscal incentives and benefits provided in the state policy, subject to the fulfilment of conditions specified in the state's incentives policy.

#### **b) Manufacturing and Other Operations in Warehouse Regulations (MOOWR), 2019**

The purpose and objective of MOOWR scheme is to make India a manufacturing hub and an investment destination. This scheme facilitates deferment of customs duties on imported goods used for manufacturing or other activities such as re-labelling, re-packing, grading, sorting, testing, and repair. The scheme offers deferment of custom duties for both raw materials and capital goods and there would be levied no customs duty if the same goods are exported.

The scheme provides a simplified approval process for manufacturing operations within a bonded warehouse. The scheme offers the option to set up a new manufacturing facility or convert an existing one into a bonded facility, regardless of its location.

Under MOOWR scheme, the payment is deferred for whole of Basic Customs Duty ('BCD'), Additional Duty of Customs/CVD and SAD/CVD in lieu of VAT/local taxes (non-GST goods), IGST and Compensation Cess on GST goods up to a date notified by Central Board of Indirect Taxes and Customs ('CBIC'), subject to fulfilment of certain prescribed conditions.

ACME Heergarh Powertech Private Limited has imported goods under the MOOWR scheme issued by the Government of India and may continue to import goods under the said scheme, subject to the fulfilment of conditions specified in the scheme.

#### **Notes:**

This Annexure sets out only the special indirect tax benefits available to the Company under the Indirect Tax Regulations, presently in force in India.

1. The Statement has been prepared on the basis that ACME Heergarh Powertech Private Limited (formerly known as ACME Solar Holdings Private Limited) (the “Holding Company”) is in the process of getting shares of the Holding Company listed on a recognized stock exchange in India and the Holding Company will be issuing shares.
2. This special indirect tax benefits discussed in this Annexure is not exhaustive. It is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences, the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the proposed IPO.
3. This annexure covers only indirect tax regulations benefits and does not cover any income tax law benefits or benefit under any other law.
4. The Statement is prepared on the basis of information available to the management of the Company and there is no assurance that:
  - i. the Company will continue to obtain these benefits in future; and
  - ii. the conditions prescribed for availing the benefits have been/ would be met with.
5. These comments are based upon the existing provisions of the specified indirect tax laws, and judicial interpretation thereof prevailing in the country, as on the date of this Annexure.
6. No assurance is given that the revenue authorities/courts will concur with the views expressed herein. Our views are based on the existing provisions of law and its interpretation, which are subject to changes from time to time. We do not assume responsibility to update the views consequent to such changes.
7. The above statement of possible special tax benefits sets out the provision of law in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.

### MACROECONOMIC OVERVIEW

#### Economic indicators

India’s gross domestic product (“**GDP**”) at constant (Fiscal 2012) prices was ₹ 173.8 lakh crore (provisional estimates) for Fiscal 2024 vis-à-vis the first revised estimate of ₹ 160.7 lakh crore as per data released by the National Statistical Office (“**NSO**”) in May 2024. This translates into a growth of 8.2% over Fiscal 2023.

India has become the fifth largest economy in the world in 2023, according to the International Monetary Fund’s (“**IMF**”) World Economic Outlook (April 2024). As per IMF GDP Forecasts (July 2024), India’s GDP growth is estimated at 6.5% in 2025, the highest amongst the top 10 economies.

#### Comparison of India’s economy with other major nations

\*India Financial Year, Source: World Economic Outlook Database (April and July 2024) by IMF; IEA, CEA, CRISIL MI&A-Consulting  
The S&P Global's macro summary for the major regions and groups is summarised below:

- **The U.S.:** Second-quarter growth momentum is tracking above the (upwardly revised) potential rate of 2.2%. Growth in labor supply primarily drove the increase in estimated potential growth.
- **Europe:** Activity is on the rise, with the May composite purchasing managers' indices firmly above the expansion threshold. The eurozone has exited the recent manufacturing recession, putting it cyclically ahead of the U.S. Meanwhile, the labor market continues to slow although the unemployment rate remains near all-time lows.
- **China:** S&P Global raised its 2024 China GDP growth forecast to 4.8%, from 4.6%, but see a sequential slowdown in the second quarter as the combination of subdued consumption and robust manufacturing investment weighs on prices and profit margins.
- **Emerging markets:** First-quarter GDP data confirmed a recovery across most emerging markets. With a few exceptions, S&P Global expects this recovery to continue in the coming quarters. External demand dynamics are also improving, especially in emerging markets that are exposed to the nascent recovery in Europe, or those that are exposed to the improvement in the electronics trade cycle. Unexpected electoral outcomes, particularly in Mexico and South Africa, have increased uncertainty about upcoming policy paths.

E: Estimated (Since Fiscal 2023 are first revised estimates and Fiscal 2024 are provisional estimates, shown as estimated))

Source: Central Statistics Office ("CSO"), CEIC, CRISIL MI&A-Consulting

CRISIL MI&A Consulting expects GDP growth to moderate to 6.8% this Fiscal 2025 after a high growth of 8.2% last year, weighed down by high interest rates and low Fiscal impulse. On a positive note, last year's laggards — agriculture and consumption — are poised to rise. Rural demand is expected to drive consumption. Monsoon is progressing well and is above normal as on September 10 (8% above long period average). Kharif sowing, too, is higher on-year. Along with increasing agricultural production, it will help ease food inflation this year, which is critical to raise discretionary spending.

In addition, government spending on employment and asset generating schemes (PM Awas Yojna for urban and rural areas) should provide additional support to consumption growth. However, unlike last Fiscal, rural consumption is expected to outpace urban consumption, as higher interest rates impact urban areas more. The signs of this are visible in the RBI's consumer confidence survey for urban areas released in August. Net-net, high rural demand and easing food inflation are expected to lift consumption over the anemic 4% growth seen last year.

Given growth expectation of 6.8%, CRISIL MI&A Consulting expects India to log the fastest growth among major economies and fare better than 6.7% growth seen in the decade preceding the pandemic.

#### GVA performance

Real gross value added ("GVA"), i.e., GVA at constant (Fiscal 2012) basic prices, is estimated to increase 7.2% in Fiscal 2024 as against 6.7% in Fiscal 2023.

### GVA at basic prices

PE: Provisional estimates; RE: revised estimates

Source: Ministry of Statistics and Programme Implementation, CRISIL MI&A-Consulting

### India's GDP recovered with subsiding of the pandemic

In the past 11 years (from Fiscal 2014 to 2024), India's GDP at constant (Fiscal 2012) prices grew at a compounded growth of approximately 5.3% ("CAGR").

GDP grew 6.7% on-year in the first quarter of Fiscal 2025, in line with CRISIL's forecast of 6.8%. This was a deceleration vs the fourth quarter of Fiscal 2024, which saw the economy expand 7.8%. And in the first quarter of Fiscal 2024, the economy had grown 8.2%. On the supply side, GVA growth of 6.8% was slightly higher than 6.7% GDP growth.

From the demand side, decline in government consumption spending was a drag on GDP growth. And reducing growth in net taxes limited the rise in GDP over GVA growth. That being said, both private consumption and fixed investments picked up in the quarter. From the supply-side, despite healthy growth of 7.0%, manufacturing was slower than in the last quarter Fiscal 2024, while agriculture and services improved. However, the improvement in agriculture was relatively modest, which capped the rise in GDP.

Overall, CRISIL MI&A-Consulting expects India's real GDP to moderate to 6.8% in Fiscal 2025, after a high growth of 8.2% last year, weighed down by high interest rates and low Fiscal impulse. However, agriculture and consumption, which were both sluggish last Fiscal 2024, are expected to see a revival this Fiscal 2025.

### CRISIL's projections

## Overview of the Indian Power Sector

### Regulatory framework

India has a widespread power network with interconnected regional grids. The power generation profile is dominated by conventional (coal, lignite, natural gas, oil, hydro and nuclear power) sources, although, non-conventional sources (such as wind, solar, and biomass and municipal waste) are rapidly gaining traction. Transmission and Distribution infrastructure has expanded over the years for evacuation of power from generating stations to load centres through the intra-state and inter-state transmission system ("ISTS").

The sector is highly regulated, with various functions being distributed between multiple implementing agencies. There are three chief architects of the sector namely the Central Electricity Regulatory Commission ("CERC"), the Central Electricity Authority ("CEA"), and the State Electricity Regulatory Commissions ("SERCs").

## Institutional and structural framework

Note:

## Power supply mix

The total installed generation capacity as of March 2024 was approximately 442 GW, of which approximately 98 GW of capacity was added over Fiscal 2018-24. The overall installed generation capacity has grown at a CAGR of 4.3% over the same period. About 9 GW of capacity has been added during Fiscal 2025 as of August 2024. The installed capacity has now reached 451 GW as of August 2024.

## India Annual capacity additions and installed capacity (GW)

Fiscal 25 data as of August 2024; Source: CEA, CRISIL MI&A-Consulting

Coal and lignite-based installed power generation capacity has maintained its dominant position over the years and accounts for approximately 48% as of August 2024. However, RE installations (including large hydroelectric projects), have reached approximately 200 GW capacity as of August 2024, compared with 114 GW as of March 2018, constituting about 44% of total installed generation capacity. This growth has been led by solar power, which rapidly rose to approximately 67 GW from 22 GW over the same period.

### Breakup of installed capacity as of August 2024 (GW, % share)

Source: CEA, CRISIL MI&A-Consulting

### Demand-supply scenario

India's electricity requirement has risen at a CAGR of approximately 5.0% between Fiscals 2018 and 2024, while power availability rose at approximately 5.1% CAGR on the back of strong capacity additions, both in the generation and transmission segments. As a result, the energy deficit declined to 0.5% in Fiscal 2023 and further reduced to 0.3% in Fiscal 2024 from 0.7% in Fiscal 2018. Also, strengthening of inter-regional power transmission capacity over the past five years has further supported the fall in deficit levels as it reduced supply constraints on account of congestion and lower transmission corridor availability. During Fiscal 2025, the deficit has reduced to 0.1% as of August 2024.

### Aggregate power demand supply (in billion units, or "BUs")

Fiscal 25 data as of August 2024; Source: CEA, CRISIL MI&A-Consulting

Peak electricity demand in India has grown from 164 GW in Fiscal 2018 to 243 GW in Fiscal 2024 clocking an average growth rate of 6.8% in the past six years. In Fiscal 2025 (as of August 2024) the peak demand further increased to 250 GW during the month of May 2024. Prior to the pandemic, electricity demand in India usually peaked in August-September, mostly covering the monsoon season. This spike in peak demand was primarily due to an increase in domestic and commercial load, mainly space cooling load due to high humidity conditions. However, during post pandemic years, annual peak demand occurred in the summer season (April-July), due to extreme heatwave conditions.

Peak demand touched record high levels of 250 GW in Fiscal 2025 during May 2024, attributed to an increase in cooling demand as intense summers scorched several regions of the country. During Fiscal 2023, the

generation has struggled to keep up with the rise in demand, resulting in an increase in peak deficit to 4.2% as compared with 1.2% for the same period in Fiscal 2022. However, during Fiscal 2024, the peak deficit reduced to 1.4% with a deficit of only 3 GW with jump in supply. The peak supply position further improved in Fiscal 2025 with no deficit witnessed during the period.

### Peak power demand and supply

Fiscal 2025 data as of August 2024; Source: CEA, CRISIL MI&A-Consulting

### Distribution sector reforms

Despite various measures, consumers did not get reliable 24x7 electricity in many parts of the country. Aggregate Technical and Commercial (“**AT&C**”) losses and the Average Cost of Supply-Average Revenue Realized (“**ACS-ARR**”) gap continued to be high. This sub-optimal performance of the Distribution Sector was due to structural and management deficiencies and some remaining weaknesses in the infrastructure. The distribution companies (“**DISCOMs**”) are required to focus on improving their operational efficiencies & financial sustainability; and improve consumer services to be able to meet the desired consumer service standards. This required large-scale reforms in the Distribution Sector and schemes that would enable the DISCOMs to reduce losses to make them financially sustainable and operationally efficient.

The government plans to implement several policies to resolve issues of the distribution segment, as it impacts the entire value chain. Key announcements pertaining to this are as follows:

- 1) ₹ 3 trillion RDSS aiming to improve operational and financial parameters of discoms — In Union Budget 2022, the GoI announced the RDSS with an outlay of ₹ 3.04 trillion, partly funded by the GoI to the tune of ₹ 976 billion, aimed at reducing financial stress across discoms. The package, slated to be distributed over the next five years, will subsume other schemes (“**DDUJY**” and “**IPDS**”) under its ambit. As has been the case with the *Aatmanirbhar Bharat* discom liquidity package, PFC and REC will be the key nodal lenders for disbursement of funds to discoms. The letter of credit (“**LC**”) mechanism was also implemented in August 2019. This order mandated discoms to issue LCs or provide payments upfront before purchase of power. However, the success of this scheme has been limited so far, due to various loopholes used by discoms and the lower bargaining power of independent power producers (“**IPPs**”).
- 2) MoP vide Gazette Notification dated 3rd June’ 2022, notified “The Electricity (Late Payment Surcharge and Related Matters) Rules, 2022” (“**LPS Rules**”) to address cash flow challenges faced mainly by generation companies (“**gencos**”) and transmission companies (“**transcos**”) and to promote timely payments across the power sector. These rules provide a mechanism for settlement of outstanding dues of gencos, ISTS Licensees and Electricity Trading Licensees. The rules provisioned for converting discoms’ outstanding dues to these companies into equated monthly instalments for gradual liquidation of these dues. Further, to promote timely payment of current power bills, the power supply would be regulated for discoms that fail to clear their bills one month after the due date of payment or two-and-a-half months after the presentation of the bill by the generating company.

Since their notification, there has been significant progress in recovering outstanding dues, with most distribution companies now adhering to regular payment schedules. The total unpaid bills have reduced from around ₹ 1.4 lakh crores in June 2022 to around ₹ 48,000 crores in February 2024. As such the issue of nonpayment by discoms is resolved to a great extent and provided much required regulatory certainty. The major driver for this trend has

been LPS Rules, which converted legacy dues to EMI instalments. The LPS rule helped bring down days payable from 166 in Fiscal 2022 to 126 in Fiscal 2023.

### ***Discom financial health***

Review of AT&C loss and ACS-ARR gap of state discoms

Distribution is the final and critical link in the power sector value chain. However, the financial position of the distribution sector has significantly deteriorated over the past decade owing to irregular tariff hikes, high AT&C losses, and delays in subsidy payments by state governments. This has adversely impacted power offtake by discoms and led to delays in payments to generation companies.

The Ujwal Discom Assurance Yojana (“**UDAY**”) was launched by the MoP in November 2015 for improving the financial health and operational efficiency of state-owned discoms across the country. Outcomes of the operational improvements were measured through following indicators:

- Reduction of a AT&C losses to 15% in Fiscal 2019 as per loss reduction trajectory to be finalized by Minister of Power and States
- Reduction in gap between average cost of supply and average revenue realized to ZERO by Fiscal 2019 as finalized by MP and States.

States took over 75% of discom debt as on September 30, 2015, over a period of two years, 50% in Fiscal 2016 and 25% in Fiscal 2017. The balance 25% (not taken over by the state) was to be converted by lenders into loans or bonds with an interest rate of not more than the banks’ base rate plus 10 basis points (“**bps**”). Alternatively, this debt could be fully/partly issued by the discoms as state guaranteed bonds at the prevailing market rates, which were to be equal to or less than the banks’ base rate plus 10 bps. This is estimated to have aided in reduction of interest cost by 300 to 400 bps as the interest rate at which debt is available to discoms is 13-14%. As on the terminal year for the scheme, Fiscal 2020, ₹ approximately 2.3 trillion worth bonds had been issued (86.3% of target), which led to the debt and interest burden on discoms being reduced, resulting in higher liquidity.

Both the financial and operational performance of discoms started to improve post implementation of Ujwal DISCOM Assurance Yojana (“**UDAY**”), but the situation reversed and worsened again once the scheme ended in March 2019.

The scheme envisaged reduction of the cost of power through measures such as additional supply of domestic coal (at notified prices), coal linkage rationalisation through swap agreements, supply of washed and crushed coal, and supply of cheaper power from NTPC and other central public sector units (as part of central allocation of power to states), if available through a higher plant load factor. Implementation was mixed with policy-level support but there was limited traction on the ground. While coal linkage rationalisation under the SHAKTI scheme did benefit several projects, and domestic supply also improved, the effect has been temporary or partial.

### **Improvements in operational efficiency**

AT&C losses reduced to 15.4% in Fiscal 2023, significantly lower than 21.5% in Fiscal 2021. AT&C losses were considerably high in Fiscal 2021, as COVID-19 adversely impacted both billing and collection efficiencies. However, AT&C losses reduced by approximately 4.5% in Fiscal 2023 even when compared with the pre-pandemic level (Fiscal 2020).

The AT&C loss trend indicates that the improvement was driven by collection efficiency, which improved from 93.1% in Fiscal 2020 to 97.3% in Fiscal 2023. On the other hand, billing efficiency improved marginally to 87.0% in Fiscal 2023 from 85.9% in Fiscal 2020.

### AT&C loss trajectory (%)

Source: PFC, CRISIL MI&A-Consulting

The cash ACS and ARR gap at the national level narrowed to ₹ 0.49 per kWh in Fiscal 2018 from ₹ 0.58 per kWh in Fiscal 2017 but expanded to ₹ 0.83 per kWh at the end of Fiscal 2019. The cash-adjusted ACS-ARR gap stood at ₹ 0.79/kWh as of March 2020 and widened further to ₹ 0.89/kWh as of March 2021, indicating further deterioration in discoms' financial profiles. However, the gap narrowed to ₹ 0.33/kWh as of March 2022 driven by higher subsidies disbursement by state governments and better cash collections. In Fiscal 2023, the gap again increased to ₹ 0.55/kWh due to an increase in power purchase cost.

The power distribution sector suffers from high trade payables averaging 126 days nationally, as opposed to the benchmark of 45 days specified in LPS Rules, 2022. With the sector making losses and facing liquidity crunch, reducing trade payables remains challenging.

### Total borrowings for discoms

Source: MoP, PFC, CRISIL MI&A-Consulting

CRISIL MI&A-Consulting has bucketed states based on their operational performance, infrastructure growth, and the respective state government's ability and willingness to support them. The details are as of March 2023.

### Most state entities within moderate-to-weak band

#### Bucketing of state utilities

|          | State          | AT&C loss (%) | ACS-ARR gap (₹/kWh) | Fiscal deficit (% of GSDP) |
|----------|----------------|---------------|---------------------|----------------------------|
| Strong   | Gujarat        | 9.66%         | 0.02                | 1.51%                      |
|          | Andhra Pradesh | 8.48%         | 0.01                | 3.60%                      |
|          | Haryana        | 11.74%        | -0.04               | 3.30%                      |
| Moderate | Karnataka      | 13.76%        | 0.61                | 2.84%                      |
|          | Punjab         | 11.30%        | 0.18                | 5.20%                      |

- Between ₹ 0.05 and ₹ 0.35/kWh
- Above ₹ 0.35/kWh

#### Fiscal deficit (% of GSDP)

- Less than 3%
- Between 3% and 4.5%
- Above 4.5%

Source: PFC, CRISIL MI&A-Consulting

### Strong states have performed better in operational parameters

Gujarat, Andhra Pradesh, and Haryana have been classified as strong states, as they have AT&C losses significantly lower than 15%, which is all India target under RDSS. Also, the state profile is preferable with lower Fiscal deficit.

### Moderate states have few promising operational parameters, but are stretched on certain counts

Madhya Pradesh despite high AT&C loss, has ACS-ARR gap relatively under control with moderate Fiscal profile of state. Karnataka, Punjab and Tamil Nady with high ACS-ARR gap and relatively good Fiscal profile except Punjab is considered moderate as its AT&C losses are lower than 15%.

### Other discoms have reported higher AT&C losses and ACS-ARR gap

AT&C loss and ACS-ARR gap in states such as Bihar, Jharkhand, Uttar Pradesh are higher than national average on account of weak distribution infrastructure, higher power purchase costs, and lower billing and collection efficiency.

As a result of operational inefficiencies and financial losses incurred over the years, state discoms have accumulated a significant debt burden. After completion of UDAY scheme, discoms' debt rose over Fiscals 2020 and 2021 as revenues fell on account of weak power demand. As of Fiscal 2023, total outstanding debt is ₹ 6.87 trillion. Going forward, the debt burden is expected to increase over Fiscals 2024-28 despite power demand recovery as operational inefficiencies persist and losses pile up, requiring discoms to borrow to fund the accumulated losses and debt servicing.

### Credit Ratings of offtakers (State Discoms, Holding Companies, Central Agencies)

| Offtakers       | Date           | Agency        | Rating        | Instrument      |
|-----------------|----------------|---------------|---------------|-----------------|

### Capacity addition outlook

India's installed generation capacity, which stood at 356 GW at the end of Fiscal 2019 has reached 442 GW as of Fiscal 2024 and approximately 451 GW in Fiscal 2025 (as of August 2024) on the back of healthy renewable capacity additions (including solar, wind, hybrid, and other renewable sources) even as additions in coal and other fuels have declined. In Fiscal 2024, renewables (excl. large hydro) accounted for approximately 33% of the installed capacity, up from approximately 22% in Fiscal 2019, whereas coal-based capacity tapered to approximately 49% over the same period.

Capacity additions in the conventional power generation segment of about 32-35 GW are expected over Fiscals 2025 to 2029 driven by higher than decadal average power demand. Fresh project announcements are limited as players are opting for the inorganic route for expansion given the availability of assets at reasonable valuations. In fact, 4.8 GW of stressed power assets awaiting debt resolution. However, the need for generation capacity equipped for flexible operations to ramp up-down quickly is critical to meet peak demand as generation from renewable capacities is infirm in nature. CRISIL MI&A-Consulting expects 25 to 27 GW of coal-based power to

be commissioned over Fiscals 2025 to 2029. Coal capacity additions are expected to be driven entirely by central and state sectors, as major private gencos continue to focus on adding RE capacity.

Nuclear power capacity additions of 5 to 6 GW are expected during the period as ongoing projects at Kakrapara, Kalpakkam, and Rajasthan is nearing completion. As of January 2024, Unit 1 of KAPP has been commissioned with Unit 2 expected by end of Fiscal 2024.

CRISIL MI&A-Consulting expects 15 to 16 GW of hydro power installations including 6.5 to 7.5 GW pumped hydro storage projects (“**PSP**”) capacity additions over Fiscals 2024 to 2029.

Old and inefficient coal plants to the tune of 14 to 15 GW (mainly state-owned) were to be retired. However, as per CEA notification issued on January 20, 2023, power utilities have been advised to not retire any thermal units until 2030 and carry out renovation and maintenance (“**R&M**”) for life extension and improve the flexibility and reliability of thermal units.

By Fiscal 2029, RE capacity (excl. large hydro) of over 320 GW is expected, driven by various government initiatives, favourable policies, competitive tariffs, innovative tenders, development of solar parks and green energy corridors, etc. RE capacity is estimated to account for about 50% of the installed capacity of 660 to 670 GW by Fiscal 2029.

Battery energy storage system (“**BESS**”) capacity additions, aimed at storing renewable energy during off-peak hours of power demand to support peak supply, are expected to commission starting Fiscal 2025, with 23 to 24 GW of BESS capacity likely to be added through Fiscal 2029.

**All India installed estimated capacity addition by Fiscal 2029 (in GW)**

RE includes solar, wind, small hydro, and other renewable sources

Source: CEA, CRISIL MI&A-Consulting

## Demand-supply scenario

### *Demand drivers and constraints*

Power demand is closely associated with a country’s GDP. Healthy economic growth leads to growth in power demand. India is already the fastest-growing economy in the world, with average GDP growth of 5.5% over the past decade. The trickle-down effect of government spending on infrastructure through the National Infrastructure Pipeline, expansion of the services industry, rapid urbanisation, and increased farm income from agriculture-related reforms are key macroeconomic factors that are expected to foster power demand. Significant policy initiatives such as 24x7 power for all, Sahaj Bijli Har Ghar Yojana (“**SAUBHAGYA**”) scheme to provide electricity connections to all households, green energy corridor to facilitate evacuation of RE power, green city scheme to promote the development of sustainable and eco-friendly cities, PLI scheme and low corporate tax rates among others are expected to further support power demand in the country.

### Factors influencing power demand

Source: CRISIL MI&A-Consulting

Apart from macroeconomic factors, power demand would be further fueled by railway electrification, upcoming metro rail projects, growing demand for charging infrastructure due to increased adoption of electric vehicles, higher demand from key infrastructure and manufacturing sectors. However, increasing energy efficiency, a reduction in technical losses over the longer term, and captive as well as off-grid generation from renewables would restrict growth in power demand.

### Power demand-supply forecast

Power demand maintained a strong growth momentum in Fiscal 2023 logging a double-digit growth of approximately 10% albeit a moderate base of Fiscal 2022 due to extreme seasonal vagaries, sustained buoyancy in economic activities along with robust industries activities accelerated power demand. GDP is expected to grow at 7.3% in Fiscal 2024 supporting power demand despite a higher base of 7.2% in Fiscal 2023. Despite the high base of preceding three years, CRISIL MI&A-Consulting expects power demand to grow by 5.5-6.0% in the next five years which will be supported by infrastructure-linked capex, strong economic fundamentals along with expansion of the power footprint via strengthening of T&D infrastructure, coupled with major reforms initiated by the GoI for improving the overall health of the power sector, particularly that of state distribution utilities, are expected to improve the quality of power supply, thereby propelling power demand.

### Energy demand outlook (Fiscals 2022 to Fiscal 2029) in BUs

P: Projected, Source: CEA, CRISIL MI&A-Consulting

Peak electricity demand in India has grown from 184 GW in Fiscal 2020 to 243 GW in Fiscal 2024 clocking an average growth rate of 7.3% in the past five years.

Peak demand is expected to grow at annual average 5% to 6% over Fiscal 2024 to Fiscal 2029 to reach nearly 315 GW by Fiscal 2029 with expected persistent high temperatures, rising urbanization, economic growth and infrastructure push leading to higher power consumption.

#### Peak demand to increase by 95 to 100 GW between Fiscals 2023 and 2029 to cross 300 GW

P: Projected, Source: CEA, CRISIL MI&A-Consulting

#### Short term market

##### Trading prices

Over the years, the weighted average price of electricity transacted through traders was higher than the price of electricity transacted through power exchanges, except in Fiscal 2022 when the price at power exchanges was comparatively high due to various factors such as rise in demand after economy opened (post COVID-19 lock downs), precarious coal stock position at various plants, reduced RE generation (especially during August and September 2021) coupled with increasing coal prices.

#### Weighted average tariff of short-term transactions

Note: Annual Report for Fiscal 2023 to Fiscal 2024 not yet available with CERC, hence the prices for Fiscal 2024 have been estimated by consolidated based on monthly reports published by CERC

Source: CERC, CRISIL MI&A-Consulting

Peak demand in Indian power system reaches during pre and post monsoon as cooling load picks up with rising temperatures. IMD has indicated that during 2024 hot weather season (April to June), above-normal maximum temperatures are likely over most parts of the country. As a result of heat wave and increase in ambient temperature, there is increase in peak demand, higher demand for relatively longer duration, increased energy consumption, and higher electricity market prices due to increased demand. The weighted average price of electricity transacted through power exchanges during Fiscal 2023 was on higher side at ₹ 6.25/kWh as against ₹ 4.69/kWh in Fiscal 2022. Rise in temperatures, increased demand and soaring imported coal prices lead to an increase in short term prices in Fiscal 2023. Short term prices have recovered to some extent in Fiscal 2024 due to correction of the elevated imported coal prices. Considering the historical trend as well as increased instances of heat wave, the weighted average short-term electricity prices are expected to be in the range of ₹ 4.0 to 4.50/kWh on medium term basis (Fiscal 2025 and 2026). Such higher short term electricity prices provide an opportunity for power generator mitigating the offtake risks specially for firm and dispatchable renewable energy

(“FDRE”) projects wherein sale of excess of contracted capacity is allowed in exchanges on daily basis. Higher power exchange tariffs would also help the developers to get better returns.

## RENEWABLE ENERGY SECTOR

### Overview of renewable energy sector

Renewable sources are a clean source of energy as they do not burn like fossil fuels, preventing the release of pollutants into the air. Increasing use of RE would help avoid carbon emissions, and thereby, restrict global warming. Further, the wide availability of these resources makes them less susceptible to depletion unlike conventional sources of energy. While there are multiple renewable sources that can be utilised, including solar, wind, small hydro, biomass, and bagasse remain key sources.

Renewable energy installations (incl. large hydro) have increased fivefold to approximately 200 GW as of August 2024, as compared with approximately 63 GW as of March 2012 (*source: MNRE*), led by various central and state-level incentives. As of March-2024, installed grid connected RE generation capacity (incl. large hydro) in India constituted approximately 44% of the total installed generation base in India. This growth has been led by solar power, which has grown to approximately 89 GW from merely approximately 0.09 GW over the discussed time period (i.e. from March 2012).

**India’s RE (incl. large hydro) capacity was approximately 44% at the end of August 2024**

Conventional: Coal, Gas, Lignite, and Nuclear; Large Hydro (including pumped hydro storage)

Source: MNRE; CEA, CRISIL MI&A-Consulting

However, owing to lower capacity utilisation factors, the RE penetration (incl. large hydro) in terms of energy generation was at approximately 187 BUs in Fiscal 2025, as of August 2024.

## India's RE (incl. large hydro) penetration was about 23% between April 2024 to August 2024

Generation from April 2024 to August 2024  
 Conventional: Coal, Gas, Lignite and Nuclear

In 2014, the government set a target to achieve 175 GW of renewable energy in India- 100 GW of solar energy by December 2022, 60 GW of wind energy by December 2022 and 15 GW via other sources, including small hydro projects, biomass projects and other renewable technologies, by December 2022.

Further, under the Paris Agreement, the Indian government has committed to generating 40% of electricity from non-fossil fuels sources by 2030. The country also has a target of setting up 450 GW of RE by 2030 and providing 17 lakh solar pumps to farmers under the Pradhan Mantri-Kusum Yojana.

The 2021 United Nations COP26 was the 26th United Nations Climate Change conference, held at Glasgow, Scotland during October-November 2021 and a draft agreement was circulated with respect to climate change action. The proposal aims at updating the time frame for revised targets NDCs to next year — much sooner than the requirement of every five years as laid out in the 2015 Paris Climate Accord. India updated its NDCs as follows:

- To reduce Emissions Intensity of its GDP by 45% by 2030, from 2005 level
- To achieve about 50% cumulative electric power installed capacity from non-fossil fuel-based energy resources by 2030,
- By the year 2070, India will achieve the target of Net Zero

These are more ambitious and are beyond the previous NDCs agreed under the Paris Agreement. These will provide a new thrust to the RE Sector in India and will boost the already accelerating RE Sector. These will also provide guidelines to the Regulators as well as Government Authorities while setting the rules, regulations, and targets.

Various incentives available for renewable energy sector in India

- **Central Public Sector Undertaking (“CPSU”)** Scheme Phase-II (Government Producer Scheme) for setting up 12 GW grid-connected Solar Photovoltaic (“PV”) Power Projects by Government Producers, using domestically manufactured solar PV cells and modules, with Viability Gap Funding (“VGF”) support, for self-use or use by Government/ Government entities, either directly or through Distribution Companies (“DISCOMS”). Viability Gap Funding (“VGF”) support is provided up to ₹ 5.5 Mn/MW to the CPSUs/Govt. Organizations entities selected through competitive bidding process.
- **Production Linked Incentive scheme** ‘National Programme on High Efficiency Solar PV Modules’ for achieving manufacturing capacity of Giga Watt (“GW”) scale in High Efficiency Solar PV modules (Tranche- I & II). The beneficiaries are eligible for Production Linked Incentive (“PLI”) on production and sale of solar PV modules. The quantum of PLI eligible for disbursement depends upon: (i) quantum of sales of solar PV modules; (ii) performance parameters (efficiency

and temperature coefficient of maximum power) of solar PV modules sold; and (iii) percentage of local value addition in modules sold.

- **Rooftop Solar Programme Phase II** for grid connected solar rooftop power plants. Under this Programme, subsidy is provided for residential sector and performance linked incentives to DISCOMs for achieving capacity addition in rooftop solar above baseline.
- **Subsidies under Grid Connected Rooftop Solar PV Power Projects PM Surya Scheme:**
  - ₹ 30,000/- per kW up to 2 kW
  - ₹ 18,000/- per kW for additional capacity up to 3 kW
  - Total Subsidy for systems larger than 3 kW capped at ₹ 78,000
- **Green Energy Corridors (“GEC”):** to create intra-state transmission system for renewable energy projects. Central Financial Assistance (“CFA”) is provided to set up transmission infrastructure for evacuation of Power from Renewable Energy projects in total ten States (considering both the phases of GEC).
  - GEC Phase-I: CFA of 40 % of DPR cost or awarded cost whichever is lower.
  - GEC Phase-II: CFA of 33 % of DPR cost or awarded cost whichever is lower.
- **National Green Hydrogen Mission** launched with an outlay of ₹ 197.44 billion with aim to make India a Global Hub for production, utilization and export of Green Hydrogen and its derivatives.
- **Viability gap funding** for 4,000 MWh battery energy storage systems and formulation of a detailed framework for pump storage projects.

### Tendering activity in renewable energy

In the last three Fiscals, India issued over 150 GW of utility scale renewable energy tenders across all technologies including ESS. However, the auction has been about half of the tendering capacity over the same period whereas the allocation has been at around 44% of the tendering capacity and 86% of auctioned capacity. The tendering activity increased about three-fold between Fiscal 2023 and 2024 due to significant increase in government targets, innovative tendering solutions, discom’s shift to offtake more stable and firm power and increase in power sector investment.

The tendering activity for utility scale RE projects has outpaced the government’s target of 50 GW for Fiscal 2024. The government selected SECI, NTPC, SJVN and NHPC as RE implementing agencies (“REIA”). However, there was a shortfall of about 6 GW in the cumulative target set for these REIAs due to non-issuance of wind tenders. The tender issuance in the first quarter of Fiscal 2024 was a bit slow but it picked up in the subsequent quarters to surpass the overall target of 50 GW due to participation from other state nodal agencies and state discoms. Apart from this, over 20 GW of standalone ESS tenders were also issued including pumped hydro storage. The average allocation of tenders has been above 85% of the auctioned capacity in the last three years.

During the first five months of Fiscal 2025, the total auctioned capacity has been 12 GW, of which 6.2 GW was auctioned in the first quarter of Fiscal 2025.

### Auctioned capacity of utility scale RE projects

Source: Industry, REIAs, CRISIL MI&A Consulting

From Fiscal 2017 to Fiscal 2021, more than 110 GW of utility-scale project development renewable energy tenders were issued.

## Solar sector

In the renewable energy basket (including large hydro) as of August 2024, solar energy accounted for a share of approximately 44%. Growth in the solar power sector over the last five years has been robust. As much as approximately 70 GW capacity was added in the segment over Fiscals 2018-24, registering a CAGR of approximately 24.8%, although on a low base. Despite the second wave of COVID-19 infections, Fiscal 2022 witnessed solar capacity additions of approximately 14 GW. In a relief to developers, the MNRE provided total extension of seven-and-a-half months for the projects affected by the first and second waves of pandemic. This is estimated to have delayed commissioning in Fiscal 2022, leading to a spillover into Fiscals 2023 and 2024. In Fiscal 2023, solar capacity additions stood at approximately 13 GW, with approximately 2.2 GW coming from rooftop solar projects. Similarly, in Fiscal 2024, solar capacity additions stood at approximately 15 GW, with approximately 3 GW coming from grid connected rooftop solar projects. The first five months of Fiscal 2025 saw a capacity addition of approximately 7.6 GW.

**Trend in solar capacity installation in India**

*\*As of August 2024, Source: MNRE, CEA, CRISIL MI&A-Consulting*

During Fiscals 2018 to Fiscal 2024, approximately 70 GW of solar capacity has been commissioned. Despite the second pandemic wave, approximately 14 GW of solar capacity was added in Fiscal 2022. The momentum continued in Fiscal 2023 and 2024, with robust solar capacity additions of approximately 13 GW and approximately 15 GW respectively. The first five months of Fiscal 2025 saw a capacity addition of approximately 7.6 GW.

### States that helped drive solar capacity addition in India

\*Fiscal 2025 as on August 2024, Source: MNRE, CRISIL MI&A-Consulting

Commissioning activity has been concentrated in the key states of Rajasthan, Gujarat, and Tamil Nadu, which accounted for two-third of total capacity added in Fiscal 2023. In the previous Fiscal as well, the installation trend was driven by the same states.

Over the past five years, the average annual CUFs of solar capacities have seen improvements, mainly driven by technological advancements, DC over-loading, improvement in inverter efficiencies for solar, better tracking and weather forecasting technologies as well as improvement in O&M practices to reduce downtime.

### PLF Trends for Solar power projects

\*Fiscal 2025 data as on July 2024; Source: CEA; CRISIL Analysis

The National Institute of Solar Energy estimated the country's solar potential at 748 GW, assuming solar PV modules cover 3% of the geographical surface. India is a perfect location for solar energy because of its location. It has 300 days of sunshine each year, with daily peak electricity use being in the evenings and a seasonal peak in the summer.

The daily average Global Horizontal Irradiance ("GHI") in India is around 5 kWh/m<sup>2</sup> in north-eastern and hilly areas to about 7 kWh/m<sup>2</sup> in western region and cold desert areas. The annual GHI varies from 1600 to 2200 kWh/m<sup>2</sup>. States like Gujarat, Rajasthan, Madhya Pradesh, Andhra Pradesh, Karnataka, Tamil Nadu offers more solar irradiance as compared to other parts of India which makes them desirable for installing solar projects.

Further, during the summer months India experiences southwest monsoon winds and northeast monsoons during the winters. The Indian summer monsoon typically lasts from June-September in large areas of western and central India, whereas certain regions in South India gets rain during winter months due to northeast monsoon. Consequently, the solar projects located in Southern part of India may get affected during October-December. Additionally, unseasonal rainfall also impacts solar generation adversely.

## Growth drivers for Solar sector in India

### Growth drivers for solar sector in India

Source: CRISIL MI&A-Consulting

Each growth driver for solar energy in India is detailed below:

#### ***Declining module prices and tariffs***

The global average solar module price, which constitutes 55% to 60% of the total system cost, crashed 73% to U.S.\$0.47 per watt-peak in 2016 (average for January-December) from U.S.\$1.78 per watt-peak in 2010. In fact, prices continued to decline to U.S.\$0.22 per watt-peak by end-August 2019, owing to technology improvement, scale benefits and a demand-supply gap in the global solar module manufacturing industry. Further, declining inverter prices (6% to 7% of the capital cost), which fell to U.S.\$0.2 per watt-peak by March 2020 (which has now been reduced to U.S.\$0.016-0.018 per Wp), reduced system costs. Module prices reached U.S.\$0.22 per watt-peak level in Fiscal 2021.

Module prices started to fall in 2023 owing to the ramp-up in the production of upstream components. Prices of modules fell to U.S.\$0.15-0.20 per watt-peak in April-November 2023 from U.S.\$0.23 per watt-peak in January 2023. This has eased some pressure on capital costs in Fiscal 2024. Global solar module prices have reached a historic low, standing at just U.S.\$0.09 per watt-peak in June 2024, which is expected to stimulate growth in solar power capacity. Prices are expected to remain stable over the medium term due to supply glut and relatively weak demand internationally. In line with this trend domestic prices too fell to U.S.\$0.14 per watt-peak maintaining a steady premium over landed cost of imported modules.

### Module prices declined over 200% from Fiscal 2015 to Fiscal 2024 (USD/Wp)

### Safeguard and customs duty trajectory

| Year of imposition | July 30, 2018, to July 29, 2019 | July 30, 2019, to January 29, 2020 | January 30, 2020, to July 29, 2020 | July 30, 2020, to January 29, 2021 | January 30, 2021, to July 29, 2021 | From April 1, 2022 (BCD)   |
|--------------------|---------------------------------|------------------------------------|------------------------------------|------------------------------------|------------------------------------|----------------------------|
| Duty rate          | 25%                             | 20%                                | 15%                                | 14.9%                              | 14.5%                              | Module – 40%<br>Cell – 25% |

Source: CRISIL MI&A-Consulting

Various players from the Indian solar component manufacturing industry filed additional duty petitions against imports. The key in this regard was a safeguard duty investigation filed by the Indian Solar Manufacturer's Association ("ISMA") to the Directorate General of Trade Remedies ("DGTR").

After initiating a probe to decide on the continuation of the safeguard duty ("SGD") on solar import and further to applications invited from domestic companies for the same, DGTR extended the imposition of the safeguard duty for another year, with the duty being levied at 14.9% from July 30, 2020, to January 29, 2021, followed by 14.5% from January 30, 2021, to July 29, 2021. Declining duty had led to easing cost pressures, and tariffs had also started lowering. The Ministry of Finance imposed BCD of 25% and 40% on solar cells and modules, respectively, effective April 1, 2022. The imposition of BCD led to an increase in capital costs for projects based on imported modules by 20-25%, and an increase in tariffs by ₹ 0.2-0.5/kWh (with the tariffs ranging from ₹ 2.6-2.8/kWh).

### Fiscal and regulatory incentives

The Indian government has been offering a variety of incentives to encourage the development of solar power plants.

**PM Surya Ghar Muft Bijli Yojna:** For further sustainable development and people's well-being, the Central Government in February 2024 launched the PM Surya Ghar: Muft Bijli Yojna. This scheme has a proposed outlay of ₹ 75,000 crore and aims to light up 1 crore households by providing up to 300 units of free electricity every month.

### Subsidy for residential households

- ₹ 30,000/- per kW up to 2 kW
- ₹ 18,000/- per kW for additional capacity up to 3 kW
- Total Subsidy for systems larger than 3 kW capped at ₹ 78,000

The MNRE on February 20, 2024, has declared that only applications received after February 13, 2024, will be considered for CFA under PM Surya Ghar Muft Bijli Yojana. Further, it was also clarified that this a whole new scheme and all previous schemes have been lapsed.

There was a similar scheme in place for encouraging solar rooftop installations. However, due to lack of awareness and clarity on savings, higher capital cost, delay in subsidy reimbursements, approvals and bureaucracy, subsidized tariff for lower slabs of electricity consumption, the scheme did not see the success as expected. Lower residential tariffs and higher investments may hinder the progress of the scheme. Further, Central Public Sector Undertakings (“CPSUs”) have been entrusted the residential solar installation under the scheme. The Central government introduced the CPSU scheme Phase I in 2015 to promote the set-up of 1,000 MW grid-connected solar PV power projects by CPSUs and government organisations with Viability Gap Funding (“VGF”). Further, the Central Government in March 2019, approved implementation of CPSU Scheme Phase-II for setting up grid-connected Solar PV Power Projects by Central and State PSUs, Government Organisations, with VGF support of ₹ 8,580 crore, for self-use or use by Government/ Government entities, either directly or through Distribution Companies (“DISCOMS”). The maximum permissible VGF was initially two tranches and was kept at ₹ 0.70 Cr/MW which was subsequently reduced to ₹ 0.55 Cr/MW for third tranche. Under this Scheme, the Government has so far sanctioned about 8.2 GW capacity of solar PV power plants to various entities. Ability of CPSUs to execute the scheme at ground level and consumer awareness will play key roles in success of the Scheme.

### **Annual Bidding Trajectory:**

MNRE has prescribed an annual bidding trajectory for RE power bids to be issued by Renewable Energy Implementation Agencies (“REIAs”). Bids for 50 GW per annum RE capacity, with at least 10 GW per annum Wind power capacity, are to be issued each year from 2023-24 to 2027-28. This is expected to help in achieving the targets specified for 2030. Bids of 35.51 GW have been issued by four REIAs (“SECI”, “NTPC”, “NHPC” & “SJVN”) in Fiscal 2024 till December 2023.

The GoI has laid significant emphasis on climate change, for which it provided a framework, NAPCC, in 2008, where it proposed an eight-pronged strategy — NSM, energy efficiency, sustainable habitat, water planning, Himalayan ecosystem, afforestation, sustainable agriculture, and strategic knowledge on climate change. As can be seen, the GoI has laid significant emphasis on solar power. This is also evident from the 100 GW out of 175 GW target set out by the GoI. Government support to the solar sector in India is reflected by the following:

### **National Solar Mission**

Central-level allocations under NVVN Batch II, JNNSM Phase II Batch III and IV have been almost entirely commissioned.

### **Operational support to execute solar projects**

Apart from providing incentives, the government has lent significant support to the solar power sector for execution of projects.

**Solar parks and ultra mega solar power projects:** One of the most important initiatives by the GoI has been setting up of solar parks in the country. To overcome the land and transmission related challenges, the scheme for “Development of Solar Parks and Ultra-Mega Solar Power Projects” was rolled out in December 2014 with an objective to facilitate the solar project developers to set up projects expeditiously.

This is critical given the land-intensive nature (approximately 5 acres required per MW of solar PV) of solar projects, coupled with low average holding (1.16 hectare) per person in India. Under the Solar Park Policy released in September 2014, the government planned to prepare land banks for 20,000 MW of solar projects across 25 states (including Andhra Pradesh, Madhya Pradesh, Gujarat, Rajasthan, Uttar Pradesh, Karnataka, Telangana, West Bengal, Chhattisgarh, Tamil Nadu, Jammu and Kashmir, and a few north-eastern states). These states have started preparing land banks for solar parks, either through their own implementing agencies or through joint ventures with SECI.

The capacity of the scheme was doubled from 20,000 MW to 40,000 MW on March 2017, to set up at least 50 solar parks by Fiscal 2022. Such parks significantly reduce construction/ execution risk as they include a contiguous parcel of land, evacuation infrastructure (HV/EHV substation evacuating to state grid substation), and other ancillary infrastructure and utilities such as road, water, and drainage.

As per the available information on CEA, 50 Nos. Solar Parks / UMREPPs of aggregate capacity of 39,785 MW have been envisaged for development in the country as of June 2024. Out of 39,785 MW, 22,489 MW is awarded (Of these, the capacity of 11,416 MW has already been commissioned while 11,073 MW capacity is under construction) and 17,296 MW is under award/tendering process.

### State wise solar park capacity (GW) as of June 2024

| Sr. No. | Name of the State in which Solar Parks/UMREPPs are located | Total Capacity of Solar Park/UMREPP (MW) | Capacity Under Award / Tendering (MW) | Capacity Awarded (MW) | Capacity Under construction (MW) | Capacity Commissioned (MW) |
|---------|------------------------------------------------------------|------------------------------------------|---------------------------------------|-----------------------|----------------------------------|----------------------------|
| 1       | Andhra Pradesh                                             | 4,200                                    | 1,150                                 | 3,050                 | 0                                | 3,050                      |
| 2       | Chhattisgarh                                               | 100                                      | 0                                     | 100                   | 0                                | 100                        |
| 3       | Gujarat                                                    | 12,150                                   | 2,770                                 | 9,380                 | 8,405                            | 975                        |
| 4       | Himachal Pradesh                                           | 53                                       | 53                                    | 0                     | 0                                | 0                          |
| 5       | Jharkhand                                                  | 1,089                                    | 859                                   | 230                   | 230                              | 0                          |
| 6       | Karnataka                                                  | 2,500                                    | 500                                   | 2,000                 | 0                                | 2,000                      |
| 7       | Kerala                                                     | 155                                      | 50                                    | 105                   | 5                                | 100                        |

### Other Policy/Regulatory initiatives

- Implementation of Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022
- The MoP, in August 2020, waived the ISTS charges and losses on all solar and wind projects commissioned before June 30, 2023. In June 2021, the waiver was extended up to June 30, 2025. However, this time, only the ISTS charges were waived off, and losses remained applicable. Waivers are available for projects commissioned by June 30, 2025. However, post June 2025, an annual increase of 25% in the ISTS charges will be applicable for solar, wind, hydro PSP, and BESS sources, resulting in the applicability of 100% of ISTS charges from July 2028. Subsequently, in February 2023, it was clarified that green hydrogen and green ammonia projects would get a waiver of ISTS charges for 25 years if the projects are commissioned before June 30, 2025.

The MoP further decided to extend the waiver of ISTS charges on the transmission of power from new hydro power projects, for which, construction work is awarded and PPAs are signed on or before June 30, 2025.

Captive power projects are exempt from paying cross subsidy surcharge (“CSS”), as per Section 42(2) of the Electricity Act 2003. The Supreme Court, in its judgement dated December 10, 2021, ruled that captive power consumers are not liable to pay an additional surcharge under Section 42 (4) of the Electricity Act, 2003.

Although the potential of solar energy is high, there exist a few challenges, which are critical to achieving rapid growth of solar power.

**Availability of contiguous parcels of land** — With rapid capacity additions and stiff competition, it becomes imperative for developers to acquire land at competitive costs and in areas with high levels of solar irradiance. The 40 GW solar park scheme is facilitative in this aspect; however, beyond that capital costs and, hence, tariffs do fluctuate state to state depending on land prices and irradiance quality.

**Adequacy of evacuation infrastructure** — Grid integration of renewables is key to the growth of the sector. Instances of delay in readiness of transmission infrastructure at solar parks have caused concern amongst developers. However, an aggressive roadmap to add an incremental approximately 100 GW via new schemes and existing available capacity to the grid should be adequate for the expected additions. However, timely execution is critical.

**Availability of low-cost capital** — With the emergence of several large players in the sector, scale and experience have aided fundraising to an extent, especially with the backing of several foreign investors. However, a weak rupee, conservative risk appetite of lenders (especially for weaker counterparties and part merchant power capacities) and policy flip-flops make it imperative for developers to maintain prudent capital management to

sustain over the long term. To mitigate this, developers have been tapping alternative/ new routes such as Infrastructure Trusts, Green bonds etc. to raise financing from time to time.

### ***Favourable technology***

Solar power is becoming increasingly attractive due falling module prices and improving efficiency resulting from excess manufacturing capacity in China and technology advancements respectively.

On the project development front, developers are exhibiting heightened preference for bifacial modules that typically have higher efficiency relative to mono-facial modules and are compatible with tracker technology. In 2023, the share of bifacial variant in module imports increased from 8% in the first quarter of 2022 to 40% in the first quarter of 2024. On the other hand, multi-crystalline modules are being phased out due to lower efficiency and higher degradation rate – share of import volume was negligible in 2023.

The share of monocrystalline technology is now about 84% (compared with 66% in 2019) of total crystalline silicon (“c-Si”) production. The performance ratio has also been improved in the 80-90% range. The c-Si segment is expected to grow substantially due to c-Si’s long life and light weight.

**Historic module imports, MW**

Source: Ministry of Commerce, Industry, CRISIL MI&A Consulting

Currently, the solar PV market is dominated by monocrystalline silicon technology. Within monocrystalline technology, Mono PERC is an advanced version that employs dielectric passivation film on the rear surface of the cells which increases the efficiency levels. These cells are currently leading the market due to higher efficiency, cover less space, higher output in low light conditions and are available at competitive pricing. However, ongoing technology innovation in manufacturing processes is crucial to reduce material intensity, especially for critical minerals like silver and copper. These efforts aim to minimize vulnerabilities in the supply chain.

In addition to process improvements, the development of new solar cell designs is essential for achieving further efficiency gains while simultaneously reducing material intensity and manufacturing costs. The p-type to n-type migration is currently underway and paving the way for new technologies – by end of 2023, n-type technologies including TOPCon, heterojunction (“HJT”) and back contact represented 42% of China’s total module manufacturing capacity (7% in 2022). These designs hold the potential for achieving additional efficiency gains in solar panels. Based on pilot tests conducted by leading global manufacturers, it is estimated that the TOPCon cell could provide an additional efficiency gain of up to 2% to 2.5% gain over mono PERC modules. While TOPCon is expected to be the dominant n-type technology over next couple of years due to its lower cost over other new technologies, higher efficiency, and lower temperature sensitivity of HJT modules make it a better alternative to TOPCon modules in select locations. Additionally, China market share of HJT modules is expected to increase from an estimated 2% in 2023 to around 16% in 2027 due to decreasing production cost differential with TOPCon technology.

In addition, there are ongoing considerations for mass manufacturing of multilayer and tandem silicon-perovskite or silicon-CdTe hybrid solar panels. These innovative solutions have the potential to significantly increase cell efficiency, surpassing the 30% mark, while maintaining competitive production costs and promise to make solar power an even more compelling and sustainable energy solution in the years to come.

### Cell efficiency comparison

Source: NREL, CRISIL MI&A Consulting

### Review of competitive bidding

For solar projects over 2009 to 2013, most states signed PPAs at FiTs determined by the state commission on the fixed regulated equity return of approximately 16%. While for wind energy projects, states followed the FiT mechanism till March 2017. However, from Fiscal 2018, the sector veered towards competitive bidding.

### Positive changes to bidding guidelines undertaken to support bidder interest

Source: MNRE, CRISIL Consulting

Overall, the above amendments are a positive for the developers as these amendments grant extension in SCOD for events that have been hampering commissioning, stipulate some form of state government guarantee and ease liquidity in the sector by way of introducing alternative payment security mechanisms, provide positive boost to the open access market and simplify procedures or provide provisions to stimulate bidder interest. However, the sector requires consistent positive regulatory support to spur capacity additions, despite a healthy pipeline.

### Bid tariffs quoted over Fiscal 2022 to August 2024

| Sr. No. | Bidding scheme/Tender | Month of bidding | Lowest tariffs discovered (₹/unit) |
|---------|-----------------------|------------------|------------------------------------|
| 1.      | 500 MW MSDCL          | September 2022   | 2.82                               |
| 2.      | 750 MW GUVNL          | September 2022   | 2.49                               |
| 3.      | 750* MW RUMS          | September 2022   | 3.03                               |

Source: Industry, CRISIL MI&A-Consulting

After registering the lowest tariff of ₹ 1.99/kWh in December 2020, the solar tariffs have bounced back and witnessed more than 25% increase. This increase can be attributed to increased project cost, implementation of BCD, requirement of ALMM and domestic content requirement as well as regulatory and policy risks. CRISIL MI&A Consulting believes that tariff of ₹ 2.5 to 2.6/kWh will be required for a 12% to 14% equity IRR owing to a sharp decline in module prices on year in Fiscal 2025, despite rising BoS cost.

### Tariffs to remain flat in Fiscal 2025 owing to fall in upstream component prices

Note: The above tariffs are for ground mounted solar only; Source: Industry, CRISIL MI&A Consulting

### New business models warrant higher tariffs

With a large quantum of the pipeline already in place for solar/ wind only projects, nodal authorities are now resorting to issue tenders, which improve the quality of power supplied to off-takers. Some key changes were made to tender structures with respect to the generation profile available from RE plant and the ability to match demand requirements of the off-taker.

Three new tender structures have been issued so far to solve the above aspects – assured peak power supply (“PPS”), RTC, and the relatively newer FDRE. A key feature across these tenders is the increase in the quantum of generation, which was required to be supplied and the PPS tender for stipulating the power to be provided during peak hours. The PPS tender also mandated the use of storage, as that would be essential to supply power during peak hours. The government agencies have released FDRE tenders of over 14 GW in Fiscal 2024 and the first quarter of Fiscal 2025 cumulatively.

**Wind-Solar Hybrid Projects:** In May 2018, the MoP issued the Wind-Solar Hybrid policy with an objective to provide a framework for promotion of large grid connected wind-solar PV hybrid system for optimal and efficient utilization of transmission infrastructure and land, reducing the variability in renewable power generation and achieving better grid stability. The Policy also aimed to encourage new technologies, methods and way-outs involving combined operation of wind and solar PV plants. Hybrid projects typically provide higher CUF than standalone solar or wind projects. This is due to the fact that the wind projects operate optimally during morning and night and thus complement solar projects which peak during daytime

As per the revised bidding guidelines, the rated power capacity of one resource (wind or solar) in such projects should be at least 33% of the total contracted capacity. The guidelines also allowed the setting up of the solar and wind projects at the same or different locations. To meet the energy obligations under the power purchase agreements, developers generally install higher renewable energy capacity than the contracted capacity under the Hybrid Scheme.

**Firm and dispatchable renewable energy projects:** In June 2023, the MoP issues guidelines for procurement of firm and dispatchable power from grid connected renewable energy projects with energy storage systems. The guidelines explained the term ‘firm and dispatchable power’ as the power profile configuration that is defined in the request for selection that is sought to be met by RE power sources and will include configurations like assured peak power, Round-the-Clock RE with firm delivery of power at rated capacity at any hour of the day as per demand or load following power delivery as specified by DISCOM, RE projects with firm delivery of power for fixed hours of requirement by DISCOMs etc.

The guidelines also broadened the renewable energy to include solar power generating systems, wind power generating systems, wind solar hybrid; or any other renewable energy resource based generating system or a combination thereof, with energy storage system. Energy from solar and wind projects is intermittent and infirm in nature resulting in lower capacity utilization. However, FDRE addresses these challenges by providing following solutions.

- Firm power supply as per demand given by utilities; and
- Higher capacity utilization factor

Under FDRE, the project developer is required to supply RE power in a Firm and Dispatchable manner, matching the demand profile(s) provided by the Buying Entity. To provide firm power, developers are required to install

mandatory energy storage system (either battery energy storage system or pumped hydro storage system) which are charged through renewable energy and discharged as per power requirement of buying entities. Further, To meet the energy obligations under the power purchase agreements developers generally install higher renewable energy capacity than the contracted capacity.

Modelling the above three tender structures with assumptions, coupled with industry interactions, we believe that the higher generation quantum mandated by these newer tenders could either be met using storage components or scaling up the plant capacity, i.e., setting up the plant of capacity larger than its rated capacity.

This has resulted in the expected tariff ranges required to maintain the equity IRRs of 12% to 14%, which are currently seen in regular tenders, to be higher than the norm of ₹ 2.5 to ₹ 2.6 per unit, approaching the range of ₹ 3 to ₹ 5 per unit. This increase will mainly be driven by higher capital and operating costs resulting from either the inclusion of a storage element or the need for higher capacity. Some moderation was observed only in the RTC tender, where the stipulated escalation in tariff will lead to higher tariffs.

#### Higher tariff range at ₹3-5 /kWh to maintain returns similar to regular trend

|                                | Plain hybrid    | FDRE                                               | Round the clock                                       | Peak power supply         |
|--------------------------------|-----------------|----------------------------------------------------|-------------------------------------------------------|---------------------------|
| Weighted average tariff        | Rs 3.05/unit    | Rs 4.59/unit                                       | Rs 4.21/unit                                          | Rs 4.70/unit              |

| Key player participation       | Many developers | Acme, Juniper, Tata, ReNew, O2, Hero and 9 players | NTPC, Ayana, Shell, Torrent, O2, ReNew, Acme and Tata | Hero, ReNew, Acme and Amp |

Note: Weighted average is calculated across all projects allocated under respective models till the first quarter of Fiscal 25.

Source: CRISIL MI&A-Consulting

So far, all these tender models have seen successful allocations, with FDRE at 4168 MW and the RTC at 1710 MW driven by central entities. In the third type of tender, bundled, thermal energy can be sourced either from existing plants or from a new setup, each with its own set of challenges. While in existing plants, power may already be tied up, funding would be a key hurdle if power is sourced from a stranded asset or a new setup.

The lowest tariff discovered in the FDRE tender is ₹ 4.38/kWh which is lower than that of many thermal plants and in fact below the APPC of many of the state utilities. The bid tariffs in the FDRE tenders are impacted by the tender conditions such as high availability requirement, supplying power during specific hours of the day, demand fulfilment ratio, etc. Hence, tenders with different conditions and complexities result in different tariffs. However, most of the good resource locations are already taken up for project development and limited availability of good resource locations may put upward pressure on tariffs. FDRE bids of total capacity of around 8.25 GW were auctioned in India during Fiscal 2024. Acme, ReNew, Juniper, Avaada, Tata, Hero are some of the leading players in such FDRE tenders.

#### Outlook on Solar capacity additions in India

Solar sector growth in India primarily spurred by robust government backing, demonstrated through an aggressive tendering strategy. Some of the key catalysts include technological advancements, affordable financing, supportive policies, thrust on go-green initiatives/sustainability targets, cost optimisation due to increased grid electricity tariffs, subsidy initiative (specially in rooftop solar) and various incentives such as ISTS charge waiver.

CRISIL MI&A-Consulting expects 137 to 142 GW of solar capacity additions over Fiscal 2025 to Fiscal 2029. This will be driven by additions under:

- **NSM:** The entire NSM Phase II Batch II Tranche I of 3,000 MW has been commissioned. Under NSM Phase II, Batch III, and Batch IV, SECI through its state specific VGF has tendered out approximately 7 GW of capacities, most of which has been completed.
- **Other central schemes:** SECI has also started tendering projects outside the JNNSM Batch programme. It has initiated the ISTS scheme, wherein projects are planned for connection with the ISTS grid directly. Under this, SECI has already tendered and allocated more than 35 GW (including hybrid).
- **State solar policies:** approximately 24 GW of projects are under construction and are expected to be commissioned over the Fiscal 2025 to Fiscal 2029. Based on tendered capacities by states at the end of

June 2024, a further approximately 24 GW capacity of solar projects is expected to be up for bidding over the same duration.

- **PSUs:** The CPSU programme under JNNSM has been extended to 12 GW in February 2019. The government is also encouraging cash-rich PSUs to set up renewable energy projects. NTPC has already commissioned a total of over approximately 2,120 MW of capacities, allocated approximately 5 GW, and tendered a further approximately 1 GW, under various schemes. It has a target of installing approximately 35 GW of renewable energy capacities by Fiscal 2028. Similarly, NHPC had allocated 2 GW of projects in 2020, while the Indian Railways has committed to 20 GW of solar power by 2030. Other PSUs such as NLC, defence organizations, and governmental establishments are also expected to contribute to this addition.
- **Rooftop solar projects:** CRISIL MI&A-Consulting expects 20 to 22 GW of rooftop solar projects (under the capex and opex mode) to be commissioned by Fiscal 2029, led by PM Surya Ghar Yojana and industrial and commercial consumers under net/gross metering schemes of various states.
- **Open-access solar projects:** CRISIL MI&A-Consulting expects 13 to 15 GW of open-access solar projects (under the capex and opex mode) to be commissioned by Fiscal 2029, led by green energy open access rules 2022, sustainability initiatives/RE 100 targets of the corporate consumers, better tariff structures and policies of states such as Uttar Pradesh and Karnataka, which are more long term in nature.
- Data centers also emerging as an attractive infrastructure asset class in India. The Data Centers primarily focus on an optimisation of grid energy and renewable energy due to the nature of energy requirements (continuous/uninterrupted supply) and about 40% to 50% of operating expenses come from electricity consumption. Due to rising demand for data, the energy requirement for data centers is expected to increase to approximately 1500 to 1700 MW in 2026 from an estimated 700 to 750 MW in 2023.
- **Push for Green hydrogen:** Production for green hydrogen is expected to start from Fiscal 2026 with expected production of 0.5-1 million tonnes of production which will see solar capacities coming from Fiscal 2024. As the government pushes towards the target production of 5 million tonnes of green hydrogen by 2030 more solar capacities are expected to commission totaling 34 to 38 GW by Fiscal 2029 to cater to the demand of producing 2 to 2.5 million tonnes of green hydrogen. However, since developers may tie-up via grid / open access and not go to the captive route generation under this segment will remain a monitorable.

#### Year wise expected solar capacity addition

Source: CRISIL MI&A-Consulting

Also, the global conglomerate such as Amazon, Microsoft has set their sustainability goals and procuring more and more renewable energy in India to set off their global GHG emission. This also provides a lucrative opportunity for IPPs to sign PPAs for RE capacity.

The European Unions' ("EU") Carbon Border Adjustment Mechanism ("CBAM") is the EU's tool to put a fair price on the carbon emitted during the production of carbon intensive goods that are entering the EU, and to encourage cleaner industrial production in non-EU countries. The CBAM is expected to have a significant impact on solar capacity additions in non-EU countries. With increasing adoption of solar energy, CBAM is expected to contribute to overall growth of the market. The CBAM is expected to drive the renewable energy demand for

energy intensive industries who export their products in European markets in order to follow their norms regarding carbon emission and avoid imposition of penalties for non-adherence to such rules & regulations.

CRISIL MI&A-Consulting's outlook factors in the prevailing market dynamics, where regulatory/policy support is key. The renewable energy domain is highly dependent on policy support, and any uncertainty surrounding this could restrict capacity additions.

### **Outlook on domestic Solar module manufacturing capacity additions**

The nameplate module manufacturing capacity in India is expected to grow 50% to 55% in Fiscal 2025 on year to reach 84 to 88 GW from 63 GW in Fiscal 2024. The increased technological progressive module capacity (500 Wp and above) will provide comfort to the increasing average solar demand of 38 to 42 GW per annum till Fiscal 2029. Further, capacity across the supply chain is expected to witness commissioning from Fiscal 2025 to meet PLI scheme timelines. Nearly 18 to 22 GW of cells, 2 to 5 GW of wafers are also expected to become operational in Fiscal 2025 reducing need for imports. Overall, the domestic manufacturing nameplate module capacity is expected to touch 125 GW by Fiscal 2029, with 25% being backward integrated till the polysilicon stage. Increased domestic module manufacturing capacity is expected to provide a boost to capacity additions, comfort in module prices, decline in import reliance and ease in supply related challenges. However, utilisation of the installed capacities will be a key monitorable.

Project developers such as ReNew, Avaada, Adani Green, ACME, AMP Energy etc. have entered into solar module manufacturing business and announced various plans for capacity addition. Modules being the most expensive component, such backward integration is expected to provide better cost control to project developers and manage the supply chain related issues with an all-year-round module supply.

The price of domestic make modules is marginally lower in Fiscal 2024 at U.S.\$0.26 per watt-peak compared to U.S.\$0.27 per watt-peak of international modules owing to steeper fall in cell prices. While the module prices are expected to fall 35 to 40% on year in Fiscal 2025, the prices in the fourth quarter of Fiscal 2024 of U.S.\$0.20 per watt-peak and U.S.\$0.21 per watt-peak of international and domestic modules, respectively, are believed to have bottomed out with limited room for discount left at manufacturing ends. The industry is expected to take cognizance of the situation and limit additions to avoid further bloodbath of prices. Nearly 42 GW of global ingot and wafer and 40 GW of polysilicon plants to be commissioned in Fiscal 2024 and 2025 have been postponed indefinitely. Further, approximately 20 GW of global cell manufacturing expected to commission in Fiscal 2024 to Fiscal 2025 has been cancelled. Additionally, MNRE has reinstated the applicability of ALMM. As a result, only ALMM enlisted manufacturers can supply cells and modules to government and government-assisted projects. Projects under open access and rooftop solar by private parties are also brought into the ambit of ALMM. Therefore, the fall in prices across the value chain is expected to be arrested in Fiscal 2025.

Global solar module prices have reached a historic low, standing at just U.S.\$0.09 per watt-peak in June 2024, which is expected to stimulate growth in solar power capacity. Prices are expected to remain stable over the medium term due to supply glut and relatively weak demand internationally. In line with this trend domestic prices too fell to U.S.\$0.14 per watt-peak maintaining a steady premium over landed cost of imported modules.

### **Project capex and O&M cost movements**

Solar project CAPEX trend has largely followed global module price trends – between 2011 and 2021, EPC cost for utility-scale projects reduced by around 65% to approximately ₹ 39 million/MWp due to falling module prices. While landed module cost increased temporarily in the second quarter of 2022 due imposition of BCD on China modules, over the second half of 2022 and 2023, led by a massive supply glut in China, prices across the solar value chain declined sharply – China module prices decreased by around 57% in two-year period ended December 2023 to U.S.\$0.12/Wp. As a result, EPC cost for utility-scale projects declined by around 33% in the two-year period ended December 2023 to ₹ 27 million/ MWp. On the BoS front, while prices of commodities like copper and aluminium (used for building mounting structures and other key components) are volatile, the effect on overall EPC cost is marginal due to low share in CAPEX.

### EPC cost, ₹ million/ MWp

Source: Industry, CRISIL MI&A Consulting

Note: EPC cost for utility scale projects is estimated using imported mono-crystalline modules in a fixed tilt layout and central inverters. EPC cost for rooftop solar systems is estimated for a typical industrial installation on a metal roof.

Global solar module prices have reached a historic low, standing at just U.S.\$0.09 per watt-peak in June 2024, which is expected to stimulate growth in solar power capacity. Prices are expected to remain stable over the medium term due to supply glut and relatively weak demand internationally. In line with this trend domestic prices too fell to U.S.\$ 0.14 per watt-peak maintaining a steady premium over landed cost of imported modules.

On the O&M front, costs have decreased by around 30% in the last 3 to 4 years to around ₹ 0.18-0.25 Mn/MW/annum due to experience gained by service providers coupled with technology adoption including robotic cleaning. Robotic cleaning not only helps in achieving better efficiency but also are more environmentally friendly since they use less water and no chemical cleaners.

### Review of wind sector in India

#### Review of wind capacity additions in India

India has a vast wind energy potential, estimated at 695.5 GW at 120 meters above ground level (“AGL”) as per estimates by the National Institute of Wind Energy.

### India-Wind Energy Potential

Note: Others 18.95 GW; Source: NIWE, MNRE, CRISIL MI&A Consulting

India has the fourth largest installed wind power capacity in the world, with approximately 47 GW as of July 31, 2024. Wind power accounted for nearly 10.5% of India's total installed utility power generation capacity. Wind power capacity is mainly spread across the southern, western, and northwestern states of India. Leading states in wind power installations include Tamil Nadu, Gujarat, Maharashtra, Rajasthan, and Karnataka. Over the last 7 to 8 years, the installed wind power capacity in India has grown at approximately 7% ("CAGR").

### India-Wind power installed capacity.

\*Fiscal 2025 as of August 2024; Source: MNRE, CEA, CRISIL MI&A-Consulting

Fiscal 2024 has witnessed, healthy capacity addition of approximately 3.25 GW whereas Fiscal 2025 witnessed a capacity addition of 1.31 GW in the first 5 months of the Fiscal. In Fiscal 2023, approximately 2.28 GW wind power capacity was installed on the back of commissioning under several schemes that have been pending - SECI Tranche IV, V and VI. The rising trend of hybrid power (solar plus wind) projects coupled with moderation and stabilisation in key commodity prices has also supported growth.

Capacity additions had declined approximately 33% year-on-year in Fiscal 2022, primarily on account of a surge in commodity prices impacting project costs and viability. This was coupled with continued challenges in acquiring sites in key windy regions along with associated connectivity, causing further delays.

The capacity additions in Fiscal 2020 following subdued Fiscals 2019 and 2018 took place after a change in the FiT regime to factor in competitive bidding. The increase in Fiscal 2020 was largely attributed to the commissioning of delayed projects under SECI Tranche I, II, and III, as well as state auctions in Tamil Nadu, Maharashtra, and Gujarat.

### Annual wind capacity additions

GH: Green Hydrogen

Source: MNRE, CEA, CRISIL MI&A-Consulting

That said, the sector continues to face delays on account of execution challenges, grid connectivity issues, regulatory approvals and limited availability of key wind sites and OEM suppliers.

### Key States with leading capacity addition

Wind power capacities have remained concentrated in certain states.

In the five months of Fiscal 2025, Karnataka added 534 MW, Gujarat 441 MW and Tamil Nadu added 327 MW.

In Fiscal 2024, Gujarat added 1,744 MW, Karnataka added 725 MW, Tamil Nadu added 586 MW, and Maharashtra added 195 MW of wind capacity.

In Fiscal 2023, Rajasthan added the highest wind capacity of 867 MW, followed by Gujarat (770 MW), Madhya Pradesh (324 MW), and Karnataka (164 MW).

**State-wise wind capacity additions (MW)**

\*Fiscal 2025 as of August 2024; Source: MNRE, CEA, CRISIL MI&A-Consulting

### High-wind-density zones to drive wind energy capacity additions

The top five states (Gujarat, Tamil Nadu, Karnataka, Rajasthan, Maharashtra) make up approximately 85% of the installed wind capacity (as of 31 August 2024), with some regions within these states accounting for most wind power projects. Since April 2021 (till August 2024), approximately 85% the new capacity additions have happened in 3 states – Gujarat, Tamil Nadu, and Karnataka.

Gujarat, with the highest installed wind capacity of 12,163 MW, sees concentration of projects in or near the Rann of Kutch region, apart from coastal sites and select locations of Jamnagar, Porbandar, Morbi and Bhavnagar. Similarly, for Tamil Nadu with an installed wind base of 10,930 MW, most projects are located in districts of Tirunelveli, Nilgiris, Erode, Tuticorin, Coimbatore and Tiruppur. Likewise, for Karnataka (6,554 MW), Chitradurga, Bellary, Davengere and Tumkur, for Rajasthan (5,196 MW), Barmer and Jaisalmer; and for Andhra Pradesh (4,097 MW), Ananthapur, Nellore and Kurnool are the key regions where projects are concentrated.

### PLF trends of operational projects

The Plant Load Factor (“**PLF**”) of operational wind projects in India has seen fluctuations over the past few years. PLF is a project/site specific variable, which primarily depends on available wind speed, turbine capacity (power curve) and hub height. Auxiliary consumption, transmission availability, curtailment, and down time due to O&M issues can impact the overall PLF of wind project. In India, the overall low PLF can be attributed to low-capacity wind turbines (25 GW, <2 MW turbine) in Class-1 wind sites, inadequate maintenance, low hub-heights of 80 to 100 meters as well as adverse changes in wind patterns.

### PLF of wind projects in India over Fiscal 2018 to Fiscal 2024

Fiscal 2025\*: As of July 31, 2024, Source: MNRE, CEA, CRISIL MI&A-Consulting

### Review of competitive bidding

The weighted average discovered tariffs for allocated capacity of competitively bid projects for Fiscal 24 is ₹ 3.4/kWh as against ₹ 3.1 to 3.3/kWh tariff required for earning 10% to 13% equity IRRS. The weighted average tariff of allocations in Fiscal 2023, have averaged at ₹ 3.0/kWh, providing an indication that developers are factoring in increased commodity costs and other execution related risks. The recent SECI auction held in July 2024 witnessed the highest tariff of ₹ 3.70 per unit in Tranche-XVI, while the latest auction held by state agency was GUVNL Phase VI saw weighted average tariff of ₹ 3.43 per unit.

CRISIL MI&A-Consulting believes projects were aggressively bid even when availability of developed land banks (availability of wind micro siting data and proximity to the transmission) with high wind density sites were not tied up prior or finalised before bidding. This has caused execution challenges for several projects in the sector; for instance, the SECI ISTS-III projects were previously not able to acquire required wind sites in the preferred region of Gujarat. Removal of the tariff cap in March 2020 provided an opportunity to developers to factor in the added execution challenges, leading to higher bid tariffs in successive auctions. Removal of e-reverse auction process also boosted bidder interest and activity in the wind sector. The move was to provide a mechanism to provide cost reflective tariffs for the segment, boosting viability for the segment.

The Ministry has indicated that it is willing to bring back reverse auction bidding for wind capacity allocation. Currently, wind capacity is auctioned based on single stage, two envelope closed bidding process. The bidding method is being reviewed in view of undersubscription and higher tariff discovery in recent wind bids. CRISIL MI&A-Consulting expects the tariff to remain nearer to ₹ 3.4 to 3.6/kWh for sustainability of the projects.

### Tariffs discovered in competitive bidding in last 3 to 4 years

| Sr No | Bidding scheme                                                  | Month of bidding | Winning tariffs discovered (₹ /unit) |         | Capacity (MW) |          | Sector  |

#Hybrid, WSH: Wind Solar Hybrid

Source: Industry, CRISIL MI&A-Consulting

CRISIL MI&A-Consulting believes sub-₹ 3.40/kWh projects are viable only at high PLFs, above 32%, which is provided by improved technology, and hub heights situated in Type I wind sites or good quality type II sites. The lower availability of type I wind sites in preferred locations and congested transmission infrastructure may force developers to move to lower quality wind sites, which have a lower PLF range sub 30%.

### Outlook for capacity additions in next 5 years

CRISIL MI&A-Consulting expects capacity additions to grow over the next five years led by pipeline build-up under existing schemes and new tendering schemes, improvement in technology, thrust on green hydrogen, renewable generation obligation and mixed resource models (RTC, hybrid, FDRE etc.). However, incremental challenges pertaining to wind-site/land availability, grid connectivity, and viability at low tariffs due to elevated capital cost pose challenges for the sector.

Led by India's ambitious clean energy targets declared under NDC, focus on clean segments such as wind is expected to continue coupled with a healthy pipeline existing in the segment. The government policy to tender 10 GW wind capacity annually till Fiscal 2028 will further boost the capacity additions. The Central Government is also contemplating for renewable generation obligation ("RGO") mandating thermal power generators to generate certain % of their additional capacity from renewable energy. Capacity additions over the long term will also be driven by increased hybrid tenders, storage, and new business model-based tenders. Central government allocations under relatively strong off-takers such as SECI and PTC, reduces risk and would support developer interest. State allocation, on the other hand, has slowed as several states have instead signed power sale agreements ("PSAs") with PTC and SECI for procurement of wind power to help fulfil their non-renewable purchase obligation targets.

Considering above, CRISIL MI&A-Consulting expects wind power capacity additions to remain at approximately 32 to 34 GW over Fiscals 2024 to 2029, higher than the approximately 12 GW seen over Fiscals 2019 to 2024.

### Expected annual wind power capacity additions

Source: CRISIL MI&A-Consulting

### Key factors to drive wind energy capacity additions

#### New tender opportunities

New opportunities have emerged in the wind sector in India with SECI tendering projects including hybrid, round-the-clock, peak power supply and FDRE projects.

Although the exact split of wind vs solar for hybrid projects is based on developer choice and technical design, they tend to have a higher share of solar energy, due to lower capital costs and ease of installation. However, since hybrid projects have a floor cap on capacity contribution from solar and wind (power capacity of one resource is at least 33% of the rated power capacity of the other resource), they contribute to capacity additions for wind. Similarly, round-the-clock, peak power supply and FDRE projects also generate substantial demand for wind capacity addition as developers require a good mix of sources (solar, wind and/or energy storage) to get the maximum possible efficiency. With the rising trend of such tenders, wind power additions will further increase gradually over the long term.

#### Improved technology

Newer wind turbines are being launched that have higher rated capacity and higher hub height (120m to 140 m), which can be set up at low-quality wind sites, otherwise considered economically unattractive. However, plant load factors and subsequent viability would vary. Technological advancements have allowed players to set up windmills in states/sites with lower wind density. Based on our estimates, for every 100-bps change in PLFs, equity IRRs improve by 100-150 bps. As per industry interactions, increased capital costs factor-in the improvement in turbine technology, and 3.5 MW and above wind turbine technology have already started installations. Innovations in blade technology with lower weight which allows for building longer blades with lower mass. These improvements in technology will enable lower levelised cost and capacity additions outside the windy region, thereby driving capacity additions.

#### Large-scale central allocations

Post competitive bidding of 1 GW by SECI in February 2017, SECI has further actively tied PPA capacity of approximately 12 GW over March 2017-June 2024 through wind only schemes. MNRE has outlined further plans to tender 10 GW of capacity each year by RE Implementing Agencies (like SECI, NTPC, NHPC, SJVN). This bodes well as central sector PPAs have lower counterparty risk compared with PPAs directly with discoms. The latter are known to delay payments to developers and have poor financial ratings, while SECI and PTC are better rated and provide various payment security mechanisms (LCs, payment security fund and SECI, NTPC, NHPC, SJVN being party to the tripartite agreement).

Major payment security mechanisms to de-risk investment in renewable energy inter- alia include Letter of Credit (“LC”); Payment Security Funds and Tripartite Agreement (“TPA”) between Ministry of Power, RBI and State Government (if applicable). These instruments are invoked in case of delays/default in payment to Renewable Energy Generating Companies and have been further strengthened by the notification of the Late Payment

Surcharge Rules, 2022. Various initiatives such as stringent late payment surcharge rules, mandatory letter of credit by Discoms, regulation of power supply in case of non-maintenance of payment security mechanisms, denial of open access in case of non-payment of dues beyond 75 days from due date etc. have tightened the payment security and brought in the much-required discipline in payments to RE generators by Discoms.

### Competitive auctions (Only Wind) over Fiscals 2023 and 2024

| Fiscal | Capacity allocated (MW) | Wt. Avg. Tariff (₹/kWh) |
|--------|-------------------------|-------------------------|
| 2023   | 3181                    | 3.02                    |
| 2024   | 1844                    | 3.40                    |

Source: CRISIL MI&A-Consulting

### Upward revision in RPO targets

The MoP provided a new RPO long-term trajectory for wind energy till Fiscal 2030 which proposes target of 0.67% for wind in Fiscal 2025, increasing consecutively to 3.48% in Fiscal 2030 for wind.

### Revised Wind RPO trajectory

Source: MoP; CRISIL MI&A-Consulting

Most states in India have set lower RPO targets (pan-India avg. non-solar RPO target in Fiscal 2023 is 8.9% versus 10.50% required as per MoP), resulting in higher compliance vis-à-vis the set targets. To meet the increased targets, states would have to procure more RE either via the REC route (which still leads to capacity additions) or via competitive bid out capacities. Waiver of ISTS charges by CERC for all projects set up until Fiscal 2025 also enables states with low RE potential to procure from more able states. However, RPO compliance is dependent on strict enforcement by regulatory authorities. Amendment to the Electricity Act, 2003 has been proposed to include stricter provisions on penalty for non-compliance; however, this is yet to be passed.

### Accelerated depreciation

Historically, particularly in Fiscals 2015 and 2016, accelerated depreciation (“AD”) had been a key driver for capacity additions. However, going forward, CRISIL expects capacity additions under this mode to be restricted only to large conglomerates in other unrelated business but seeking tax breaks. While AD was halved to 40% from April 2017 onwards, it will continue to support additions in open-access segment.

### High industrial tariffs in select states

In states such as Maharashtra, Karnataka, Tamil Nadu, and West Bengal, where industrial tariffs are high (₹ 6 to 6.5/unit), wind power is an attractive option since generation cost is about ₹ 3.0 to 4.0/kWh. Capacity can be set up via the open-access mode, i.e., bilateral agreements directly with consumers such as commercial/industrial entities.

### Review of Wind Solar Hybrid sector in India

#### Overview of Indian wind solar hybrid (“WSH”) market

WSH is increasingly gaining traction over plain vanilla RE projects in India. Although MNRE has not yet set a generation target, the nascent sector has received strong support from SECI and several state governments. There

are two types of WSH projects — pure-play ones and those with storage. There are also projects that may come up under the government’s RTC power scheme.

India has introduced RTC generation tenders, including hybrid tenders to strengthen clean generation combining solar, wind and storage technologies. The MNRE introduced the National WSH Policy on May 14, 2018. The main objective of the policy is to provide a framework for promoting large grid connected WSH systems and efficient utilisation of transmission infrastructure and land. It also aims to reduce the variability in RE generation and achieve better grid stability. As on June 30, 2024, hybrid projects of aggregate capacity 12,884.35 MW are under construction in the country. It is expected that India will witness 21 to 24 GW of WSH capacity in the next five years (Fiscal 2024 to Fiscal 2029) out of which around 12 to 13 GW will be from wind.

#### Tariff discovered in recent WSH Tenders

| Sr No | Bidding scheme                              | Month of bidding | Winning tariffs discovered (₹ /unit) |         | Capacity (MW) |          | Sector  | Winners                                                                                                                                                       |

@The recent SECI auction held in July 2024 witnessed the highest tariff of ₹ 3.71 per unit in Tranche-XV  
WSH: Wind Solar Hybrid; Source: Industry, CRISIL MI&A-Consulting

FDRE bids of total capacity of around 8.25 GW were auctioned in India during Fiscal 2024. ACME, Renew, Hero Solar, JSW Neo are leading players in FDRE.

### Key growth drivers

- WSH segment in India is experiencing rapid growth, driven by several key factors:
- **Potential:** India has around 696 GW (120 m hub height) wind potential and around 750 GW of solar potential. Currently only around 10% of the potential is developed and balance 90% of the potential yet to be exploited. This provides huge opportunities for wind and solar energy development.
- **Geographical advantages:** India's coastline provides high wind speed as well as excellent solar potential. State such as Gujarat, Maharashtra, Karnataka, Tamil Nadu, Andhra Pradesh have excellent wind as well solar potential. Such an advantage provides a great opportunity for supply of hybrid power. Depending on the project requirements, the hybrid projects can be co-located or located in different locations also making it more flexible even if natural resources are located in different places.
- **Complementary resources:** Wind and solar sources complement each other. Due to their inherent characteristics, they generate power during different times of the day as well as seasons. Therefore, for 24X7 supply, they complement each other and hence WSH projects provide more reliable power and can be used for RTC supply (especially with energy storage).
- **Resource optimisation:** Co-located WSH plants can help with resource optimisation. With optimum land utilisation and infrastructure sharing, the wind and solar resources can be optimally utilised leading to better CUF as well as cost optimisation. With energy storage facilities, the WSH plants help in better grid management and higher penetration of RE into existing power systems.
- **Policy push:** Government of India's policy push has also helped the WSH segment. A confluence of increased RPO targets, VGF funding, ISTS waiver, PLI and solar park schemes, have helped both the resources to thrive.

## Support policies for WSH plants

### National Wind-Solar Hybrid Policy 2018

This policy aims to encourage new technologies, methods and way-outs involving combined operation of wind and solar PV plants. The aim is to reduce RE variability and improve grid stability.

**Capacity:** A wind-solar plant will be recognised as hybrid if the rated power capacity of one resource is at least 33% of the rated power capacity of other resource.

**Integration:** The policy provides for integration of both energy sources, wind and solar, at alternating current (“AC”) and direct current (“DC”) level.

**RPO:** The power procured from the hybrid project can be used for fulfilment of solar RPO and non-solar RPO in the proportion of rated capacity of solar and wind power in the hybrid plant.

**Hybridisation of existing wind/solar PV plants:** Existing wind or solar power projects, willing to install solar PV plant or WTGs to avail benefit of hybrid project may be allowed to do so under certain conditions.

**Incentives:** All Fiscal and financial incentives available to wind and solar power projects will also be made available to hybrid projects.

**Battery storage:** Battery storage may be added to the hybrid project to reduce the variability; providing higher energy output for a given capacity and ensuring availability of steady power during a particular period.

### State level policies

Based on the MNRE’s WSH policy, governments of RE-rich states have also introduced their own WSH policies. Gujarat was the first to come up with such a policy in 2018. Other states such as Rajasthan, Andhra Pradesh, and Karnataka followed. This has helped set up open access WSH projects and encouraged corporates to procure RTC power from such projects. These policies provide clarity in terms of various provisions, such as RPO, banking, settlement period, various waivers and incentives, applicability of transmission and wheeling charges and waiver in electricity duty etc.

### WSH policy comparison for select states

| Parameter                         | MNRE                                                    | Gujarat*                                                                          | Andhra Pradesh                                                                                 | Rajasthan                                                                                                                                                          | Karnataka                                                       |

## GLOBAL RE LANDSCAPE

### *Solar capacity addition*

The strong global thrust on clean energy is driving renewable installations worldwide led by reducing RE generation costs, favourable policies, improved emphasis on energy security and access, and socio-economic benefits. The last decade saw a remarkable evolution in solar PV segment marked by large scale installations, significant reduction in tariffs and technological advancements.

Concerns over climate change are at the heart of the energy shift towards RE and its increasing utilisation will be key for decarbonisation. Various initiatives, such as Kyoto Protocol, Paris agreement, Conference of Paris (“COP”), RE 100, ISA, and subsequent favourable policy interventions, have helped strengthen the RE segment. The transition towards RE is critical to limit the rise in global average temperatures to well below 2 degrees Celsius and ideally below 1.5 degrees Celsius above pre-industrial levels.

Countries that are part of the Paris Agreement are required to submit their plans for climate action, known as nationally determined contributions (“NDCs”). These NDCs represent the efforts these countries need to take to reduce national emissions. Various countries have provided policy impetus to the solar PV industry through various mechanisms, such as FiT, ‘must run’ status, renewable purchase obligations, tax incentives, AD, favourable regulatory frameworks, subsidies, and PLIs. This has accelerated global growth in solar PVs.

Investments in solar PV is expected to increase further as it is rapidly becoming the preferred and lowest-cost option for electricity generation globally. As per IEA, average annual solar generation should grow by an average 25% between 2022 to 2030 to meet the Net Zero Emissions Scenario by 2050. This translates to over 3x increase in annual capacity deployment until 2030.

As per IRENA, globally, approximately 347 GW of solar PV capacity was added in 2023, taking the installed capacity to 1,411 GW, which is a approximately 33% increase over the previous year. China continued to lead the market with total cumulative capacity of approximately 609 GW, whereas the US came in second with approximately 138 GW, followed by Japan at approximately 89 GW.

### Global solar PV installed capacity registered about 25% CAGR between 2016 and 2023

Source: IRENA Renewable Capacity Statistics 2024 (July 2024), CRISIL MI&A-Consulting

### Global solar outlook

IEA has estimated a capacity addition of 2,317 GW over a period of 2024 to 2028. As per IEA, renewable power capacity additions will continue to increase in the next five years, with solar PV and wind accounting for a record 96% of it because their generation costs are lower than for both fossil and non-fossil alternatives in most countries and policies continue to support them.

Solar PV and wind additions are forecast to more than double by 2028 compared with 2022, continuously breaking records over the forecast period to reach almost 710 GW.

### Projected annual Solar PV capacity additions over 2024 to 2028

Note: Including PV distributed systems and PV Utility scale systems; ("P"): Projected  
Source: IEA Renewables 2023, CRISIL MI&A-Consulting.

### Review of Global Wind energy capacity additions

Since 2016, global installed capacity for wind energy has grown at a CAGR of approximately 12%, to approximately 1,017 GW in 2023 from approximately 467 GW in 2016. In terms of cumulative installations, China, US, Germany, Brazil, India, and Spain remain the top markets, collectively making up 75% of the total 1,017 GW of installed wind power capacity across the world. Countries transitioning away from feed-in-tariffs to market-based mechanisms, thrust on sustainability, falling costs and relatively firm generation solar wind hybrid models gaining traction have driven wind capacity additions in the past few years.

Offshore wind is increasingly playing an important role in driving global wind installations, with the segment witnessing record installations of 21.1 GW in 2021, accounting for a share of 22.9% of wind power additions. However, in 2022 and 2023, offshore wind contributed to approximately 9% to 10% of new installations due to the conclusion of the FiT program.

### Global cumulative installed wind power capacity (GW)

Source: IRENA, CRISIL MI&A-Consulting

Nearly approximately 115 GW of wind-based power capacities were added in 2023 (January-December), mainly led by additions made by China (76 GW), U.S. (6.3 GW), Brazil (4.9 GW), UK (1.3 GW), Germany (3.3 GW), Brazil (4.9 GW) and India (2.8 GW).

### Outlook 2023 to 2027: Wind energy capacity additions to be driven by China and U.S.

As per IEA, following two consecutive years of decline, onshore wind capacity additions are on course to rebound in 2023 to approximately 107 GW, an all-time record installation. This is mainly due to the commissioning of delayed projects in China following COVID-19 restrictions. Faster expansion is also expected in Europe and the United States owing to supply chain challenges pushing project commissioning into 2023 from 2022. On the other hand, offshore wind growth is not expected to match the record expansion it achieved two years ago due to the low volume of projects under construction outside of China. As per IEA approximately 708 GW of wind capacity is expected to be added globally between 2024 and 2028.

## ENERGY STORAGE

### Overview of energy storage technologies

Energy storage technologies can be broadly divided into four segments – mechanical, electromechanical, chemical, and thermal storage. However, only a few technologies are available on a commercial scale worldwide. Technologies such as pumped hydro storage (“PHS”), lithium, and sodium batteries are available commercially and are being used for different applications. Other technologies such as compressed air, flywheel, thermal and hydrogen storage, have yet to demonstrate their commercial viability at scale.

### Major types of storage technologies

Source: Industry reports, CRISIL MI&A-Consulting

Pumped Hydro Storage Project (“PHSP”) is the most widely used and commercially available means of energy storage technology in India. However, the total installed capacity of PHSP is minuscule (approximately 4% of the exploitable potential) in the country. Considering the intermittent and unpredictable nature of RE technologies, such as solar and wind technologies, efficient and economical grid operation is increasingly becoming one of the critical challenges for India’s power system. This challenge calls for solutions such as spinning reserves, flexible generation, ancillary services, transmission system augmentation & frequency control, etc.

Energy storage technologies could play a vital role in smoothening the delivery of intermittent resources like wind and solar energy. By storing excess energy during periods of high generation and use of the same during high demand period thereby ensuring grid stability. This balancing effect helps ensure a more consistent and reliable energy supply, reducing dependence on immediate availability and improving overall grid stability.

### ***Advantages of PHS projects***

Some of the major advantages provided by PHS are as follows:

- **Peak shaving** - PHS has a very high ramp rate. As per CEA's study, the ramp rate of Pondage /Storage Hydro-based power plants is about 50% of its capacity per minute, the highest amongst the different categories of plants. In comparison to this, the ramp rate of combined cycle gas-based plants is up to 10% per minute. The lowest ramp rate is that of coal-based power plants, maximum of 3% for super-critical power plants.
- **Load balancing** - PHS can play a crucial role in load balancing, i.e., storing power during off-peak hours and utilising it when required during periods of high demand.
- **Frequency and voltage regulation** - PHS can respond rapidly to changes in grid frequency to maintain the frequency within the given band. PHS can be operated in pumping mode when frequency is higher than 50 Hz, to help the grid bring down frequency to 50 Hz. On the other hand, in case of frequency lower than 50 Hz, it can be operated in generation mode to provide necessary relief to the grid. PHS can also help control grid voltage within acceptable limits by adjusting their generation levels by rendering reactive power balancing services.
- **Spinning Reserve** - PHS can also be used to provide back-up reserve, spinning reserve, with its high ramping rate and can be operated in case of sudden outage or failure of any load in the grid.
- **Black Start Services** - PHS can provide black start capability, which means, if the upper reservoir of PHS is full and ready for generation, it can be used for energizing the grid in case of cascade tripping.

### **Pumped hydro storage projects in India**

#### ***Potential of PHS in India***

The identified potential of PHS in the country is about 124 GW (comprising 114 PHSP). However, the operational capacity of PHSP is merely 4.7 GW, which indicates the large potential growth in this segment.

**State wise PHS Potential in India**

Source: MoP, CEA (Pumped storage potential as of May 2023), CRISIL MI&A-Consulting

#### ***Overview of PHS projects in India***

As on July 2024, India has an installed capacity of 4.75 GW of on-river pumped storage projects in operation. Further, as per CEA, 4.05 GW is under construction, of which 2.2 GW is expected to be commissioned during Fiscal 2025. Also, 3.6 GW projects have been cleared by CEA and will shortly commence construction and about 60 GW of PHS projects (including on-river and off-river) are under survey and investigation stage for which

different states have already allocated these projects to various agencies. The summary of PHS projects at different stages is tabulated below:

#### Status of PHS development in India as of July 2024

| Description                                                     | Pumped storage capacity |               |
|-----------------------------------------------------------------|-------------------------|---------------|
|                                                                 | Nos                     | MW            |
| Identified on-river & off-river PHS potential as per CEA        | 114                     | 1,23,951      |
| Operational pumped storage projects                             | 8                       | 4,746         |
| Under construction projects                                     | 4                       | 4,050         |
| Projects allotted by States for development                     | 45                      | 64,910        |

| Projects cleared by CEA and yet to be taken up for construction | 3                       | 3,600         |
| Projects under survey & investigation                           | 42                      | 61,310        |
| <b>Total</b>                                                    | <b>45</b>               | <b>64,910</b> |

Source: CEA, CRISIL MI&A-Consulting

#### Battery energy storage

Battery Energy Storage Systems (“BESS”) is another form of storage technology which has gained traction in the last few years. It has a very high energy density making it appropriate to offer ancillary services. More importantly, BESS can be installed easily, requires less time for setup, and can be used for a wide range of grid support activities, such as energy time shift, distribution deferral, and energy arbitrage etc. The technology is yet to achieve its full potential to provide grid support services, and comes with high investment cost and changing technology, and therefore has associated risks. Further, batteries would require replacement or disposal after 7 to 10 years, depending upon usage.

#### Policy and regulatory landscape for storage projects

Over the last 2 to 3 years, the government has taken several initiatives to promote energy storage through standardisation of the policy and regulatory framework by issuing guidelines, regulations, changes in bidding mechanisms, etc. The summary of key policy measures is listed below.

#### Key policy measures for storage projects

Source: MoP, MNRE, CRISIL MI&A-Consulting

The GoI has taken several measures such as providing legal status to storage, energy storage obligation, waiver in ISTS charges, captive status for energy stored in BESS. These measures are expected to expedite the deployment of storage systems and thereby accelerating the growth of India’s RE capacity. The initiatives taken to promote growth of energy storage technologies in India are summarised below:

- MoP issued legal status for ESS on January 2022 wherein ESS has been designated as a power system element which can be utilized as a Generator, Transmission or Distribution element.

- ESO trajectory till Fiscal 2030 and bidding guidelines for BESS has been notified by MoP. 1% energy storage target in Fiscal 2024, going up by 0.5% every year to 4% in Fiscal 2030. However, the ESO has been removed from the RPO notification released by MoP in October 2023.
- Waiver of ISTS charges on PHS will be applicable to those Projects whose construction work would be awarded up to June 30, 2025. The waiver is applicable for a period of 25 years for PHS. The waiver of ISTS charges for BESS projects commissioned up to June 30, 2025 would be provided for a period of 12 years.
- Revised scheme for flexibility in generation and scheduling of thermal/ hydro projects through bundling with RE and storage power.
- In the amendment to Electricity Rules, 2023, GoI has allowed the energy stored in BESS to be considered for captive status.
- The MNRE in its RE bidding guidelines provided the option to the RE developer to tie up with energy storage system developers to meet the project parameters to provide firm and dispatchable RE power.

For PHS projects, several provisions are proposed to facilitate the allocation and development of PHS. No upfront premium is required to pay for project allocation. Appropriate regulatory commissions are mandated to ensure that ancillary services are monetized, and they will determine peak and off-peak tariffs. This will provide assurance of revenue realization and improve off-take chances. PHS will be allowed to participate in all market segments, including the high-price segment of the day-ahead market, thereby expanding the market available for sale. Developers will have the freedom to utilise surplus capacity for optimisation purposes.

To ensure financial viability, the GoI may notify a benchmark cost, and only PHS with a levelized cost within the benchmark cost may be considered for development. While this measure intends to maintain cost control, it may pose challenges to growth in this segment. However, in the PHS guidelines, measures such as reducing the equity component from the existing 30% upto 20% has been suggested. Financial institutions such as PFC, REC, and IREDA are expected to treat PHS at par with other RE projects and provide long-term loans with tenures more than 18 years, with a debt-equity ratio of 80:20. This availability of loans at competitive rates will support the financial aspects of PHS development.

To encourage PHS development, certain tax and duty incentives are provided. States may reimburse State Goods and Services Tax (“SGST”) on hydropower project components, provide exemptions in stamp duty and registration fees for land, and offer land on an annual lease rent basis. Furthermore, PHS will be exempt from ISTS charges.

In addition, the PHS will be exempted from free electricity obligation, doing away with the need for environmental impact assessment studies and public hearings if such projects are built on existing dams or areas away from the main river water (off-the-river). The guidelines also mandated using green finance like sovereign bonds or concessional climate finance for funding such projects.

CEA has also established a Single Window Clearance Cell for approval of PHSPs. It has nominated Officers from Central Water Commission and Geological Survey of India to fast-track the clearance of design and geological aspects of DPR, respectively. The timeline for concurrence of DPR has been reduced from 90 days to 50 days for PHSPs awarded under section 63 of Electricity Act, 2003, part of integrated RE project and being developed as captive plants or merchant plants. The timeline for concurrence of DPR of other PHSPs has been reduced from 125 days to 90 days.

MoP vide its office memorandum dated 28<sup>th</sup> September 2019 provided budgetary support of ₹ 1 Crore per MW (for projects above 200 MW) and ₹ 1.5 Crore per MW (for projects below 200 MW and up to 25 MW) for the construction of roads and bridges for hydropower projects (including PHS projects) whose construction started after 8 March 2019.

Also, the MoP issued guidelines in April 2023 to regulate and promote development of PHSP projects in India. The guideline highlights methods for allotment of projects on nomination basis where states can directly award projects to developers. While this can expedite development, it could also lead to project delays. Another method is the competitive bidding process. This method is advantageous for the market as it introduces competition. However, the provision that grants the home state the right of first refusal for 80% of the project capacity could hamper interests of private developers.

Further, in August 2023, MoP published the National Framework for promoting Energy Storage Systems. The framework reaffirms various policies and provisions that have encouraged the planning and installation of ESS in the country. Additionally, it proposes various incentives to further encourage the development of ESS. The comprehensive framework is an important step towards developing the ESS and will facilitate a conducive ecosystem for its development. The policy proposes measures to ensure adequate storage capacity to supply reliable power. New RE projects (excluding Hydro Projects) with an installed capacity of over 5 MW may be mandated to install ESS (of at least 1 hour storage) for minimum 5% of the RE capacity. Further Hydro Projects may be encouraged to have minimum pondage capacity to manage variability and peak demand.

In September 2023, the government approved the VGF scheme for development of 4000 MWh of BESS capacity by Fiscal 2031. An initial outlay of ₹9,400 crore including budgetary support of ₹ 3,760 crore has been provided under the scheme. The VGF would be provided from Fiscal 2024 to Fiscal 2026 and will be capped at 40% of the capital cost. Prior to VGF scheme, the Ministry of Heavy Industries in June 2021 launched a PLI scheme for Advance Chemistry Cell battery storage of 50 GWh capacity with an outlay of ₹ 18,100 Crore, which includes more than 10 GWh grid-scale battery storage. The Scheme expects direct investment of around ₹ 45,000 crore in ACC Battery storage manufacturing projects. As of December 2023, out of 50 GWh capacity, 30 GWh capacity has already been allotted through competitive bidding process. On the supply side too, several private sector developers have announced plans and signed agreements with state governments to develop PHSPs. Strong state government support in developing project sites proactively and a differential time-of-day pricing mechanism can go a long way in boosting PHS prospects.

### Large scale ESS tenders

As RE penetration scales up, ESS is expected to play a critical role. In the recent past, there have been several grid scale ESS tenders including RTC, peak power supply, standalone ESS, and the recently announced firm and dispatchable renewable energy (“**FDRE**”) tenders. The table below shows the classification of ESS tenders in India.

**Types of storage tenders**

| Tender type              | Description                                                                                           |
|--------------------------|-------------------------------------------------------------------------------------------------------|
| <b>RTC tender</b>        | To ensure round-the-clock availability of power to the offtakers with or without storage              |
| <b>Peak power supply</b> | To meet the power requirements of the offtakers during peak hours through a combination of RE and ESS |
| <b>Solar BESS</b>        | + Small-scale tenders with mandatory fixed solar and BESS components                                  |
| <b>Standalone ESS</b>    | Fulfills on demand power requirement of the offtakers, treats “ESS as-a-service”                      |
| <b>FDRE</b>              | Demand profile following ESS tenders ensuring firmness and dispatchability of renewable energy power  |

Source: CRISIL MI&A-Consulting

SECI issued its first 1200 MW RE+storage tender with guaranteed peak power supply of 6 hours per day which concluded in 2020. The two bidders, Greenko (900 MW at peak tariff of approximately ₹ 6.12/kWh) with pumped hydro storage and ReNew Power (300 MW at peak tariff of ₹ 6.85/kWh) with BESS were awarded the project. The first FDRE tender of 1,500 MW conducted by SJVN in November 2023 witnessed the lowest tariff of ₹ 4.38/kWh.

Also, a few large-scale standalone ESS tenders were also issued by SECI, NTPC and Power Company of Karnataka Limited (“**PCKL**”) in Fiscal 2023. In terms of ESS technology, SECI’s tender was for BESS, while PCKL’s tender was for PHS. However, NTPC’s tender was technology agnostic with the requirement of six hours of energy supply. JSW Energy won 500 MW in SECI’s tender and 300 MW in PCKL’s tender, whereas Greenko won the NTPC tender and 700 MW in PCKL tender.

As of July 2024, approximately 11 GW of grid-scale ESS capacity has been tendered of which approximately 6 GW has been awarded.

A confluence of these initiatives indicates the large potential and keen interest from project developers in the ESS segment. Moreover, the results of these tenders also indicate the commercial competitiveness of ESS and RE+ESS as compared to electricity sources.

A list of recently concluded storage tenders are mentioned below:

### Recently concluded storage tenders

| Sr. No. | Tender name                 | Tender type     | Capacity (MW/MWh)    | Result date    | Lowest bid               | Winners                                              |
|---------|-----------------------------|-----------------|----------------------|----------------|--------------------------|------------------------------------------------------|
| 1.      | SECI Rajasthan Tranche - II | Standalone BESS | 1,000 MW / 2,000 MWh | September 2024 | ₹ 4.57 million/MW/year   | JSW, Reliance                                        |

Source: SECI, Bidding agencies, CRISIL MI&A-Consulting

There were other small scale solar-cum-storage tenders issued by SECI, NLC for regions such as Leh, Andaman and Nicobar Islands and Lakshadweep of capacities less than 50 MW, which have also been successfully awarded by the bidding agencies.

While PHS is primarily useful for long duration energy storage requirement (i.e., for 6 to 10-hour storage) while BESS is typically useful for shorter duration storage requirement (2 to 4 hours). Hence, both the technologies have their unique requirements and use cases.

### Major players in pumped storage and BESS technology

Major RE developers such as ReNew, Greenko, Torrent Power, JSW, Acme are aggressively adopting ESS. ReNew won two ESS tenders (Peak Power Supply, RTC-1). Greenko is developing ESS through PHS. It is developing Integrated Renewable Energy Storage Projects (“IRESP”) in Andhra Pradesh combining GW scale wind, solar and PHS power.

### Major players and their share in ESS/PHS based projects as of July 2024

Source: CEA, SECI, Bidding agencies, CRISIL MI&A-Consulting

Greenko has the highest share in terms of capacity awarded under energy storage projects. It has won 2.1 GW under tariff based competitive bidding conducted by SECI, PCKL and NTPC. According to CEA's status report on PHS development as of July 2024, a cumulative capacity of approximately 13.5 GW has been allotted to Greenko. Other players such as Adani Green Energy, JSW, Torrent Power are cumulatively developing approximately 25 GW of PHSPs. Acme is also developing 600 MW Off-river PHSP in Uttar Pradesh under MoU route.

Further, the developers who won RTC, peak power, FDRE tenders under competitive bidding route such as ReNew, Acme, Tata Power, Bluepine, O2 Power, NTPC are deploying BESS to meet the power requirements of their respective offtakers as indicated in the RfP.

#### **Outlook for ESS market**

As per the updated NDC, India now stands committed to reduce emissions intensity of its GDP by 45% by 2030, from 2005 level and achieve about 50% cumulative installed electricity capacity from non-fossil fuel-based energy resources by 2030. This is expected to significant RE capacity additions by 2030. However, the increasing penetration of variable RE into the grid has risks with respect to grid stability and resilience. Energy storage will play an important role in ensuring the firmness and sustainable growth of RE in the electricity mix. PHSPs are likely to play a vital grid-scale storage solution in India for the next 5 to 7 years led by low cost, large scale, and no reliance on international supply chains.

Usage of battery storage is expected to be strong across the generation, transmission, and distribution segments as well as at the consumer end. The National Renewable Energy Laboratory has also forecasted a fall in the price of storage solutions, especially lithium-ion technology. With the greater adoption of lithium-ion battery storage, improvement in battery efficiency, and large-scale manufacturing, CRISIL MI&A Consulting expects the four-hour utility-scale lithium-ion battery costs to decrease to U.S.\$90 to 100 per kWh in 2030 from the costs of U.S.\$130 to 140 per kWh in 2023.

With the announcement of several large-scale PHS projects across the country, the PHS segment is also expected to witness significant adoption. According to the CEA's report on optimum power generation mix study in April 2023, India will require at least 41.7 GW/208 GWh of BESS and 18.9 GW of PHS by Fiscal 2030.

#### **Key driving factors for adoption of ESS in India**

**RE capacity addition:** GoI has set an ambitious target of 450 GW of RE capacity addition by 2030. Such high quantum, variability, and intermittent nature of RE will drive installation of energy storage in India.

**Demand profile:** During non-solar peak periods, additional generation and ramping requirements are high. Further, the projected peak load growth and the expanding disparity between peak and base demand will

necessitate sufficient capacity expansion and adoption of storage-based generation technologies. Additionally, energy storage will also help in addressing ramping requirements as well as providing capacity during non-solar hours.

**Regulatory and Policy Support:** The GoI has placed emphasis on developing BESS and PHS capacity to improve grid operations. In April 2023, the MoP issued guidelines and incentives for the PHS project to catalyse the growth of the PHS market. Other policy support to ESS includes transmission charges waiver, inclusion of ESO, VGF scheme for BESS, among others.

**Storage duration:** PHS offers energy storage of 6 to 12 hours, which is significantly longer than BESS. Thus, PHS is well suited for energy-shifting applications, wherein excess RE generation can be shifted to peak demand periods of late evenings. On the other hand, a single BESS can be used for multiple applications such as voltage and frequency regulation, spinning reserves, peak shaving.

**Maturity of technology:** Pumped storage is a proven technology and has been in use for decades to support/balance grids. Unlike other storage technologies, performance of PHS is quite reliable on long term basis. With the evolution in BESS technology and falling costs, its adoption will also see an improvement.

**Self-sufficiency of domestic equipment:** PHS project infrastructure is similar to a hydropower plant. Thus, with India already having a significant presence in hydropower, most PHS project components can be sourced locally. This is in high contrast to BESS, wherein battery cells, a key project component, still need to be almost wholly imported. However, with capacities awarded under the PLI scheme for advanced chemical cell battery storage, share of indigenous solutions would increase.

**Economical:** PHS is a cost-effective ESS technology due to a significantly longer project life (40 to 50 years) as compared to other ESS technologies. For BESS solutions too, with rising R&D and subsequent improvement in technology as well as increasing scale, cost competitiveness of such solutions to improve.

**Availability of finance:** The long project life of PHS has the potential to provide a stable and consistent cash inflow for about 40 years. This healthy cash-flow profile enables favourable project financing arrangements for PHS, such as lower loan rates and a higher debt-equity ratio.

**Sustainable:** With long useful life (more than 40 years for plant and equipment and more than 80-100 years for Dam), PHS provide long term solution. Since it involves only the flow of water (uphill & downhill), it has relatively minimal environmental impact. For batteries, a special consideration is degradation. Batteries degrade as they age, decreases the amount of capacity they can store. The expected life of the batteries is about 10 to 15 years (depending on the technology and how the batteries are operated). By the end of that time, the batteries' capacity is expected to be reduced to less than 70% of their original capacity. Furthermore, the MoEF&CC has issued Battery Waste Management Rules, 2022 to ensure proper collection and recycling/refurbishment of waste batteries and use of recovered materials from wastes into new batteries. This will ensure environmentally sound management of waste batteries.

However, there are few disadvantages of BESS as outlined below:

- **Capital intensive/High upfront cost:** The initial investment required to purchase and install a BESS can be expensive specially for individuals or small organisations. BESS capex also depends on the commodity prices and the volatility in commodity prices can impact the BESS capex.
- **Size restrictions and life:** Batteries have limited energy density i.e. they can only store a certain amount of energy per unit of weight and volume. Also, batteries naturally lose their charge over time, even when not in use. Additionally, batteries have a limited number of charge-discharge cycles before their capacity begins to degrade. This may lead to inferior performance and shorter lifespan.
- **Safety:** Improper design, installation or maintenance of batteries can be hazardous. That may lead to issues such as overheating, fire, or even explode if handled incorrectly.
- **Environmental impact:** Mining of various materials used for battery manufacturing can impact the environment. Additionally, the production and disposal of BESS can have adverse environmental impacts, including greenhouse gas emissions, water pollution, and waste generation.
- **Recycling:** Battery technology itself is in nascency. The recycling of lithium-ion batteries, in particular, is not yet developed and hence efficient and sustainable recycling of these batteries can be challenging.
- There aren't very many large size / utility scale BESS installation in India and hence there are not many data points available on the performance of the BESS.

## **LEADING PROJECT DEVELOPERS**

Competitive mapping covers the details of companies, their products and services within a given market to understand competitive intensity. Some of the key players include ACME Solar (1.32 GW operational solar), Renew Power (approximately 8.3 GW operational wind & solar), Adani Green Energy (approximately 10.9 GW operational wind, solar and hybrid), NTPC Green Energy (approximately 3.5 GW operational solar and wind), TATA Power RE (approximately 4.5 GW operational solar and wind), Greenko (5.4 GW operational wind and solar) and Avaada Energy (operational approximately 4 GW Solar) as of March 31, 2024. These players also have sizeable quantum of capacity under consideration/development.

@ Additionally, ACME has secured a capacity of 350 MW and 300 MW from SECI and SJVN in July and August 2024 respectively.

NA: Not available Source: Company websites, Annual Reports, CRISIL MI&A-Consulting

ACME is one of the largest renewable IPP in India and is among the top 10 renewable energy company in terms of operational capacity as on June 30, 2024, in India.

ACME Group has been one of the early entrants in the solar IPP business in India among the top 10 renewable energy companies.

The following table summarises the competitive analysis of ACME Solar Holdings with 2 publicly listed IPPs.

| INR Millions                                             |       | ACME <sup>1</sup> |                   |              |              |              | ACME <sup>1</sup> Adjusted<br>for Acquisition<br>/Divestment |              |              | Adani Green                            |                                           |                                        |                                        |                                        | ReNew                                  |                                        |                                 |                                 |                                        |

(W): Wind; (S): Solar and (H): Hybrid (A): Audited; (UA): Unaudited

Note: 1. - Average CUF, average grid availability and average plant availability includes calculations for installed capacity at the end of the period & excludes assets which were monetized during the period.

Presently, Adani Green and Renew are the only two listed comparable renewable energy players operating in India

Source: Company, Company websites, Annual Reports, Filings, CRISIL MI&A Consulting

Formulae used:

EBITDA: Earnings before interest, tax, depreciation, and amortization (Profit before tax + Finance cost + Depreciation and amortization expense - Other income - Exceptional items)

EBITDA margin: EBITDA / Revenue from operations

PAT: Profit after tax

PAT margin: PAT / total revenue

*Cash RoE: (Profit after tax + Depreciation) / Equity; Cash ROE is not a financial metric related to a renewable energy sector specifically. The terminology is used as a measure of capital efficiency with focus on cash profit. It is calculated as a cash profit (profit after tax plus depreciation) for the year divided by closing net worth. Given that the companies operate in a capital-intensive business with high depreciation and interest cost, profit may not represent the companies' performance accurately, accordingly Cash ROE has been used to describe the companies' performance. The operational life of solar power plants is around 30 years and depreciation is not a cash flow.*

*Net Debt/Equity: (Long term borrowing + Short term borrowing – Cash and cash equivalents – Other bank balances)/ Equity*

*DSO: Closing trade receivables divided by Revenue from Operations multiplied by 365 for yearly or 91 for quarterly calculations.*

*#Not annualized.*

## THREATS AND CHALLENGES

### Threats

- Any adverse shift in government policies, including reductions in incentives or changes in energy regulations, can significantly impact renewable player's revenue and profitability. However, considering the COP commitment, climate change ambitions and government push for RE, the chances of drastic changes in regulatory regime are less likely. This can also be ascertained from the fact that as against capacity addition of approximately 70 GW of RE, only approximately 20 GW of conventional capacity is added over last 5 years.
- There were some delays in signing PSAs having higher tariffs by Discoms due to declining tariffs in subsequent tenders. However, with the government's plan for stricter adherence to renewable purchase obligations ("RPOs"), higher penalties in case of non-compliance, and revision of tariff in manufacturing-linked tenders, PSA signing activity improved during Fiscal 2022 onwards.
- There are only few states which are complying with the RPO obligations fully and there has been limited enforcement on obligated entities - discoms and open access and captive power users - to meet RPO targets. Proposed amendment to Electricity Act, 2003 has stipulated a penalty on RPO non-compliance and uniform imposition of penalties and strict enforcement would be critical for significant improvement and fair distribution of RPO compliance across states.
- The solar power industry is currently facing cost pressures on account of volatility in module prices, exchange rates, freight, and commodity prices. This may impact the EPC margin of renewable players as they may not be able to pass on the cost increase to project developing SPVs.
- The RE sector is highly competitive, with numerous players vying for market share. Established competitors along with capable new entrants can pose challenges. Climate change and extreme weather events can affect the performance and reliability of renewable energy systems, potentially leading to disruptions or damage to infrastructure. Further, economic downturns and financial instability can reduce capital available and increase costs for renewable energy investments, affecting the renewable player's expansion plans.

### **Challenges:**

- There is counterparty credit risk due to the depleted financial position of most Discoms. Due to legacy issues, higher T&D losses, lack of adequate tariff revisions, lack of timely subsidy support, operational challenges, financial position in most of the State Discoms is weak. However, with competitive tariffs, payment security mechanism, diversification in counter parties largely mitigates the counterparty credit risk.
- Further, execution risk in under construction projects may impact profitability and in turn liquidity. However, major renewable players having in-house EPC expertise and experience in execution of large-scale projects should mitigate this risk.
- Furthermore, availability of contiguous land and acquisition challenges associated with land parcels are some of the key challenges that developers are facing. To acquire large tracts of land in a single resourceful location, many stakeholders have to be involved which slows down the pace of project execution. The 40 GW solar park scheme, which provides land to successful bidders for setting up of the projects, is facilitative in this aspect.
- Availability of timely transmission connectivity is another challenge. To optimize costs, utilization levels, and losses associated with the transmission system, it is crucial to have robust transmission planning. Concerns about connectivity for renewable projects have been raised by the various stakeholders at the appropriate levels. Nodal agencies ("PGCIL" and "SECI") have planned various schemes to reduce grid congestion and enhance connectivity, taking this into account.
- Green Energy Corridor Scheme and Renewable Energy Zones expected to add approximately 80 GW of transmission grid capacity taking it to more than 100 GW for RE projects. This will give comfort against the planned capacity additions in renewable energy segment.

## OUR BUSINESS

Some of the information in this section, including information with respect to our business plans and strategies, contain forward-looking statements that involve risks and uncertainties. You should read **“Forward-Looking Statements”** on page 22 for a discussion of the risks and uncertainties related to those statements and also **“Risk Factors”**, and **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** on pages 34 and 536, respectively, for a discussion of certain factors that may affect our business, financial condition or results of operations. Our actual results may differ materially from those expressed in or implied by these forward-looking statements.

Unless otherwise indicated or the context otherwise requires, the financial information included herein is based on or derived from our Restated Consolidated Financial Information included in this Red Herring Prospectus. For further information, see **“Restated Consolidated Financial Information”** on page 411. We have also included Unaudited Pro Forma Consolidated Financial Information to show the impact of the sale of the Divested Project SPVs made during Fiscal 2024 on our statement of profit and loss for Fiscal 2024. For further details, see **“Unaudited Proforma Financial Information”** on page 522.

Unless the context otherwise requires, in this section, references to “we”, “us” and “our” are to Acme Solar Holdings Limited on a consolidated basis while references to “our Company” or “the Company”, are to Acme Solar Holdings Limited on a standalone basis. Further, references to the “ACME Group” include MKU Holdings Private Limited, ACME Cleantech and its subsidiaries.

Unless otherwise indicated, industry and market data used in this section has been derived from industry publications, in particular, the report titled “Strategic assessment of power and renewable energy sector in India” dated October 2024 (the **“CRISIL Report”**) prepared and issued by CRISIL Market Intelligence & Analytics, appointed by us on February 27, 2024 and exclusively commissioned and paid for by us in connection with this Offer. A copy of the CRISIL Report is available on the website of our Company at <https://acmesolar.in/investor-corner/investor-resources/industry-reports>. The data included herein includes excerpts from the CRISIL Report and may have been re-ordered by us for the purposes of presentation. There are no parts, data or information (which may be relevant for the proposed Offer), that has been left out or changed in any manner. Unless otherwise indicated, financial, operational, industry and other related information derived from the CRISIL Report and included herein with respect to any particular year refers to such information for the relevant calendar year. For more information, see **“Risk Factors - 55. Industry information included in this Red Herring Prospectus has been derived from an industry report exclusively commissioned and paid for by us for such purpose. Further, this Red Herring Prospectus contains information from technical reports by TÜV SÜD South Asia Private Limited appointed by our Company.”** on page 83.

### Overview

We are a renewable energy company in India with a portfolio of solar, wind, hybrid and firm and dispatchable renewable energy (**“FDRE”**) projects. We are one of the largest renewable energy independent power producers (**“IPP”**) in India and among the top 10 renewable energy players in India in terms of operational capacity as of June 30, 2024 as disclosed on page 238 in the section **“Industry Overview – Key Competitors”** and over the years, we have diversified and expanded our portfolio from solar power projects to become an integrated renewable energy company in India. We develop, build, own, operate and maintain utility scale renewable energy projects (through our in-house engineering, procurement and construction (**“EPC”**) division and operation and maintenance (**“O&M”**) team, and generate revenue through the sale of electricity to various off-takers including central and state government-backed entities. Our Company was established in 2015 to consolidate the ACME Group’s renewable energy business and to capitalize on the opportunities in the Indian renewable energy industry.

The ACME Group is promoted by Manoj Kumar Upadhyay and ACME Cleantech was incorporated in 2003. It originally operated as a provider of energy management solutions to wireless telecommunications operators in India and subsequently entered into the renewable energy generation business in 2009. The ACME Group has been one of the early entrants in the solar IPP business in India (Source: *CRISIL Report*) and commissioned its first solar power plant in Fiscal 2012. The ACME Group has a track record of developing, executing and commissioning a total of 2,719 MW (3,668 MWp) of solar power projects from inception until the date of this Red Herring Prospectus.

We have an aggregate Operational Project capacity of 1,340 MW (1,826 MWp) solar power projects; Under Construction Contracted Project capacity of 3,250 MW including solar power projects of 1,500 MW (2,192

MWp), wind power projects of 150 MW, hybrid projects of 1,030 MW and FDRE projects of 570 MW; and Under Construction Awarded Project capacity of 1,730 MW comprising 600 MW (870 MWp) of solar power projects, 450 MW hybrid power projects and 680 MW of FDRE power projects, as of the date of this Red Herring Prospectus. The revenue from our projects in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and comprises of revenue from our operational solar projects.

According to the CRISIL Report, FDRE projects offer firm power supply as per demand given by utilities and a higher capacity utilization factor (“CUF”) compared to pure-play solar and wind projects. Further, according to the CRISIL Report, expected tariff ranges have resulted in being higher than the norm of ₹2.5 to ₹ 2.6 per unit, approaching the range of ₹3 to ₹ 5 per unit. (Source: CRISIL Report) With this expanding portfolio, we have enhanced our capabilities and product offerings and emphasized our commitment to sustainable energy development. This ensures that we remain responsive to evolving market dynamics while maintaining our presence as a key player in the renewable energy sector. We have also strategically divested certain solar power projects to investors delivering value to the shareholders, with a cumulative capacity of 1,379 MW (1,842 MWp) and used the proceeds from such sale to grow our business.

The following table provides an overview of our entire portfolio of Operational, Under Construction Contracted Projects and Under Construction Awarded Projects, as of the date of this Red Herring Prospectus:

| Particulars              | Contracted Capacity (AC) MW | Solar (AC) MW | Solar (DC) MWp | Wind MW | Battery MWh |
|--------------------------|-----------------------------|---------------|----------------|---------|-------------|
| Operational <sup>1</sup> | 1,340 <sup>2</sup>          | 1,340         | 1,826          | -       | -           |

<sup>(1)</sup> Our Operational Projects comprise those projects which have achieved their commercial operation date and obtained a commissioning certificate.

<sup>(2)</sup> Our Company has signed a share purchase agreement dated September 27, 2023 with Blupine Energy Private Limited, for inter alia the sale of 20 MW in ACME Sidlaghatta Solar Energy Private Limited (“ACME Sidlaghatta”). The long stop date for the sale and purchase of ACME Sidlaghatta was the date falling after expiry of one year from the execution date of the share purchase agreement, i.e., September 27, 2023. However, since the conditions precedent required to be fulfilled prior to closing of the ACME Sidlaghatta transaction could not be completed before the long stop date, being September 28, 2024, the share purchase agreement dated September 27, 2023, stands automatically terminated with respect to ACME Sidlaghatta transaction.

<sup>(1)</sup> Our Under Construction Contracted Projects comprise those projects for which a power purchase agreement has been signed but the project has not achieved its commercial operation date.

<sup>(2)</sup> Our Under Construction Awarded Projects comprise those projects for which we have received a letter of award (“LOA”) from the off-taker but have not signed a PPA and the contracted capacity details for such projects are as per the LOA.

<sup>(3)</sup> The current configuration of solar, wind and battery energy storage system (“BESS”) has been identified based on our initial assessments and may undergo change on account of change in capital expenditure cost of these resources and will be finalized at the stage of financial closure.

The following tables set forth certain details of our Under Construction Contracted Projects and Under Construction Awarded Projects, as of the date of this Red Herring Prospectus:

<sup>#</sup>The relevant SPVs have received extensions for the development of these projects due to impact of COVID-19, supply chain disruptions in the solar sector and stay order passed by the Rajasthan High Court on respective substation land and underground laying of transmission lines in habitats of Great Indian Bustard. The Supreme Court pursuant to an order dated March 19, 2024 has directed our Company to re-route the transmission line as recommended by the Great Indian Bustard committee and has granted 12 months to complete the projects. Accordingly, SECI has further extended the commercial operational date by 12 months from March 19, 2024 or actual date of commissioning, whichever is earlier.

Note: 1. The LOA for these projects was initially issued in favour of ACME Cleantech and the projects are to be developed by the relevant SPVs. Subsequently, on May 20, 2024, our Company acquired the entire equity share capital of these two SPVs from ACME Cleantech.

2. The LOAs for these projects was initially issued in favour of ACME Cleantech and the projects are to be developed by the relevant SPVs. Subsequently, on May 16, 2024, our Company acquired the entire equity share capital of these SPVs from ACME Cleantech. PPA has been signed for 190 MW, out of a total awarded capacity of 380 MW.

3. The LOA was initially issued in favor of ACME Cleantech and the project is to be developed by the SPV. Our Company has entered into share purchase and shareholders agreement each dated June 17, 2024, with ACME Cleantech for the SPV. Pursuant to such share purchase agreement, our Company on June 19, 2024, has acquired 49.00% of the equity share capital of the SPV, while remaining 51.00% continues to be held by ACME Cleantech. In terms of such share purchase and shareholder agreements, our Company exercises control over the SPV and responsibility of overall development, commissioning, and funding of the relevant project shall reside with our Company. Further, our Company has the right to acquire the remaining 51.00% of the equity share capital held by ACME Cleantech post expiry of the PPA lock-in-period (as set out under bid documents as well as the respective power purchase agreement entered into by the SPV, which is one year post the commercial operation date for the respective projects housed in the SPV.

4. The connectivity approval is subject to the outcome of the writ petition filed by Axis Energy Venture India Private Limited pending before the High Court of Andhra Pradesh at Amaravati against Central Electric Regulatory Commission. For further information, see “**Outstanding Litigation and Material Developments – Litigation involving our Promoters – Material Civil proceedings**” on page 601.

5. As on the date of this Red Herring Prospectus, we have entered into a PPA for 150 MW out of a total awarded capacity of 350 MW.

6. All of these four Subsidiaries have received Central Electricity Authority’s approval for energization of FBTL end bay, transmission line, switchyard, pooling sub-station equipment and plant. Further, NRLDC registration has been completed and plant First Time Charging (“FTC”) has been received for ACME Deogarh, ACME Phalodi, ACME Dhaulpur and ACME Raisar for 253 MW, 272 MW, 272 MW and 272 MW, respectively. ACME Deogarh, ACME Phalodi and ACME Raisar have also commenced supplying infirm power of 253.00 MW, 272.00 MW and 56.63 MW respectively.

Note: Under Construction Awarded Projects represent projects for which we have received LOAs from the off-taker but have not signed a PPA. Accordingly, it is not possible to determine the scheduled commercial operations date or expected commissioning date of such projects at this stage. The scheduled commissioning date for the projects above will typically be 24 months from the effective date of their respective PPAs.

For ACME Sigma Urja Private Limited, tariff has been adopted and for ACME Alpha Renewables Private Limited and ACME Omega Urja Private Limited, tariff adoption petitions were filed and are pending in CERC. For the remaining projects, tariff adoption petitions are yet to be filed.

\*The LOAs for these projects was initially issued in favour of ACME Cleantech and the projects are to be developed by the relevant SPVs. Subsequently, on May 16, 2024, our Company acquired the entire equity share capital of these SPVs from ACME Cleantech.

<sup>#</sup>The LOAs for these projects was initially issued in favor of ACME Cleantech and the projects are to be developed by the relevant SPVs. Our Company has entered into share purchase and shareholders agreements each dated June 17, 2024, with ACME Cleantech for such SPVs. Pursuant to such share purchase agreements, our Company on June 19, 2024, has acquired 49.00% of the equity share capital of such SPVs, while remaining 51.00% continues to be held by ACME Cleantech. In terms of such share purchase and shareholder agreements, our Company exercises control over such SPVs and responsibility of overall development, commissioning, and funding of the relevant project shall reside with our Company. Further, our Company has the right to acquire the remaining 51.00% of the equity share capital held by ACME Cleantech post expiry of the relevant PPA lock-in-period (as set out under bid documents as well as the respective power purchase agreement to be entered into by such SPVs, which is one year post the commercial operation date for the respective projects housed in these SPVs.

<sup>5</sup>The LOA for this project has currently been issued in the name of our Company. However, the project will be developed by the relevant SPV, once finalized.

In addition to the above, we have secured connectivity of 647 MW, which has not been allocated to any projects, and have also applied for connectivity of 3,300 MW for future bids. Further, ACME Cleantech has signed a memorandum of understanding with the Government of Uttar Pradesh for the development of a 600 MW closed loop pump storage project in the state by ACME Urja Two Private Limited, the relevant project SPV. On June 17, 2024, our Company acquired the entire equity share capital of ACME Urja Two Private Limited. Terms of reference required for environment clearance has been completed, the site for the project has been identified for which land acquisition is underway and the project implementation will start once the project off-take has been firmed up and the power purchase agreement is executed. Further, bids for engineering, procurement and construction for the project has been floated.

The following map sets forth the geographical spread of all our projects across the country, as of the date of this Red Herring Prospectus:

1. UC: Under Construction

2. Some of the FDRE and Hybrid projects are planned to be installed across states and are subject to changes. For such projects, the proposed installed capacity has been split across the states as per the current estimates.

3. In addition to the above, the Company will install BESS with a total capacity of 4,756 MWh for FDRE and Hybrid projects.

[Map not to scale]

The table below sets forth details of the states in which our Operational Projects, Under Construction Contracted Projects and Under Construction Awarded Projects are located, along with details of the installed capacity of our projects in each of these states:

| States         | Operational Projects<br>Solar (MWp) | Under Construction Contracted Projects |            |                    |                  |                    |                  | Under Construction Awarded Projects |           |                    |                  |                    |                  | Total installed capacity (MWp) | Percentage of total installed capacity (%) |

Notes:

1. Some of the FDRE and Hybrid projects are planned to be installed across states and are subject to changes. For such projects, the proposed installed capacity has been split across the states as per the current estimates.
2. In addition to the above, the Company will install BESS with a total capacity of 4,756 MWh for FDRE and Hybrid projects.

According to the CRISIL Report, states like Gujarat, Rajasthan, Madhya Pradesh, Andhra Pradesh, Karnataka, and Tamil Nadu offer more solar irradiance as compared to other parts of India which makes them desirable for installing solar projects. As can be seen from the above map, more than 80% of our Operational and Under Construction portfolio is in such states. The following chart sets forth details of our contracted capacity (which includes capacity of our Operational Projects, Under Construction Contracted Projects and Under Construction Awarded Projects) between off-takers, as of the date of this Red Herring Prospectus:

The table below provides details of our off-takers, along with their contracted capacity as a percentage of our total contracted capacity (which includes our Operational Projects, Under Construction Contracted Projects and Under Construction Awarded Projects):

| Sr. No.         | Off-Taker         | Capacity (in MW) | Capacity as a % of Total Contracted Capacity (in %) |

We have an integrated in-house business platform to execute and operate our projects across their life cycles from bid submission until it achieves commercial operations as well as their operations and maintenance. The key activities performed by our team include tendering and bidding, land acquisition and obtaining relevant approvals, financial closure, design engineering, procurement, construction and O&M. In June 2024, our Company and ACME Cleantech entered into an agreement pursuant to which certain employees of ACME Cleantech who are engaged in EPC and O&M activities shall be transferred to our Company thereby strengthening our in-house EPC and O&M capabilities. For further details, see “- **Project Development Mechanism – Internal Restructuring**” on page 269.

## Our Competitive Strengths

We believe the following competitive strengths have contributed and will continue to contribute to our growth:

- *Large renewable energy player well positioned to capitalize on strong industry tailwinds in our IPP business;*
- *End-to-end value chain capabilities and an integrated approach to developing renewable power projects by in-house project development, EPC and O&M teams;*
- *Expansive portfolio diversified across different renewable energy technologies;*
- *Long-term stable cash flows based on contracts with central and state government entities;*
- *Access to diversified sources of funding;*
- *Design and value engineering leading to higher efficiencies; and*
- *Committed Promoters and senior management team.*

### ***Large renewable energy player well positioned to capitalize on strong industry tailwinds in our IPP business***

We are one of the largest renewable energy independent power producers (“**IPP**”) in India and among the top 10 renewable energy players in India in terms of operational capacity as of March 31, 2024, in India as disclosed on page 238 in the section “**Industry Overview – Key Competitors**”. As of the date of this Red Herring Prospectus, we have an aggregate Operational Project capacity of 1,340 MW (1,826 MWp); Under Construction Contracted Project capacity of 3,250 MW and Under Construction Awarded Project capacity of 1,730 MW. According to the

CRISIL Report, renewable energy installations (including large hydroelectric projects) have increased fivefold to approximately 200 GW as of August 2024, as compared with approximately 63 GW as of March 2012, led by various central and state level incentives. As of March 2024, installed grid connected renewable energy generation capacity (including large hydroelectric projects) in India constituted approximately 44% of the total installed generation base in India. In the renewable energy basket (including large hydroelectric projects) as of August 2024, solar energy accounted for a share of approximately 44%. Growth in the solar power sector over the last five years has been robust. As much as approximately 70 GW capacity was added in the segment over Fiscals 2018 to 2024, representing a CAGR of approximately 24.8%, although on a low base. (Source: CRISIL Report)

India has a vast wind energy potential, estimated at 695.5 GW at 120 meters above ground level as per estimates by the National Institute of Wind Energy. India has the fourth largest installed wind power capacity in the world, with approximately 47 GW as of July 31, 2024. Wind power accounted for nearly 10.5% of India's total installed utility power generation capacity. Led by India's ambitious clean energy targets declared under its nationally determined contribution, focus on clean segments such as wind is expected to continue coupled with a healthy pipeline existing in the segment. The government policy to tender 10 GW wind capacity annually till Fiscal 2028 will further boost the capacity additions. (Source: CRISIL Report) According to CRISIL Report, wind power capacity additions to remain at approximately 32 to 34 GW over Fiscals 2024 to 2029, higher than the approximately 12 GW seen over Fiscals 2019 to 2024. Wind solar hybrid is increasingly gaining traction over plain vanilla renewable energy projects in India. Although MNRE has not yet set a generation target, the nascent sector has received strong support from SECI and several state governments. There are two types of wind solar hybrid projects - pure-play ones and those with storage. There are also projects that may come up under the government's round-the-clock power scheme. (Source: CRISIL Report)

According to the CRISIL Report, the global transition to clean energy sources is driving increasing demand for renewable energy solutions, providing us with substantial growth opportunities. In line with the global transition, India has set a target of achieving 450 GW of installed capacity for renewable energy by 2030. The Government has taken various steps to promote renewable capacity additions, which include waiver of inter-state transmission charges on electricity generated from solar and wind projects that are commissioned until 2025 and renewable purchase obligation which mandates consumers like distribution companies to purchase a certain proportion of power generated from renewable energy sources. Further, the MNRE has prescribed an annual bidding trajectory for renewable energy power bids to be issued by Renewable Energy Implementation Agencies ("REIAs"). Bids for 50 GW per annum renewable energy capacity, with at least 10 GW per annum wind power capacity, are to be issued each year from Fiscals 2024 to 2028. We believe that we are well positioned to capitalize on the growth opportunities in the Indian renewable energy sector.

Further, the Government of India has provided an impetus to improve the payment security mechanism of power generators. The Ministry of Power has notified The Electricity (Late Payment Surcharge and Related Matters) Rules, 2022 ("LPS Rules") to address cash flow challenges faced mainly by generation companies and transmission companies and to promote timely payments across the power sector. These rules provide a mechanism for settlement of outstanding dues of generation companies, ISTS Licensees and Electricity Trading Licensees. The rules provisioned for converting distribution companies outstanding dues to these companies into equated monthly instalments ("EMIs") for gradual liquidation of these dues. Further, to promote timely payment of current power bills, the power supply would be regulated for distribution companies that fail to clear their bills one month after the due date of payment or two-and-a-half months after the presentation of the bill by the generating company. Since the notification of the LPS Rules, there has been significant progress in recovering outstanding dues, with most distribution companies now adhering to regular payment schedules. The total unpaid bills have reduced from approximately ₹ 1.4 lakh crores in June 2022 to approximately ₹ 48,000 crores in February 2024. As such, the issue of non-payment by distribution companies is resolved to a great extent and provided much required regulatory certainty. The major driver for this trend has been LPS Rules, which converted legacy dues to EMIs. The LPS rule helped bring down days payable from 166 in Fiscal 2022 to 126 in Fiscal 2023. (Source: CRISIL Report)

***End-to-end value chain capabilities and an integrated approach to developing renewable power projects by our in-house project development, EPC and O&M teams***

We have an integrated in-house approach to executing our renewable projects across the entire life cycle of developing a project, from PPA signing to the project achieving commercial operations within 18 to 24 months and subsequently operating and maintaining the project. We have leveraged our capabilities to capitalize on the

growing renewable power industry in India and successfully won competitive bids for diverse renewable energy projects.

Our project development team has extensive experience in the renewable energy industry with the experience of completing renewable energy projects in a time and cost efficient manner. Our end-to-end value chain capabilities include tendering and bidding, land acquisition and obtaining relevant approvals, financial closure, design engineering, procurement and construction and operations and maintenance.

The ACME Group has a track record of developing, executing and commissioning a total of 2,719 MW (3,668 MWp) of solar power projects in 12 states in India from inception as set forth in the following table:

| Financial Year |              | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 | Fiscal 2021 | Fiscal 2020 | Fiscal 2019 | Prior to Fiscal 2019 |
|----------------|--------------|-------------|-------------|-------------|-------------|-------------|-------------|----------------------|
| Capacity (MW)  | commissioned | 250         | 300         | -           | 20          | 335         | 760         | 1,054                |

Certain of our key differentiators include:

- Project Development.** We focus on establishing robust connectivity to seamlessly integrate our projects with substations. We assess substations with available capacity, conduct comprehensive evaluations of various factors before initiating connectivity including solar irradiation, wind speed and availability of land. We secured 2,400 MW of connectivity in Fiscal 2024 and 2,150 MW of connectivity in Fiscal 2025 till date from Government and state entities through various options including providing bank guarantees, acquiring land and receipt of letter of awards. Further, we have secured additional connectivity of 647 MW which has not yet been allocated to any projects and have applied for 3,300 MW of connectivity for future bids, ensuring the readiness of evacuation systems in alignment with stipulated timelines essential for our future project commissioning schedules. This proactive approach is aimed at securing connectivity well in advance of bid conclusions, which provides us competitive advantages. We continuously evaluate additional connectivity options to help us grow our business.

We proactively engage in discussions with external stakeholders for securing additional connectivity and land in high irradiation/high wind speed locations. These additional capacities are allocated to new projects that are won assisting us in developing the projects in a timely fashion. For land identification, we utilize solar resource maps, satellite imagery, and geographic information system tools to identify potential sites with high solar irradiance, flat or gently sloping terrain, wind resource assessments and proximity to existing infrastructure. Further, we conduct site visits to verify the suitability of the land, considering factors such as accessibility, topography and land use. As of the date of this Red Herring Prospectus, we have a land bank of approximately 1,200 acres comprising land purchased and leased.

- Tendering and bidding.** We only submit bids for those renewable energy auctions where we are comfortable with the policies, incentives, credit history of the off-taker, and where there is access to evacuation infrastructure, transmission systems, water, roads and communications networks and other ancillary infrastructure, competitive intensity, capacity on offer and restrictions on maximum/minimum bid quantity (if applicable). Renewable energy auctions are assessed against certain key parameters, including threshold return requirement to determine the attractiveness of the auction and accordingly determine our bid strategy. ACME Group's tendering, bidding and PPA implementation team has a track record of successfully winning bids.

The table below sets forth the percentage of bids the ACME Group, ACME Cleantech, our Company and our Subsidiaries won against the total bids that it participated in and those that came up for auction in the Indian solar power sector in the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

| Particulars                                                                                       | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024          | Fiscal 2023 | Fiscal 2022 |

Notes:

<sup>(1)</sup> Source: CRISIL Report

<sup>(2)</sup> This includes 320 MW of the FDRE project being undertaken by ACME Sun Power Private Limited with SJVN allocated as part of a green shoe option.

<sup>(3)</sup> The capacity was secured during the three months ended June 30, 2024 as the bid was submitted in the first quarter and the e-reverse auction was conducted on July 16, 2024. Additionally, our Company has been awarded a capacity of 300 MW each from SJVN and SECI subsequent to June 30, 2024.

<sup>(4)</sup> None of our Step-Down Subsidiaries participated in any bids in the financial periods mentioned above.

In Fiscal 2024, the ACME Group was one of the leading bidders for FDRE projects (Source: CRISIL Report) entailing integration of solar, wind and battery storage technologies to deliver continuous power especially during peak demand hours. It won projects with an aggregate capacity of 1,250 MW out of 8,250 MW auctioned (Source: CRISIL Report) representing 15.15% of the total FDRE projects bids in India during Fiscal 2024.

- **Land acquisition.** Our land acquisition team is conversant with local practices which helps us to acquire land without any disruptions. Once we win a bid, we obtain the land required for the renewable power project either by purchasing the land or by entering into lease agreements with the land-owners. The ACME Group's land acquisition team has extensive experience in acquiring and

leasing land for our projects and has acquired/leased more than 15,000 acres of land across 12 states since inception, highlighting the capability of the team to acquire large parcels of land for our projects. For further details on our land acquisition process, see “— **Project Development Mechanism**” on page 266.

- **Our EPC and O&M capabilities.** Due to our scale, size and experience, we are able to maintain a full-fledged EPC team to undertake the EPC related activities of our projects. We believe that the scale of our operations and our growth strategy enables us to deploy our EPC resources across any future projects that we win, in an efficient and timely manner, without affecting the scheduled timelines of project development. Our in-house O&M team centrally monitors all of our plants with real time tracking of performance using supervisory control and data acquisition (SCADA) system which comprises computers, networked data communications and graphical user interface for supervision of our machines and processes. In June 2024, our Company and ACME Cleantech entered into an agreement pursuant to which certain employees of ACME Cleantech who are engaged in EPC and O&M activities shall be transferred to our Company thereby strengthening our in-house EPC and O&M capabilities. For further details, see “—**Project Development Mechanism – Internal Restructuring**” on page 269.
- **Cost efficiencies.** We have a wide base of domestic and international vendors and have strategic relationships which assist us to maintain a stable supply chain and our bulk order strategy enhances our negotiation power with vendors. Our supply chain management team strives to maintain efficiency in our operations, ensure that we receive equipment within anticipated timelines and at competitive cost in the market within our approved budget. We also focus on developing our projects in an efficient manner, optimizing our finance costs and obtaining regulatory approvals in a timely manner.

Our in-house EPC capabilities allow us to control our process, costs and timelines, use our project design expertise, be flexible with our choice of technology and top tier suppliers, while also being actively involved in the technological, build-of-material and design features of the components. We also utilize technologically advanced modules including bifacial modules to optimize power generation, where possible.

As part of our EPC function, our construction capabilities are also a significant strength in our business. We utilize our own civil and electrical engineers with proven project development and project management capabilities to develop and monitor our projects. Our organizational structure allows on site decision making, so that project managers can respond to changing situations during the construction phase of a project. Having in-house construction expertise allows us to track the pricing trends of raw materials, monitor established milestones during the construction phase, strengthen our design expertise and maintain quality of build when we develop a project.

Our in-house O&M capabilities, through the use of technology, forecasting software, central monitoring system software, maintenance scheduling and other systems, allow us to monitor our portfolio performance and operational metrics, in order to maximize our plants’ utilization rates, availability and system life.

Our integrated approach to project development allows us to control our costs, especially in our EPC related activities where we would have otherwise paid higher amounts to third-parties, thus allowing us to retain the construction related margins. This also assists us in increasing internal cash accruals for future development.

#### ***Expansive portfolio diversified across different renewable energy technologies***

We have an expansive portfolio of projects diversified across different renewable energy technologies. Our projects are located across 11 Indian states of Rajasthan, Gujarat, Punjab, Madhya Pradesh, Uttar Pradesh, Bihar, Chattisgarh, Andhra Pradesh, Odisha, Karnataka and Telangana. According to the CRISIL Report, states like Gujarat, Rajasthan, Madhya Pradesh, Andhra Pradesh, Karnataka, and Tamil Nadu offer more solar irradiance as compared to other parts of India which makes them desirable for installing solar projects. Further, states such as Gujarat, Maharashtra, Karnataka, Tamil Nadu and Andhra Pradesh have excellent wind as well solar potential and provide great opportunities for supply of hybrid power. (Source: CRISIL Report)

We have an aggregate Operational Project capacity of 1,340 MW (1,826 MWp) solar power projects; Under Construction Contracted Project capacity of 3,250 MW including solar power projects of 1,500 MW (2,192 MWp), wind power projects of 150 MW, hybrid projects of 1,030 MW and FDRE projects of 570 MW; and Under

Construction Awarded Project capacity of 1,730 MW comprising 600 MW (870 MWp) of solar power projects, 450 MW hybrid power projects and 680 MW of FDRE power projects, as of the date of this Red Herring Prospectus.

The following chart sets forth the geographical spread of our Portfolio, i.e., Operational Projects, Under Construction Contracted Projects and Under Construction Awarded Projects, as of the date of this Red Herring Prospectus:

*Note:*

*In addition to the above, as part of our hybrid and FDRE projects, we will install BESS with a total capacity of 4,756 MWh for FDRE and hybrid projects.*

*The current configuration of solar, wind and battery has been identified based on our initial assessment and may undergo change on account of change in capital expenditure cost of these resources and the same will be finalized at the stage of financial closure.*

Our Under Construction Contracted Projects include solar projects of 1,500 MW (2,192 MWp) being constructed in Rajasthan, wind projects of 150 MW being constructed in Gujarat, hybrid project of 1,030 MW being constructed in Andhra Pradesh, Karnataka, Rajasthan and Gujarat and FDRE projects of 570 MW being constructed in Rajasthan and Gujarat.

According to the CRISIL Report, India has introduced round-the-clock generation tenders, including hybrid tenders to strengthen clean generation combining solar, wind and storage technologies. The MNRE introduced the National Wind Solar Hybrid Policy on May 14, 2018. The main objective of the policy is to provide a framework for promoting large grid connected wind solar hybrid systems and efficient utilization of transmission infrastructure and land. It also aims to reduce the variability in renewable energy generation and achieve better grid stability. As on June 30, 2024, hybrid projects of aggregate capacity 12,884.35 MW are under construction in the country. It is expected that India will witness 21 to 24 GW of wind solar hybrid capacity in the next five years (Fiscal 2024 to Fiscal 2029) out of which around 12 to 13 GW will be from wind. (Source: CRISIL Report) Further, major payment security mechanisms to de-risk investment in renewable energy are invoked in case of delays/default in payment to renewable energy generating companies and have been further strengthened by the notification of the LPS Rules. (Source: CRISIL Report) Various initiatives such as stringent LPS Rules, mandatory letter of credit by distribution companies, regulation of power supply in case of non-maintenance of payment security mechanisms, denial of open access in case of non-payment of dues beyond 75 days from due date have tightened the payment security and brought in the much-required discipline in payments to renewable energy generators by distribution companies. (Source: CRISIL Report)

Following such developments, we have recently acquired certain projects with a contracted capacity of 2,080 MW comprising 830 MW of hybrid and 1,250 MW of FDRE projects from ACME Cleantech. Out of acquired capacity, for 450 MW capacity, our Company has entered into share purchase and shareholders agreements with ACME Cleantech and relevant SPVs. Pursuant to such share purchase agreements, our Company has acquired 49.00% of the equity share capital of such SPVs, while remaining 51.00% continues to be held by ACME Cleantech. In terms of such share purchase and shareholder agreements, our Company exercises control over such SPVs; and responsibility of overall development, commissioning, and funding of the relevant project shall reside with our Company.

Further, our Company has the right to acquire the remaining 51.00% of the equity share capital held by ACME Cleantech post expiry of the relevant PPA lock-in-period (as set out under bid documents as well as the respective power purchase agreement to be entered into by such SPVs), which is one year post the commercial operation date for the respective projects housed in these SPVs. For the remaining 1,630 MW capacity, our Company has acquired the entire equity share capital of the respective SPVs.

The following chart sets forth details of our Portfolio segregated across project type, as of the date of this Red Herring Prospectus:

#### ***Long-term stable cash flows based on contracts with central and state government entities***

Almost all of our portfolio is contracted through long term power purchase agreements with central and state government backed entities typically for a period of 25 years. For further details, see “– **Power Purchase Agreements**” and “**Selected Operating Information**” on pages 218 and 226, respectively. As of June 30, 2024, the weighted average residual period (based on the contracted capacity) under the PPAs for all our Operational Projects was 19.94 years. We generally execute our PPAs before we commence the development and construction of our projects. As a result, once the project is commissioned and it is connected to the grid, we are able to immediately sell electricity pursuant to our contractual arrangements.

Our portfolio offtake for our projects are with central and state government entities and government-backed entities, except for one Under Construction Contracted solar merchant project of 300 MW. Almost all of our PPAs (apart from the contracted capacity of 40 MW across two projects, one each in Gujarat and Madhya Pradesh, which were awarded under earlier project tendering regimes) were won on the basis of transparent competitive biddings that were conducted by central and state government backed entities that have strong regulatory support, which in our experience has minimal counter-party risk. Our PPAs typically provide for fixed tariff rates or, in some cases, clearly defined tariff escalation provisions.

The following charts set forth details of the tariff and off-taker rating bifurcation for our Portfolio:

Note: The credit ratings of the relevant off-taker is sourced from the CRISIL Report and the bifurcation above is derived from the CRISIL Report based on the off-takers for our Operational Projects, Under Construction Contracted Projects and Under Construction Awarded Projects, as applicable. Please note that "Not Rated/NA" category represents operational capacity of 25 MW, whose off-takers are North Bihar Power Distribution Company Limited and South Bihar Power Distribution Company Limited and Under Construction Contracted Capacity of 300 MW solar merchant plant, whose credit ratings are not included in the CRISIL Report.

### Access to diversified sources of funding

We have extensive experience in effectively financing our renewable power projects, minimizing investment risks, optimizing our capital structure and maximizing returns for each project. Our approach to each project is to determine the appropriate level of equity investment, taking into account our existing capital, growth plans and assessment of available opportunities, and to obtain debt financing for the remainder of the capital requirements for each project on the best terms and tenure, given our strategic objectives and practical requirements.

We generally invest equity of approximately 25% of the total project cost in each power project. For the remaining approximately 75% of the total project cost, we have worked with a number of lenders to obtain debt financing. This provides us the flexibility we require in project development and enables us to obtain competitive interest rates. Additionally, we have raised capital in the form of structured debt from strategic and financial investors to develop projects in India.

We have been able to successfully refinance some of our debt in the past and have reduced the interest payable on such loans, increased the tenure as well as the debt amounts. We have also successfully refinanced the debt of certain of our Project SPVs through green bonds wherein the Project SPVs issued unlisted NCDs in Fiscal 2022 for a total amount of ₹ 24,855.25 million (US\$ 334.00 million) including a top up debt of ₹ 5,029.30 million (US\$ 67.58 million) to India Cleantech Energy, whose green bonds are listed on the Singapore Stock Exchange. From April 1, 2020 till the date of this Red Herring Prospectus, we have raised a total refinanced debt of ₹ 32,995.70 million including a top-up debt of ₹ 6,188.80 million through rupee term loan from several Indian lenders assisting us to reduce our cost of debt.

We have also strategically divested projects to help churn the capital and have deployed it for new projects. These initiatives have helped enhance our liquidity, reduce our borrowings thus enabling us to invest in new projects. As of date of this Red Herring Prospectus, we have divested 1,379 MW of projects to various reputed investors and raise equity capital through such asset divestments demonstrating the quality of assets built by us. The following table sets forth certain details of the year-wise divestment details:

| Year of Divestment | Capacity (AC) MW of Solar Power Plant | Buyers                                        |
|--------------------|---------------------------------------|-----------------------------------------------|
| Fiscal 2024        | 369                                   | Blupine (Blupine Energy Private Limited)      |
| Fiscal 2023        | -                                     | -                                             |
| Fiscal 2022        | 250                                   | Ayana (Ayana Renewable Power Private Limited) |
|                    | 260                                   | Renew (Renew Solar Power Private Limited)     |
| Fiscal 2021        | 400                                   | Actis (Actis Greengen Limited)                |

| Year of Divestment | Capacity (AC) MW of Solar Power Plant | Buyers                                     |
|--------------------|---------------------------------------|--------------------------------------------|
|                    | 100                                   | Amplus (Amplus Energy Solutions Pte. Ltd.) |
| <b>Total</b>       | <b>1,379</b>                          | <b>-</b>                                   |

We have been able to effectively utilize capital by carefully managing costs per project through economies of scale available to us and the strong relationships that we have built with suppliers and lenders, by efficiently identifying suitable and economically advantageous parcels of land for projects and effectively managing our project targeting and bidding processes. We believe that our tested strategies in managing investments in new projects will continue to allow us to fund our growth strategy while providing value to our stakeholders.

### ***Design and value engineering leading to higher efficiencies***

While submitting a bid for a renewable power project, it is important to accurately estimate the cost of production and the output expected to be generated in order for the project to be economically viable.

We use value engineering to achieve optimum CUF per unit of capital investment. This involves initiatives such as installing a higher number of modules at optimal DC:AC ratios and optimizing the capacity of the inverters and balance-of-plant to augment output from the solar power project. In addition, we also use technologically advanced modules including bifacial modules to optimize power generation, where possible. For wind projects, we forecast and determine wind resource availability which enhances the effectiveness of our turbine site selection. Also, we engage with vendors and project implementation teams of wind turbine generators to optimize the design of our wind power plant.

We have a dedicated technology team which evaluates new technology and utilizes different software to help us manage in-house engineering right from the bidding stage to the final execution of a project. We use software tools that help us optimize design capacity and capitalize on opportunities especially for FDRE projects. We utilize multiple technology systems including laboratory breakdown voltage kits I-V curve tracers, cable fault locators, thermal imagers, electroluminescence testing and oil filtration machines. For performance tracking, we have an in-house central monitoring system, remote SCADA, and preventive maintenance portals.

Our engineering capabilities also include implementing a cost optimal and reliable approach to designing our project layouts by conducting a thorough analysis of potential land parcels on the basis of cost, solar radiation, grid connection infrastructure, using seasonal tilting systems to mount our modules as opposed to solar tracker systems for higher yields, utilizing in-house designed pile foundations, installing cable trenching depending on the type of land strata, and using standardized specifications and layouts for switchgear, transformer foundations and main control room buildings.

### ***Committed Promoters and senior management team***

Manoj Kumar Upadhyay, one of the Promoters and the Chairman and Managing Director of our Company has more than two decades of experience in the power, telecommunications and energy management and storage sectors. He has cleared the examination for a diploma in electronics engineering and has been an innovator and a seasoned entrepreneur with patents registered in his name. In 2003, he founded our Promoter, ACME Cleantech to provide innovative, energy efficient, environment friendly products for passive telecommunications infrastructure. His leadership, vision and experience have enabled the ACME Group to commission its first solar project in March 2012 and thereafter commission renewable power projects with an aggregate capacity of 2,719 MW (3,668 MWp), as of date of this Red Herring Prospectus. For further details, see “***Our Management – Brief profiles of our Directors***” on page 387.

Our Promoter, ACME Cleantech, has a proven track record of developing renewable power projects and has also significantly invested in our business through a combination of equity and debt financing in our Company and our project SPVs. ACME Cleantech has also supported us with bank guarantees for the security we are required to provide at the time of submitting a bid for a renewable power auction and has also provided us with support for the performance guarantees and corporate guarantees our project SPVs are required to have in place for the development phase of a project.

We have a well-qualified senior management team with extensive experience in the renewable energy industry, which positions us well to capitalize on future growth opportunities. The heads of functional groups enhance the quality of our management with their specific and extensive industry experience. Our senior management includes

Nikhil Dhingra, our Chief Executive Officer with oversight across all areas of our business operations and developing and implementing long-term growth strategies; Purushottam Kejriwal, our Chief Financial Officer with responsibility for our finance, fund raising and strategic planning; Manish Jha, our Chief Operating Officer, Renewable Business with responsibility of overall operations of our projects; Mr. Rahula Kumar Kashyapa, our Chief Commercial Officer – Renewable Business and Mr. Rajesh Sodhi, Assistant Vice President, Company Secretary and Compliance Officer.

Further we benefit from the experience and knowledge of our directors who bring with them decades of expertise in areas of business strategy, operational and financial capabilities and strong corporate governance.

## **Our Strategies**

The key elements of our business strategies include the following:

- *Expand and diversify our portfolio to continue to maintain our leadership position;*
- *Continue to invest in and improve our integrated business model;*
- *Focus on technology upgrades to improve efficiency and longevity of our projects; and*
- *Continue to diversify our funding sources, optimise our cost of capital and identify partners/investors for future growth.*

### ***Expand and diversify our portfolio to continue to maintain our leadership position***

Over the years, we have diversified and expanded our portfolio from solar power projects to become an integrated renewable energy company in India and we intend to continue to expand and diversify our portfolio to maintain our leadership position. According to the CRISIL Report, battery energy storage systems is another form of storage technology which has gained traction in the last few years and can be installed easily, requires less time for setup, and can be used for a wide range of grid support activities, such as energy time shift, distribution deferral, and energy arbitrage. We have an Under Construction Contracted Project capacity of 3,250 MW including solar power projects of 1,500 MW (2,192 MWp), wind power projects of 150 MW, hybrid projects of 1,030 MW and FDRE projects of 570 MW; and Under Construction Awarded Project capacity of 1,730 MW comprising 600 MW (870 MWp) of solar power projects, 450 MW hybrid power projects and 680 MW of FDRE power projects, as of the date of this Red Herring Prospectus.

According to the CRISIL Report, pumped hydro storage projects is the most widely used and commercially available means of energy storage technology in India. However, their total installed capacity is minuscule at approximately 4% of the exploitable potential in the country. In Fiscal 2024, the ACME Group was one of the leading bidders for FDRE projects (*Source: CRISIL Report*) and won projects with an aggregate capacity of 1,250 MW out of 8,250 MW auctioned (*Source: CRISIL Report*) representing 15.15% of the total FDRE projects bids in India during Fiscal 2024, which required installation of high renewable energy capacity and BESS for supplying firm and dispatchable power during peak hours of the day. Further, under the hybrid projects which have been awarded to us, we are required to install higher solar and wind capacities in order to supply power at a higher CUF compared to standalone solar and wind projects, respectively. In addition, ACME Cleantech has signed a memorandum of understanding with the Government of Uttar Pradesh for the development of a 600 MW closed loop pump storage project in the state by ACME Urja Two Private Limited, the relevant project SPV. On June 17, 2024, our Company acquired the entire equity share capital of ACME Urja Two Private Limited.

We believe that our adeptness in the development of renewable energy projects positions us well to secure bids for additional integrated projects. By combining our expertise and leveraging the experience of our Promoters across renewable energy sources, we intend to offer comprehensive solutions that capitalize on the strength of each technology. This integrated approach enhances the feasibility and attractiveness of our solutions and demonstrates our ability to deliver innovative, reliable and sustainable energy solutions in an increasingly competitive market landscape. Further, the cross-disciplinary expertise will enable us to identify synergies, mitigate potential challenges, and ultimately drive greater efficiency and effectiveness in our renewable energy projects.

### ***Continue to invest in and improve our integrated business model***

The growth of our portfolio of assets is critical to us and in order to seamlessly grow our operations, we intend to invest in our business units and continue to develop and maintain established procedures for each stage in the

project development cycle. These include using standardized parameters for determining the auctions that we will submit bids for, using standardized processes for evaluating land, interacting with the relevant local or government authorities to obtain the relevant approvals for a project, designing and developing a project site, procuring our components in a timely manner and constructing the project. We believe that having established procedures in place should help reduce the costs of developing a project and improve the timelines within which the project will be commissioned.

We will continue to leverage our supplier relationships and diversify our supplier base to maintain a stable supply of high-quality and cost-effective components. As we continue to enhance economies of scale, we expect to further reduce the costs of these components. We will also leverage our supplier relationships to shorten delivery timelines to reduce the gestation period from when we are awarded a project to bringing the project to its commercial operation date (that is, the date on which a project receives its completion certificate or is connected to the grid).

Further, in line with our group strategy to be an integrated player, MKU Holdings Private Limited (one of our Promoters) is currently setting up a manufacturing facility for solar PV modules in Jaipur, Rajasthan, India. The manufacturing facility is expected to be commissioned by the end of 2024 and have an annual capacity of 1,200 MW. We have entered into a memorandum of understanding dated June 25, 2024 with MKU Holdings Private Limited for the supply of solar PV modules to us from the manufacturing facility. We expect to benefit from such backward integration capabilities of the ACME Group and have better visibility over our supply chain and enhance cost efficiency and reliability.

By having our EPC and O&M services in-house, we will seek to use our resources at optimal levels to ensure that our development and maintenance processes are streamlined and efficient, in order to increase our profitability.

#### ***Focus on technology upgrades to improve efficiency and longevity of our projects***

We have been experimenting with our value engineering approach to make our projects more economically viable to improve efficiency, plant availability and output and, as a result, profitability. We introduced optimal DC:AC ratios at our projects, utilize customized software for forecasting and use bifacial modules to optimize power generation at some of our projects.

In addition, we intend to “repower” our solar projects. By “repowering” we counter module degradation to maintain the same level of electricity output in order to maintain the same level of projected cash flow. Under this system, we intend to install additional modules every two to three years, to match the actual or expected loss of output from the existing modules, thereby maintaining production output and high CUF. We also purchase additional land for use to repower or add more DC capacity to counter module degradation. In addition, we have implemented robotic cleaning technology for certain of our projects that would help in optimizing the module cleaning process, improve generation and save water in arid regions. According to the CRISIL Report, robotic cleaning not only helps in achieving better efficiency but is also more environmentally friendly since it uses less water and no chemical cleaners.

#### ***Continue to diversify our funding sources, optimise our cost of capital and identify partners/investors for future growth***

We finance our projects with an optimal mix of equity and debt, including flexible structures with options to refinance at better commercial terms and longer tenors in the future. This helps us to efficiently use capital and utilize our borrowing limits for upcoming projects. Our ability to access diversified pools of capital coupled with our strong credit profile has enabled us to raise funding and refinance our projects regularly and on competitive terms and longer tenors.

As we grow our business and strategically undertake new projects, we will continue to explore various funding sources and our ability to access diversified pools of capital enables us to raise funding with an optimized capital structure. Further, we intend to reduce our cost of borrowings by leveraging our relationships with banks and financial institutions to secure financing at favorable terms, which will help us reduce our finance cost and improve our profitability.

We have, in the past, explored arrangements with equity partners / investors to meet the funding requirements of the projects awarded to us. We will continue to explore similar strategic partnerships by evaluating the quantum of investment required and selecting projects where the risk-reward profile and profitability (including EPC

margins) is favorable. We will aim to capitalize on our prior experience, capabilities, and track record of identifying suitable partners / investors in order to meet the funding requirements of our projects in the future for overall benefit of shareholders. This will help us to diversify our sources of funding and raise capital for green field ventures.

In addition, we may also be required to meet technical or other requirements as part of the prequalification for bidding of a contract or execution of a project for which, we may be required to enter into joint venture agreements or form a subsidiary with other entities. Any such arrangement would also allow us to pool in the technical and management skills, expertise, finances, and equipment of our partner as may be necessary.

### ACME Group Holding Structure

- As our Company and ACME Cleantech are part of the ACME Group, bidding for renewable energy projects (which includes Solar, Wind, Hybrid and FDRE projects) has been historically done by both of them (directly or indirectly through their respective subsidiaries). Further, as on the date of this Red Herring Prospectus, the entire shareholding of our Company is held by ACME Cleantech itself or through its nominees. During Fiscal 2024, the ACME Group decided to demerge the solar and wind business of our Company into ACME Cleantech on a going concern basis and amalgamation of our Company with its remaining business with and into MKU Holdings Private Limited and accordingly a scheme for amalgamation was filed on June 27, 2023 with the National Company Law Tribunal, Chandigarh. Subsequently, ACME Group started bidding for all the renewable energy projects under ACME Cleantech and was awarded 2,380 MW of capacity under various tenders participated by it in Fiscal 2024. Subsequently, our Board in its meeting held on May 27, 2024, approved the resolution to withdraw the scheme and the National Company Law Tribunal, Chandigarh pursuant to an order dated June 7, 2024 allowed the petition to withdraw the scheme.
- When our Company decided to raise fresh funds through this Offer, it undertook an internal restructuring exercise for transferring the entire renewable energy project portfolio, which includes Solar, Wind, Hybrid and FDRE Projects under our Company. Pursuant to such internal restructuring exercise, our Company acquired 100% shareholding of six SPVs from ACME Cleantech. Further it also acquired 49% shareholding (as permitted under the relevant bid documents) of three subsidiaries from ACME Cleantech (namely, ACME Renewtech, ACME Sigma Urja and ACME Alpha), and has entered into shareholders' agreement with ACME Cleantech which gives our Company the right to acquire the remaining 51% of the equity share capital of these subsidiaries as provided under the respective shareholders' agreement. As per the terms of the shareholders' agreement, our Company has the right to nominate all of the directors on the board of these three SPVs.

- Further, in the past, ACME Cleantech has undertaken O&M and certain EPC business for the renewable energy projects housed under the ACME Group.

On June 25, 2024 (“**Effective Date**”), our Company has entered into a non-compete agreement with ACME Cleantech and MKU Holdings (promoter of ACME Cleantech) which, when read with the amendment agreement dated October 7, 2024, provides that (a)(i) MKU Holdings and ACME Cleantech and, (ii) all the subsidiaries of MKU Holdings and ACME Cleantech, other than our Company and its subsidiaries, directly and indirectly, will not carry on, or engage in any business that competes with the renewable energy business of our Company and subsidiaries, and (b) all the subsidiaries of MKU Holdings and ACME Cleantech, other than ACME Solar and subsidiaries shall not undertake EPC and O&M related business other than undertaking supply of modules and wind turbines for the existing renewable energy projects as on the Effective Date which are being implemented by ACME Solar by itself or through its Subsidiaries.

- On June 25, 2024, our Company and ACME Cleantech has also entered into a deed of novation which, when read with the amendment agreement dated October 7, 2024, provides that, as part of certain internal restructuring contemplated within the ACME Group, all operations and maintenance related activities and operations shall be housed within our Company and for the assets held under its subsidiaries. Accordingly, ACME Cleantech had agreed to novate all of its rights, obligation, interests and title under the O&M agreements entered into with the SPVs, to our Company through this deed of novation. Further, on June 25, 2024, our Company has entered into an agreement with ACME Cleantech which, when read with the amendment agreement dated October 9, 2024, provides for the transfer of certain employees, including employees who are engaged in EPC and O&M operations of the projects, of ACME Cleantech to our Company, to bring all the capabilities of EPC and O&M operations within the purview of our Company.
- Consequently, the entire renewable energy business (which includes solar, wind, hybrid, FDRE projects and inhouse-EPC and O&M services), including all operational and upcoming projects, EPC and O&M divisions are now housed under our Company, along with a non-compete agreement between our Company, MKU Holdings and ACME Cleantech, in order to avoid any overlap of the business.

## Our Key Business Divisions

Below are our key business divisions and key functions undertaken:

| Key Business Divisions                                                                                                                                       |                                                                                                                                                                                |                                                                                                                                                                  |                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                              | EPC Team                                                                                                                                                                       |                                                                                                                                                                  |                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                        |
| Business Development                                                                                                                                         | Engineering & Design                                                                                                                                                           | Procurement                                                                                                                                                      | Execution & Construction                                                                                                                                                                                                                                                 | Land Acquisition                                                                                                                                                                                                                       |

## Our Renewable Energy Power Projects

We are a renewable energy company in India with a portfolio of solar, wind, hybrid and FDRE projects. Over the years, we have diversified and expanded our portfolio from solar power projects to wind, hybrid and FDRE projects.

A brief description of hybrid wind-solar projects and FDRE projects are as follows:

*Hybrid Wind-Solar Projects:* In May 2018, the Ministry of Power issued the Wind-Solar Hybrid policy with an objective to provide a framework for promotion of large grid connected wind-solar PV hybrid system for optimal and efficient utilization of transmission infrastructure and land, reducing the variability in renewable power generation and achieving better grid stability. The policy also aims to encourage new technologies, methods and way-outs involving combined operation of wind and solar PV plants. Hybrid projects typically provide higher CUF than standalone solar or wind projects. This is due to the fact that the wind projects operate optimally during morning and night and thus complement solar projects which peak during daytime. As per the revised bidding guidelines, the rated power capacity of one resource (wind or solar) in such projects should be at least 33% of the total contracted capacity. The guidelines also allowed the setting up of the solar and wind projects as same or different locations. To meet the energy obligations under the power purchase agreements, developers generally install higher renewable energy capacity than the contracted capacity under the hybrid scheme. (Source: CRISIL Report)

*FDRE Projects:* In June 2023, the Ministry of Power, Government of India, issued guidelines for procurement of firm and dispatchable power from grid connected renewable energy projects with energy storage systems. The guidelines explained the term ‘firm and dispatchable power’ as the power profile configuration that is defined in the request for selection that is sought to be met by renewable energy power sources and will include configurations like assured peak power, round the clock renewable energy with firm delivery of power at rated capacity at any hour of the day as per demand or load following power delivery as specified by discoms and renewable energy projects with firm delivery of power for fixed hours of requirement by discoms. The guidelines also broadened the renewable energy to include solar power generating systems, wind power generating systems, wind solar hybrid; or any other renewable energy resource based generating system or a combination thereof, with energy storage system. (Source: CRISIL Report)

Energy from solar and wind projects is intermittent and infirm in nature resulting in lower capacity utilization. However, FDRE addresses these challenges by providing following solutions:

- i. Firm power supply as per demand given by utilities; and
- ii. Higher capacity utilization factor.

Under FDRE, the project developer is required to supply renewable energy power in a firm and dispatchable manner, matching the demand profile(s) provided by the buying entity. To provide firm power, developers are required to install mandatory energy storage system (either battery energy storage system or pumped hydro storage system) which are charged through renewable energy and discharged as per power requirement of buying entities. Further, to meet energy obligations under the power purchase agreements developers generally install higher renewable energy capacity than the contracted capacity. (Source: CRISIL Report)

For selected information, in relation to our Operational Projects, Under Construction Contracted Projects and Under Construction Awarded Projects, please see “**Selected Operating Information**” on page 280.

## Operating Indicators

### *Operating indicators for solar projects*

A solar power project’s performance generally depends on the following parameters:

- Irradiation levels at the project site;
- Quality and efficiency of solar modules; and
- Project design and engineering.

### ***Irradiation Levels at the Project Site***

A key determining factor of the performance of a solar power project is the solar irradiation level at the project site. Higher irradiation levels lead to greater energy yield per MW installed. Irradiation levels at a site can be estimated based on historical average global horizontal irradiance (“**GHI**”) data and soiling losses. GHI represents the total amount of shortwave radiation received from above by a surface which is horizontal to the ground and its levels vary during a period due to changes in solar irradiation, temperature, cloud cover, dust levels and the bell curve of the sun’s activity cycle.

We identify suitable project sites by conducting a detailed analysis of potential land parcels on the basis of solar irradiation, proximity to existing grid infrastructure, land cost and other relevant information. For further details on our process for identifying project sites, see “— **Project Development Mechanism**” on page 266.

### ***Quality of Solar Photovoltaic Modules***

Solar photovoltaic (“**PV**”) modules are one of the most important components of a solar power project. Modules perform differently under the varying conditions of irradiance, temperature, shading and voltage at project sites. Therefore, modules need to be carefully selected based on suitable technical evaluation as well as performance guarantees provided by manufacturers.

Our suppliers for solar PV modules include tier 1 suppliers and are actively involved in the technological, build-of-material and design features of the modules. For further details on our process for procuring modules, see “— **Project Development Mechanism**” on page 266.

### ***Project Design and Engineering***

Detailed design and engineering is used to optimize the output of a solar power project to maintain productivity levels. These design initiatives include installing modules at appropriate tilt angles, avoiding shading created by surrounding objects or terrain in order to capture maximum solar irradiation, installing higher number of modules at optimal DC:AC ratios and optimizing the capacity of the inverters and balance-of-plant to augment output from the solar power project.

Solar modules generate DC electrical output that is converted to AC through an electrical inverter. The bid documents for solar projects awarded to us require us to restrict output to a certain maximum AC level (“**AC Capacity**”). Therefore, an important aspect of engineering for a solar project involves installing optimum number of DC solar modules (“**DC Capacity**”) to attain the desired level of AC Capacity.

The generation at a project site can also be further enhanced through “repowering”, which entails installing additional modules over a period of time.

Our suppliers for solar PV modules include certain tier-I solar PV module suppliers and we are actively involved in the technological, build-of-material and design features of the solar PV modules. For further details on our process for procuring solar PV modules, see “— **Project Development Mechanism**” on page 266.

In order to monitor the performance of our projects, we measure and focus on optimising the CUF of the solar power project. The CUF is the ratio of the actual output of our solar power plants over the reporting period to their potential output if it were possible for them to operate uninterruptedly at full rated capacity for that entire operating period. The CUF is not the same as the plant availability factor. The variability in CUF is a result of differences in irradiation at various times of the day as well as during different seasons in a year, cloud covers, the daily rotation of the earth, equipment efficiency losses, breakdowns of transmission systems and grid availability. We track CUF as a core measure of the performance of our solar power projects. High CUF results in increased electricity generation and indicates high operating efficiency and also validates our value engineering and operations research. Monitoring CUF on a real time basis allows us to respond effectively to potential generation anomalies.

### ***Operating indicators for wind projects***

A wind power project’s performance generally depends on the following parameters:

- Wind speed at the project site;
- Quality and efficiency of WTGs; and
- Project design and engineering.

### ***Wind Speed at the Project Site***

A key determining factor of the performance of a wind power project is the wind speed at the project site. In our experience, higher speed leads to better energy yield. Wind speed levels at a site are estimated based on long-term site-specific wind data. This data helps in identifying coordinates for establishing wind power projects. Further, we analyze other relevant factors such as proximity to existing grid infrastructure, land availability and costing for determining the suitable project sites. For further details on our process for identifying project sites, see “**Project Development Mechanism**” on page 266.

### ***Quality of Wind Turbine Generators***

Wind turbine generation systems (“**WTGs**”) are one of the most important components of a wind power project. WTGs perform differently under the varying conditions of inter-annual variability and impact of wind speed uncertainties at project sites. Therefore, WTGs need to be carefully selected based on suitable technical evaluation as well as performance guarantees provided by manufacturers.

We intend to source our WTGs from established suppliers and intend to be actively involved in selection of the turbine technology, layout, hub-height and rotor motor to be used.

### ***Project Design and Engineering***

Innovative design and engineering is used to optimize the output of a wind power project to maintain output levels. Wind resource assessment and the data gathered from multiple wind masts is used for micro-siting of the project i.e., the placement of wind turbines at the coordinates determined to be the most efficient for energy production.

Wind turbines give output in the form of AC which will be then directly fed into the transmission infrastructure of the project. The generation from a wind power project can be optimised during the later years of operations through “repowering”, which may entail replacement of existing wind turbine generation systems with high capacity and high efficiency wind turbine generation systems. We intend to use our in-house capabilities to optimize the output of the wind power project in collaboration with the wind turbine generation system suppliers.

In order to monitor the performance of our projects, we measure and focus on optimizing the CUF of the wind power project. The CUF is the ratio of the actual output of wind power plants over the reporting period to their potential output if it were possible for them to operate uninterruptedly at full rated capacity for that entire operating period. The CUF is not the same as the plant availability factor. The variability in CUF is a result of differences in wind speed at various times of the day as well as during different seasons in a year, the daily rotation of the earth, equipment efficiency losses, breakdowns of transmission systems and grid availability. We intend to track CUF as a core measure of the performance of our wind power projects. High CUF results in increased electricity generation and indicates high operating efficiency and also validates our value engineering and operations research. Monitoring CUF on a real time basis will allow us to respond effectively to potential generation anomalies.

### ***Power Purchase Agreements***

We have entered into power purchase agreements for each of our Operational Projects and Under Construction Contracted Projects with central and state government entities and government-backed corporations (each a “**Counterparty**”), which generally contain most or all of the following key terms:

**Term and Termination:** The term of each PPA for our solar, wind and FDRE projects is typically 25 years from the commercial operation date of the project, unless otherwise terminated earlier in accordance with the terms of the PPA, which inter-alia, includes failure to commission the project by scheduled commercial operation date, failure to supply power in terms of the relevant PPA and voluntarily or involuntarily becoming insolvent. The PPAs can be renewed prior to the expiry of its term, subject to the terms of the relevant PPA, provided that the relevant permits are valid beyond the term of the relevant PPAs.

**Tariffs:** The PPAs provide for fixed tariff rates (inclusive of all taxes, duties and levies or any other statutory liability) to be paid by the respective Counterparty. In some cases, the PPAs also provide for clearly defined tariff escalation provisions.

*Contracted capacity:* The capacity awarded to the project is the maximum power which can be supplied by the project. Contracted capacity is used to calculate minimum energy requirement to be supplied by the project in a given year. PPAs vary on provision of DC capacity of the plant i.e. extra solar modules or DC equipment in plant design, with recent PPAs allowing increased flexibility to the IPPs to alter such capacity. In certain of our PPAs, flexibility is provided to selling it to any other entity other than the offtaker in the event the generation is over and above 20% of the declared annual CUF provided the first right of refusal will vest with the offtaker.

Our FDRE PPAs have the provisions for Energy Storage Systems (“ESS”), which require a minimum ESS capacity (as a percentage of contracted capacity) in the design of the facility. Further, under our FDRE PPAs, we need to install systems in addition to our power generation capacity to capture energy produced at one time to be used later.

Under certain PPAs, we are required to pay compensation (typically a percentage of the agreed tariff for the particular tariff year) to the Counterparty if the CUF falls below the lower range mentioned in the PPA for such shortfall in the CUF. In addition, it is stipulated in certain of the PPAs that if the CUF exceeds the higher range mentioned in the PPA then the tariff payable by the Counterparty will be 75% of the agreed tariff, for such excess energy, subject to counter party off-taking such excess power. Certain of the PPAs provide that no extra solar modules or equipment can be added that will alter the contracted capacity, since the maximum capacity cannot exceed the contracted capacity.

*Minimum equity thresholds:* We are required to meet minimum equity thresholds over the project SPVs undertaking the projects. For example, certain PPAs stipulate that our Company should hold a minimum of 51.0% of the equity share capital of the project SPV for a minimum of one year from the commercial operation date of the project. Further, we are not allowed to encumber, assign or mortgage out interests in the projects except for obtaining financing for the construction of the projects. In contrast, the Counterparties to such PPAs can transfer, sell, assign or mortgage the projects in accordance with the terms of the PPAs.

*Synchronization, commissioning and commercial operation:* We are responsible for the synchronization of the project to the grid system. In following a timeline as set out in the PPA, we are required to commission a project within 18 to 24 months (as specifically stipulated in the PPA) from the date the PPA is signed. Failure to commission a project in time will subject us to penalties.

*Payment and billing:* The Counterparty is required to pay our invoices on a monthly basis and will be subject to an interest or surcharge for any late payment made. In contrast, timely payment by the Counterparty will entitle the Counterparty to a rebate.

*Performance bank guarantee:* Under the PPAs, we are required to furnish and maintain a performance bank guarantee from the effective date of the PPA. The date specified in the PPA could either be immediately after or any time between three to six months after the scheduled commissioning date of the project, subject to any extension of the scheduled commissioning date. The Counterparty has the right to encash the performance bank guarantee if there is a delay in the commissioning of a project due to a *force majeure* event or event of default by the counter party.

*Undertakings, insurance and indemnity:* We are responsible for the operation and maintenance of the projects. We are also required to maintain adequate insurance for replacement value for the project through the term of the PPA against losses due to natural calamities, fire, riot and strike and take industrial all risk insurance policy. Generally, we are required to indemnify, defend and hold harmless the Counterparties and their related parties against any and all losses, damages, costs and expenses including legal costs, fines, penalties and interest actually suffered or incurred by the Counterparty from third party claims arising out of or in connection with the breach of any of our obligations under the PPA or any of the representations or warranties, if any, made under the PPA.

*Force majeure events:* The PPAs also provide for *force majeure* relief to the party affected by the occurrence of a *force majeure* event. A *force majeure* event includes events such as an act of God, any act of war, terrorist or military action, radioactive contamination amongst others. To the extent not prevented by a *force majeure* event, the obligations of both parties will continue to apply.

*Peak Hours:* Under the FDRE PPAs, we are obliged to supply the contracted capacity with firm and dispatchable renewable energy power configuration keeping at least 90% availability during the peak hours on monthly basis.

Peak hours will be four hours out of 24 hours on daily basis. The peak hours will be of two hours in the morning during the period 05:00 hours to 11:00 hours and will be of two hours in the evening during the period 17:00 hours to 23:00 hours on daily basis as per the schedule given. However, this will not be applicable for the contract year ending March 31 immediately after commencement of supply date of the contracted capacity.

**Change in law:** Our PPAs also provide for change in law (as defined in the relevant PPA) relief to the aggrieved party. A change in law refers to the occurrence of events such as a change in the interpretation or application of a law relating to or affecting the project or a change in the terms and conditions applicable to the obtaining of consents or permits; or any statutory change in tax structure. The aggrieved party must seek approval from the relevant state regulatory authority for change in law. The decision of the relevant state regulatory authority to acknowledge a change in law, the date from which such a change in law will become effective and the date on which relief will be given as a result of such change in law, will be final and binding on the parties to the PPA.

**Event of default:** Upon the occurrence of an event of default (as defined in the PPA), the non-defaulting party will deliver to the defaulting party a notice specifying in detail the circumstances giving rise to the issue. Thereafter, a grace period of generally 30 to 90 days or longer will apply for the defaulting party to cure the event of default. The parties will continue to perform their respective obligations under the PPA during the grace period. Following the expiry of the grace period and unless the parties otherwise agree to the contrary or the event of default has ceased to exist or has been remedied, the non-defaulting party may terminate the PPA.

**Compensation in offtake constraints due to grid unavailability and reduced offtake:** Under our FDRE PPAs, during the operation of the plant, on account of temporary transmission unavailability, for reasons not attributable to us, which may result into grid unavailability, we may be provided compensation as per the calculation in the relevant PPAs. Further, in case of reduced offtake by the offtaker including non-dispatch of power due to non-compliance with rules and regulations, considering the principle of must run status of the power plants, we are eligible for payment for the corresponding reduce off-take in terms of the relevant PPAs.

## Project Development Mechanism

Our projects are typically developed over a period of approximately 18 to 24 months from bid submission through to the project achieving commercial operation.

The following chart illustrates the typical indicative timeline and activities for the development of our renewable power projects:

The table below provides a bifurcation of our revenue from operations in the three months ended June 30, 2024 and June 30, 2023 and Fiscal 2024, 2023 and 2022 on a consolidated basis:

| (in ₹ million)                                       |                                  |                                  |             |             |             |
|------------------------------------------------------|----------------------------------|----------------------------------|-------------|-------------|-------------|
| Particulars                                          | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 |
| <b>Revenue from operations</b>                       |                                  |                                  |             |             |             |
| <b>Sale of goods and services</b>                    |                                  |                                  |             |             |             |
| - Sale of electricity                                | 3,096.40                         | 3,689.74                         | 13,188.54   | 12,701.50   | 13,744.88   |
| - Engineering, procurement and construction services | -                                | -                                | -           | 32.47       | 938.19      |
| - Project management services                        | -                                | -                                | -           | 210.00      | 191.00      |
| <b>Other Operating Revenue</b>                       |                                  |                                  |             |             |             |
| - Other Operating Revenue                            | -                                | 1.58                             | 3.96        | 5.07        | 4.95        |

The major components of our project identification and development activities are as follows:

**Identification and assessment of bids.** We consider a number of factors in our assessment of potential bids. These factors include the credit rating of the state or central distribution utilities, ease of doing business, policies, land availability, irradiation levels / wind resource assessment at the location of the project, land costs, payment cycles grid availability and associated risks including liquidated damages in case service level agreements of the bid is not met. We also evaluate the opportunity on the basis of the capacity being offered and the substation details and evacuation infrastructure.

We assess the potential bids by grading each relevant factor. An overall grade is obtained to help us determine whether or not to participate in a bid.

**Tendering, bidding and PPA implementation.** We have established processes to track opportunities for project awards in the industry. Once a tender is identified, we analyze the relevant information from the request for proposal document. Our tendering and bidding teams prepare market analysis reports and financial models, including key financial assumptions, to guide us in evaluating the potential bidding opportunity. Each report includes information on overall market conditions, an analysis of our local strengths and weaknesses, average cost estimates, project development procedures, a detailed list and analysis of tasks, authorizations, key project milestones, the major risks and an action plan for pursuing the bidding opportunity, if we determine the project to be viable. We have an in-house project development information database which helps us establish the most effective tariff for us to win the bid. Once a bid is won, a letter of intent/letter of award is issued.

Once the letter of intent is issued, we typically set up a project company, or SPV, to own the renewable power project. We hold 100.00% of the equity interest in each SPV. All contracts and other agreements are entered into under the name of such SPV. The SPV enters into the PPA with the counterparty, which reflects the agreed terms, including the expected commercial operation date of the renewable power project, the tariff, the period of the PPA and key performance indicators, on the basis of which electricity is supplied to the counterparty.

**Land acquisition.** As part of our strategy, for implementation of our projects, we proactively engage in acquiring land by identifying suitable land sites by conducting a detailed analysis of potential land parcels on the basis of cost, resource estimation, proximity to existing grid infrastructure, and other relevant information. When the land is government-owned, we identify suitable parcels of land from the responsible agency and obtain approval from such authority to use the land for the purposes of setting up renewable power projects, including by entering into lease agreements with the relevant government agency. When the land is privately owned, we identify appropriate parcels of land and conduct suitable due diligence through a legal counsel and hire third party land facilitators to undertake further compliances.

**Project financing.** Our renewable power projects are generally financed with a 75:25 debt-to-equity ratio. We typically enter into long term loan arrangements in order to rapidly obtain the required financing to start developing the project. We invest equity from our internal accruals and Promoter funding.

**Approvals and consents.** After the development budget is approved and term sheets for financing arrangements are executed, the project development team begins project development. Approvals and consent requirements vary, depending on the location of the renewable power project, but the key permits and licenses required include land use permits (where necessary), environmental impact assessments, building permits, planning consents and grid connection contracts. The authorities and other parties that are consulted vary from state to state but usually

include the local planning authority, electricity utilities, local communities, environmental agencies, and health and safety agencies.

*Evacuation infrastructure.* Unless our projects are in renewable parks, it is our responsibility to ensure that the evacuation infrastructure arrangements are set up within a time frame stipulated in the PPA. The evacuation of power from the renewable power projects is limited to the capacities as contracted under the PPAs. We bear the cost of setting up such infrastructure.

*EPC.* Our EPC services include engineering design, construction contracting and management, and procurement of solar panels, wind turbines, balance-of-system components and other components. Our in-house EPC capabilities enable us to be flexible with our choice of technology and allow us to choose high quality equipment which is substantially procured in-house while optimizing the combination of total project cost and yield. We make detailed project plans and monitor project progress on the delivery and construction schedules to ensure commissioning of our renewable power projects on schedule. The table below sets forth details of the revenue generated from engineering, procurement and construction services during the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

| <i>(in ₹ million unless stated otherwise)</i>                   |                                  |                                  |             |             |             |
|-----------------------------------------------------------------|----------------------------------|----------------------------------|-------------|-------------|-------------|
| Particulars                                                     | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024 | Fiscal 2023 | Fiscal 2022 |
| Revenue from engineering, procurement and construction services | -                                | -                                | -           | 32.47       | 938.19      |
| Percentage of revenue from operations                           | -                                | -                                | -           | 0.25%       | 6.31%       |

The criteria we apply to assess the quality of the solar panels we procure for our solar power plants are the (i) bill-of-materials; (ii) in-process controls; (iii) source of the solar cell and its quality; (iv) level of automation and tool set; and (v) physical monitoring of the manufacturing process and final inspection.

For assessment of wind turbine generation systems, we analyse (i) turbine technology, (ii) hub-height and (iii) rotor diameter and (iv) physical monitoring of the manufacturing process and final inspection.

Our quality team along with third party consultants appointed for inspection during the manufacturing phase ensure that the parameters are strictly adhered to. Our team specifies the bill-of-materials to the supplier and undertakes factory audits and factory dispatch sample checking in order to maintain quality control. We also undertake “flash testing” of samples from reputable third-party laboratories. We use our experienced and innovative design capabilities to optimize the output of the renewable power project at high CUF levels to maintain our productivity levels. For solar power projects, the design initiatives include installing a higher number of modules at optimal DC:AC ratios and optimizing the capacity of the inverters and balance-of-plant to augment output from the solar power project. For our wind power projects, the design initiatives of micro-siting of the project and selection of wind turbines with optimum hub-height and rotor diameter for techno-commercial optimization. Where necessary, we utilize and rely on third-party sub-contractors to construct and install portions of our renewable power projects. For details of the components and/or services sourced from third-party suppliers, see “**Our Business – Components**” on page 273.

Our construction activities are monitored by our project management and control (“**PMC**”) team. The PMC team prepares a detailed implementation plan capturing all the aspects of the construction and allocates timelines for each activity. At each site where our renewable power projects are located, we have a dedicated team of about five (5) to 25 employees comprising members of the PMC team, civil managers, quality managers, electrical managers and transmission line experts, among others. This on-site team liaises with the authorities to rectify any transmission line issues, conducts quality checks and ensures the progress in the construction of the renewable power project is aligned with the implementation plan managed by the PMC team, among other things. Each project is led by a site-in-charge person who typically has extensive technical expertise, and who monitors the execution of the detailed implementation plan on a day-to-day basis.

*O&M.* We operate and maintain our portfolio of renewable power projects. We maintain our power projects with the intention of maximizing their utilization rate, availability and system life. We utilize customized software, including SAP integration, for forecasting, scheduling and the monitoring of the performance of our renewable

power projects on a real-time basis. We have in-house O&M capabilities in, among other things, the management of maintenance scheduling and services, monitoring and reporting of performance, management of warranty claims and insurance, compliance with environmental and health and safety requirements and the repowering and upgrading of the renewable power plants. We engage on-the-ground specialists who are on-call to promptly remedy any issues that may arise with our projects.

**Internal Restructuring:** The O&M functions of our projects and certain EPC supply work including contracting of module/wind turbines were typically undertaken by our Promoter, ACME Cleantech. In order to bring all the capabilities of EPC and O&M operations within the purview of our Company, our Company entered into an agreement for the transfer of employees with ACME Cleantech on June 25, 2024 read with the amendment agreement dated October 9, 2024 (“**Transfer Agreement**”). Pursuant to the Transfer Agreement, certain employees of ACME Cleantech including employees who are engaged in EPC and O&M operations of the projects shall be transferred to the rolls of our Company with effect from November 1, 2024, thus giving us the capability to undertake integrated EPC and O&M operations in-house.

Further, ACME Cleantech had entered into O&M agreements with our project SPVs pursuant to which it provided O&M services for such projects. On June 25, 2024, our Company and ACME Cleantech entered into a deed of novation (“**Deed of Novation**”), which was amended by way of the amendment agreement dated October 7, 2024, pursuant to which ACME Cleantech agreed to novate all of its rights, obligations, interest and title under the O&M agreements to our Company.

The table below provides details of the revenue, operating profit and operating profit margin generated by our Company from EPC and O&M operations on a standalone basis for the three months ended June 30, 2024 and June 30, 2023 and Fiscals 2024, 2023 and 2022:

*(in ₹ million unless otherwise stated)*

| Particulars                        | Three months ended June 30, 2024 | Three months ended June 30, 2023 | Fiscal 2024     | Fiscal 2023     | Fiscal 2022     |
|------------------------------------|----------------------------------|----------------------------------|-----------------|-----------------|-----------------|
| <b>Revenue</b>                     |                                  |                                  |                 |                 |                 |
| EPC Revenue                        | 3,693.70                         | 594.05                           | 4,708.40        | 4,685.91        | 7,587.57        |
| O&M Revenue                        | -                                | -                                | -               | -               | -               |
| <b>Total Revenue</b>               | <b>3,693.70</b>                  | <b>594.05</b>                    | <b>4,708.40</b> | <b>4,685.91</b> | <b>7,587.57</b> |
| <b>Operating Expenses</b>          |                                  |                                  |                 |                 |                 |
| Expenses                           | 1,323.29                         | 542.14                           | 4,400.27        | 4,427.09        | 6,488.72        |
| <b>Total Operating Profit</b>      | <b>2,370.41</b>                  | <b>51.91</b>                     | <b>308.13</b>   | <b>258.82</b>   | <b>1,098.85</b> |
| <b>Operating Profit Margin (%)</b> | <b>64.17%</b>                    | <b>8.74%</b>                     | <b>6.54%</b>    | <b>5.52%</b>    | <b>14.48%</b>   |

*Note: Our EPC revenue and operating profit margin for the three months ended June 30, 2024 is higher than the three months ended June 30, 2023 due to milestone billing at the end of the projects, and are not an indication of project profitability.*

## Offtakers

All of our portfolio offtake for our Operational Projects are with central and state government entities and government-backed entities.

The table below sets forth our revenue from our top ten off-takers including as a percentage of our revenue from operations for the Fiscals indicated:

| Fiscal 2024                                 |                        |                    | Fiscal 2023                                 |                        |                    | Fiscal 2022 <sup>(1)</sup>                  |                        |                    |
|---------------------------------------------|------------------------|--------------------|---------------------------------------------|------------------------|--------------------|---------------------------------------------|------------------------|--------------------|
| Customers/Of f-takers                       | Revenue (₹ in million) | % of Total Revenue | Customers/Of f-takers                       | Revenue (₹ in million) | % of Total Revenue | Customers/Of f-takers                       | Revenue (₹ in million) | % of Total Revenue |

Notes:

1. For ACME Urja One Private Limited, PPA has been signed for 190 MW out of a total awarded capacity of 380 MW. For the balance 190 MW, the PPA signing process is underway.
2. For ACME Platinum Urja Private Limited, PPA has been signed for 150 MW out of a total awarded capacity of 350 MW. For the balance 200 MW, the PPA signing process is underway.
3. The LOA for this project has currently been issued in the name of our Company. However, the project will be developed by the relevant SPV, once finalized.
4. We do not have consent from the off-taker to disclose their name in this Red Herring Prospectus.

## Components

We procure solar panels/wind turbine generation system, inverters and other key equipment for the construction of our renewable power projects from third-party suppliers. Solar panels and wind turbine generation system comprise the primary equipment for our renewable power projects and the costs of these generally constitute a substantial portion of the project development costs.

Historically, solar panels were primarily imported from China by ACME Cleantech, our Promoter, which is also our top supplier. However, our Company has now entered into a non-compete agreement dated June 25, 2024 read with the amendment agreement dated October 7, 2024 with ACME Cleantech and MKU Holdings, under which *inter alia* (a) (i) MKU Holdings and ACME Cleantech; and (ii) all the subsidiaries of MKU Holdings and ACME Cleantech, other than our Company and our Subsidiaries, shall not undertake EPC and O&M related business other than undertaking supply of modules and wind turbines for the existing renewable energy projects as on June 25, 2024 which are being implemented by our Company by itself or through our Subsidiaries. Further, under the terms of the non-compete agreement, three wind power projects managed by two companies which are under corporate insolvency resolution process, may be owned, and operated by ACME Cleantech or its affiliates, subject to receipt of necessary approval in this regard in accordance with applicable law and approval from lenders of ACME Cleantech or its affiliates, as applicable. For further details, see, “ - **Non-Compete Agreement dated June**

25, 2024, read with the amendment agreement dated October 7, 2024, entered into among our Company, MKU Holdings Private Limited and ACME Cleantech Solutions Private Limited’.

As described above, during the execution of our projects, various components and/or services are sourced from third-party suppliers, wherever necessary. We maintain an updated list of qualified and reliable suppliers with whom we have established relationships on the basis of their proven track records. We typically issue purchase orders to these suppliers which define the general terms and conditions of our purchases, including warranties, product specifications, indemnities, delivery and other customary terms. The number of third-party suppliers, the amount spent on engaging them or procuring components and/or services from them, the terms and conditions of the agreements entered into with them and the percentage of the total project for which their services are engaged, varies from project to project.

Our purchasing decisions take into consideration technical specifications (including size, type and power output) bid price, warranty and insurance programs, spectral response, performance in low light/low speed, nominal power tolerance levels, degradation rate, technical support and the reputation of the supplier. We generally require warranties for defects in materials for a typical duration of 5 to 10 years and a warranty for module performance under normal testing conditions for at least 25 years.
