<sup>(1)</sup> Total purchases is defined as amount spent by us for procurement of components for our projects and spare parts for O&M services. Historically, ACME Cleantech has been our top supplier as it has been the EPC contractor for majority of our projects especially procuring modules and provided O&M services for majority of our Operational Projects. Our Company pursuant to internal restructuring has taken over the EPC and O&M operations. For further information, see “ – **Project Development Mechanism - Internal Restructuring**” on page 269.

<sup>(2)</sup> The names of the top 10 suppliers is commercially sensitive information and we are not in a position to disclose them in this Red Herring Prospectus. Further, the top 10 suppliers in each Fiscal may vary as per actual purchases made.

We have a long-standing relationship with a diverse base of key component suppliers. Our solar portfolio includes modules sourced from various leading vendors such as Jinko (Zhejiang Jinko Solar Co., Ltd.), JA Solar (Yiwu JA Solar Technology Co., Ltd.), Econess (Econess Energy Co., Ltd), Znshine (Znshine PV-TECH Co., Ltd), CECEP (CECEP Solar Energy Technology (Zhenjiang) Co., Ltd), Trina (Trina Solar Energy Development Pte Ltd), First Solar (First Solar GmbH); and inverters sourced from vendors such as Sungrow (Sungrow (India) Private Ltd.), TBEA (TBEA Xi'an Electric Technology Co. Ltd) and Sieneng (Sineng Electric India Private Limited). In addition, we have tied up with, a domestic supplier, Envision (Envision Wind Power Technologies India Private

Limited) for the supply of wind turbine generation system, which will be sourced by ACME Cleantech, for our first wind power project, which is currently under-construction.

### **Environment, Safety and Governance**

We believe that environmental, social, and governance (“ESG”) factors are crucial for long-term sustainable growth. We have incorporated these principles into our core business strategy, demonstrating a strong commitment to the environment and social stewardship. This commitment is reflected in our comprehensive ESG Management System Manual, which encompasses various initiatives and policies.

We are committed to ensuring that our business activities are conducted safely, the health of our employees, contractors and the public are protected and the environmental impact resulting from our operations and maintenance are minimized, energy resources are utilized in a responsible and efficient manner to reduce emissions and statutory and regulatory requirements concerning health, safety and environment are complied with.

As part of our ESG principles, we have a comprehensive ESG management system which includes a dedicated ESG team for implementing and overseeing our ESG strategy in close coordination with all of our business units and we have constituted an ESG steering committee and CSR committee which focuses on various ESG/ social responsibility initiatives while collaborating with internal and external stakeholders. Further, to improve our governance management, we have also formulated various policies such as an ESG policy, equal employment opportunity policy, employee grievance policy, environment health and safety policy, vigil mechanism and whistle blower policy and an ethics procedure.

### **Competition**

We believe our primary competitors are other domestic and international renewable energy players. Competition to acquire new renewable power projects occurs at the bidding and tendering stage as we bid against other renewable energy players for long term PPAs in central and state solar power auctions. We compete for project awards based on, among other things, pricing, technical and engineering expertise, financing capabilities, past experience and track record. Some of the key players include ReNew Power (approximately 8.3 GW operational wind and solar power projects), Adani Green Energy Limited (approximately 10.9 GW operational wind, solar and hybrid power projects), NTPC Green Energy Limited (approximately 3.5 GW operational solar and wind power projects), TATA Power Renewable Energy Limited (approximately 4.5 GW operational solar and wind power projects), Greenko (5.4 GW of operational wind and solar power projects) and Avaada Energy Private Limited (operational approximately 4.0 GW of solar power projects) as of March 31, 2024. (*Source: CRISIL Report*)

In addition to other renewable energy, we compete with utilities generating power from conventional energy sources. Utilities generating conventional energy face rising costs as the constraints on domestic fuel supplies continue and these energy sources do not benefit from various governmental incentives available to renewable energy producers. As we reduce our costs and achieve parity with conventional energy suppliers, we expect to compete with these suppliers, without incentives, on the basis of cost and reliability.

### Industry specific legislations

#### ***The Electricity Act, 2003 (“Electricity Act”)***

The Electricity Act provides for, *inter alia*, generation, transmission, distribution, trading and use of electricity. Under the Electricity Act, the transmission, distribution and trade of electricity are regulated activities that require licenses from the Central Electricity Regulatory Commission (“CERC”), the State Electricity Regulatory Commissions (“SERCs”) or a joint commission (constituted by an agreement entered into by two or more state governments or the central government in relation to one or more state governments, as the case may be). The generating company is required to establish, operate and maintain generating stations, tie-lines, sub-stations and dedicated transmission lines. Further, the generating company may supply electricity to any licensee or even directly to consumers, subject to availing open access to the transmission and distribution systems and payment of transmission charges, including wheeling charges and open access charges, as may be determined by the relevant electricity regulatory commission. In terms of the Electricity Act, open access means the non-discriminatory provision for the use of transmission lines or distribution system or associated facilities with such lines or system, by any licensee or consumer or a person engaged in generation in accordance with the regulations specified by the relevant electricity regulatory commission. Under the Electricity Rules, 2005, as amended, if the captive generating plant is established by an affiliate company, the captive user must hold no less than 51% of the ownership in that affiliate company.

The Electricity Act promotes co-generation and generation of electricity from renewable sources of energy by requiring the relevant SERCs to: (i) provide suitable measures for grid connectivity and sale of electricity from such sources; and (ii) specify a percentage of the total consumption of electricity in the area of distribution licensees for purchase of electricity from such sources, known as renewable purchase obligations (“RPOs”). The Ministry of Power, Government of India (the “MoP”), has, from time to time, notified the long-term growth trajectory of RPOs for solar and non-solar power, uniformly for all states and union territories. The MoP, through an order dated July 22, 2022 (F. No. 09/13/2021-RCM) has notified the RPO trajectory for a period of eight years i.e., Fiscal 2023 to Fiscal 2030. It includes trajectory for wind renewable purchase obligations, hydro power renewable purchase obligations and other renewable purchase obligations.

Under the Electricity Act, the appropriate commission shall specify the terms and conditions for the determination of tariff, and one of the guiding factors in doing so shall be the promotion of co-generation and generation of electricity from renewable sources of energy. The SERCs under the Electricity Act are also required to promote co-generation and generation of electricity from renewable sources of energy by providing suitable measures for connectivity with the grid and sale of electricity to any person, and also specify, for purchase of electricity from such sources, a percentage of the total consumption of electricity in the area of a distribution license.

The Electricity (Amendment) Bill, 2022 was introduced in Lok Sabha on August 8, 2022. The key provisions of the Bill are the operation of the multiple DISCOMS in the same area, cross-subsidy balancing fund, license for distribution in multiple states, payment security, renewable purchase obligation, selection committee for SERCs, etc. The Electricity (Amendment) Bill, 2022, is yet to be implemented.

***Central Electricity Regulatory Commission (Terms and Conditions for Tariff Determination from Renewable Energy Sources) Regulations, 2020 (“Tariff Regulations”)***

The Tariff Regulations prescribe the criteria that may be taken into consideration by the CERC while determining the tariff for the sale of electricity generated from renewable energy sources. The CERC shall determine projectspecific tariff for solar PV power projects, based on financial principles such as, inter alia, debt equity ratio, loan tenure and interest on loan, interest on working capital and any incentive, grant or subsidy from the Central or State Government.

***Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022***

The MoP notified the Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules, 2022 on June 6, 2022. These rules are notified for promoting generation, purchase and consumption of green energy including the energy from waste-to-energy plants. Consumers are entitled to demand supply of green power from discoms and the discoms would be obligated to procure and supply green power to eligible consumers. These rules have streamlined the overall approval process for granting open access. Time bound processing by bringing uniformity and transparency in the application as well as approval of open access through a national portal had been mandated.

Further, the MoP, notified the Electricity (Promoting Renewable Energy through Green Energy Open Access) Amendment Rules, 2023 on January 27, 2023, applicable on generation, purchase and consumption of green energy including waste-to-energy plants. It provides details for renewable purchase obligation (“**RPO**”), green energy open access, nodal agencies, procedure for the grant of green energy open access, banking and cross-subsidy surcharge. It also provides for tariff for green energy which shall be determined by the appropriate commission.

***Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2024***

Pursuant to a notification bearing reference no. No.L-1/268/2022/CERC dated March 15, 2024, the Central Electricity Regulatory Commission notified CERC (Terms and Conditions of Tariff) Regulations, 2024, which shall remain in force for a period of five years from April 1, 2024 to March 31, 2029. It aims for determination of different tariff components for a generating company (coal and gas based and large hydro) and a transmission licensee, taking into consideration, the target to be a net-zero country by 2070, revised Intended Nationally Determined Contributions (“**INDCs**”) submitted by India and ensure steady growth of power sector.

***Central Electricity Regulatory Commission (Terms and Conditions for Tariff Determination from Renewable Energy Sources) Regulations, 2017***

The Central Electricity Regulatory Commission has announced the Central Electricity Regulatory Commission (Terms and Conditions for Tariff Determination from Renewable Energy Sources) Regulations, 2017 (“**Tariff Regulations**”), which prescribe the criteria that may be taken into consideration by the relevant electricity regulatory commissions while determining the tariff for the sale of electricity generated from renewable energy sources which include, among others, return on equity, interest on loan and working capital, operations and maintenance expenses, cost of capital and depreciation. Pursuant to the National Tariff Policy, the CERC is required to determine the rate of return on equity which may be adopted by the relevant electricity regulatory commissions to determine the generic tariff, keeping in view the overall risk and prevalent cost of capital, which factors are also to be taken into consideration by relevant electricity regulatory commissions while determining the tariff rate. The Tariff Regulations prescribe that the normative return on equity will be 14%, to be grossed up by the prevailing Minimum Alternate Tax (“**MAT**”) as on April 1st of the previous year for the entire useful life of the project.

The Tariff Regulations also provide the mechanism for sharing of carbon credits from approved clean development mechanism projects between renewable energy generating companies and the concerned beneficiaries. Under the Tariff Regulations, the project developer is entitled to retain 100% of the gross proceeds on account of clean development mechanism project benefit in the first year after the date of commercial operation of the generating station. Subsequently, in the second year, the share of the beneficiaries will be then progressively increased by 10% every year until it reaches 50% after which the clean development mechanism project proceeds are to be shared equally between the generating company and the beneficiaries. Further, under the Determination of Green Tariff under Electricity (Promoting Renewable Energy Through Green Energy Open Access) Rules,

2022, for incentivising the use of renewable energy, the MoP has clarified that in no case the green tariff should be higher than the sum of average power purchase cost of renewable energy, surcharge at the rate of 20% of average cost of supply.

#### ***Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020***

On May 4, 2020, the Central Electricity Regulatory Commission issued the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020. The purpose of these regulations is to ensure that transmission charges are fully covered, thereby minimizing power losses during interstate transmission. These regulations apply to all designated ISTS customers, Inter-state transmission licensees, the national load dispatch centre, regional load dispatch centres, state load dispatch centres, and regional power committees.

#### ***Central Electricity Regulatory Commission (Deviation Settlement Mechanism and Related Matters) Regulations, 2024***

The Central Electricity Regulatory Commission (CERC) has introduced the Deviation Settlement Mechanism and Related Matters Regulations, 2024 ("**DSM Regulations, 2024**"), effective from September 16, 2024. These regulations play a crucial role in upholding grid discipline and security, aligning with the objectives set forth in the grid code. The DSM Regulations, 2024 establish a commercial framework for Deviation Settlement, outlining specific penalties for both over-injections and under-injections of electricity.

#### ***Central Electricity Regulatory Commission (Connectivity and General Network Access to the Inter-State Transmission System) (Second Amendment) Regulations, 2024***

The Central Electricity Regulatory Commission (CERC) has introduced the Connectivity and General Network Access to the Inter-State Transmission System (Second Amendment) /Regulations, 2024, in line with the 'One Nation, One Grid' vision. These regulations guarantee non-discriminatory access to the central transmission network for all power producers. To request access, power producers need only specify the desired capacity and the time blocks for transmission. This streamlined approach not only simplifies the process but also promotes the seamless integration of renewable energy into the grid.

#### ***Central Electricity Regulatory Commission Power Market Regulations 2021***

The Central Electricity Regulatory Commission has notified the CERC (Power Market) Regulations, 2021, which came into effect on August 15, 2021. These regulations apply to Power Exchanges, market participants other than Power Exchanges, and the OTC Market.

#### ***Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2023***

The Central Electricity Regulatory Commission issued the CERC (Indian Electricity Grid Code) Regulations, 2023 which came into effect on October 1, 2023. These regulations aim to promote a stable, reliable, and secure grid while achieving maximum economy and efficiency in grid operations and the power system.

#### ***Renewable Energy Certificates Regulations ("REC Regulations")***

The Central Electricity Regulatory Commission notified the REC Regulations on January 29, 2020 which has been amended from time to time. REC Regulations was enacted to develop the market in electricity from non-conventional energy sources by issuance of transferable and saleable credit certificates ("**REC Mechanism**"). The REC Mechanism provides a market based instrument which can be traded freely and provides means for fulfilment of RPOs by the distribution utilities/consumers. Under the REC Regulations, there are two categories of certificates, i.e. solar certificates issued to eligible entities for generation of electricity based on solar as renewable energy source and non-solar certificates issued to eligible entities for generation of electricity based on renewable energy sources other than solar. The REC Regulations determine the quantum of such certificates to be issued to the eligible entities and the method of dealing in the certificates.

The National Load Despatch Centre is the central agency which oversees the REC Mechanism, including, inter alia, registration of eligible entities, issuance of certificates, maintaining and settling accounts in respect of certificates, acting as repository of transactions in certificates and such related functions of the REC Mechanism

as may be assigned by the CERC. There are certain conditions which are now imposed on electricity generating company, distribution licensee and captive generation plant to be eligible to apply for REC.

The Central Electricity Regulatory Commission (Terms and Conditions for Renewable Energy Certificates for Renewable Energy Generation) Regulations, 2022 (“**REC Regulations**”) has been notified May 9, 2022 (No. RA-14026(11)/1/2022-CERC). It is envisaged that REC Regulations would address the concerns raised by stakeholders during the operational experience of last one decade and would bring required flexibility in the renewable energy certificates market. Under the REC Regulations, National Load Despatch Centre (“**NLDC**”) would continue to be the central agency for the REC Mechanism and would act a repository for transactions of certificates along with responsibility of registration of eligible entities and issuance of certificates. The NLDC would be responsible for various functions such as, registration of eligible entities, issuance of certificates, maintaining and settling account for certificates, acting as repository of certificate transactions, maintaining registry and carrying out any other function that may be assigned by the commission from time to time for smooth and effective implementation of REC Mechanism.

### ***National Electricity Plan***

Section 3(4) of Electricity Act, 2003 stipulates that, the Central Electricity Authority (“**CEA**”) shall prepare a National Electricity Plan (“**NEP**”) in accordance with the national electricity policy and notify such plan once in five years. Accordingly, the first NEP was notified in the gazette in August, 2007. The second NEP was notified in the Gazette in December, 2013 in two volumes (Volume-I, Generation and Volume-II, Transmission) and the third NEP for 2022-27 was notified in the Gazette of India (Volume-I-Generation in March 2018 and Volume-II – Transmission in January, 2019). It recognizes the need for additional coal-based capacity, ranging from 17 GW to nearly 28 GW, till Fiscal 2032, over and above the 25 GW of coal-based capacity that is currently under construction. The NEP also highlights the need for significant investments in battery storage, with an estimated requirement of between 51 GW to 84 GW by Fiscal 2032. It projects an increase in the Plant Load Factor (“**PLF**”) of coal-fired power plants from 55% up to Fiscal 2027 to 62 % in Fiscal 2032. It also emphasizes the challenges posed by the increasing reliance on renewables, which will require careful management and planning in the years ahead.

### ***Net Metering Regulations***

These regulations have been formulated by various states to promote the generation of electricity from renewable energy sources in respect of the grid connected solar rooftop photovoltaic systems. These regulations regulate the supply of excess electricity from an eligible consumer allowing the consumer to export the excess quantum of electricity produced from his premises to the distribution licensee. Under these regulations, the eligible consumer can avail the benefit of the excess quantum supplied to be carried forward to the next billing cycle as credited units of electricity. According to the MoP Electricity (Rights of Consumer) Rules 2020 amendment, the net metering will be allowed for the prosumers for load upto 500 kW or upto the sanctioned load whichever is lower and gross metering for loads above 500 kW.

### ***Forecasting Regulations***

The state electricity regulatory commissions of certain states, including Karnataka, Andhra Pradesh and Gujarat have introduced regulations prescribing forecasting requirements with penalties for any deviations. The primary objective is to facilitate large-scale grid integration of solar generating stations and maintaining grid stability and security. These regulations apply to all solar generators connected to the respective state grids, including those connected through pooling stations, and selling generated power within or outside the state or consuming power generated for self-consumption.

### ***Grid Connected Solar Rooftop Programme***

The aim of this initiative is to achieve a cumulative capacity of 40,000 MW from the rooftop solar projects by 2022. Phase-II of the Grid Connected Solar Rooftop Programme was approved by the Cabinet Committee on Economic Affairs (“**CCEA**”) and provides for central financial assistance for residential rooftop solar installations upto 40% for rooftop systems up to a capacity of 3 kW and 20% for those with a capacity of 3-10 kW and 20% for those with a capacity of 3-10 kW. The Phase II also focuses on increasing the incentives for DISCOMs based on achievement of certain installed capacity. Phase-II of Grid Connected Rooftop Solar programme has further been extended upto March 31, 2026 without any financial application.

### ***Production linked incentive scheme (“PLI Scheme”)***

The aim of the PLI scheme is to boost domestic manufacturing and cut down on import bills. The PLI scheme provides companies incentives on incremental sales from products manufactured in domestic units. Along with inviting foreign companies to set up shops in India, the PLI scheme also aims to encourage local companies to set up or expand existing manufacturing units. The PLI scheme was initially rolled out for mobile and allied equipment, pharmaceutical ingredients, and medical devices manufacturing. The government aims to expand the ambit of the PLI scheme to include as many as ten more sectors, such as food processing and textiles. In the union budget 2021-2022, the government has introduced provisions for renewable energy sector. The government has committed nearly 1.97 lakh crores, over a period of five years starting financial year 2021-2022 for, inter alia, high efficiency solar PV modules. The PLI scheme will also incentivise new gigawatt scale solar PV manufacturing facilities in India.

The EPCG Scheme provides that importers can benefit from zero customs duty on the import of capital goods provided that they fulfil an export obligation to export a prescribed amount, such amount being a multiple of the duty saved, within a specified period. In addition, authorized importers are required to fulfil the average export obligation achieved in the preceding three licensing years for the same and similar product.

### ***State Specific Regulations***

Various states in India have from time to time, announced administrative policies and regulations in relation to solar power projects and related matters. These state-specific policies and regulations have material effects on our business because PPAs between project developers and state offtakers are entered into in accordance with the relevant state policies and regulations. Accordingly, these PPAs are standard form contracts and the project developers have no flexibility in negotiating the terms of the PPAs.

For instance, in the states of Madhya Pradesh and Gujarat, our projects are subject to certain state policies as discussed below.

These Restated Consolidated Financial Information are presented in Indian Rupees (Rs), which is also the Company's functional currency. All amounts have been rounded to the nearest millions, unless otherwise indicated.

**Historical cost convention**

The consolidated financial statements have been prepared on a historical cost convention on a going concern basis except for certain financial assets and financial liabilities which are measured at fair value.

**b) Basis of consolidation**

The Restated Consolidated Financial Information comprise the financial statements of Holding Company and all of its subsidiaries as at 30 June 2024, 30 June 2023, 31 March 2024, 31 March 2023, 31 March 2022. The financial statements of the entities used for the purpose of consolidation are drawn up to same reporting date as that of the Holding Company. Subsidiaries are all entities over which, Holding Company exercises control. Holding Company exercises control only if it has the following:

- a) power over the entity
- b) exposure, or rights, to variable returns from its involvement with the entity; and
- c) the ability to use its power over the entity to affect the amount of its returns.

The Holding Company or any of its subsidiaries, whether it controls an entity, if facts and circumstances indicate that there are changes to one or more of the three elements of control.

The Difference between the cost of investment in subsidiaries (investee company) to the Group and the proportionate share in the equity of the investee Company as at the date of acquisition of stake is recognised in the Restated Consolidated Financial Information as Goodwill or Capital Reserve, as the case may be. Goodwill arising on consolidation is tested for impairment at the Balance Sheet date. Non-controlling interests which represent part of the net profit or loss and net assets of subsidiaries that are not, directly or indirectly, owned or controlled by the Group, are excluded.

The financial statements of the companies under the Group are consolidated on a line-by-line basis and intra-group balances and transactions including unrealised gain / loss from such transactions are eliminated upon consolidation.

These financial statements are prepared by applying uniform accounting policies in use at the Group level.

The Consolidation of the financial statements of subsidiaries begins on the date control is established.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group, and they are de-consolidated from the date that control ceases. Non-controlling interests is the equity in a subsidiary not attributable to a parent and presented separately from the parent's equity. Non-controlling interests consist of the amount at the date of the business combination and its share of changes in equity since that date. Profit or loss and other comprehensive income are attributed to the controlling and non-controlling interests in proportion to their ownership interests, even if this results in the non-controlling interests having a deficit balance. However, in case where there are binding contractual arrangements that determine the attribution of the earnings, the attribution specified by such arrangement is considered.

**c) Use of estimates**

The preparation of consolidated financial statement in conformity with Ind AS requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

*(This space has been intentionally left blank)*

**Notes to Restated Consolidated Financial Information**

**d) Business combinations**

Business combinations are accounted for using the acquisition method. The acquisition method involves the recognition of the acquiree's identifiable assets and liabilities, including contingent liabilities, regardless of whether they were recorded in the financial statements prior to acquisition. On initial recognition, the assets and liabilities of the acquired subsidiary are included in the consolidated balance sheet at their fair values, which are also used as the bases for subsequent measurement in accordance with the Group's accounting policies. Goodwill is stated after separating out identifiable intangible assets. Goodwill represents the excess of acquisition cost over the fair value of the Group's share of the identifiable net assets of the acquiree at the date of acquisition. Any excess of identifiable net assets over acquisition cost is recognised in the other comprehensive income on the acquisition date and accumulated in equity as capital reserve. Acquisition related costs are accounted for as expenses in the period in which they are incurred and the services are received.

Business combination in which all of the combining entities or businesses are ultimately controlled by the same party or parties, both before and after the business combination, and where that control is not transitory, is referred to as business combinations of entities under common control. The accounting policy of the Group is to account for the assets and liabilities of acquired entities at their book values in its consolidated financial statements. The book value of the assets and liabilities of an acquired entity is the book value as reflected in the standalone financial statements. The excess of the fair value of the consideration paid (in cash and in kind) over the acquirer's proportionate share of the net asset value acquired is adjusted in other equity. The consolidated financial statements and financial information presented for comparative year are since the date of existence of common control.

As per Ind AS 103, common control business transaction include transactions, such as transfer of subsidiaries, between entities within the Group and the business combination under common control is being accounted for using pooling of interest method.

The following accounting has been followed:

- The assets and liabilities of the combining entities are reflected at their carrying amounts.
- No adjustments are made to reflect fair values, or recognise any new assets or liabilities. The only adjustments that are made are to harmonise accounting policies.
- The financial information in the financial statements in respect of prior periods has been as if the business combination had occurred from the beginning of the preceding period in the financial statements, irrespective of the actual date of the combination.
- The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statement of the transferee.
- The identity of the reserves shall be preserved and shall appear in the financial statements of the transferee in the same form in which they appeared in the financial statements of the transferor.

**e) Revenue from contracts with customers**

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. Revenue excludes taxes collected on behalf of government.

**(e.1) Sale of power**

- Revenue from supply of power is recognised net of any cash rebates and consumption, when the power is supplied and units of electricity are delivered as it best depicts the value of the customer and complete satisfaction of performance obligation.

Revenue from sale of power is recognized when persuasive evidence of an arrangement exists, the fee is fixed or determinable, solar energy kilowatts are supplied and collectability is reasonably assured. Revenue is based on the solar energy kilowatts actually supplied to customers multiplied by the rate per kilo-watt hour agreed to in the respective power purchase agreement (PPAs). The solar energy kilowatts supplied by the Group are validated by the customer prior to billing and recognition of revenue.

- Where Power Purchase Agreement's (PPAs) include scheduled rate changes, revenue is recognized at lower of the amount billed or by applying the average rate to the energy output estimated over the term of the PPA. The determination of the lesser amount is undertaken annually based on the cumulative amount that would have been recognized had each method been consistently applied from the beginning of the contract term. The Group estimates the total kilowatt hour units expected to be generated over the entire term of the PPA. The contractual rates are applied to this annual estimate to determine the total estimated revenue over the term of the PPA. The Group then uses the total estimated revenue and the total estimated kilo-watt hours to compute the average rate used to record revenue on the actual energy output supplied. The difference between actual billing and revenue recognised is recorded as unearned revenue.

**(e.2) Rendering of services**

The Group generates revenue from rendering of services including engineering, procurement and construction services, operation and maintenance and management services.

**i) Engineering, procurement and construction contract**

Construction revenue and costs are recognised by reference to the stage of completion of the construction activity at the balance sheet date, as measured by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs. Where the outcome of the construction cannot be estimated reliably, revenue is recognised to the extent of the construction costs incurred if it is probable that they will be recoverable. When the outcome of the contract is ascertained reliably, contract revenue is recognised at cost of work performed on the contract plus proportionate margin, using the percentage of completion method i.e. over the period of time. The estimated outcome of a contract is considered reliable when all the following conditions are satisfied:

- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the contract will flow to the Group.
- The stage of completion of the contract at the end of the reporting period can be measured reliably.
- The costs incurred or to be incurred in respect of the contract can be measured reliably Provision is made for all losses incurred to the balance sheet date. Variations in contract work, claims and incentive payments are recognised to the extent that it is probable that they will result in revenue and they are capable of being reliably measured. Expected loss, if any, on a contract is recognised as expense in the period in which it is foreseen, irrespective of the stage of completion of the contract. For contracts where progress billing exceeds the aggregate of contract costs incurred to-date and recognised profits (or recognised losses, as the case may be), the surplus is shown as the amount due to customers. Amount received before the related work is performed are disclosed in the financial statement as a liability towards advance received. Amounts billed for work performed but yet to be paid by the customers are disclosed in the financial statement as trade receivables. Work performed but yet not billed to the customer are disclosed as unbilled revenue.

**ii) Management services**

Consideration received for management services is recognised as revenue in the year when the service is performed by reference to the stage of completion at the reporting date, when outcome can be assessed reliably. A contract's stage of completion is assessed by management by comparing the work completed with the scope of work.

**(e.3) Interest income**

Interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortized cost of the financial liability. When calculating the effective interest rate, the Group estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Interest income is included in other income in the Statement of Profit and Loss.

**(e.4) Claims**

Claims i.e. late payment interest recoverable from customer, insurance claim and liquidated damages, are recognised on acceptance or actual receipt of the claim, whichever is earlier, considering the certainty as to measurement or ultimate collectability of revenue.

Notes to Restated Consolidated Financial Information

(f) **Borrowing costs**

Borrowing costs directly attributable to the acquisitions, construction or production of a qualifying asset are capitalised during the period of time that is necessary to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed in the period in which they are incurred and reported in finance costs.

(g) **Property, plant and equipment**

Property, plant and equipment's are carried at cost less accumulated depreciation. The cost of items of the property, plant and equipment comprises its purchase price net of any trade discount and rebate, any import duties and other taxes (other than those subsequently recoverable from tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying property, plant and equipments upto the date the asset is ready for its intended use.

Whenever significant parts of the property, plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognised in statement of profit and loss as incurred.

Depreciation on plant and equipments is calculated on a straight line basis over the estimated useful lives of the assets as follows:

| Category                                                         | Life (in years) |
|------------------------------------------------------------------|-----------------|
| Plant and equipment (Solar Power projects till 31st March 2023)* | 25              |
| Plant and equipment (Solar Power projects from 1st April 2023)*  | 30              |

\*Based on and technical assessment, the management believes that the useful lives as given above and residual value of 5%, best represents the period over which management expects to use its assets and its residual value. The useful life of plant and equipment is different from the useful life as prescribed under Part C of Schedule II of Companies Act, 2013.

The estimated useful lives and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognized. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, If appropriate.

(h) **Intangible assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Group amortises intangible assets using straightline method over a period of 25 years for customers contracts.

(i) **Leased assets and right of use**

The Group assesses at contract inception whether a contract is, or contains, a lease. A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

To apply this definition, the Group assesses whether the contract meets three key evaluations which are whether:

- the contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group
- the Group has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use, considering its rights within the defined scope of the contract
- the Group has the right to direct the use of the identified asset throughout the period of use. The Group assess whether it has the right to direct 'how and for what purpose' the asset is used throughout the period of use.

At lease commencement date, the Group recognizes a right-of-use asset and a lease liability on the balance sheet. The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received).

The Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the underlying asset or the end of the lease term. The Group also assesses the right-of-use asset for impairment when such indicators exist.

At the commencement date, the Group measures the lease liability at the present value of the lease payments unpaid at that date, discounted using the interest rate implicit in the lease if that rate is readily available or the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance fixed), variable payments based on an index or rate, amounts expected to be payable under a residual value guarantee and payments arising from options reasonably certain to be exercised.

Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments.

When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or profit and loss if the right-of-use asset is already reduced to zero or the adjustment relates to reduction in scope of the lease.

The Group has presented the right-of-use assets and lease liabilities on the face of statement of financial position.

(j) **Impairment of non-financial assets**

For impairment assessment purposes, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level. All individual assets or cash-generating units are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's (or cash-generating unit's) carrying amount exceeds its recoverable amount, which is the higher of fair value less costs of disposal and value-in-use. To determine the value-in-use, management estimates expected future cash flows from each cash-generating unit and determines a suitable discount rate in order to calculate the present value of those cash flows. The date used for impairment testing procedures are directly linked to the Group's latest approved budget, adjusted as necessary to exclude the effects of future reorganisations and asset enhancements. Discount factors are determined individually for each cash-generating unit and reflect current market assessments of the time value of money and asset-specific risk factors.

Impairment losses are charged in the statement of profit or loss. Further, impairment loss is reversed if the asset's or cash-generating unit's recoverable amount exceeds its carrying amount. The reversal is limited so that the carrying of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as an increase in revaluation.

(k) **Government grants**

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grant will be received.

Government grants relating to income are determined and recognised in the statement of profit and loss over the period necessary to match them with the cost that they are intended to compensate, on a systematic basis and presented within other income.

Government grants relating to the assets are presented as deferred income and such income are recognised in the statement of profit and loss over the period on a systematic basic within other income.

**Notes to Restated Consolidated Financial Information**

**(l) Financial instruments**

**Recognition, initial measurement and derecognition**

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument, and, except for trade receivables which do not contain a significant financing component, these are measured initially at:

- a) fair value, in case of financial instruments subsequently carried at fair value through profit or loss (FVTPL);
- b) fair value adjusted for transaction costs, in case of all other financial instruments.

Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under Ind AS 115. Refer to the accounting policies in section (f) Revenue from contracts with customers.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred. A financial liability is derecognised when the underlying obligation specified in the contract is discharged, cancelled or expires.

**Classification and subsequent measurement of financial assets**

Different criteria to determine impairment are applied for each category of financial assets, which are described below.

For purposes of subsequent measurement, financial assets are classified in three categories:

- Financial assets at amortised cost
- Financial assets at fair value through other comprehensive income (FVOCI)
- Financial assets, derivatives and equity instruments at FVTPL

**(1) Financial assets at amortised cost**

A 'Financial assets' is measured at the amortised cost if both the following conditions are met:

- (a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- (b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

**Impairment of financial assets**

In accordance with Ind-AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss for financial assets carried at amortised cost.

ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive. When estimating the cash flows, the Group is required to consider :

– All contractual terms of the financial assets (including prepayment and extension) over the expected life of the assets.

-Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

**Trade receivables**

The Group applies simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of receivables.

**Other financial assets**

For recognition of impairment loss on other financial assets and risk exposure, the Group determines whether there has been a significant increase in the credit risk since initial recognition and if credit risk has increased significantly, life time impairment loss is provided otherwise provides for 12 month expected credit losses.

**(2) Financial assets at fair value through other comprehensive income (FVOCI)**

Financial assets that meet the following conditions are measured initially as well as at the end of each reporting date at fair value, recognised in other comprehensive income (OCI).

- a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b) The contractual terms of the asset give rise on specified dates to cash flows that represent solely payment of principal and interest.

**(3) Financial assets, derivatives and equity instruments at FVTPL**

Financial assets that do not meet the amortised cost criteria or FVTOCI criteria are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset.

**(4) Classification and subsequent measurement of financial liabilities**

The Group's financial liabilities includes borrowings, trade payable and other payables and derivative instruments.

Financial liabilities are measured subsequently at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVTPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss.

**Offsetting of financial assets and financial liabilities**

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

**Derivative financial instruments**

The Group uses derivative financial instruments, such as forward currency contracts and interest rate swaps to hedge its foreign currency and interest rate risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses from changes in the fair value of derivatives are taken directly to statement of profit and loss.

**Compound financial instruments**

Compound financial instruments are separated into liability and equity components based on the terms of contract. On the issuance of compound financial instruments, the fair value of liability component is determined using a market rate for an equivalent instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption. The equity component is classified under other equity.

Notes to Restated Consolidated Financial Information

(m) **Income taxes**

Tax expense comprises current and deferred tax. Tax expense is recognised in profit or loss except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case it is recognised in equity or in other comprehensive income.

**Current tax**

Current tax comprises the expected tax payable on the taxable income for the year. The amount of current tax payable is the best estimate of the tax amount expected to be paid that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax assets and liabilities are offset only if certain criteria is met. Current Income tax related to items recognised in other comprehensive income or directly in equity is recognised in other comprehensive income or in equity as the case may be.

**Deferred tax**

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and tax base i.e. amounts used for taxation purposes.

A deferred tax asset is recognised for unused tax losses, unabsorbed depreciation, deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. A deferred tax liability is recognised in respect of taxable temporary differences.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets and they relate to income taxes levied by the same tax authority on the same taxable entity or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

Deferred tax relating to items recognised outside the statement of profit and loss is recognised outside the statement of profit and loss either in comprehensive income or in equity. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

The Group recognises MAT credit available as deferred tax asset only to the extent that there is reasonable evidence that the Group will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward.

The deferred tax in respect of timing differences which reverse during the tax holiday period is not recognised to the extent the enterprise's gross total income is subject to the deduction during the tax holiday period as per the requirements of sections 80-IA of the Income-tax Act, 1961.

(n) **Cash and cash equivalents**

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short-term, highly liquid investments maturing within 3 months from the date of acquisition. Cash and cash equivalent are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value.

(o) **Provisions, contingent assets and contingent liabilities**

Provisions are recognized only when there is a present obligation, as a result of past events, and measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligations as a whole. Provisions are discounted to their present values, where the time value of money is material. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost. The expense relating to any provision is presented in the Statement of Profit and Loss net of any reimbursement.

Any reimbursement that the Group is virtually certain to collect from a third party with respect to the obligation is recognised as a separate asset. However, this asset may not exceed the amount of the related provision.

No liability is recognised if an outflow of economic resources as a result of present obligations is not probable. Such situations are disclosed as contingent liabilities unless the outflow of resource is remote.

Contingent liabilities are disclosed by way of note unless the possibility of outflow is remote. Contingent assets are neither recognized nor disclosed. However, when realization of income is virtually certain, related asset is recognized

(p) **Employee benefits**

**Short-term employee benefits**

Liabilities for wages and salaries, including nonmonetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are classified as short-term employee benefits. These benefits include salaries and wages, short-term bonus, pension, incentives etc. These are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

**Post-employment benefits plans**

The Group provides post-employment benefits through various defined contribution and defined benefit plans.

**Defined contribution plans**

The Group pays fixed contribution into independent entities in relation to several state plans and insurances for individual employees. The Group has no legal or constructive obligations to pay contributions in addition to its fixed contributions, which are recognised as an expense in the period that related employee services are received.

**Defined benefit plans**

Under the Group's defined benefit plans, the amount of pension benefit that an employee will receive on retirement is defined by reference to the employee's length of service and final salary. The legal obligation for any benefits remains with the Group, even if plan assets for funding the defined benefit plan have been set aside. Plan assets may include assets specifically designated to a long-term benefit fund as well as qualifying insurance policies.

The liability recognised in the balance sheet for defined benefit plans is the present value of the defined benefit obligation (DBO) at the reporting date less the fair value of plan assets.

Management estimates the DBO annually with the assistance of independent actuaries. Actuarial gains/losses resulting from re-measurements of the liability/asset are included in other comprehensive income.

Service cost of the Group's defined benefit plan is included in employee benefits expense. Employee contributions, all of which are independent of the number of years of service, are treated as a reduction of service cost. Net interest expense on the net defined benefit liability is included in profit and loss. Gains and losses resulting from re-measurements of the net defined benefit liability are included in other comprehensive income.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date. The group recognizes expected cost of short-term employee benefit as an expense, when an employee renders the related service.

The group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the reporting date. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer the settlement for at least twelve months after the reporting date.

*(This space has been intentionally left blank)*

**Notes to Restated Consolidated Financial Information**

**(q) Earnings per share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

**(r) Investment Properties**

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any.

The cost includes the cost of replacing parts and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of the investment properties are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognised in profit or loss as incurred.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the period of derecognition. In determining the amount of consideration from the derecognition of investment properties the Group considers the effects of variable consideration, existence of a significant financing component, non-cash consideration, and consideration payable to the buyer (if any).

Transfers are made to (or from) investment properties only when there is a change in use. Transfers between investment property, owner-occupied property and inventories do not change the carrying amount of the property transferred and they do not change the cost of that property for measurement or disclosure purposes.

**(s) Assets held for sale**

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification. As at each balance sheet date, the management reviews the appropriateness of such classification.

Non-current assets classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. The Group treats sale/distribution of the asset or disposal group to be highly probable when:

- the appropriate level of management is committed to a plan to sell the asset (or disposal group),
- an active programme to locate a buyer and complete the plan has been initiated (if applicable),
- the asset (or disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value,
- the sale is expected to qualify for recognition as a completed sale within one year from the date of classification, and
- actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Property, plant and equipment and intangible assets once classified as held for sale/distribution to owners are not depreciated or amortised.

**(t) Recent accounting pronouncements**

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. There are no such recently issued standards or amendments to the existing standards for which the impact on the Restated Consolidated Financial Information is required to be disclosed.

**2.2 Significant management judgement in applying accounting policies**

When preparing the Restated Consolidated Financial Information, management makes a number of judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses.

**Income tax and deferred tax assets**

The Group uses estimates and judgements based on the relevant rulings in the areas of allocation of revenue, costs, allowances and disallowances which is exercised while determining the provision for income tax. A deferred tax asset is recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilised. Accordingly, the Group exercises its judgement to reassess the carrying amount of deferred tax assets at the end of each reporting period.

**Impairment of non-financial assets**

In assessing impairment, management estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and uses an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate.

**Useful lives of depreciable assets**

The Group reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

**Fair value measurement**

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

**Revenue recognition**

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Contract asset is the right to consideration in exchange for goods or services transferred to the customer. Contract liability is the entity's obligation to transfer goods or services to a customer for which the entity has received consideration from the customer in advance. Contract assets are transferred to receivables when the rights become unconditional i.e. only the passage of time is required before payment of consideration is due and the amount is billable. Contract liabilities are recognized as revenue as and when the performance obligation is satisfied.

Significant changes in the contract liabilities balances during the year are as follows:

e) Transaction price - remaining performance obligation

The remaining performance obligation disclosure provides the aggregate amount of the transaction price yet to be recognized as at the end of the reporting period and an explanation as to when the Group expects to recognize these amounts in revenue. Applying the practical expedient as given in Ind AS 115, the Group has not disclosed the remaining performance obligation related disclosures for contracts as the revenue recognised corresponds directly with the value to the customer of the entity's performance completed till the reporting period.

f) There is no significant estimate involved in the recognition of revenue from contract except for engineering, procurement and construction services where contract revenue is recognised at cost of work performed on the contract plus proportionate margin, using the percentage of completion method i.e. over the period of time.

(i) Fair value hierarchy

Financial assets and financial liabilities are measured at fair value in the financial statement and are grouped into three Levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

(ii) Financial assets and liabilities measured at fair value – recurring fair value measurements

(C) Market risk

a) Foreign exchange risk

The Group has exposure in foreign exchange risk arising from foreign currency transactions (imports). Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the Group's functional currency. The Group as per its overall strategy uses forward contracts and swaps to mitigate its risks associated with fluctuations in foreign currency and interest rates on borrowings. The Group does not use forward contracts and swaps for speculative purposes.

**B. Other Matters**

(i) The Government of Andhra Pradesh had issued a government order on 1 July 2019, pursuant to which it constituted a high-level negotiation committee to negotiate and reduce the tariff of solar power purchase agreements (PPAs) to Rs. 2.44 per unit. Pursuant to this Government order, the DISCOM in Andhra Pradesh, with whom power purchase agreement was entered, issued notice to the Group, asking for reduction of the tariff to Rs. 2.44/unit, failing which the PPA would be terminated. The Group approached Hon'ble High Court of Andhra Pradesh and the Hon'ble High Court pronounced its interim order on 24 September 2019 by way of which the Government order and DISCOM notice were set aside and AP DISCOM was directed to make payment at interim tariff of Rs. 2.44 per unit until the already pending matter before Andhra Pradesh Electricity Regulatory Commission ("Commission") is decided by the Commission. The Group challenged the said order before divisional bench of Hon'ble High Court of Andhra Pradesh ("HC") to the extent of interim tariff of Rs. 2.44 per unit as there was no such matter related to solar developers which was pending before the Commission since the matter related to wind developers alone was pending before the Commission and thus, the said findings were incorrect. On 15 March 2022, the Hon'ble HC issued its order in Group's favour upholding that the order passed by the learned single Judge fixing the interim rate or interim tariff of Rs. 2.44 per unit for solar power and for payment of all the pending and future bills of all the petitioners, is set aside and instead the DISCOM is directed to make payment of all pending and future bills at the rate mentioned in the PPAs and further, the payment of arrears/pending bills shall be made within a period of six weeks from the date of the said order. Pursuant to such order by the Hon'ble High Court, AP Discoms filed a petition before Hon'ble Supreme Court against the said order of High Court of Andhra Pradesh, which was subsequently dismissed by Hon'ble Supreme Court on 2 January 2023.

On 4 August 2022, AP DISCOMs communicated to the Subsidiary Companies that they were availing the scheme of Ministry of Power (Late Payment Surcharge and related matters) Rules 2022 ("LPS rules"). Accordingly, AP Discoms called upon the Group for reconciliation of accounts and stated that the outstanding dues up to May 2022 would be disbursed in 12 monthly instalments starting from August 2022. Accordingly, AP DISCOMs started paying monthly instalment against the said outstanding dues.

During reconciliation, the Group noted that a unilateral deduction of dues was being considered effective the plant commissioning date (COD), towards the alleged excess installed DC capacity. On 4 April 2023, the Group received a notice from AP DISCOM to disconnect the additional installed DC panels added after COD of the project, falling which DISCOM shall be free to terminate the PPA. The Group had challenged the same before the Commission; however, the Commission did not provide any interim relief. In an appeal filed before Appellate Tribunal for Electricity (APTEL) against the Commission's interim order denying appropriate relief to the Company, APTEL vide order dated 8 May 2023 has directed AP Discoms to not take any coercive steps against the Group and further, upheld that the AP Discoms are no longer required to make payment for the additional DC capacity installed, until the petition pending before the Commission is finally disposed of.

The Commission has issued its interim order on 8 November 2023 and directed the AP Discom to pay the amount with respect to excess DC capacity installed prior to commissioning of the project for the invoices already raised and for future invoices. Consequently, the Discom vide its letter dated 1 December 2023 has agreed to pay the withheld amount in six instalments. Further, with respect to excess DC capacity installed after the commissioning of the project, the Discom vide its letter dated 19 March 2024 has accepted to pay the withheld amount up to the Commission's order dated 1 February 2023 issued in other case, in 12 instalments provided that the excess DC capacity installed after the commissioning of the project are removed by the developers. Accordingly, the Company has removed the excess DC capacity installed after the commissioning of the project on 20 November 2023. Subsequently, the Company got favourable order from APERC (Andhra Pradesh Electricity Regulatory Commission), dated 19 June 2024, directing AP discoms to pay the outstanding amount towards additional DC panels installed post COD, for the period starting from COD till 4 May 2023 in 12 equal instalments without any surcharge. Accordingly, the Company has requested AP DISCOM to make payment as per APERC order.

As at 30 June 2024, total undisputed outstanding dues attributable to excess DC capacity installed after commissioning of the project up to 4 May 2023 amount to Rs. 1,135.05 million and outstanding dues attributable to excess DC capacity installed after commissioning of the project for period from 5 May 2023 to 30 June 2024 amounts to Rs. 114.28 million which are under dispute and pending before the Commission for resolution.

Based on the internal analysis supported by legal opinion, the management is of the view that it is highly likely that the matter with respect to outstanding dues towards the excess DC capacity installed after the commissioning of the project pending before the Commission, will be decided in Company's favor and hence, no adjustment is considered necessary in these financial statements.

(ii) One of the Subsidiary Company has entered into a long-term power purchase agreement (PPA) with Solar Energy Corporation of India (SECI) for generation and supply of solar power from the state of Rajasthan for 25 years. As per the terms of such PPA, the scheduled commissioning date was 2 December 2020, however, due to various reasons which were beyond the control of the Company such as outbreak of Covid-19 and disruption in global supply chain. SECI had allowed an extension in scheduled commissioning date to 17 March 2022. Meanwhile, the Ministry of New & Renewable Energy ("MNRE") filed an Interlocutory Appeal before Hon'ble Supreme Court of India for allowing high voltage and extra high voltage lines, with installation of appropriate mitigation measures like bird diverters for environmental safety etc, contesting the Hon'ble Supreme Court order dated 19 April 2021 regarding underground laying of transmission lines in habitats of Great India Bustard ("GIB") in Rajasthan and Gujarat. Hon'ble Supreme Court has passed order on 21 March 2024 whereby the earlier order has been modified, removing injunction from potential area of GIB and also constituted a 7 member committee to recommend appropriate suitable measure for protection of GIB. Subsequent to this Order, SECI has issued regular COD certificate to the Company.

During the previous year, pending the final outcome in the above matter by Hon'ble Supreme Court, SECI had allowed extension of scheduled commissioning date to 30 days from the date of judgement by the Hon'ble Supreme Court. During the current year, MNRE in its letter dated 25 January 2023 has allowed extension of scheduled commissioning date of eligible projects, including that of the Company, to 31 March 2024, due to disruption in supply chain. Further, Rajasthan Urja Vikas Nigam Limited (RUVNL) vide its order dated 31 March 2023 has accorded its consent for procurement of solar power from early part commissioning of the Company's solar power project. The Company has commissioned the entire 250 MW capacity on 06 January 2024 and obtained regular COD certificate from SECI.

(iii) One of the subsidiary company had imported solar modules without payment of import duties amounting to Rs. nil (30 June 2023: Rs. 2344.88 million, 31 March 2024: Rs. 2566.08 million, 31 March 2023: Rs. 949.56 million and 31 March 2022: Rs. 931.72 million), for setting up the solar plant in the bonded warehouse area, as defined in the license under section 58 of the Customs Act, 1962 ('the Act'), along-with permission for undertaking manufacturing or other operations in the warehouse under section 65 of the Act, read with Manufacture and Other Operations in Warehouse (no. 2) Regulations, 2019 ('MOOWR regulations') dated 1 October 2019 and circular 34/2019-custom dated 1 October 2019. As assessed by such subsidiary company's management, the duty deferment allowed under MOOWR regulations is without any time limitation and further, such regulations also allow export of the said capital goods after use, without payment of duty under the Act. Based on inputs from an expert, the subsidiary company's management had assessed that they shall be able to comply with the conditions defined in the MOOWR regulations and consequently, the resultant savings towards duties in relation to import of capital goods, was accounted for as per applicable Ind AS.

Another five subsidiary companies had imported solar modules with deferment of import duties, as per MOOWR regulations. As assessed by the management of such another subsidiary companies, the duty deferment allowed under MOOWR regulations is without any time limitation and the subsidiary companies shall be able to comply with all the prescribed conditions defined in the MOOWR regulations. Consequently, such subsidiary companies as at 30 June 2024 has accounted for the resultant benefit as per applicable Ind AS and is carrying 'deferred duty liability' amounting to Rs. 13,354.43 million (30 June 2023: Rs. 4,657.12 million, 31 March 2024: Rs. 10,407.41 million, 31 March 2023: Rs. 4,338.70 million and 31 March 2022: Rs Nil).

With reference to the instruction dated 9 July 2022 (Instruction No.13/2022-Customs) issued by the Central Board of Indirect taxes and Customs (CBIC) to the departmental officers, the Group had been granted stay until the next rescheduled date of hearing by the Honourable High Court of Delhi against the write petition filed by the Group. The Group's management based on inputs from an external expert, believes that the Instruction dated 9 July 2022 is principally and legally untenable and further, as the approval to operate under MOOWR has been granted by the authorities only after due verification of premises and further, as the Group has been complying with all the conditions of MOOWR regulations so far, there should not be any impact either on the already imported goods or on the validation of already issued licences, affecting the Group's eligibility to avail the benefits under the MOOWR scheme. On 6 May 2024, Honourable High Court of Delhi issued its order and quashed the said instruction of the CBIC dated 9 July 2022. Pursuant to the said order in favour of the Company, the custom authorities allowed import of remaining modules under MOOWR Scheme. Subsequently, the custom authorities have filed an appeal against the 6 May order before honourable Supreme Court and the same is yet to be listed for hearing. Accordingly, no adjustment is currently required in these financial statements.

**C. Capital commitments**

During the normal course of business, the Group purchases assets for the construction of solar power plants and estimates that it will incur Rs. 8,100.76 million (30 June 2023: Rs. 7947.24 million, 31 March 2024: Rs. 51,440.03 million, 31 March 2023: Rs. 44,197.87 and 31 March 2022: Rs. 11,066.79 million) for engineering, procurement and construction of solar power projects.

**52 Ind AS 116 - Leases**

The Group has lease agreement usually for a period of 25-28 years with individuals for land and solar park developers. With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. The Group classifies its right-of-use assets in a consistent manner to its property, plant and equipment.

Each lease generally imposes a restriction that, unless there is a contractual right for the Group to sublease the asset to another party, the right-of-use asset can only be used by the Group. The Group is prohibited from selling or pledging the underlying leased assets as security.

**A Lease payments not included in measurement of lease liability**

The Group did not entered into any lease arrangements which are either of low value or are considered as short term leases.

**B Information about extension and termination options**

The lease agreement provide options for extension to the Group if power purchase agreement is extended.

## **SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS AND FINANCIAL CONDITION**

Our results of operations and financial condition are affected by a number of important factors including:

### ***The terms of our power purchase agreements***

We generate revenue through the sale of electricity to various off-takers including central and state government-backed entities with whom we enter into PPAs. Almost all of our portfolio is contracted through long term PPAs for a period of 25 years. Our PPAs typically provide for fixed tariff rates or, in some cases, clearly defined tariff escalation provisions. For a description of the terms of our PPAs, see “***Our Business – Power Purchase Agreements***” on page 264.

The growth of our business and revenues will depend on our ability to continue to fulfil our obligations under our PPAs and enter into additional PPAs for our new projects in the future. In the event we default in fulfilling our obligations under the PPAs, such as not supplying the minimum amount of power specified in the PPAs or fail to obtain regulatory approvals, licenses and clearances, we may be liable for penalties and, in certain specified events, face the risk of the PPAs being terminated. Our results of operations will also be affected by the willingness of our customers to fulfil their contractual obligations and make payments due to us in a timely manner. We have experienced delays in the receipt of payment from certain of our customers in the past and the occurrence of such events in the future may affect our results of operations. For further details, see “***Risk Factors – 2. We are dependent on our Power Purchase Agreements (“PPA”) to sell power and generate our revenue from operations. Further, the terms of our PPAs may expose us to certain risks that may affect our future results of operations and cash flows.***” on page 36.

### ***Our ability to develop and commission our projects according to schedule***

We have an aggregate Operational Project capacity of 1,340 MW (1,826 MWp) solar power projects; Under Construction Contracted Project capacity of 3,250 MW including solar power projects of 1,500 MW (2,192 MWp), wind power projects of 150 MW, hybrid projects of 1,030 MW and FDRE projects of 570 MW; and Under Construction Awarded Project capacity of 1,730 MW comprising 600 MW (870 MWp) of solar power projects, 450 MW hybrid power projects and 680 MW of FDRE power projects, as of the date of this Red Herring Prospectus.

Going forward, our ability to generate revenue will be dependent on commissioning of these projects according to estimated schedule commissioning dates as defined in the relevant PPAs. Typically, we are required to commission a project within 18 to 24 months from the date the PPA is executed. Any time delays and/or cost over-run for under-construction awarded/contracted portfolio may impact the performance in the long run. Accordingly, our revenues, and cash flows will be different in different periods on account of difference in the expected schedule commissioning dates of the under-constructed projects.

### ***Project operations and generation***

Our results of operations depend on the volume of electricity generated and sold by our projects. Our ability to generate electricity in an efficient and cost-effective manner depends on our ability to maintain and utilize the electrical generation capacity of our projects, which in-turn depends on suitable solar, wind and other weather conditions. The volume of electricity generated and sold by our projects during a particular period is also affected by the number of projects that have commenced commercial operations, scheduled and unexpected repair and maintenance required to keep our projects operational. The CUF of a project, which is the actual power output of the project compared to the theoretical maximum output, is an important operating metric through which we determine the efficiency of operating a power project. We are required to generate power within an optimum CUF range as provided in our PPAs and we ensure that our projects generate power within such range. Equipment performance often represents the primary factor affecting our operating results because equipment downtime affects the volume of the electricity that we are able to generate from our projects. The volume of electricity

generated and sold by our projects will be adversely affected if any of our projects experience higher than normal downtime as a result of electrical grid disruption or curtailment, weather disruption, equipment failure or other factors. We have faced certain instances in the state of Rajasthan, Andhra Pradesh, Telangana and Karnataka where the transmission of power got impacted on account of grid failure or other grid related issues. For further details, see ***“Risk Factors – 12. Any constraints in the availability of the electricity grid, including our inability to obtain access to transmission lines in a timely and cost-efficient manner, could adversely affect our business, results of operations and cash flows.”*** on page 53.

Generally, over longer time periods, we expect our portfolio will exhibit less variability in generation compared to shorter periods. It is likely that we will experience more generation variability in monthly or quarterly production than we do for annual production. For further details, see ***“Risk Factors – 29. Our business is subject to environmental conditions, seasonal fluctuations and natural calamities that may have an adverse impact on our business, financial condition and results of operations.”*** on page 67.

### ***Successful participation in auctions for new renewable energy projects***

We participate in auctions held by various government authorities or any other third party to bid for new renewable energy projects. We consider a number of factors in our assessment of potential bids including the credit rating of the off-taker, ease of doing business, policies, land availability, irradiation levels / wind resource assessment at the location of the project, capital costs, payment cycles and grid status. While we operate in a highly competitive environment, we believe that our track record of executing large renewable power projects helps us identify potential bids and prepare for bids when such opportunities arise in the market. We only submit bids for those renewable energy auctions where we are comfortable with the policies, incentives, credit rating of the off-taker, which meets the internal return requirement and where there is access to evacuation infrastructure, transmission systems, water, roads and communications networks and other ancillary infrastructure, competitive intensity, capacity on offer and restrictions on maximum/minimum bid quantity (if applicable). However, it is difficult to predict whether and when we will be awarded a new renewable power project. In addition, the rules of the auction process may change. Going forward, our results of operations will depend on us successfully competing for renewable energy projects by selectively participating in bids for renewable energy projects.

### ***EPC and O&M Capabilities***

Our in-house EPC capabilities allow us to control our process, costs and timelines, use our project design expertise, be flexible with our choice of technology and top tier suppliers, while also being actively involved in the technological, build-of-material and design features of the components. We also utilize technologically advanced equipments including modules, invertors, wind turbines amongst others to optimize power generation, where possible.

As part of our EPC function, our construction capabilities are also a significant strength in our business. We utilize our own civil and electrical engineers with proven project development and project management capabilities to develop and monitor our projects. Our organizational structure allows on site decision making, so that project managers can respond to changing situations during the construction phase of a project. Having in-house construction expertise allows us to track the pricing trends of raw materials, monitor established milestones during the construction phase, strengthen our design expertise and maintain quality of build when we develop a project.

Our in-house O&M capabilities, through the use of technology, forecasting software, central monitoring system software, maintenance scheduling and other systems, allow us to monitor our portfolio performance and operational metrics, in order to maximize our plants’ utilization rates, availability and system life.

Our integrated approach to project development allows us to control our costs, especially in our EPC related activities where we would have otherwise paid higher amounts to third-parties, thus allowing us to retain the construction related margins. This also assists us in increasing internal cash accruals for future development.

The O&M functions of our projects and certain EPC supply work including contracting of module/wind turbines were typically undertaken by our Promoter, ACME Cleantech. In order to bring all the capabilities of EPC and O&M operations within the purview of our Company, our Company entered into an agreement for the transfer of employees with ACME Cleantech on June 25, 2024 read with amendment agreement dated October 9, 2024 (***“Transfer Agreement”***). Pursuant to the Transfer Agreement, certain employees of ACME Cleantech including employees who are engaged in EPC and O&M operations of the projects shall be transferred to the rolls of our Company with effect from November 1, 2024, thus giving us the capability to undertake integrated EPC and O&M operations in-house.

Further, ACME Cleantech had entered into O&M agreements with our project SPVs pursuant to which it provided O&M services for such projects. On June 25, 2024, our Company and ACME Cleantech entered into a deed of novation dated, pursuant to which ACME Cleantech agreed to novate all of its rights, obligations, interest and title under the O&M agreements to our Company. The deed of novation was subsequently amended on October 7, 2024 by the parties.

### ***Financing requirement and divestment of projects***

We generally invest equity of approximately 25% of the total project cost in each power project. For the remaining approximately 75% of the total project cost, we have worked with a number of lenders to obtain debt financing. This provides us the flexibility we require in project development and enables us to obtain competitive interest rates. Additionally, we have raised capital in the form of structured debt from strategic and financial investors to develop projects in India. For Fiscal 2024, 2023 and 2022, our finance costs were ₹ 7,672.93 million, ₹ 8,090.97 million and ₹ 9,960.08 million or 52.33%, 59.43% and 63.74%, of our total revenue while for the three months ended June 30, 2024 and June 30, 2023, our finance costs were ₹ 1,962.83 million and ₹ 1,878.40 million or 57.73% and 44.04%, respectively.

We have been able to successfully refinance some of our debt in the past and have reduced the interest payable on such loans, increased the tenure as well as the amounts that were originally sanctioned. We have also successfully refinanced certain of our Project SPVs through green bonds wherein the Project SPVs issued unlisted NCDs in Fiscal 2022 for a total amount of ₹ 24,855.25 million (US\$ 334.00 million) listed on the Singapore Stock Exchange including a top up debt of ₹ 5,029.30 million (US\$ 67.58 million). From April 1, 2020 till the date of this Herring Prospectus, we have raised a total refinanced debt of ₹ 32,995.70 million including a top-up debt of ₹ 6,188.80 million through rupee term loan from several Indian lenders assisting us to reduce our cost of debt.

We have also strategically divested projects to help churn the capital and have deployed it for new projects. These initiatives have helped enhance our liquidity, reduce our borrowings thus enabling us to invest in new projects. As of date of this Red Herring Prospectus, we have divested 1,379 MW of projects to various reputed investors and raise equity capital through such asset divestments demonstrating the quality of assets built by us. The following table sets forth certain details of the year-wise divestment details:

| <b>Year of Divestment</b> | <b>Capacity (AC) MW of Solar Power Plant</b> | <b>Buyers</b>                                 |
|---------------------------|----------------------------------------------|-----------------------------------------------|
| Fiscal 2024               | 369                                          | Blupine (Blupine Energy Private Limited)      |
| Fiscal 2023               | -                                            | -                                             |
| Fiscal 2022               | 250                                          | Ayana (Ayana Renewable Power Private Limited) |
|                           | 260                                          | Renew (Renew Solar Power Private Limited)     |
| Fiscal 2021               | 400                                          | Actis (Actis Greengen Limited)                |
|                           | 100                                          | Amplus (Amplus Energy Solutions Pte. Ltd.)    |
| <b>Total</b>              | <b>1,379</b>                                 | <b>-</b>                                      |

As we operate in capital intensive industry, cost effective financing is a crucial requirement for us. We fulfil our financing requirements through equity, funds from operations, project finance and corporate debt through lenders and other capital investors. To raise funds on competitive terms helps us maximising our capital efficiency though we expect to raise funds for our under construction and development projects in the same manner, however such financing is subject to various factors including macro-economic environment.

### ***Government Schemes and Incentives***

We depend on Government policies and incentives that support the development of renewable energy projects. Such incentives are generally in the form of exemptions on payment of excise duty and custom duty provided by the central government and exemptions on payment of entry tax, VAT, stamp duty on registration of land for renewable power projects, registration charge, electricity duty on energy used for auxiliary consumption, change of land use provided by state governments which may vary from state to state, and other incentives to end users, distributors, system integrators and manufacturers of solar energy products. Such incentives are aimed at reducing the development costs of renewable energy projects and our operations benefit from these government incentives. Any adverse change or termination of these incentives could have an adverse effect on our results of operations.

Further, the Government of India has provided an impetus to improve the payment security mechanism of power generators. The Ministry of Power has notified The Electricity (Late Payment Surcharge and Related Matters) Rules, 2022 (“LPS Rules”) to address cash flow challenges faced mainly by generation companies and transmission companies and to promote timely payments across the power sector. These rules provide a mechanism for settlement of outstanding dues of generation companies, ISTS Licensees and Electricity Trading Licensees. The rules provisioned for converting discoms’ outstanding dues to these companies into equated monthly instalments for gradual liquidation of these dues. (Source: CRISIL Report)

While we believe that the Government will continue to focus on providing variety of schemes and incentives for the growth of renewable energy sector in India, in the event there are adverse changes in such schemes or incentives, our results of operations may be impacted.

## NON-GAAP MEASURES

Net worth, earnings before interest, taxes, depreciation and amortization expenses (“EBITDA”), EBITDA Margin, PAT Margin, net debt to equity ratio, and cash return on equity (together, “Non-GAAP Measures”), presented in this Red Herring Prospectus is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP. Further, these Non-GAAP Measures are not a measurement of our financial performance or liquidity under Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP and should not be considered in isolation or construed as an alternative to cash flows, profit for the years or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS, U.S. GAAP or any other GAAP. In addition, these Non-GAAP Measures are not standardized terms, hence a direct comparison of these Non-GAAP Measures between companies may not be possible. Other companies may calculate these Non-GAAP Measures differently from us, limiting its usefulness as a comparative measure. Although such Non-GAAP Measures are not a measure of performance calculated in accordance with applicable accounting standards, our Company’s management believes that they are useful to an investor in evaluating us as they are widely used measures to evaluate a company’s operating performance. For further information see **“Risk Factors – 61. We have in this Red Herring Prospectus included certain non-GAAP financial measures and Key Performance Indicators (“KPIs”) that may vary from any standard methodology that is applicable across our industry. We rely on certain assumptions and estimates to calculate such measures, therefore such measures may not be comparable with financial, operational or industry-related statistical information of similar nomenclature computed and presented by other similar companies.”** on page 85.

### Reconciliation of Non-GAAP measures

#### Reconciliation of net worth

#### Reconciliation of Profit/(Loss) to EBITDA and EBITDA Margin

Revenue from engineering, procurement and construction services were nil in the three months ended June 30, 2024 and June 30, 2023.

### **Project management services**

Revenue from project management services was nil in the three months ended June 30, 2024 and June 30, 2023.

### **Other operating revenue**

Other operating revenue was nil in the three months ended June 30, 2024 compared to ₹ 1.58 million in the three months ended June 30, 2023 on account of sale of entities generating revenue from transmission line before March 31, 2024.

### **Other Income**

Other income decreased to ₹ 303.74 million in the three months ended June 30, 2024 from ₹ 574.30 million in the three months ended June 30, 2023. The decrease was on account of:

- A decrease in interest income on inter corporate deposits to ₹ 32.94 million in the three months ended June 30, 2024 from ₹ 119.46 million in the three months ended June 30, 2023;
- A decrease in interest income on late payment surcharge to ₹ 2.19 million in the three months ended June 30, 2024 from ₹ 264.73 million in the three months ended June 30, 2023; and
- A decrease in miscellaneous income to ₹ 1.66 million in the three months ended June 30, 2024 from ₹ 4.36 million in the three months ended June 30, 2023.

This was offset by an increase in:

- Interest income on bank deposits from ₹ 129.18 million in the three months ended June 30, 2023 to ₹ 133.45 million in the three months ended June 30, 2024;
- Interest income on non-convertible debentures from nil in the three months ended June 30, 2023 to ₹ 64.64 million in the three months ended June 30, 2024 on account of interest earned on investment made through non-convertible debentures in ACME Cleantech Solutions Private Limited during the three months period ended 30 June 2024; and
- Amortisation of deferred revenue from ₹ 26.49 million in the three months ended June 30, 2023 to ₹ 56.08 million in the three months ended June 30, 2024;

### **Total Expense**

Total expenses decreased by 7.08% to ₹2,897.63 million in the three months ended June 30, 2024 compared to ₹ 3,118.31 million in the three months ended June 30, 2023. This was primarily due to below mentioned reasons:

### **Cost of Materials Consumed**

Cost of materials consumed remained nil in the three months ended June 30, 2024 and June 30, 2023 primarily on account of no external supply of EPC.

### **Employee Benefits Expenses**

Employee benefit expenses increased by 13.01% to ₹ 150.05 million in the three months ended June 30, 2024 from ₹ 132.78 million in the three months ended June 30, 2023. This was mainly due to an increase in salaries, wages and bonus by 12.83% to ₹ 143.94 million in the three months ended June 30, 2024 from ₹ 127.57 million in the three months ended June 30, 2023 on account of increase in manpower and joining bonus paid during in the three months ended June 30, 2024 as compared to three months ended June 30, 2023.

### **Other Expenses**

Other expenses decreased by 32.92% from ₹ 341.56 million in the three months ended June 30, 2023 to ₹ 229.13 million in the three months ended June 30, 2024. This was primarily due to a decrease in:

- Operational and maintenance expenses by 15.37% from ₹ 142.52 million in the three months ended June 30, 2023 to ₹ 120.62 million in the three months ended June 30, 2024 on account of decrease in operation and maintenance expenses amounting to ₹ 42.91 million pertaining to entities divested in January 2024, which has been offset by increase in operation and maintenance expenses primarily in ACME Heergarh and ACME Aklera due to capitalization of above entities.
- Repairs and maintenance on plant and equipment from ₹ 7.35 million in the three months ended June 30, 2023 to ₹ 6.44 million in the three months ended June 30, 2024;
- Rates and taxes from ₹ 68.42 million in the three months ended June 30, 2023 to ₹ 3.38 million in the three months ended June 30, 2024 on account of fee paid to Rajasthan Renewable Energy Development Fund for ACME Heergarh during Fiscal 2024;
- Insurance by 14.94% from ₹ 26.58 million in the three months ended June 30, 2023 to ₹ 22.61 million in the three months ended June 30, 2024; and
- Legal and professional fee from ₹ 86.39 million in the three months ended June 30, 2023 to ₹ 26.35 million in the three months ended June 30, 2024 on account of technical engineering and monitoring service provided by a third party for ACME Heergarh project in the three months ended June 30, 2023.

This was partially offset primarily by an increase in impairment loss on fair value of asset held for sale from nil in the three months ended June 30, 2023 compared to ₹ 13.48 million in the three months ended June 30, 2024 on account of reduction in value of uninstalled excess module capacity in ACME Jaisalmer Solar Power Private limited, Aarohi Solar Private Limited, Niranjana Solar Energy Private Limited and Vishwatma Solar Energy Private limited.

As such, total expenses amounted to ₹ 2,897.63 million in the three months ended June 30, 2024 as compared to ₹ 3,118.31 million in the three months ended June 30, 2023. Profit before exceptional items amounted to ₹ 502.51 million in the three months ended June 30, 2024 as compared to profit before exceptional items of ₹ 1,147.31 million in the three months ended June 30, 2023 primarily on account of decrease in profit before exceptional items of the entities divested during Fiscal 2024.

### **Exceptional Items**

Exceptional items were nil in the three months ended June 30, 2024 as compared to ₹ 74.47 million in the three months ended June 30, 2023 due to net gain in sale of assets / investments.

### **Depreciation and Amortisation Expense**

Depreciation and amortisation expense decreased to ₹ 555.62 million in the three months ended June 30, 2024 from ₹ 765.57 million in the three months ended June 30, 2023, primarily due to a decrease in depreciation of property, plant and equipment to ₹ 526.96 million in the three months ended June 30, 2024 from ₹ 732.34 million in the three months ended June 30, 2023, mainly due to entities divested during Fiscal 2024; and amortization of right of use decreased to ₹ 28.66 million in the three months ended June 30, 2023 from ₹ 33.23 million in the three months ended June 30, 2023.

### **Profit/(Loss) before Tax**

For the reasons discussed above, profit before tax decreased to ₹ 502.51 million in the three months ended June 30, 2024 as compared to profit before tax of ₹ 1,221.78 million in the three months ended June 30, 2023.

Current tax expense increased from ₹ 30.53 million in the three months ended June 30, 2023 to ₹ 468.64 million in the three months ended June 30, 2024 mainly on account of increase in the taxable profits from the EPC business (after adjusting unabsorbed losses) of our Company. Deferred tax (credit) / expense decreased to ₹ 19.98 million in the three months ended June 30, 2024 from ₹ 367.91 million in the three months ended June 30, 2023 primarily on account of a reversal of opening deferred tax assets on brought forward losses, on purchase of external compound financial instruments and reversal of opening deferred tax on account of decrease in lease liabilities and deferred revenue.

### **Profit/(Loss) for the Year**

For the various reasons discussed above, profit for the year decreased to ₹ 13.89 million in the three months ended June 30, 2024 compared to profit for the year of ₹ 823.31 million in the three months ended June 30, 2023.

### **Engineering, Procurement and Construction Services**

Revenue from engineering, procurement and construction services were nil in Fiscal 2024 compared to ₹ 32.47 million in Fiscal 2023 as we sold certain materials which primarily includes transmission line material to our Promoter ACME Cleantech during Fiscal 2023.

### **Project management services**

Revenue from project management services was nil in Fiscal 2024 compared to ₹ 210.00 million in Fiscal 2023, which pertains to project management services provided to ACME Cleantech.

### **Other operating revenue**

Other operating revenue decreased to ₹ 3.96 million in Fiscal 2024 from ₹ 5.07 million in Fiscal 2023 on account of assets divested on January 3, 2024.

### **Other Income**

Other income increased to ₹ 1,470.17 million in Fiscal 2024 from ₹ 664.69 million in Fiscal 2023. The increase was on account of:

- An increase in interest income on bank deposits to ₹ 486.08 million in Fiscal 2024 from ₹ 311.40 million in Fiscal 2023;
- An increase in interest income on inter corporate deposits to ₹ 299.85 million in Fiscal 2024 from ₹ 42.16 million in Fiscal 2023;
- An increase in interest income on late payment surcharge to ₹ 290.62 million in Fiscal 2024 from ₹ 22.21 million in Fiscal 2023;
- An increase in amortisation of deferred revenue to ₹180.37 million in Fiscal 2024 from ₹ 106.38 million in Fiscal 2023;
- An increase in insurance claim received to ₹ 58.86 million in Fiscal 2024 from ₹ 4.67 million in Fiscal 2023; and
- An increase in miscellaneous income to ₹ 17.19 million in Fiscal 2024 from ₹ 6.31 million in Fiscal 2023.

### **Total Expense**

Total expenses decreased by 7.82% to ₹13,055.33 million in Fiscal 2024 compared to ₹ 14,162.10 million in Fiscal 2023. This was primarily due to below mentioned reasons:

### **Cost of Materials Consumed**

Cost of materials consumed remained nil in Fiscal 2024 and Fiscal 2023 primarily on account of no external supply of EPC.

### **Employee Benefits Expenses**

Employee benefit expenses increased by 70.28% to ₹ 589.95 million in Fiscal 2024 from ₹ 346.44 million in Fiscal 2023. This was mainly due to an increase in salaries, wages and bonus by 71.54% to ₹ 566.21 million in

Fiscal 2024 from ₹ 330.06 million in Fiscal 2023 on account of increase in long term retention bonus and incentives to employees during Fiscal 2024 as compared to Fiscal 2023.

### ***Other Expenses***

Other expenses increased by 95.18%, from ₹ 876.67 million in Fiscal 2023 to ₹ 1,711.07 million in Fiscal 2024. This was primarily due to an increase in:

- Repairs and maintenance of plant and equipment by 63.00% from ₹ 31.35 million in Fiscal 2023 to ₹ 51.10 million in Fiscal 2024 on account of repairs and maintenance majorly in ACME Jodhpur Solar Power Private Limited and ACME Sandur Solar Energy Private Limited because of replacement of equipment due to fire incidents and the amount was recovered through insurance claims, which has been reflected in other income.
- Rates and taxes from ₹ 28.29 million in Fiscal 2023 to ₹ 94.62 million in Fiscal 2024 mainly on account of fee paid to Rajasthan Renewable Energy Development Fund for ACME Heergarh during Fiscal 2024;
- Corporate social responsibility by 94.13% from ₹ 6.98 million in Fiscal 2023 to ₹ 13.55 million in Fiscal 2024;
- Charity and donation from nil in Fiscal 2023 to ₹ 510.00 million in Fiscal 2024; and
- Impairment loss on fair value of asset held for sale from nil in Fiscal 2023 to ₹ 122.28 million in Fiscal 2024 on account of reduction in value of uninstalled excess module capacity in ACME Jaisalmer Solar Power Private limited, Aarohi Solar Private Limited, Niranjana Solar Energy Private Limited and Vishwatma Solar Energy Private limited.

This was partially offset primarily by a decrease in amortisation of deferred expenses by 6.18% from ₹ 10.68 million in Fiscal 2023 to ₹ 10.02 million in Fiscal 2024; a decrease in insurance by 17.84% from ₹ 131.71 million in Fiscal 2023 to ₹ 108.21 million in Fiscal 2024; and a marginal decrease in miscellaneous expenses from ₹ 6.23 million in Fiscal 2023 to ₹ 6.21 million in Fiscal 2024.

As such, total expenses amounted to ₹ 13,055.33 million in Fiscal 2024 as compared to ₹ 14,162.10 million in Fiscal 2023. Profit before exceptional items amounted to ₹ 1,607.34 million in Fiscal 2024 as compared to loss before exceptional items of ₹ (548.37) million in Fiscal 2023 primarily on account of reduction in depreciation because of change in estimate of useful life of solar plant and sale of assets with AC capacity of 369 MW in January 2024. This is further on account of reduction in finance costs majorly because of sale of assets.

### ***Exceptional Items***

Exceptional items increased to ₹ 7,486.91 million in Fiscal 2024 from ₹ 394.36 million in Fiscal 2023. This increase is primarily attributable to an increase in net gain on sale of assets/investments to ₹ 7,212.30 million in Fiscal 2024 from ₹ 225.67 million in Fiscal 2023 since we divested 369 MW of projects to an investor during Fiscal 2024; and an increase in contingent consideration related to investment disposed in earlier years to ₹ 274.61 million in Fiscal 2024 from ₹ 168.69 million in Fiscal 2023.

### ***Finance Costs***

Finance costs decreased by 5.17% to ₹ 7,672.93 million in Fiscal 2024 from ₹ 8,090.97 million in Fiscal 2023. This decrease is primarily attributable to decrease in interest payable on non-convertible debentures from ₹ 2,998.96 million in Fiscal 2023 to ₹ 2,621.99 million in Fiscal 2024 (due to principal repayment of non-convertible debentures during the year amounting to ₹ 1,565.88 million and repayment of corporate non-convertible debentures of ₹ 3,758.49 million during Fiscal 2023); increase in interest on term loans from ₹ 4,073.87 million in Fiscal 2023 to ₹ 4,119.37 million in Fiscal 2024 and exchange loss of ₹ 68.34 million (mainly due to capitalization of new projects which was partially offset by sale of assets); decrease in amortisation of ancillary cost of borrowings from ₹ 719.99 million in Fiscal 2023 to ₹ 611.48 million in Fiscal 2024.

### ***Depreciation and Amortisation Expense***

Depreciation and amortisation expense decreased to ₹ 3,081.38 million in Fiscal 2024 from ₹ 4,848.02 million in Fiscal 2023, primarily due to a decrease in depreciation of property, plant and equipment to ₹ 2,947.17 million in Fiscal 2024 from ₹ 4,716.02 million in Fiscal 2023, mainly due to change in estimate of useful life of solar power plants and divestments of assets of 369 MW during Fiscal 2024. This was partially offset by an increase in amortisation of right of use from ₹ 131.98 million in Fiscal 2023 to ₹ 134.19 million in Fiscal 2024.

### Profit/(Loss) before Tax

For the reasons discussed above, profit before tax was ₹ 9,094.25 million in Fiscal 2024 as compared to loss before tax of ₹ (154.01) million in Fiscal 2023.

### Total Tax (Credit) / Expense

Total tax (credit)/expense increased from ₹ (122.27) million in Fiscal 2023 to ₹ 2,116.44 million in Fiscal 2024. Current tax expense increased from ₹ 55.48 million in Fiscal 2023 to ₹ 1,069.21 million in Fiscal 2024 mainly on account of tax on gain on sale of investments. Deferred tax (credit) / expense increased from ₹ (179.21) million in Fiscal 2023 to ₹ 1,046.38 million in Fiscal 2024 primarily by a reversal of opening deferred tax assets on brought forward losses, on purchase of external compound financial instruments and reversal of opening deferred tax on account of decrease in lease liabilities and deferred revenue.

### Profit/(Loss) for the Year

For the various reasons discussed above, we recorded a profit for the year of ₹ 6,977.81 million in Fiscal 2024 compared to a loss for the year of ₹ (31.74) million in Fiscal 2023.

### FISCAL 2023 COMPARED TO FISCAL 2022

#### Key Developments

- Commissioned a new project for MSEDCL in Rajasthan having AC capacity of 300 MW.
- We divested assets with AC capacity of 510 MW during Fiscal 2022.

### Total Revenue

Total revenue decreased by 12.88% from ₹ 15,627.26 million in Fiscal 2022 to ₹ 13,613.73 million in Fiscal 2023, primarily attributable to the following:

#### Revenue from Operations

Revenue from operations decreased by 12.97% from ₹ 14,879.02 million in Fiscal 2022 comprising ₹ 13,744.88 million from sale of electricity, ₹ 4.95 million from other operating revenue, ₹ 938.19 million from engineering procurement and construction services and ₹ 191.00 million from project management services to ₹ 12,949.04 million in Fiscal 2023 comprising ₹ 12,701.50 million from sale of electricity, ₹ 5.07 million from other operating revenue, ₹ 32.47 million from EPC services and ₹ 210.00 million from project management services.

### **Engineering, procurement and construction services**

Revenue from engineering, procurement and construction services decreased to ₹ 32.47 million in Fiscal 2023 from ₹ 938.19 million in Fiscal 2022 mainly on account of one time supply of galvanized steel to an external customer in Fiscal 2022, who subsequently use the steel to sell us the module mounting structure for our under construction projects.

### **Project management services**

Revenue from project management services increased to ₹ 210.00 million in Fiscal 2023 from ₹ 191.00 million in Fiscal 2022 on account of increase in supply of project management services to ACME Cleantech.

### **Other operating revenue**

Other operating revenue increased from ₹ 4.95 million in Fiscal 2022 to ₹ 5.07 million in Fiscal 2023.

### **Other Income**

Other income decreased by 11.17% from ₹ 748.24 million in Fiscal 2022 to ₹ 664.69 million in Fiscal 2023. This was on account of:

- Decrease in interest income on receivable from discoms by 39.74% from ₹ 226.78 million in Fiscal 2022 to ₹ 136.66 million in Fiscal 2023 on account of divestment of MSEDCL-1 project in Fiscal 2022 and payment received from discom during Fiscal 2023;
- A decrease in amortisation of deferred revenue by 30.70% from ₹ 153.50 million in Fiscal 2022 to ₹ 106.38 million in Fiscal 2023 on account of divestment of AC capacity of 510 MW assets during the Fiscal 2022;
- A decrease in insurance claim received by 73.30% from ₹ 17.49 million in Fiscal 2022 to ₹ 4.67 million in Fiscal 2023 based on actual insurance claims received;
- A decrease in excess provisions written back by 58.88% from ₹ 22.30 million in Fiscal 2022 to ₹ 9.17 million in Fiscal 2023 on account of writing back provisions in Fiscal 2022 taken in earlier years which were not required to be carry forward; and
- A decrease in miscellaneous income by 83.48% from ₹ 38.19 million in Fiscal 2022 to ₹ 6.31 million in Fiscal 2023 majorly on account of carbon credits sold by the entities divested during Fiscal 2022.

This was partially offset by an increase in late payment surcharge, from nil in Fiscal 2022 to ₹ 22.21 million in Fiscal 2023 on account of receipt of late payment surcharge, as per the PPA entered into for power sales with customers in KREDL project entities and Madhya Pradesh entity for payments done by customer after due date.

### **Total Expense**

Total expense decreased by 20.88% to ₹ 14,162.10 million in Fiscal 2023 compared to ₹ 17,898.63 million in Fiscal 2022. This was primarily due to a significant decrease in cost of materials consumed, employee benefits expenses and other expenses.

### ***Cost of Materials Consumed***

Cost of materials consumed decreased from ₹ 938.50 million in Fiscal 2022 to nil in Fiscal 2023 on account of cost of one time supply of goods/services to an external customer in Fiscal 2022.

### ***Employee Benefits Expenses***

Employee benefit expense decreased by 9.40% to ₹ 346.44 million in Fiscal 2023 from ₹ 382.37 million in Fiscal 2022. This was primarily on account of decrease in salaries, wages and bonus by 9.51% to ₹ 330.06 million in Fiscal 2023 from ₹ 364.74 million in Fiscal 2022 as a result of special incentives awarded to employees by our Company during Fiscal 2022 which was partially offset by general increments in salaries during Fiscal 2023 and increase in number of employees.

### ***Other Expenses***

Other expenses decreased by 24.09%, from ₹ 1,154.93 million in Fiscal 2022 to ₹ 876.67 million in Fiscal 2023. This was primarily due to decrease in:

- Operation and maintenance expenses by 7.82% from ₹ 581.73 million in Fiscal 2022 to ₹ 536.25 million in Fiscal 2023, which included (a) a decrease on account of entities divested having AC capacity of 510 MW; which was offset by on account of a new a project having AC capacity of 300 MW capitalized during Fiscal 2022;
- Repairs and maintenance of plant and equipment by 24.06% from ₹ 41.28 million in Fiscal 2022 to ₹ 31.35 million in Fiscal 2023 on account of entities divested with AC capacity of 510 MW during Fiscal 2022;
- Rates and taxes by 64.91% from ₹ 80.61 million in Fiscal 2022 to ₹ 28.29 million in Fiscal 2023 majorly on account of development charges paid in Fiscal 2022 to Rajasthan Renewable Energy Development Fund in MSIEDCL project in ACME Chittorgarh which was divested in Fiscal 2022 and a one-time fee paid for increase in authorised share capital in ACME Deoghar;
- Bank charges from ₹ 1.22 million in Fiscal 2022 to ₹ 0.85 million in Fiscal 2023;
- Corporate social responsibility by 34.09% from ₹ 10.59 million in Fiscal 2022 to ₹ 6.98 million in Fiscal 2023; and
- Miscellaneous expenses by 69.76% from ₹ 20.60 million in Fiscal 2022 to ₹ 6.23 million in Fiscal 2023.

As such, total expenses amounted to ₹ 14,162.10 million in Fiscal 2023 as compared to ₹ 17,898.63 million in Fiscal 2022. Loss before exceptional items amounted to ₹ (548.37) million in Fiscal 2023 as compared to loss before exceptional items amounted to ₹ (2,271.37) million in Fiscal 2022.

### ***Exceptional Items***

Exceptional items decreased by 88.03% to ₹ 394.36 million in Fiscal 2023 from ₹ 3,295.63 million in Fiscal 2022. This decrease is primarily attributable to a decrease in net gain on sale of assets/investments to ₹ 225.67 million in Fiscal 2023 from ₹ 3,295.63 million in Fiscal 2022 on account of divestment of 510 MW of assets during Fiscal 2022 compared to no divestment in Fiscal 2023. Profit on sale of investment was ₹ 225.67 million during Fiscal 2023 from the assets divested during Fiscal 2021.

### ***Finance Cost***

Finance costs decreased by 18.77% to ₹ 8,090.97 million in Fiscal 2023 from ₹ 9,960.08 million in Fiscal 2022. This decrease is primarily attributable to decrease in interest on term loans from ₹ 5,543.70 million in Fiscal 2022 to ₹ 4,073.87 million in Fiscal 2023 on account of divestment of projects having AC capacity of 510 MW during Fiscal 2022; decrease in other borrowing cost from ₹ 734.29 million in Fiscal 2022 to ₹ 60.20 million in Fiscal 2023 because of one time prepayment charges paid for the closure of loans from financial institutions at the time of issuance of non-convertible debentures during Fiscal 2022; increase in amortisation of ancillary cost of borrowings from ₹ 557.83 million in Fiscal 2022 to ₹ 719.99 million in Fiscal 2023 on account of refinance of term loan in Dayanidhi Solar Power Private limited, ACME Jaisalmer Solar Power Private Limited, Aarohi Solar Private Limited, Niranjana Solar Energy Private Limited and Vishwatma Solar Energy Private Limited in March 2023.

### **Depreciation and Amortisation Expense**

Depreciation and amortisation expense decreased by 11.25% to ₹ 4,848.02 million in Fiscal 2023 from ₹ 5,462.75 million in Fiscal 2022, primarily due to a decrease in depreciation of property, plant and equipment by 11.65% to ₹ 4,716.02 million in Fiscal 2023 from ₹ 5,337.87 million in Fiscal 2022. This was partially offset by an increase in amortisation of right of use by 5.77% from ₹ 124.78 million in Fiscal 2022 to ₹ 131.98 million in Fiscal 2023.

Decrease in depreciation and amortisation expenses during Fiscal 2023 was majorly on account of divestment of assets having AC capacity of 510 MW during Fiscal 2022.

## **LIQUIDITY AND CAPITAL RESOURCES**

Our liquidity requirements relate to investments in infrastructure development at project sites for renewal energy projects; servicing our debt; funding our working capital requirements; and maintaining cash reserves against fluctuations in operating cash flows. The cash outflows on projects are incurred in the initial stages whereas the realization occur over a period of time from the sale of power. We currently hold our cash and cash equivalents primarily in Indian Rupees.

We have funded our growth principally from equity funding, EPC margin, bank borrowings, borrowings from ACME Cleantech, and internal cash flows. Our principal uses of cash have been, and are expected to continue to be, funding our growth which includes long investments and development of renewable energy projects. We intend to continue to fund our liquidity and capital requirements primarily through shareholder capital and funds generated from operations, and indebtedness, including term loans from banks, raising bonds from international market, non-convertible debentures, commercial paper, refinancing and top up loan from banks and financial institutions. We actively manage our liquidity and capital position by raising funds periodically at SPV levels. We regularly monitor our funding levels to ensure that we can satisfy the requirements for loan disbursements and maturity of our liabilities.

#### **SIGNIFICANT DEPENDENCE ON SINGLE OR FEW CUSTOMERS**

We derive our revenue from sale of electricity, providing operations and management services and engineering, procurement and construction services. Certain of our customers contributed more than 10 percent of our overall revenue from operations for three months ended June 30, 2024 and June 30, 2023 and Fiscal 2024, 2023 and 2022.

During the three months ended June 30, 2024 we generated more than 10% of our revenue from operations from two customers which contributed ₹ 977.85 million, while during three months ended June 30, 2023, one customer contributed more than 10% of our revenue from operation amounting to ₹ 463.94 million.

#### **SEASONALITY/ CYCLICALITY OF BUSINESS**

The revenues generated by our renewable energy projects are proportional to the amount of electricity generated, which in turn is dependent upon prevailing environmental conditions. Our power generation is highly dependent on weather conditions and the profitability of our operations depend not only on observed weather conditions at the project site but also on the consistency of those weather conditions. We base our investment decisions with respect to each renewable energy project on the findings of related studies conducted on-site.

However, operating results for renewable energy projects vary depending on natural variations from season to season and from year to year and may also change permanently because of climate change or other factors (including conditions resulting from man-made causes, such as smog from crop burning), which are beyond our control. In addition, the amount of electricity our projects produce is dependent in part on the amount of sunlight or irradiation. For instance, there may be a fall in electricity generation due to certain environmental conditions, such as, cloudy weather, sandstorms, heavy rainfall, solar eclipse and environment pollution.

For further information, see “**Risk Factors – 29. Our business is subject to environmental conditions, seasonal fluctuations and natural calamities that may have an adverse impact on our business, financial condition and results of operations..**” on page 67.

1. 3. M. K. Ranjitsinh & Ors. (“**Petitioners**”) filed a petition in form of application dated November 6, 2021, before the Supreme Court of India against the Union of India & Ors. (“**Respondents**”) on behalf of Solar Power Developers Association (“**Applicant**” or “**SPDA**”) for modification of order dated April 19, 2021 (“**Order**”), passed by the Supreme Court of India seeking specific directions/measures to save/protect two bird species, namely, the Great Indian Bustard (“**GIB**”) and the Lesser Floricane. 6. ACME Cleantech (“**Petitioner**”), filed a petition dated July 12, 2024, under Section 79(1)(c) of the Electricity Act, 2003, before the Central Electricity Regulatory Commission, against Central Transmission Utility of

India Limited, Solar Energy Corporation of India, Ministry of New and Renewable Energy and Ministry of Power (“**Respondents**”), regarding the Central Electricity Regulatory Commission (Connectivity and General Network Access to the Inter-State Transmission System) Regulations, 2022. The Petitioner filed a compliance affidavit on August 20, 2024, addressing the Commission’s queries from the July 22, 2024, hearing. ACME Cleantech initially expected the Sanchore sub-station to be operational by June 25, 2027, but Central Transmission Utility of India Limited’s update indicates a new readiness date of March 2030. To address this, the Petitioner plans to source renewable energy from alternative means to power its green hydrogen plant until the sub-station is complete. The Petitioner clarified that the 698 MW required for its green hydrogen plant justifies the 2,182 mega-watt solar capacity, given a capacity utilization factor of 32%. While the Petitioner maintains that its letter of authorization from Solar Energy Corporation of India meets connectivity requirements, it is prepared to provide a bank guarantee under the land bang guarantee route, if needed. The Petitioner also requested a relaxation of land requirements due to the impracticality of acquiring 5,500 acres within 12 months and seeks to meet land requirements under the letter of award route instead. The Central Electricity Regulatory Commission directed the Petitioner to clarify how the 2,182 MW solar plant will supply the 698 MW demand, and provide details on the general network access application for the green hydrogen plant. Solar Energy Corporation of India and Central Transmission Utility of India Limited were instructed to comply with prior directions within two weeks. This being the initial public offering of the Equity Shares of our Company, the Equity Shares are not listed on any stock exchange as on the date of this Red Herring Prospectus, and accordingly, no stock market data is available for the Equity Shares.

## Mechanism for Redressal of Investor Grievances

The Registrar Agreement provides for retention of records with the Registrar to the Offer for a period of at least eight years from the date of listing and commencement of trading of the Equity Shares on the Stock Exchanges or any such period as prescribed under the applicable laws, to enable the investors to approach the Registrar to the Offer for redressal of their grievances. The Registrar to the Offer shall obtain the required information from the Self Certified Syndicate Banks (“SCSBs”) for addressing any clarifications or grievances of application supported by blocked amount (“ASBA”) Bidders.

**Bidders can contact the Company Secretary and Compliance Officer and/or the Registrar to the Offer in case of any pre-Offer or post-Offer related problems such as non-receipt of letters of Allotment, non-credit of Allotted Equity Shares in the respective beneficiary account, non-receipt of refund orders or non-receipt**

of funds by electronic mode, etc. For all Offer related queries and for redressal of complaints, Bidders may also write to the BRLMs, in the manner provided below. Our Company, the Promoter Selling Shareholder, the BRLMs and the Registrar to the Offer accept no responsibility for errors, omissions, commission or any acts of SCSBs including any defaults in complying with its obligations under the applicable provisions of the SEBI ICDR Regulations.

All Offer related grievances, other than of Anchor Investors, may be addressed to the Registrar to the Offer with a copy to the relevant Designated Intermediary, with whom the Bid cum Application Form was submitted giving full details such as name of the sole or First Bidder, Bid cum Application Form number, Bidder's DP ID, Client ID, Unified Payments Interface Identity ("UPI ID"), Permanent Account Number ("PAN"), address of Bidder, number of the Equity Shares applied for, ASBA Account number in which the amount equivalent to the Bid Amount was blocked or the UPI ID (for UPI Bidders who make the payment of Bid Amount through the UPI Mechanism), date of Bid cum Application Form and the name and address of the relevant Designated Intermediary where the Bid was submitted. Further, the Bidder shall enclose the Acknowledgment Slip or the application number from the Designated Intermediary in addition to the documents or information mentioned hereinabove. The Registrar to the Offer shall obtain the required information from the SCSBs for addressing any clarifications or grievances of ASBA Bidders. For Offer-related grievances, investors may contact the BRLMs, details of which are given in "General Information – Book Running Lead Managers" on page 103.

In case of any delay in unblocking of amounts in the ASBA Accounts exceeding two Working Days from the Bid/Offer Closing Date, the Bidder shall be compensated at a uniform rate of ₹100 per day for the entire duration of delay exceeding two Working Days from the Bid / Offer Closing Date by the intermediary responsible for causing such delay in unblocking. The BRLMs, in their sole discretion, identify and fix the liability on such intermediary or entity responsible for such delay in unblocking.

Pursuant to the SEBI master circular for Issue of Capital and Disclosure Requirements bearing reference number SEBI/HO/CFD/PoD-2/P/CIR/2023/00094 dated June 21, 2023 ("SEBI ICDR Master Circular"), SEBI has identified the need to put in place measures, in order to manage and handle investor issues arising out of the UPI Mechanism *inter alia* in relation to delay in receipt of mandates by Bidders for blocking of funds due to systemic issues faced by Designated Intermediaries/SCSBs and failure to unblock funds in cases of partial allotment/non allotment within prescribed timelines and procedures.

In terms of SEBI ICDR Master Circular issued by the SEBI, any ASBA Bidder whose Bid has not been considered for Allotment, due to failure on the part of any SCSB, shall have the option to seek redressal of the same by the concerned SCSB within three months of the date of listing of the Equity Shares. SCSBs are required to resolve these complaints within 15 days, failing which the concerned SCSB would have to pay interest at the rate of 15% per annum for any delay beyond this period of 15 days. Further, in terms of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, the payment of processing fees to the SCSBs shall be undertaken pursuant to an application made by the SCSBs to the BRLMs, and such application shall be made only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.

Separately, pursuant to the circular (No. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M) dated March 16, 2021 issued by the SEBI ("March 2021 Circular"), the following compensation mechanism shall be applicable for investor grievances in relation to Bids made through the UPI Mechanism, for public issues opening on or after May 1, 2021, for which the relevant SCSBs shall be liable to compensate the investor:

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of *inter alia* equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the relevant UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by UPI Bidder through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended until June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI pursuant to its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI pursuant to its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds was discontinued and replaced by the UPI

Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

**Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“**T+3 Notification**”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. Accordingly, the Offer will be undertaken pursuant to the processes and procedures under UPI Phase III, subject to any circulars, clarification or notification issued by the SEBI pursuant to the T+3 Notification. The Offer shall be advertised in all editions of Financial Express (a widely circulated English national daily newspaper) and all editions of Jansatta (a widely circulated Hindi national daily newspaper, Hindi also being the regional language of Haryana where our Registered and Corporate Office is situated), on or prior to the Bid/Offer Opening Date and such advertisement shall also be made available to the Stock Exchanges for the purpose of uploading on their websites.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company has appointed the Sponsor Banks to act as a conduit between the Stock Exchanges and National Payments Corporation of India (“**NPCI**”) in order to facilitate collection of requests and/or payment instructions of the UPI Bidders using the UPI.

NPCI through its circular (NPCI/UPI/OC No. 127/ 2021-22) dated December 9, 2021, inter alia, has enhanced the per transaction limit from ₹ 200,000 to ₹ 500,000 for applications using UPI in initial public offerings.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send short message service (“**SMS**”) alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the BRLMs.

Further, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all UPI Bidders shall provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

Further, the

total holdings of all FPIs put together, with effect from April 1, 2020, can be up to the sectoral cap applicable to the sector in which our Company operates (i.e., up to 100%). In terms of the FEMA Rules, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs shall be included. Bids by FPIs which utilise the multi-investment manager structure, submitted with the same PAN but with different beneficiary account numbers, Client IDs and DP IDs may not be treated as multiple Bids.

In case of Bids made by FPIs, a certified copy of the certificate of registration issued under the SEBI FPI Regulations is required to be attached to the Bid cum Application Form, failing which our Company, in consultation with the BRLMs reserves the right to reject any Bid without assigning any reason, subject to applicable laws.

FPIs are permitted to participate in the Offer subject to compliance with conditions and restrictions which may be specified by the Government from time to time. In terms of the FEMA Non-debt Instruments Rules, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs shall be included.

To ensure compliance with the above requirement, SEBI, pursuant to its circular dated July 13, 2018, has directed that at the time of finalisation of the Basis of Allotment, the Registrar shall (i) use the PAN issued by the Income Tax Department of India for checking compliance for a single FPI; and (ii) obtain validation from Depositories for the FPIs who have invested in the Offer to ensure there is no breach of the investment limit, within the timelines for issue procedure, as prescribed by SEBI from time to time.

Subject to compliance with all applicable Indian laws, rules, regulations, guidelines and approvals in terms of Regulation 22 of the SEBI FPI Regulations, an FPI, may issue, subscribe to or otherwise deal in offshore derivative instruments (as defined under the SEBI FPI Regulations as any instrument, by whatever name called, which is issued overseas by a FPI against securities held by it in India, as its underlying) directly or indirectly, only in the event (i) such offshore derivative instruments are issued only by persons registered as Category I FPIs; (ii) such offshore derivative instruments are issued only to persons eligible for registration as Category I FPIs; (iii) such offshore derivative instruments are issued after compliance with 'know your client' norms; and (iv) such other conditions as may be specified by SEBI from time to time.

An FPI issuing offshore derivative instruments is also required to ensure that any transfer of offshore derivative instruments issued by, or on behalf of it subject to, inter alia, the following conditions:

- (a) such offshore derivative instruments are transferred to persons subject to fulfilment of SEBI FPI Regulations; and
- (b) prior consent of the FPI is obtained for such transfer, except when the persons to whom the offshore derivative instruments are to be transferred are pre-approved by the FPI.

The FPIs who wish to participate in the Offer are advised to use the Bid cum Application Form for non-residents.

Bids received from FPIs bearing the same PAN shall be treated as multiple Bids and are liable to be rejected, except for Bids from FPIs that utilize the multiple investment manager structure in accordance with SEBI master circular bearing reference number SEBI/HO/AFD-2/CIR/P/2022/175 dated December 19, 2022, provided such Bids have been made with different beneficiary account numbers, Client IDs and DP IDs.

Accordingly, it should be noted that multiple Bids received from FPIs, who do not utilize the multiple investment managers ("MIM") Structure, and bear the same PAN, are liable to be rejected. In order to ensure valid Bids, FPIs making multiple Bids using the same PAN, and with different beneficiary account numbers, Client IDs and DP IDs, are required to provide a confirmation in the Bid cum Application Forms that the relevant FPIs making multiple Bids utilize the MIM Structure. In the absence of such confirmation from the relevant FPIs, such multiple Bids shall be rejected.

Further, in the following cases, Bids by FPIs shall not be treated as multiple Bids:

- FPIs which utilise the MIM structure, indicating the name of their respective investment managers in such confirmation;
- Offshore derivative instruments (“ODI”) which have obtained separate FPI registration for ODI and proprietary derivative investments;
- Sub funds or separate class of investors with segregated portfolio who obtain separate FPI registration;
- FPI registrations granted at investment strategy level/sub fund level where a collective investment scheme or fund has multiple investment strategies/sub-funds with identifiable differences and managed by a single investment manager;
- Multiple branches in different jurisdictions of foreign bank registered as FPIs;
- Government and Government related investors registered as Category 1 FPIs; and
- Entities registered as collective investment scheme having multiple share classes.

The Bids belonging to any of the above mentioned seven structures and having same PAN may be collated and identified as a single Bid in the Bidding process. The Equity Shares allotted in the Bid may be proportionately distributed to the Applicant FPIs (with same PAN). In order to ensure valid Bids, FPIs making multiple Bids using the same PAN, and with different beneficiary account numbers, Client IDs and DP IDs, are required to provide a confirmation along with each of their Bid cum Application Forms that the relevant FPIs making multiple Bids utilize any of the above-mentioned structures and indicate the name of their respective investment managers in such confirmation. In the absence of such confirmation from the relevant FPIs, such multiple Bids shall be rejected.

Please note that in terms of the General Information Document, the maximum Bid by any Bidder including QIB Bidder should not exceed the investment limits prescribed for them under applicable laws. Further, MIM Bids by an FPI Bidder utilising the MIM Structure shall be aggregated for determining the permissible maximum Bid. Further, please note that as disclosed in this Red Herring Prospectus read with the General Information Document, Bid Cum Application Forms are liable to be rejected in the event that the Bid in the Bid cum Application Form *“exceeds the Offer size and/or investment limit or maximum number of the Equity Shares that can be held under applicable laws or regulations or maximum amount permissible under applicable laws or regulations, or under the terms of this Red Herring Prospectus.”*

For example, an FPI must ensure that any Bid by a single FPI and/ or an investor group (which means the same multiple entities having common ownership directly or indirectly of more than 50% or common control) (collective, the “**FPI Group**”) shall be below 10% of the total paid-up Equity Share capital of our Company on a fully diluted basis. Any Bids by FPIs and/ or the FPI Group (including but not limited to (a) FPIs Bidding through the MIM Structure; or (b) FPIs with separate registrations for offshore derivative instruments and proprietary derivative instruments) for 10% or more of our total paid-up post Offer Equity Share capital shall be liable to be rejected.

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DPIIT (formerly Department of Industrial Policy & Promotion) issued the consolidated FDI Policy circular dated October 15, 2020, with effect from October 15, 2020 (the “**FDI Circular**”), which consolidates and supersedes all previous press note, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020.

In terms of Press Note 3 of 2020, dated April 17, 2020 (“**Press Note**”), issued by the DPIIT, the FDI Circular and the FEMA (Non-debt Instruments) Rules has been amended to state that all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

Transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Circular and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Circular; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

For details of the aggregate limit for investments by NRIs and FPIs in our Company, see “**Offer Procedure – Bids by Eligible Non-resident Indians**” and “**Offer Procedure – Bids by Foreign Portfolio Investors**” on pages 655 and 655, respectively.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.

The Equity Shares have not been and will not be registered under the U.S. Securities Act of 1933, as amended or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are being offered and sold (a) in the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act) pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act and (b) outside the United States in reliance on Regulation S and the applicable laws of the jurisdiction where those offers and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.
